Mr. BAKER. Mr. President, the minority leader is on the floor and I should like to respond to his suggestion of taking up the Martin Luther King bill tomorrow. I ran my hotline on this side and I find that there is no objection to taking up the Martin Luther King bill tomorrow. However, there is an objection to a time limitation. As a practical matter, I say to the minority leader, under those circumstances, I feel very strongly that we ought to continue with the original plan; that is, to try to do State authorization tomorrow and the Export-Import Bank and go to Martin Luther King on Friday.

I have no illusions about finishing that bill on Friday, given the fact that I have been advised that there are objections to time limitations or to limitation to the number of amendments at this time. It seems certain that we cannot finish the bill in 1 day. I am committed to do the bill and to finish the bill, but I do not think we can finish it on Thursday or Friday.

Therefore, I say to the minority leader that I appreciate his offer, but I must respectfully say that I think the better part of discretion on this side would be to stick to the original plan.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. I thank the minority leader.

LOCAL GOVERNMENT FISCAL ASSISTANCE AMENDMENTS OF 1983

Mr. BAKER. Mr. President, if the minority leader has no objection, I ask unanimous consent at this time that the Chair lay before the Senate the revenue-sharing authorization bill.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (S. 1426) to reauthorize the revenue-sharing program of general-purpose fiscal assistance to local governments for 3 fiscal years, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Finance with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Local Government Fiscal Assistance Amendments of 1983".

DEFINITIONS AND APPLICATIONS

SEC. 2. (a) Section 6701 of title 31, United States Code, is amended—

(1) by striking out "October 1, 1981, and October 1, 1982" in subsection (a)(1) and inserting in lieu thereof "October 1 of 1982, 1983, 1984, and 1985",

(2) by striking out "allocate amounts" in the last sentence of subsection (c) and inserting in lieu thereof "make all data computations", and

(3) by striking out "having one unit of general local government" in subsection (e)(2) and inserting in lieu thereof "that is the sole unit of general local government in the area".

(b)(1) Subsection (a) of section 6701 of such title is amended by adding at the end thereof the following new paragraphs:

"(8) 'adjusted taxes of a unit of general local government' means the taxes imposed by the unit of general local government for public purposes (except employee and employer assessments and contributions to finance retirement and social insurance systems and other special assessments for capital outlay) determined by the Secretary of Commerce for general statistical purposes and adjusted (under regulations of the Secretary of the Treasury) to exclude amounts properly allocated to education expenses.

"(9) 'urbanized population' has the meaning given to such term by the Secretary of Commerce for general statistical purposes.".

(2) Clause (A) of section 6709(a)(2) of such title is amended to read as follows:

"(A) the adjusted taxes of the unit of general local government, divided by".

(3) Clause (5) of section 6707(c) of such title is amended by striking out the last sentence thereof.

ADDITIONAL COMPLIANCE ASSURANCES

SEC. 3. Subsection (a) of section 6704 of title 31, United States Code, is amended—

(1) by striking out "and" at the end of clause (7),

(2) by striking out the period at the end of clause (8) and inserting in lieu thereof "; and", and

(3) by adding at the end thereof the following new clause:

"(9) the government will comply with the requirements of sections 6714 and 6723.".

REDUCTIONS IN STATE GOVERNMENT ALLOCATIONS

SEC. 4. Section 6706 of title 31, United States Code, is hereby repealed.

STATE VARIATIONS OF LOCAL GOVERNMENT ALLOCATIONS

SEC. 5. Subsection (a) of section 6711 of title 31, United States Code, is amended—

(1) by adding "and" at the end of clause (1),

(2) by striking out "; and" at the end of clause (2) and inserting in lieu thereof a period, and

(3) by striking out clause (3).

INFORMATION USED IN ALLOCATION FORMULAS

SEC. 6. Subsection (a) of section 6713 of title 31, United States Code, is amended by inserting "before the beginning of the entitlement period" after "Secretary of Commerce".

PUBLIC HEARINGS

SEC. 7. Section 6714 of title 31, United States Code, is amended—

(1) by striking out paragraph (1) of subsection (a),

(2) by redesignating paragraphs (2) and (3) of subsection (a) as paragraphs (1) and (2), respectively,

(3) by striking out "subsection (a)(2)" in subsection (b)(1) and inserting in lieu thereof "subsection (a)(1)",

(4) by striking out clause (1) of subsection (c),

(5) by striking out "subsection (a)(2)" in subsection (c)(2) and inserting in lieu thereof "subsection (a)(1)", and

(6) by redesignating clauses (2) and (3) of subsection (c) as clauses (1) and (2), respectively.

DISCRIMINATION PROCEEDINGS

SEC. 8. Section 6717 of title 31, United States Code, is amended—

(1) by striking out "the Secretary submits a notice of noncompliance to the government" in subsection (b) and inserting in lieu thereof "the government receives a notice of noncompliance from the Secretary of the Treasury", and

(2) by striking out "shall suspend payments to the government under this chapter unless by the 10th day after the decision" in the second sentence of subsection (c) and inserting in lieu thereof "shall notify the government of the decision and shall suspend payments to the government under this chapter unless, within 10 days after the government receives notice of the decision,".

REPORTS

SEC. 9. (a) Section 6724 of title 31, United States Code, is amended—

(1) by striking out subsections (b) and (c), and

(2) by striking out "(a) Before" and inserting in lieu thereof "Before".

(b) Clause (8) of section 6704(a) of such title is amended by striking out ", in addition to the annual reports required under section 6724(b) of this title" and inserting in lieu thereof "to determine compliance with the provisions of this chapter".

ALTERNATIVE ALLOCATIONS OF REVENUE-SHARING FUNDS TO UNITS OF GENERAL LOCAL GOVERNMENT

SEC. 10. (a) Chapter 67 of title 31, United States Code, is amended—

(1) by redesignating sections 6713 through 6724 as sections 6716 through 6727, respectively,

(2) by redesignating section 6710 as section 6715,

(3) by redesignating sections 6708, 6709, 6711, and 6712 as sections 6711, 6712, 6714, and 6713, respectively, and

(4) by inserting after section 6707 the following new sections:

"§ 6708. Entitlements for units of general local government

"(a) Except as otherwise provided in this chapter, each unit of general local government shall be entitled to receive for each entitlement period an amount equal to the greater of—

"(1) the amount which would be allocated to such unit of general local government for such entitlement period under—

"(A) sections 6711, 6712, and 6713, or

"(B) section 6714,

if the amount authorized under section 6703(b)(2) for such entitlement period were $4,566,700,000, or

"(2) the amount allocated to such unit of general local government for such entitlement period under section 6709 or 6710, as adjusted by reason of subsection (b).

"(b)(1) If necessary, the Secretary shall proportionately reduce (but not below zero) the allocation differential of all units of general local government located in a State in a manner which insures that the sum of

the entitlements of all units of general local government located in such State for the entitlement period does not exceed the amount allocated to such State for such entitlement period under section 6707.

"(2) ALLOCATION DIFFERENTIAL.—For purposes of this subsection, the term 'allocation differential' means the portion, if any, of the allocation made to a unit of general local government under section 6709 or 6710 for the entitlement period that exceeds the amount determined under subsection (a)(1) with respect to such unit of general local government for such entitlement period.

"§ 6709. Allocations for Indian tribes and Alaskan Native villages

"(a) The amount allocated by the Secretary under this section to each Indian tribe or Alaskan Native village having a recognized governing body carrying out substantial governmental duties and powers is an amount bearing the same ratio to the amount allocated under section 6707 to the State in which such tribe or village is located as the population of such tribe or village bears to the population of the entire State.

"(b) If the amount allocated to any Indian tribe or Alaskan Native village under this section is waived by the governing body of such tribe or village, the amount waived shall be paid to the county government in the county area in which such tribe or village is located.

"§ 6710. Allocations for local governments

"(a) The amount allocated to each unit of general local government (other than an Indian tribe or Alaskan Native village) by the Secretary under this section is an amount bearing the same ratio to the general local government allocation as—

"(1) the product of—

"(A) the population of such unit of general local government, multiplied by

"(B) the general tax effort factor of such unit of general local government, multiplied by

"(C) the relative income factor of such unit of general local government, bears to

"(2) the sum of the products determined under clause (1) for all units of the general local government located in such State.

"(b)(1)(A) The per capita allocation of any unit of general local government in a State under this section for any entitlement period shall be at least 15 percent but not more than 160 percent of the amount determined by dividing—

"(i) the amount allocated to the State under section 6707, by

"(ii) the population of the State.

"(B) Subparagraph (A) shall be applied by substituting "145 percent" for "160 percent" in the case of a unit of general local government whose per capita adjusted taxes exceed 250 percent of the average per capita adjusted taxes of all units of general local government within the State in which such unit of general local government is located (other than Indian tribes or Alaskan Native villages) that are classified by the Secretary of Commerce for general statistical purposes as being the same form of governmental unit as such unit of general local government.

"(2) The amount allocated to any unit of general local government under this section for any entitlement period shall not exceed an amount equal to the product of—

"(A) the adjusted taxes of such unit of general local government, multiplied by

"(B) 250 percent of the quotient determined by dividing—

"(i) the general local government allocation, by

"(ii) the aggregate amount of adjusted taxes of all units of general local government within the State in which such unit of general local government is located (other than Indian tribes and Alaskan Native villages).

"(3) If the amount allocated to any unit of general local government (except an Indian tribe, or an Alaskan Native village) under this section for an entitlement period would be less than $200 but for this paragraph, no allocation shall be made to such unit of general local government under this section for such entitlement period.

"(4) The Secretary shall make proportional adjustments in the amounts allocated under subsection (a) to units of general local governments located within the same State that are necessary to bring such allocations into compliance with the provisions of this subsection in the following order:

"(A) under paragraph (1),

"(B) under paragraph (2), and

"(C) under paragraph (3).

"(5) If the amount allocated to any unit of general local government under this section is waived by the governing body of such unit of general local government, the amount waived shall be paid to the county government in the country area in which such unit of general local government is located.

"(c) For purposes of this section—

"(1) The term 'general local government allocation' means, with respect to units of general local government located in a State, the excess of—

"(A) the amount allocated to such State under section 6707, over

"(B) the aggregate amount allocated under section 6709 to Indian tribes and Alaskan Native villages located in such State.

"(2)(A) The term 'general tax effort factor' has the meaning given to such term by section 6712(a)(2).

"(3) The term 'relative income factor' means, with respect to any unit of general local government, an amount determined by dividing—

"(A) the per capita income of the State, by

"(B) the per capita income of such unit of general local government.

"(4) The term 'per capita allocation' means, with respect to any unit of general local government, the amount determined by dividing—

"(A) the amount allocated to such unit of general local government under this section for the entitlement period, by

"(B) the population of such unit of general local government.

"(5) The term 'per capita adjusted taxes' means, with respect to any unit of general local government, the amount determined by dividing—

"(A) the adjusted taxes of such unit of general local government, by

"(B) the population of such unit of general local government.

"(d) When the Secretary of the Treasury decides that information available for a unit of general local government for an entitlement period is inadequate in allocating an amount under this section for a unit of general local government (except a county government) with a population below a number (of not more than 500) prescribed by the Secretary, the Secretary may allocate to the unit of general local government an amount bearing the same ratio to the general local government allocation of the units of general local government in the State in which such unit is located for the entitlement period as the population of the unit of general local government bears to the population of all units of general local government in the State (other than Indian tribes or Alaskan Native villages). If the Secretary allocates an amount under this subsection, the Secretary shall reduce the general local government allocation of the units of general local government in the State in which such unit is located by the amount allocated under this subsection.".

(b)(1) Section 6701 of title 31, United States Code, is amended—

(A) by striking out "section 6721(b)" in subsection (a)(2) and inserting in lieu thereof "section 6724(b)",

(B) by striking out "section 6716 (a) or (b)" in subsection (a)(2) and inserting in lieu thereof "subsection (a) or (b) of section 6719",

(C) by striking out "section 6716(b)" in subsection (a)(3)(B) and inserting in lieu thereof "section 6719(b)",

(D) by striking out "sections 6708(b), 6709, 6711, and 6712(a) (2) and (3)" in subsection (a)(5)(B) and inserting in lieu thereof "sections 6711(b), 6712, 6714, and paragraphs (2) and (3) of section 6713(a)",

(E) by striking out "6705–6713(c)(1)" in subsection (a)(5)(C) and inserting in lieu thereof "6705 through 6716(c)(1)",

(F) by striking out "section 6710" in subsection (a)(5)(C) and inserting in lieu thereof "section 6715",

(G) by striking out "sections 6708–6712" in subsection (d) each place it appears and inserting in lieu thereof "sections 6708 through 6715", and

(H) by striking out "6705–6713(c)(1)" in subsection (d) and inserting in lieu thereof "6705 through 6716(c)(1)".

(2) Clause (2) of section 6703(b) of such title is amended by striking out all after "pay" and inserting in lieu thereof "entitlements to units of general local government under section 6708.".

(3) Subsection (a) of section 6704 of such title is amended—

(A) by striking out "section 6723(b)" in clause (7) and inserting in lieu thereof "section 6726(b)",

(B) by striking out "section 6724(b)" in clause (8) and inserting in lieu thereof "section 6727(b)", and

(C) by striking out "sections 6714 and 6723" in clause (9), as added by section 3 of this Act, and inserting in lieu thereof "sections 6717 and 6726".

(4) Subsection (a) of section 6707 of such title is amended by striking out the last sentence and inserting in lieu thereof the following: "The Secretary shall determine the amount allocated to the State under subsection (b) or (c) and allocate the greater amount to the State.".

(5) Section 6712 of such title, as redesignated by subsection (a) of this section, is amended—

(A) by striking out "section 6708" in subsection (a)(1) and inserting in lieu thereof "section 6711", and

(B) by striking out "section 6708(a)" in subsection (b) and inserting in lieu thereof "section 6711(a)".

(6) Section 6713 of such title, as redesignated by subsection (a) of this section, is amended—

(A) by inserting "under section 6711 or 6712" after "entitlement period" each place it appears in subsection (a),

(B) by inserting "under this section" after "adjustment" in subsection (b),

(C) by inserting "under section 6711 or 6712" after "general local government" in subsection (b), and

(D) by inserting "under section 6711 or 6712" after "general local government" in the first sentence of subsection (c).

(7) Subsection (a) of section 6714 of such title, as redesignated by subsection (a) of this section, is amended—

(A) by striking out "A State" in the first sentence and inserting in lieu thereof "In lieu of the allocation made under section 6711(a) or subsection (a) or (b) of section 6712, a State",

(B) by striking out "sections 6708(a) and 6709 (a) and (b)" and inserting in lieu thereof "section 6711(a) and subsections (a) and (b) of section 6712", and

(C) by striking out "6708(a) or 6709 (a) or (b)" each place it appears and inserting in lieu thereof "6711(a) or subsection (a) or (b) of section 6712".

(8) Section 6715 of such Code, as redesignated by subsection (a), is amended—

(A) by striking out "would receive" in subsection (a) each place it appears and inserting in lieu thereof "would be entitled to receive under section 6708",

(B) by striking out "allocated to a county area" in subsection (b)(1) and inserting in lieu thereof "of the entitlement under section 7608 of a country area",

(C) by striking out "allocated to the governments" in subsection (b)(2) and inserting in lieu thereof "of the entitlements under section 7608 of the governments",

(D) by striking out "amounts allocated to" in subsection (c) each place it appears and inserting in lieu thereof "entitlements under section 6708 of", and

(E) by striking out "amount allocated to" in subsection (c)(2) and inserting in lieu thereof "entitlement under section 6708 of".

(9) Subsection (b) of section 6720(b)(1) of such title, as redesignated by subsection (a) of this section, is amended—

(A) by striking out "6716(a)" in clause (1) and inserting in lieu thereof "6719(a)", and

(B) by striking out "6716(b)" in clause (2) and inserting in lieu thereof "6719(b)".

(10) Subsections (c) and (d) of section 6720 and sections 6721, 6722, 6723, 6724, and 6726(f)(1)(C) of such title, as redesignated by subsection (a) of this section, are each amended by striking out "section 6716(a) or (b)" each place it appears and inserting in lieu thereof "subsection (a) or (b) of section 6719".

(11) Sections 6720(c) and 6721(a)(1)(B) of such title, as redesignated by subsection (a) of this section, are each amended by striking out "6719" each place it appears and inserting in lieu thereof "6722".

(12) Section 6720(d)(2)(B) and 6725(a) of such title, as redesignated by subsection (a) of this section, are each amended by striking out "6718" and inserting in lieu thereof "6721".

(13) Sections 6721 and 6723(a) of such title, as redesignated by subsection (a) of this section, are each amended by striking out "6717" each place it appears and inserting in lieu thereof "6720".

(14) Sections 6722(c) and 6726(f)(1)(A) of such title, as redesignated by subsection (a) of this section, are each amended by striking out "6721(b)" each place it appears and inserting in lieu thereof "6724(b)".

(15) Subsection (b) of section 6724 of such title, as redesignated by subsection (a) of this section, is amended by striking out "6716(d)" and inserting in lieu thereof "6719(d)".

(16) Clause (2) of section 6727 of such title, as amended by section 9(a) of this Act and redesignated by subsection (a) of this section, is further amended—

(A) by striking out "sections 6716–6720" in subclause (A) and inserting in lieu thereof "sections 6719 through 6723",

(B) by striking out "6715, and 6723" in subclause (B) and inserting in lieu thereof "6718, and 6726", and

(C) by striking out "section 6723" in subclause (B) and inserting in lieu thereof "section 6726".

(17) The heading for section 6711 of such title, as redesignated, is amended to read as follows:

"§ 6711. Alternative allocations for county areas and county governments".

(18) The heading for section 6712 of such title, as redesignated, is amended to read as follows:

"§ 6712. Alternative allocations for other local governments".

(19) The heading for section 6713 of such title, as redesignated, is amended to read as follows:

"§ 6713. Adjustments to alternative allocations to local governments".

(20) The table of sections for chapter 67 of such title is amended by striking out the items relating to sections 6708 through 6724 and inserting in lieu thereof the following:

"6708. Entitlements for units of general local government.
"6709. Allocations for Indian tribes and Alaskan Native villages.
"6710. Allocations for local governments.
"6711. Alternative allocations for county areas and county governments.
"6712. Alternative allocations for other local governments.
"6713. Adjustments to alternative allocations to local governments.
"6714. State variation of local government allocations.
"6715. Separate law enforcement officer allocations for Louisiana.
"6716. Information used in allocation formulas.
"6717. Public hearings.
"6718. Prohibition on using payments to influence legislation.
"6719. Prohibited discrimination.
"6720. Discrimination proceedings.
"6721. Suspension and termination of payments in discrimination proceedings.
"6722. Compliance agreements.
"6723. Enforcement by the Attorney General of prohibitions on discrimination.
"6724. Civil action by a person adversely affected.
"6725. Judicial review.
"6726. Audits, investigations, and reviews.
"6727. Reports.".

(c) The amendments made by this section shall apply to—

(1) any entitlement period for which the amount authorized under section 6703(b)(2) of title 31, United States Code, exceeds $4,566,700,000, and

(2) any entitlement period which begins after such entitlement period.

ADJUSTED TAXES OF UNITS OF GENERAL LOCAL GOVERNMENT IN MASSACHUSETTS FOR 1983 ENTITLEMENT PERIOD

SEC. 11. (a) For purposes of allocating amounts among units of general local government located in the Commonwealth of Massachusetts under chapter 67 of title 31, United States Code, for the entitlement period beginning October 1, 1983, the adjusted taxes of those governments shall include property taxes levied for fiscal year 1982 of the Commonwealth of Massachusetts and recognized as fiscal year 1982 receipts pursuant to sections 21 and 23 of chapter 59 and sections 35 through 46 of chapter 44 of the Massachusetts General Laws.

(b) The provisions of subsection (a) shall apply only if the Governor of the Commonwealth of Massachusetts certifies to the Secretary of the Treasury by August 1, 1983, or twenty days after the effective date of this Act, whichever is later, that all units of general local government in Massachusetts (other than those qualifying for the exception in section 6726(a)(2) of such title, as redesignated by section 10(a)(1) of this Act) will be required, beginning with fiscal year 1985 of the Commonwealth of Massachusetts, to submit their audited financial statements in accordance with generally accepted accounting principles, as established by the National Council on Governmental Accounting and its successor bodies, with the exception of the treatment of the General Fixed Asset Account Group, and as adopted by the Commonwealth of Massachusetts.

(c) Any property tax credited by reason of paragraph (1) to a unit of general local government for fiscal year 1982 of the Commonwealth of Massachusetts for purposes of allocating funds to such unit of general local government under chapter 67 of title 31, United States Code, shall not be credited to such unit of general local government for any other fiscal year.

Mr. DOLE. Mr. President, it is my belief that if we really want to we can finish this bill rather quickly. I know the Senator from New York has an amendment, which will not be debated at length. The Senator from New Jersey has an amendment. I understand the Senator from Pennsylvania may have an amendment and there is a possibility the Senator from Louisiana will have an amendment. Well, he does have an amendment, unless we can work out some way to take care of it on a voluntary basis.

Mr. SASSER. Mr. President, if the Senator from Kansas will yield, the Senator from Tennessee may have an amendment, also.

Mr. DOLE. Mr. President, the point being there are not that many amendments and this is a matter that I think is very important.

We ought to try to finish it tonight if we can. I do not have any desire to stay here too late, but if it appears we are moving along at great speed and if Members will cooperate by not trying to tell us all they know about this matter tonight, it would be helpful.

Mr. President, today we are taking up S. 1426, the bill reported by the Finance Committee to extend the general revenue sharing program for 3 years and make a few changes in the program. I am pleased that we have reached agreement on expediting this legislation, and I know that local officials throughout the Nation will welcome swift Senate action assuring that revenue sharing payments continue without interruption.

Before the August recess our colleagues in the House completed action on their version of revenue sharing legislation, H.R. 2780. As modified on the House floor, that bill moves significantly closer to the approach taken by the Finance Committee in S. 1426. The House changed their bill to limit the funding increase for revenue sharing to $450 million, the amount allowed for under the budget resolution. I hope the Senate will agree with the Finance Committee and hold funding at present levels, but at least the House moved in the right direction. In addition, the House limited the extension of the program to 3 years, as our committee and the President have recommended. This gives certainty to localities while at the same time giving Congress an early opportunity to review the program. The House also removed all authority for appropriating revenue sharing money for the States, and restored the Louisiana sheriffs to the program.

I think the point I would like to make is that we are talking about a 3-year program. That is what the county and local officials have been asking for for some time, some stability, some certainty. But we are also talking about level funding at $4.6 billion a year for the next 3-year period.

I know there will be amendments offered to increase that funding, but I would say, as I said in the committee, we are faced with massive deficits. We do not have any revenue to share. We have a lot of deficits we ought to be sharing. We certainly do not have any revenue to share.

I suggest that even if you increase this program by $450 million and spread that out across the country, it will not make that much difference in each locality.

It just seems to me that this is one demonstration we could make that we are willing to hold down the Federal deficit, at least a little bit. Why add a half a billion dollars when there is no real demand for it, there is no clamor for it? It was in the budget resolution, but that does not mean anything. There are a lot of things in the budget resolution.

There are a lot of spending programs. There are not many cuts in spending programs in the budget resolution. We are still trying to act on the budget resolution, too. It is my hope that we can move on this legislation in an expedited manner with level funding, and that we can satisfy the concerns members have.

I ask unanimous consent to have printed in the RECORD following my statement a letter by the Director of the Office of Management and Budget, David Stockman, and the Secretary of the Treasury for this administration, Donald Regan. The entire letter says in effect that we are for level funding, $4.6 billion for a 3-year period. They do not oppose the extension of general revenue sharing, but they are concerned about the possibility of increasing the funding over $4.6 billion. The key paragraph is:

> We and the President's other senior advisers will strongly recommend to the President a veto of any legislation which funds general revenue sharing in excess of $4.6 billion annually.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

EXPEDITE ACTION

Mr. DOLE. Mr. President, the House action means the Senate can make a major contribution by completing action now on revenue sharing. Taking care of revenue sharing means enabling local governments to plan their budgets for the next few years with certainty. The 3-year extension is strongly supported by President Reagan, and we can do the President and ourselves a favor by clearing this program now, so as to make more room in the legislative agenda to consider real, substantial action to cut the deficit. That is where our priority ought to be.

In addition, the fact that the House bill has been modified to conform it more closely to the Senate bill means we may be able to agree fairly swiftly on a House-Senate package. There is every reason to do that while we have a bit of momentum.

SENATE BILL

S. 1426 is simple and straightforward. It provides for continuing revenue sharing payments to units of local government at present funding levels for 3 years. It makes a number of technical adjustments in the program, many of which came to attention when the law was recodified last year. The bill would retain the present law requirement that, if any money is to be appropriated for a States share of revenue sharing, the States must first agree to reduce other Federal grant funds by an equivalent amount, dollar for dollar. Finally, the bill includes a provision for triggering formula changes concerning the distribution of funds within States if the level of funding is increased over that in present law. This proposal, the result of a lot of hard work and careful consideration on the part of our colleague from Minnesota, Senator DURENBERGER, is designed to insure that no additional funds are put into the program unless certain marginal, but significant, improvements in the way funds are distributed can be agreed to.

While I am mentioning the contributions Members have made to this legislation, let me acknowledge the invaluable role played by the distinguished Senator from Pennsylvania, Senator HEINZ, who chairs our Subcommittee on Revenue Sharing. He has made a determined effort since the beginning of the year to focus our attention on the importance of revenue sharing and the role it plays in the Federal system, and he helped considerably in building the consensus we reached in the Finance Committee. His efforts, and those of Senator DURENBERGER as chairman of the Subcommittee on Intergovernmental Relations of the Government Affairs Committee, are much appreciated by our colleagues. And, although we have some differences over the question of funding for this program, I want also to thank Senator LONG for helping us reach agreement in committee, and Senators BRADLEY and MOYNIHAN for their continuing interest in the program, although I trust that their amendments to the bill will not be agreed to. They are offered in good faith, but they cost money: And that we ought to avoid.

LEVEL FUNDING

Mr. President, let me make clear that while I appreciate the changes made in the House bill that make it more fiscally responsible, I continue to strongly urge my colleagues to support the Finance Committee bill without further changes. Our policy of adhering to present funding levels is not only consistent with the President's wishes, it is the right thing for us to do. Of course localities could use more money. So can welfare mothers, Government contractors, farmers, homebuilders and home buyers, and just about everyone you can think of. But if we cannot even hold the line here—not reduce, just hold the line—in a program that benefits other units of Government, rather than individuals in need, then we really cannot claim to be serious about the deficit. The $450 million increase proposed in the House bill, and allowed for in the 1984 budget, adds up to $1.35 billion over 3 years. That is not a small sum, and it would be yet another addition to the mammoth triple-digit deficits we are so concerned about. Let us prove that concern by stricking with the funding level in the Finance Committee bill.

FORMULA

Finally, let me say that I understand why there is always a lot of concern when we suggest any changes in the revenue sharing formula. The formula has worked fairly well, and it continues to be a realistic compromise for governing the allocation of general purpose fiscal assistance.

I would point out, however, that the formula modifications proposed under our bill are strictly conditioned. None of them would take effect unless we increase funding for the revenue sharing program; no State would have its allocation changed; and no jurisdiction in any State could receive less in revenue sharing funds than it presently receives. The triggered formula changes proposed by Senator DURENBERGER, dealing with the maximum and minimum constraints, the budget con-

straint, and eliminating the separate county area allocation, are intended to even out the distribution of revenue sharing funds if money is made available to do that fairly. If extra funds are not made available—which is my preference, and I understand Senator DURENBERGER's as well—no change would be made. This is a simple matter of trying to guarantee that any additional funds are used as equitably as possible.

Mr. President, I know Members have amendments and I hope we can by agreement take them up and consider them in a prompt and orderly fashion. Then we can move toward final action of revenue sharing extension legislation.

EXHIBIT 1

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., September 19, 1983.

Hon. ROBERT DOLE,
Chairman, Committee on Finance,
Washington, D.C.

DEAR MR. CHAIRMAN: This is to convey the Administration's firm opposition to the funding for General Revenue Sharing at a level over $4.6 billion annually for a three year period. A funding level of $4.6 billion and reauthorization period of three years is in agreement with the levels reported out in S. 1426, which reauthorizes General Revenue Sharing.

The funding level contained in S. 1426 is a considerable improvement over the House passed bill, which authorizes $5.02 billion. The House legislation would provide $1.3 billion in additional spending authority and $1.2 billion in outlays for General Revenue Sharing in the 1984–1986 period. Increases of this magnitude are inappropriate in light of the serious financial problems facing the Federal Government.

The Administration does not oppose the extension of General Revenue Sharing. It is concerned about the possibility of a fiscally irresponsible funding increases over $4.6 billion.

We and the President's other senior advisors will strongly recommend to the President a veto of any legislation which funds General Revenue Sharing at a level in excess of $4.6 billion annually.

We have taken the liberty of sending an identical letter to Senator Baker.

Sincerely,

DAVID A. STOCKMAN,
Director,
DONALD T. REGAN,
Secretary of the Treasury.

Mr. DOLE. Before I yield to the Senator from Pennsylvania, I think we should hear from somebody on the minority side.

Mr. MOYNIHAN. Mr. President, the distinguished ranking member of the committee asked me to proceed at this point. I had in mind simply to offer directly an amendment. First, if the Senator from Pennsylvania has other business to speak about, he may proceed.

Mr. HEINZ. The Senator from Pennsylvania appreciates the courtesy of the Senator from New York. I would like to make a brief introductory statement on this bill, if the Senator from New York would not mind.

Mr. MOYNIHAN. I would be interested in hearing it.

Mr. HEINZ. Mr. President, I will be very brief. Mr. President, I am pleased to bring up for the Senate's consideration today the general revenue sharing reauthorization bill, S. 1426. This bill which I introduced on behalf of the President in early June 1983, was favorably reported by the Senate Finance Committee on June 29, 1983. Current cosponsors of S. 1426 include Senators DOLE, DURENBERGER, BRADLEY, CHAFEE, SYMMS, PACKWOOD, GRASSLEY, ROTH, DANFORTH, DODD, and DOMENICI.

As we all know the current authorization for the general revenue sharing program expires on September 30, 1983. That deadline has loomed large in the eyes of many Members of Congress and local officials who have come to rely upon this most efficient means of providing Federal support. By providing these unrestricted funds Congress has since 1972—when GRS was first enacted as the core of the ambitious New Federalism plan—given local leadership in 39,000 communities the capacity to apply Federal funds to their most pressing local needs. At a time when Federal and State programs continue to be cut back, it is even more imperative that we complete the reauthorization of a program that provides support for an enormous range of social services and municipal activities. If we delay local officials will be faced with losing on the average 7 percent of local revenues, a loss which would require, for example, local property tax increases of more than 20 percent to replace.

The Local Government Fiscal Assistance Amendments of 1983 would reauthorize the general revenue sharing program for 3 years at the current funding level of $4.6 billion. S. 1426 is similar to S. 41 introduced by Senator DURENBERGER earlier this year and cosponsored by 76 Senators.

FORMULA MODIFICATIONS

The only notable change is the contingency amendment to change the local allocation formula for fairness purposes. These changes would only be triggered if funds were added to S. 1426 to hold harmless all jurisdictions. The formula changes would have no effect on allocations among States and no recipient government would receive less from the program than it does currently. We agree that the intrastate GRS formula is essentially sound; it usually provides a good match between payments and local fiscal capacities and responsibilities. However, there are inequities in the allocation of funds to the Nation's most fiscally distressed communities—in some cases the most devastated urban areas are being grievously shortchanged.

The formula changes include:

First, detiering the formula so that all local governments within a State compete with one another on an equal basis;

Second, changing the maximum constraint on allocations to recipient governments from 145 percent of the statewide per capita average to 160 percent of that average;

Third, changing the minimum constraint from 20 percent of the statewide per capita average to 15 percent of the average; and

Fourth, replacing the current budget constraint limiting a jurisdiction's dependency on GRS to a new tax constraint.

This is a carefully balanced package and should be accepted without removing any of its parts. I reiterate that if adopted, the formula changes would have no effect on interstate allocations and that the 100-percent hold-harmless provision means that no jurisdiction will receive less than it receives currently.

FUNDING

Clearly there is wide support for this program in the U.S. Congress. Indeed, before the recess the House of Representatives passed H.R. 2780, a bill to reauthorize the program for 3 years with an annual funding increase of $450 million.

The administration is also strongly supportive of the program's reauthorization although at current funding levels.

In fact, the President's advisers have sent a strongly worded letter to leadership on both sides of the aisle plainly stating that they will recommend that he not sign a bill that increases GRS funding.

Now, Mr. President ever since March when as chairman of the Subcommittee on Economic Growth, Employment and Revenue Sharing, I held hearings on GRS reauthorization, I have felt that our most important task was to reauthorize the program expeditiously. At that hearing on March 21, 1983, we heard from representatives from all of the local government interests that receive GRS funds. The National League of Cities, the U.S. Conference of Mayors, the National Association of Counties, and the National Association of Towns and Townships all praised the program for its efficiency and effectiveness. They all also pressed for an increase in GRS funding because there has not been one since 1976 and the program's purchasing power has suffered accordingly. Yet, the strongest message received by the committee that day was that we should move with all due speed to reauthorize the program so that local officials could plan their budgets for the next fiscal year.

Mr. President, I certainly am hopeful that we can complete consideration

of this bill quickly and I commend the leadership on both sides of the aisle for producing the time agreement that should enable us to accomplish this objective.

AMENDMENTS

We have before us just a few amendments, some of which we may be able to accept without a rollcall vote. One of those amendments to be offered by Senator DURENBERGER ideas with further study of the GRS program—its interstate allocation formulas, and its potential role in new federalism and in providing countercyclical economic assistance. We all concur that GRS is an exemplary Federal program and one would assume that as a body we can agree that Congress should look at ways to perfect the program and to capitalize upon it more broadly. Leadership urges quick acceptance of this amendment.

I certainly support further study of means to utilize GRS as the vehicle for providing fiscal relief to distressed communities during economic downturns. My colleagues may recall that during consideration of the emergency jobs bill this spring I offered an amendment to accelerate $1.15 billion in general revenue sharing payments by one quarter, as a means of providing emergency fiscal relief to distressed local governments beset by increased social service demands created by the recession.

Because I believe that GRS is the best vehicle in the Federal repertoire for delivering quick assistance to distressed jurisdictions, I will offer an amendment to protect communities that experience extraordinary economic dislocation—which dramatically reduce their revenue bases—from equally dramatic reductions in their revenue sharing allocations. The amendment will have no effect on the interstate distribution of GRS funds and negligible impact on intrastate allocations. I anticipate its quick acceptance.

The remaining amendments may require greater debate. As managers of the bill, we will certainly be called upon to argue strongly against any increase in GRS payments. The President's position notwithstanding, I am sure that many of my colleagues, who like myself, are strong supporters of GRS, recognize that the current budget crisis facing this country is forcing us to make difficult choices. In the case of revenue sharing, we are being asked to increase funding for the least targeted entitlement program while at the same time we are cutting or defending level funding for means tested entitlement programs for the poorest of the poor.

Finally, there are several Senators on the other side of the aisle who question the wisdom of the contingency in the bill to make modest local formula changes if funding is increased. Mr. President, we should note at this time that these are changes that would make the GRS program more responsive to indices of fiscal need. These changes would by and large provide greater assistance to poor rural communities and our Nation's urban centers where the demand for social services and infrastructure repair is the greatest and the local revenue picture is the bleakest. Mr. President, I trust my colleagues will appreciate the irony here, and I am hopeful that as a body we can see the wisdom of these sound and responsible changes which have been supported by GAO and Treasury officials for the last 5 years. I am sure that my distinguished colleague, Senator DURENBERGER, who brought these changes to the attention of the Finance Committee will have more to say on this subject later in the debate.

In closing, Mr. President, let me say simply that we should not unnecessarily prolong the debate on this measure. We should let local government officials across the country breathe a sigh of relief knowing that they will not have to raise taxes more to makeup for delayed revenue sharing payments in fiscal year 1984.

Mr. MOYNIHAN. Mr. President, may I first congratulate the distinguished Senator from Pennsylvania, Mr. HEINZ, and the distinguished Senator from Minnesota, Mr. DURENBERGER, my colleague, on the Finance Committee, for their continued efforts on behalf of the revenue-sharing program.

I had the great honor of serving in the White House in 1969, helping to draft President Nixon's address of August 8, 1969, which called for the creation of revenue sharing. In his address, the President asked for the creation of a number of domestic programs by the Senate Finance Committee. In his message to the Nation, President Nixon said: "For a third of a century, power and responsibility have flowed toward Washington, and Washington has taken for its own the best sources of revenue.

We intend to reverse this tide."

The President said that revenue sharing would be a modest program, but eventually it would grow in size. President Nixon said: "This start on revenue sharing is a step toward what I call the New Federalism. It is a gesture of faith in America's State and local governments and in the principle of democratic self-government."

Mr. President, I would argue that we have kept that basic faith in the principle of democratic self-government. We have established a sizable program. But now we are in danger because of money allocated for this vital program has remained the same for almost a decade. There has already been a significant real decline in the revenue-sharing funding, a full 40 percent since 1976. We know this. It is not a matter of dispute.

The distinguished chairman of the committee, Mr. DOLE, has made a sound argument concerning our present budgetary situation. Yet an even stronger case would be made of many, if not most, of the 39,000 jurisdictions that receive funds. The reduction in revenues from the Federal Government in many programs are already creating significant difficulties for our fiscally strapped local governments.

This morning a telling article about the city of New York appeared in the New York Times. In the last 2 years, Federal aid to the Human Resources Administration in New York City has declined by 46 percent. The city has no way to make up for these lost funds.

I ask unanimous consent, Mr. President, that that article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 21, 1983]

STUDY FAULTS CITY ON AID FOR CHILDREN

(By Sheila Rule)

A private study released yesterday shows that Federal budget cuts have seriously reduced services to children in New York City and that the city has failed to restore the money in areas where it could have.

Instead, the city chose to increase funds to such agencies as the Department of Cultural Affairs, according to the study, by the Foundation for Child Development.

"We realize the city has to make difficult choices, but we come down on the side of children," said Toni Porter, manager of the public expenditures for children project of the foundation.

"We say it is more important for the city to provide jobs for teen-agers than to provide money for major cultural institutions that could have turned to the private sector," she said.

The study, "Public Expenditures for Children, 1980-83," was based on an analysis of Federal, state and local revenue and spending data for the last four fiscal years. It said those agencies serving children most affected by reductions in Federal aid were the Human Resources Administration, the Board of Education and criminal-justice agencies.

In the first year of the Reagan Administration, the study said, the Human Resources Administration lost nearly half—$199 million—of its Federal aid and eliminated jobs for 13,000 teen-agers. The same year, the Department of Social Services lost $22 million in funds that had been used, in part, for day-care services.

In the second year of the Reagan program, the Board of Education lost $56 million in Federal funds, the report said. Last year, it said, 4,000 children left publicly financed day-care programs because of changes in Federal policies.

Criminal-justice agencies lost $4.9 million from fiscal year 1981 through 1983.

The study found the following things:

In the 1981-82 fiscal year of the city, while Federal aid to the Human Resources Administration fell 46 percent, money from

city taxes allocated to the agency were cut 35 percent.

In the same year, tax funds allocated to the Board of Education increased 10.7 percent, but the increase was less than the rate of growth of total city tax revenues. The next year, city tax revenues grew 4.9 percent, but the allocation to the board rose 3.7 percent.

In the four fiscal years, the growth in city spending for children's services fell behind the growth for all other services. By 1983, the growth rate was 25 percent less than the overall rate of 3.75 percent.

In the 1981-82 fiscal year, in which time the Human Resources Administration, Board of Education and other agencies serving children saw their allocations of tax money grow more slowly than the city average, the Department of Cultural Affairs received a 35 percent increase, amounting to an additional $10 million.

Mayor Koch was at West Point yesterday and had not seen the study, a spokesman, Larry Simonberg, said.

A spokesman for the Human Resources Administration said the agency had also not seen the study. But the spokesman, Jack Deacy, said that Federal cuts of $30 million in day-care services in the 1981-82 fiscal year were entirely made up with city money.

"But it's impossible for the city to make up all of the loss of Federal dollars," he said. "We just don't have the money."

AMENDMENT NO. 2180

(Purpose: To increase the authorization of entitlements for local governments to $5,017,000,000)

Mr. MOYNIHAN. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN), for himself, Mr. INOUYE, Mr. TSONGAS, Mr. GLENN, and Mr. RANDOLPH, proposes an amendment numbered 2180.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The amendment is as follows:

Redesignate sections 3 through 11 of the matter proposed to be inserted as sections 4 through 12, respectively.

On page 10, between lines 2 and 3, insert the following:

AUTHORIZATION FOR ENTITLEMENTS OF LOCAL GOVERNMENTS

SEC. 3. Paragraph (2) of section 6703(b) of title 31, United States Code, is amended by striking out "$4,566,700,000" and inserting in lieu thereof "$5,017,000,000".

On page 26, beginning with line 14, strike out all through page 27, line 5, and insert in lieu thereof the following:

(c) The amendments made by this section shall apply to entitlement periods beginning after September 30, 1983.

Mr. MOYNIHAN. The purpose of this amendment simply is to give this body the opportunity to decide whether or not to authorize this program at the funding level in the budget resolution.

The budget resolution calls for a revenue-sharing program for the coming fiscal year of $5.017 billion. We are proposing $450 million less, a total of $5.567 billion. This amendment simply brings the funding for the program to the level approved in the budget resolution; which certainly has not been notorious for its generosity in these funding matters.

Mr. President, I serve on the Budget Committee, as the representative of the Democratic Party from the Finance Committee. This decision to increase revenue-sharing moneys was not made casually by the Budget Committee. It was made in due deliberative form, and we knew exactly what we were doing. We know that the real value of revenue-sharing funds has declined 40 percent since 1976. We know that, over the past 2 years, Federal aid to State and local governments has declined by 40 percent. We know that since the 1981 Reconciliation Act, U.S. county governments have sustained a 15-percent reduction in Federal spending.

While this Federal aid has been declining, we have gone through the most serious decline in economic activity since the Great Depression of the 1930's. The most recent Nobel laureate for economics in the United States, Professor Stiegler of the University of Chicago—a loyal supporter of the ladies and gentlemen on the opposite side of the aisle—in the newsroom of the White House, described the events of the economic decline of 1981-82 as a depression. When the White House press spokesman had recovered his composure, he asked him what on Earth did he mean? Professor Stiegler said: "It's very simple. I have lived through a depression and I know what one looks like when I see it."

That depression—left steel production at 29 percent of capacity for the week ending December 25, 1982, a fact no one need tell the Senator from Pennsylvania. The decline in industrial capacity utilization has contributed to a great loss in revenues for State and local governments. That is elementary and quite obvious. My proposal simply aids our institutions of government, which have been so harmed by the economic policies of the past 3 years.

If it is the determined intent of Members on the opposite side of the aisle to cut programs of the Federal Government, then it ought also to be their corresponding purpose to see that additional moneys flow to local governments through revenue sharing. Clearly, the persons who first proposed revenue sharing and the Members of this body who supported it, established the program as an institution of American federalism.

Mr. President, I do not intend to prolong the debate. I say, however, revenue sharing is a proposal concerning the fundamental nature of the American federalist system. During the 1960's we faced an elementary fact: The progressive income tax system caused the revenues of the Federal Government to grow faster than the revenues of local government. As money flowed to Washington, so did power. Thus, the minutia of Government came to the floors of the House and the Senate and we began the process of the nearly unmanageable legislative process that we now confront.

If we truly care about the principle of federalism, then we must be faithful to the principle of maintaining the real dollar value of revenue sharing.

Mr. President, I have presented the case for increasing the funding, and I now ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. Mr. President, may I say the amendment I sent to the desk was cosponsored by Senators INOUYE, TSONGAS, GLENN, and RANDOLPH.

Mr. DOLE. Mr. President, I shall take just a minute. Maybe other Senators wish to speak on this, but I hope we can dispose of this amendment.

Again, I do not have any quarrel with the intent—obviously, I would have no quarrel, but even if we had the money to add $1.3 billion over the next 3 years to help out localities, counties, and cities, that would be all right with this Senator. But we do not have any such funds. We are being bombarded every day by responsible people in this country to face up to the deficits. They are asking us, "When is Congress going to face up to the deficit?"

Here we are about to add $1.3 billion to that deficit and we are already told the deficits are going to be between $550 billion and $600 billion over the next 3 years. This is new deficit added to the $1.4 trillion debt. This may not seem much compared to that gigantic figure, but it seems to this Senator that we have to indicate a willingness to at least make some fairly difficult choices. This is not a very difficult choice.

It is my understanding that those who rely on revenue sharing want this 3-year authorization, and that they are satisfied with the level of funding. Obviously, they would like more, but this does give some stability to the program.

The fact is that this amendment was offered in the committee—it failed in the committee by a 12-to-6 vote. I hope the amendment might be rejected. The fact that it was approved in the budget resolution does not convince this Senator of anything except the Budget Committee plays those little games. They like to put in little spending things for this and that; then

they ask us in the Finance Committee to raise taxes to pay for it.

I do not know how many people want to raise taxes $73 billion. That is what the budget resolution said. So I do not suggest we go out and adopt all the spending programs in the budget resolution then reject the taxes in the budget resolution.

It is my hope we might increase the spending restraint before this year is out and come up with some balanced revenue and spending restraint packages and bring down the deficits.

This would send exactly the wrong signal to those who are looking to Congress for fiscal responsibility. A vote for this amendment is a vote for fiscal irresponsibility.

Mr. HEINZ. Mr. President, I rise to oppose the amendment.

It is not only an amendment that the Treasury does not have the extra money to pay for, but it is ironic that we are talking about revenue sharing when all we have is deficits. Maybe we should share deficits.

But I would like to say to my good friend from New York that even if we had money to provide at this point, I would have severe reservations about providing all that money based on the existing formula.

One of the reasons that we made an effort in committee to keep the Durenberger amendment in the bill is to highlight the fact that there are many jurisdictions, and some of our biggest cities are among them—including New York, Pittsburgh, and Philadelphia—that because of the way the present formula operates do not get their fair share out of the revenue-sharing formula. The political realities are such that we are not going to be able to adjust the formulas in the bill without increasing the funding. The House is not going to accept it. The political realities are that any change that we made within the existing amount of money would be fought tooth and nail by some of the people who would not be winners.

Were the amendment of the Senator from New York agreed to without formula changes what we would be doing is spreading a thin layer of additional money evenly across 39,000 municipalities without making any improvement based on need.

As I calculate it, what it amounts to is—it will be more for some, less for others—$11,500 in round numbers for every municipality in the United States.

I know that there are some municipalities in which $11,500 will buy half a garbage collector, maybe in New York a third of a garbage collector.

I would also say that general revenue sharing, within the normally accepted term, is not a means-tested program. The Senator is a member of the Finance Committee, one of our most distinguished members. We are being asked day in and day out to cut the budget. An addition to a non-means-tested program I fear is going to put pressure on us to cut means-tested programs.

What are the means-tested programs? They are the ones that affect the truly needy. And the Senator in his opening remarks about how important revenue sharing is made mention of some very startling statistics in his State. It is exactly those poor children or poor women or jobless people that I worry about when we go about increasing funding for non-means-tested programs.

Now, Mr. President, I will make one last comment. This has to do with the budget. It is true, yes, that the budget resolution passed by the House and Senate technically leaves room for this amount of money, and one of the arguments is that because there is room for it we have to do it. It strikes me as a terrible mistake for this body to accept as a target for spending a line with a number in it in the spending part of the budget resolution. That number should be seen simply as a limitation on our spending not a target for our spending. I hope that our colleagues will understand that we are under pressure to reduce the deficit, and in the scheme of all the things that need to be done this just does not come up nearly as close to the areas of health care, the areas of working poor, the areas which are really dealing with specific human need.

I have a good record on this issue because I wanted to do something significant on the emergency jobs bill. I think most of the Senators present will remember the amendment that Senators MOYNIHAN and DURENBERGER joined me in offering to accelerate general revenue sharing payments.

Now, that would have made a difference, it would have meant $1.15 billion in extra funds when local governments needed it most. Those funds would have been spent out in 2 weeks rather than the 2 years it will take much of the funds to be spent. I would have offset that immediate funding by removing some of the late spending features of that so-called emergency bill. I would respectfully suggest that this amendment to increase funding by $450 million over a full year does not make a lot of difference. Additionally it violates a principle of the congressional budget process—difficulty with, namely, adding money into a non-means-tested program because of treating the budget number as a target rather than as a limit.

Mr. DURENBERGER addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. DURENBERGER. Mr. President, I am going to take a few minutes to add a dimension to the comments that have been made by my two colleagues on this side of the aisle and obviously to compliment our colleague from New York for his long-time commitment to revenue sharing.

Several of us, at least the three of us on this side of the aisle who have been speaking on this issue, were, as the Senator from Pennsylvania pointed out, interested a few months ago in doing some of the spreading that the Senator is being accused of doing. But if you put it back in the context of the time, we stood on this floor signing letters to the President and then following the lead of our colleague from Pennsylvania with an amendment. It was to find a more practical way, which this program is, to handle the problems of the truly needy. In other words, who can make the best judgment? It is mayors and county commissioners and people down at the local level. Instead, we substituted and this gets to the budget issue—for that a jobs program in the form of a major highway tax and a construction based public works jobs program.

Then we came back a few months later and instead of spreading a little more to the hands of the folks that can give us 99 cents on the dollar, we did some more of this sort of thing.

None of us object to putting money into this program. None of us object to getting more money out to solve the problems, but the fact of the matter is that history will show us that over the last 6 to 8 months we have done a fair amount to try to put money where it is needed.

Today the Senate is going to reauthorize what has become one of the most important Federal assistance programs to local governments, and that is general revenue sharing. I do not have any question in my mind that we are going to reauthorize the program. As the Senator from Pennsylvania indicated, I introduced S. 41 back in January, and two-thirds of the Senate was on that bill as cosponsors. Today that number is three-fourths, 76 Members.

But having established that as a safety net for the program, I then turned my personal attention to trying to find ways to improve the program. I discovered that revenue sharing was in many ways the best hope for putting a real foundation under the reform for future federalism.

So in the year 1983 when all the steam had gone out of the President's version of New Federalism I started some searching for ways to put into practice the lessons that we had all learned.

Mr. MOYNIHAN. Would my friend allow me to make a correction? The new, New Federalism.

Mr. DURENBERGER. The new, new, new, New Federalism.

The result of all that—and this is again to put in perspective the Fi-

nance Committee bill—was a bill S. 700 in which I attempted to take the best of our revenue sharing and improve on it by extending the program, making needed changes in the allocation formulas. I also included in S. 700 some major tax reform measures which are unimportant to deal with presently.

Now, at the same time I introduced S. 700 with those allocation formula changes, I knew that this was not the year to make federalism reforms. But I recognized just as certainly that this was the year to begin formulating how we could make those reforms in the coming years.

So, I saw the year of reauthorizing revenue sharing as a period to explore how to use that concept of revenue sharing in the future. As a result, a lot of supporters of revenue sharing outside these Halls became very nervous, because it appeared that I was going to make some proposals that might threaten the program—in effect, by loving it to death.

I took that warning very seriously; and in my personal involvement in the issue this year, I have taken a two-track course. I tried to use the interest in the program prompted by the need to reauthorize it to keep attention on the flaws that exist in the program.

When it came to the time for the Finance Committee to mark up the bill, I thought I had a pretty good feeling for what reforms were possible in this reauthorization period. It was clear that certain incremental improvements in the program were possible without endangering the reauthorization. I was also well aware that even the most technically sound changes could produce intense opposition. As we all know, change of any sort, no matter how meritorious, creates unease among various interests.

So, as we on the Finance Committee went to markup, the President was indicating his support for the program, but at the same time insisting that the program be authorized at current funding levels. He repeatedly threatened to veto if funding were increased, and it seemed the wise course would have been to go back to S. 41, with a simple reauthorization of the program at current funding levels. But it also was apparent that there was widespread support in the House and among local officials for an increase in funding, and obviously there is that support here being articulated by the Senator from New York.

The original House bill provided $731 million in increase, an increase of about 15 percent. As the Senator pointed out, the first concurrent budget resolution provided for a 9.9 increase to approximately 5.05. So, at one end we had the House, and now our colleague from New York with an amendment to increase this funding by almost 10 percent; and, as the Senator from Pennsylvania has indicated, spreading that little increase all around proportionately over 39,000 local governments.

In a year, as has been indicated here, when we continue to pare back other Federal programs or consider raising taxes on the American people, the President threatens—and I guess I believe him on this one—a veto of revenue sharing, even though he loved the program, if a single dollar more is put into the program.

Given this situation, I asked myself where the Senate might best place itself to insure the best possible outcome both for the local governments and for the American taxpayer. It seemed to me that the best possible thing the Senate could do would be to pass 3-year extension of the program at the current funding level and fight to hold any increase in conference to some acceptable level—which, in my opinion, the Senator's amendment is not.

I then asked myself, if the Senate were to pass revenue sharing at current funding, would it not be desirable to have some kind of leverage in conference to hold the increase to some acceptable level and maybe persuade the President he should do a little better than $4.6 billion?

So, pursuing this a little further, I asked myself, if Congress were to provide for an increase in funding, should we not, at the very least, improve the targeting of the program—not the targeting as among States but the targeting within the States, so that we would try our best to eliminate those glaring and well-known inequities in the allocation formulas that I have been told about for the 5 years I have been in the Senate? I assume that those who have preceded me have been told about these things for a longer period of time.

So, I came to believe that somewhere between no increase in funding—in other words, 4.6—and a 10-percent increase in funding, which is 5.05, could be the magic figure that the President, as he did with withholding reform, would swallow very hard and sign. Where that magic number is, it separates a modest and an acceptable increase in the President's mind from one requiring a veto. Clearly, I do not know, but I suspect it might be there, without having talked to him.

So, through this process, we were led in the Finance Committee to take the approach we took in S. 1426, a simple 3-year extension at the current level of 4.6, but with the provision that if the funding level eventually emerging were to exceed 4.6, then so-called desirable modifications to the intrastate formula could be triggered.

Formula changes such as those contained now in S. 1426 have been recommended by back-to-back administrations—Democrats and Republicans. I did not author them. Others have authored them. I just sponsored them as an amendment.

So what we have before us, in effect, is a kind of two-edged sword, and this is the reason why I argue against the Senator's amendment. It is a chip we can give away if the House agrees to no increase in funding. Then it is 4.6. The Senator will be very unhappy. I do not know what my emotions will be, but I guess the President will be happy. But you give away the formula, and that will please a lot of people on this side of the aisle.

I have said from the outset that although I believe the program can be improved, I would support a simple extension, so that tells you how I would feel. So I would feel disappointed that we should be willing to trade away the formula, in my opinion, for funding at the current level.

On the other hand, if, as a matter of good conscience and as part of the conference committee, the Members on the House side believe that increasing the funding is more important than staying with this level of 4.6, which we have been at since 1972, when you all initiated this program, then the Senate position is clearly this: Let us try the best we can to move that extra money as close to need as we possibly can.

With those two sides of this problem, it seems to me that if we win, we win; and if we lose, we win—unless you do not like the formula, and there may be some who will debate whether or not we like the formula. It is not my formula. It is the formula that has been around for a long time.

What we have said on this side of the aisle about the reality of either increasing taxes to pay for this or borrowing money to pay for it is a reality. If I were to be bragging about an increase in revenue sharing, which I hope might be possible at some appropriate level, then I would like to say that we also did something to improve each of those dollars spent.

For that reason, I will oppose the amendment of the distinguished Senator from New York, while I compliment him for his commitment to general revenue sharing.

Mr. MOYNIHAN. Mr. President, I would like to express my appreciation for the good generosity of the Senator from Minnesota. His argument is clear, and his purpose is altogether admirable.

I think we simply have to make a decision by voting. All of us are torn between choices we do not entirely desire. My purpose here is that, given the sharp reductions in aid to just those communities the Senator from Minnesota speaks of, we do all we can to help them.

Mr. SASSER. Mr. President, I rise in support of the amendment presented by Senator MOYNIHAN to increase the

funding for the revenue sharing program by $450 million. This will bring the amount up to the $5.02 billion assumed in the Senate budget resolution.

Adjusting the general revenue sharing payments upward in this way will make partial amends to local governments for the effect of inflation on the program. Though the Consumer Price Index has increased by 60 percent since 1977, general revenue sharing payments have remained the same.

Yet, the fiscal condition of the local governments has been adversely affected by the recession and the decline in other forms of Federal aid. Since 1980, local governments have had cuts in categorical grant programs and entitlement programs. Estimates on the size of these reductions vary from $13 billion to $40 billion.

However, one thing is sure. Nearly three-quarters of these local governments have had to raise taxes to continue to provide the same level of services to their constituents. Half have had to reduce their work force.

A U.S. Conference of Mayors' survey shows that cities could only meet 43 percent of the demand for emergency services in 1982. City expenditures for health programs are down by 52 percent since 1981. Spending for employment programs has been reduced 68 percent. And there is a 12-percent decline in expenditures for senior citizen services.

Obviously, these local governments need a quick infusion of funds to provide them much needed relief from the current fiscal squeeze.

That is why I am voting in favor of Senator MOYNIHAN's amendment to beef up the funding for this important program.

Mr. MOYNIHAN. Mr. President, I have no desire to extend the debate. I would simply hope to vote on the amendment.

Mr. DOLE. Mr. President, I thank the Senator from New York.

There is no reason to extend the debate. I am prepared to vote.

The yeas and nays have been ordered.

I simply suggest what we are doing here is adding to the deficit, and when Senators put our next release about how bad it is, if you vote for it, be sure you put a P.S. on it to say "I voted to increase the deficit by a half billion dollars."

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the Senator from Delaware (Mr. BIDEN), the Senator from West Virginia (Mr. BYRD), and the Senator from Ohio (Mr. METZENBAUM) be included as cosponsors to my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, if there is no further debate, I move the amendment.

The PRESIDING OFFICER. Is there further debate?

The Chair hears none.

The question is on agreeing to the amendment of the Senator from New York. On this question, the yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 30, nays 64, as follows:

[Rollcall Vote No. 260 Leg.]

YEAS—30

Biden	Huddleston	Metzenbaum

NOT VOTING—6

Cranston	Goldwater	Mathias
Dodd	Hollings	Stennis

So Mr. MOYNIHAN's amendment (No. 2180) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the Senator from Arkansas (Mr. PRYOR) be added as a cosponsor to the amendment just voted upon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DURENBERGER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I would say to my colleagues, and I know many have other plans, that the majority leader wants us to finish this bill on the early side, if we are to finish it tonight. The Senator from New Jersey has an amendment which will not take too long. The Senator from Louisiana has an amendment to strike a provision. I am notified now that the Senator from New Hampshire has an amendment and perhaps the Senator from Tennessee. I can assure my colleagues that debate will not be lengthy on this side. Most of the issues are fairly clear cut.

I am ready to proceed with the Bradley amendment.

Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, I rise to voice my strong support for the general service sharing program.

The legislation we are considering today continues the general service sharing to our cities and towns for 3 more years. Revenue sharing has been one of the most successful Government programs ever to come out of Washington. This program has served as the Government's most effective vehicle for returning Federal tax dollars to our local communities to be used by these local units of Government to meet the needs of the people of the cities, towns, and counties.

To local citizens, the general service sharing funds mean hospital beds, ambulances, sewerplants, daycare centers, police protection, highways, housing, and bridges. Where will the local officials in our towns and cities turn to make up for this loss if we do not fully support the reauthorization of revenue sharing. Since local taxing authority is typically limited to property taxes and service fees, cities and counties need financial assistance to maintain essential services. Therefore, it goes without saying that the revenue sharing program is critical to the financial stability of our cities and counties. Revenue sharing has been particularly vital during the past 2 years when cities and counties have been facing and continue to face.

Substantial problems relating to high unemployment and general deteriorating economic conditions.

However, local units of government are still being confronted with serious fiscal problems as a result of the various cutbacks in Federal aid causing their purchasing power to diminish at an extraordinary rate.

I intend to fight side by side with our mayors, county commissioners and other local government officials to see

to it that our local citizens receive a fair return of their Federal tax dollar. I intend to see to it that these local officials have the opportunity to shore up fireservice, police protection, elderly programs, public works programs, transportation, economic development, employment, and manpower. These are the essential programs that can be maintained through the revenue sharing program. Today, with the increased responsibilities being placed on the shoulders of our local governments, reauthorization of the revenue sharing program is more important now than ever before. It will allow local officials wide discretion to respond to the various demands of their constituents.

Ever since its beginning back in the early 1970's, the revenue sharing program has served as an integral part of a long range plan to return government control to the people through their local, city, and county governments. Throughout its history, the general revenue sharing program has remained a remarkable success story. The record will show that it has the lowest administrative costs of any Federal assistance program and the funds are distributed to the local governments on a fair and equitable basis with no Federal strings attached. This is as it should be and I wholeheartedly support this principal.

While I have the floor, Mr. President, let me point out also the importance of maintaining the current intrastate revenue sharing formula. I do not think that we need to change the way the funds are distributed within each State at this time. While I am supportive of increases in the Federal revenue sharing funds, I am against the provision contained in the bill to change the distribution formula as increases occur. These proposed changes in the distribution formula would mean that most jurisdictions in most States would receive little or no increase in their revenue sharing payments, while a few large jurisdictions would receive substantial gains. Therefore, I am supportive of the proposed amendment to the revenue sharing bill authored by my dear friend and colleague the distinguished senior Senator from Louisiana, the Honorable RUSSELL LONG. Senator LONG's amendment will prohibit any changes in the way the money is distributed within the States. I urge my colleagues to join me in supporting Senator LONG's amendment when this matter is considered on the floor of the Senate.

I also urge my colleagues to join me in supporting full reauthorization of the general revenue sharing program without reductions in funding.

The PRESIDING OFFICER. The Senator from New Jersey.

AMENDMENT NO. 2181

(Purpose: To increase the authorization of entitlements for local governments to $4,791,700,000)

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. BRADLEY), for himself and Mr. MATHIAS, proposes an amendment numbered 2181.

Mr. BRADLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Redesignate sections 3 through 11 of the matter proposed to be inserted as sections 4 through 12, respectively.

On page 10, between lines 2 and 3, insert the following:

AUTHORIZATION FOR ENTITLEMENTS OF LOCAL GOVERNMENTS

SEC. 3. Paragraph (2) of section 6703 (b) of title 31, United States Code, is amended by striking out "$4,566,700,000" and inserting in lieu thereof "$4,791,700,000".

On page 26, beginning with line 14, strike out all through page 27, line 5, and insert in lieu thereof the following:

(c) The amendments made by this section shall apply to entitlement periods beginning after September 30, 1983.

Mr. BRADLEY. Mr. President, I offer this amendment on behalf of Senator MATHIAS and myself.

The PRESIDING OFFICER. The Senate is not in order. The Senate will be in order.

The Senator may proceed.

Mr. BRADLEY. Mr. President, I ask unanimous consent that Senators LAUTENBERG, MOYNIHAN, GLENN, BIDEN, D'AMATO, and TSONGAS be added as cosponsors of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, my amendment will increase funding for general revenue sharing by $225 million.

Mr. President, the bill reported by the Finance Committee freezes general revenue sharing for the next 3 years at its current funding level even though the 1984 budget resolution we recently adopted provides for a $450 million increase. We believe that a modest increase in funding for general revenue sharing is long overdue. The program has not been increased since 1977, even though the cost of living has increased by about 60 percent since then. The Finance Committee bill extends the freeze through 1986, further eroding the purchasing power of the program.

The first budget resolution for fiscal year 1984 assumes a 10-percent increase in funding for general revenue sharing. This proposal is a fiscally prudent one, since it represents less than a 5-percent increase in funding.

Mr. President, local governments are currently facing a serious fiscal crisis as a result of the recession and the cutbacks in Federal aid. Few State governments have been able to provide relief to local governments because State treasuries are in no better shape than local treasuries. An increase in general revenue sharing is the simplest and most direct way for the Federal Government to help local governments restore vital public services.

Mr. President, support for the program, indeed increased support, is more essential today than ever before. In the older cities of the Northeast and the poor areas of the South, the combined effects of deep recession, high unemployment, and cutbacks in Federal aid have intensified the service demands on fiscally strapped local governments. The fiscal plight of most local governments, and the State treasuries upon which they depend for assistance, has worsened significantly. In my home State of New Jersey, unemployment has increased by 20 percent since 1980 yet many services have been frozen at constant levels. Cities and townships cannot turn to the States for help, given the current economic climate. An upcoming report from the National Conference of State Legislators indicates that during this past legislative session:

At least 38 States were forced to cut their budgets; 11 States will be rolling deficits into their fiscal year 1984 budgets; 34 States were forced to raise taxes by an average of 18 percent; and 8 States are presently in special sessions to resolve revenue shortages.

Mr. President, revenue sharing remains one of the most popular programs because local officials increasingly rely upon Federal revenue-sharing payments to fill unanticipated budget gaps and finance the increased demand for basic services. It is one of the very few Federal programs that has not created a massive Washington bureaucracy; instead, it has targeted assistance through a decentralized network that acknowledges the priority concerns of local communities.

The partnership of Federal, State and local governments in our Federal system is vital. The general revenue sharing program enhances American federalism by recognizing the service responsibilities of local governments and the utility of decentralized administration. By providing localities with additional resources in reasonable proportion to this important task, we provide a direct benefit to all Americans.

Mr. President, if this amendment is adopted, New Jersey would receive an additional $7.1 million in revenue sharing next year. The increased aid would be targeted to cities hard hit by the recession and poor counties. East

Orange would receive an additional $600,000, a 65-percent increase. Newark would receive an additional $2 million, a 32-percent increase. Trenton would receive an additional $600,000, a 36-percent increase. Camden would receive an additional $500,000, a 34-percent increase. Jersey City would receive an additional $500,000, an 11-percent increase. And Cape May County would receive an additional $300,000, a 30-percent increase, and Atlantic County an additional $200,000, a 9-percent increase.

Mr. President, we all recognize the need to hold down the budget deficit, and for that reason we are recommending this modest increase in funding for the next 3 years; $225 million represents less than a 5-percent increase over the amount frozen since 1977—one-half the increase that is assumed in the 1984 Budget Resolution. I urge my colleagues to support the amendment.

● Mr. MATHIAS. Mr. President, I am pleased to join with my colleague from New Jersey, Senator BRADLEY, in sponsoring this amendment to provide for a modest increase in funding for general revenue sharing to local governments. It is a straightforward amendment—it raises the funding levels by $225 million annually.

The reasons for this amendment are equally straightforward, and very compelling. Funding for general revenue sharing to local governments has been frozen at $4.567 billion annually since 1977, while the cost of living has skyrocketed. The Finance Committee bill would extend this freeze through 1986. Furthermore, the Federal grant-in-aid programs have declined dramatically in this period, and, in 1980, the State share of general revenue sharing was eliminated.

Our amendment, which is supported by the U.S. Conference of Mayors, amounts to nearly a 5-percent increase in general revenue sharing; it recognizes the plight of our local governments and the need for fiscal prudence at the Federal level. Even with this increase, we are well within the budget resolution's provisions for general revenue sharing. It is not a budget buster. I would support even more money for revenue sharing, but we must at least do this much.

General revenue sharing goes a long way toward alleviating the fiscal straits many local goverments are experiencing. Public safety, education, public transportation, roads, corrections, sanitation, and public health—all essential services which benefit the entire community—have been funded with revenue sharing money. As a result, every citizen, young and old, rich and poor, has benefited. While the need for these services continues to increase, the funding for general revenue sharing has remained constant while inflation has caused its real value to be greatly reduced.

To deny that this amendment is needed is to deny the pleas of the Nation's local officials who struggle with the dollars-and-cents problem of not being able to provide services to their citizens. The accomplishments of general revenue sharing have been amply demonstrated. To make sure that this creative program can continue to work effectively and efficiently, I urge the adoption of the amendment.●

Mr. D'AMATO. Mr. President, I rise today in support of an amendment raised by my distinguished colleague from New Jersey, Senator BRADLEY. Senator BRADLEY's amendment would increase the general revenue-sharing program by $225 million annually, from $4.6 billion to $4.825 billion.

Revenue sharing is a program that has become a vital source of funding for local government. It is a masterful program that gives our towns, cities, and counties the opportunity to spend Federal dollars with no strings attached. Revenue sharing takes advantage of the strengths both of local governments and the Federal Government. The Federal Government is able to raise money well, but often spends taxpayer dollars in a profligate manner. On the other hand, local governments tend to be more thrifty, but have greater difficulty raising revenues.

Revenue sharing is a block-grant program to local governments with no strings attached. Local jurisdictions are given the opportunity to spend these funds as they see fit. In this way, cities and counties can spend funds on their unique needs.

However, general revenue sharing was last increased in 1976. Since that time, inflation has risen 50 percent. Consequently, the $4.6 billion annual appropriations established in 1976 is only $2.3 billion in real terms. Clearly, local government is in desperate need of an increase in the general revenue-sharing program.

This is particularly true given the impact of the past recession on local government. As unemployment and bankruptcies have increased, the tax base of local governments declined. The need for additional reveunes became acute. Mounting budget deficits presented the possibility of disaster for cities and towns. This made the need for an increase in revenue sharing doubly important. For this reason, I have cosponsored the Bradley amendment.

I urge my colleagues to support the Bradley amendment increasing the general revenue-sharing program by $225 million annually.

Mr. LAUTENBERG. Mr. President, I rise in support of S. 1426, the Local Government Fiscal Assistance Amendments of 1983 which would increase assistance to our Nation's cities.

The local share of revenue sharing has not been increased since 1976. In 1980, the State share was eliminated. Since States provide a critical source of revenue to local governments, this was a significant loss of funds on top of those lost to inflation for localities.

Mr. President, local governments, particularly our larger, older, urban areas have suffered greatly from the recession and have been forced to layoff employees. Critically needed programs in both human services and infrastructure improvements have had to be laid aside to cope with fiscal shortages.

The Senate has the opportunity in this legislation to address these problems. The first concurrent budget resolution assumes a 10-percent increase in revenue sharing. It is my hope that the Senate will approve an increase in this vital program as outlined in the amendment offered by Senator BRADLEY, of which I am an original cosponsor.

Revenue sharing has been a critically important program to local governments throughout New Jersey. It enjoys the support of all levels of government in my State. Revenue sharing has provided absolutely essential assistance in meeting basic service needs in cities, counties, towns, and townships across the country. I am pleased to support the extension and expansion of this program.

Mr. BRADLEY. Mr. President, in conclusion, this is simply a question of whether we intend to recognize the erosion of purchasing power at the local level and increase general revenue sharing by $225 million. I hope the Senate will see that this is a prudent and important step to take.

Mr. DOLE. Mr. President, I am just going to take a minute, because I think the arguments are pretty much the same as on the previous amendment. This means that we do not increase the deficit by quite as much; we just increase it by half as much, $675 million instead of $1.3 billion.

It seems to this Senator, and again, I say it in all seriousness, that we are faced with massive deficits. We are concerned about interest rates. We are concerned about unemployment. And here we are about to vote to add another $700 million to the deficit over the next 3 years.

We can issue all the statements we want about the deficit, but this is the time when we can demonstrate that we are willing to hold the line.

We are not cutting the program. We have a 3-year extension of this program at level funding of $4.6 billion a year. That is a billion dollars a year. I find that most counties and cities are satisfied with level funding. Obviously, they would take more, but in the interest of trying to do something about the deficit and the fiscal responsibility

that we talk about on the Senate floor and in our public speeches around the country, this amendment should be defeated. When we balance the budget or start balancing the budget and interest rates start coming down, then, perhaps, at that time, we can address whether or not revenue sharing should be increased.

As an original sponsor of revenue sharing 10 to 15 years ago and a solid supporter of the program, I believe I speak for most people, most mayors, and county officials, when I say what they want is to see the program extended. They want some stability in the program, a 3-year extension.

Oh, yes, they will take more money. Who would not? But we do not have any money.

Though I do not quarrel with the intent of the amendment, I just do not think we can afford it. I hope the amendment might be rejected.

Mr. BRADLEY. Mr. President, I ask unanimous consent that Senator BYRD be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, I am prepared to vote.

Mr. HEINZ. Mr. President, I think the arguments against this amendment are much the same as we offered against the Moynihan amendment. It is not that GRS is an evil or bad program. This is not a means-tested program, frankly. There are many programs that do affect the needy. It is my view that we ought to be concentrating our resources, if we are going to be adding any money to bills, to programs that help the truly needy.

We all have mayors, we all have township people who would like a little more money. It comes out roughly, in this case, to a little less than $5,800 per municipality.

I hope that we reject this amendment, not because it is not wellmeaning, but because, we must reduce the deficit rather than add to it.

Second, I hate to think that just because there is some room under the budget resolution, we are going to take that as a license simply to spend more than money. I said a moment ago and I meant it: I hope the budget resolution and the numbers it contains will be seen as limits as far as spending is concerned; they should not be targets for us to try to reach or exceed.

Mr. BRADLEY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there further discussion?

If there is no further discussion, the question is on agreeing to the amendment of the Senator from New Jersey. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS, I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS) and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 36, nays 58, as follows:

[Rollcall Vote No. 261 Leg.]

YEAS—36

Biden	Hart	Melcher

NOT VOTING—6

Cranston	Goldwater	Mathias
Dodd	Hollings	Stennis

So the amendment (No. 2181) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. The Senator from Louisiana wants to be heard.

The PRESIDING OFFICER. The Chair recognizes the Senator from Louisiana.

AMENDMENT NO. 2182

Purpose: To eliminate the alternative allocation of revenue sharing funds to local governments.

Mr. LONG. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an amendment numbered 2182:

On page 13, beginning with line 1, strike out all through page 27, line 5.

On page 27, line 9, strike out "SEC. 11" and insert in lieu thereof "SEC. 10".

Mr. LONG. Mr. President, I ask unanimous consent that the names of the following Senators be added as cosponsors of the amendment: Mr. JOHNSTON, Mr. BURDICK, Mr. HATFIELD, Mr. BINGAMAN, Mr. RANDOLPH, and Mr. D'AMATO.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, the revenue sharing extension bill reported by the Committee on Finance includes an amendment to change the way those funds are distributed among local governments. This formula change is unnecessary, undesirable, and unwanted by those affected. I am offering an amendment to delete that formula change.

Even though the Finance Committee did not approve an increase in funding for this program, it included in the bill a formula change which will apply to any additional funds which might be added later in the consideration of this bill or in some future year. The impact of this formula change is very substantial. It means that most cities and towns and counties in this country will get less than their full share of whatever increase may take place.

At the time the Finance Committee acted on this bill, detailed information about its impact was not available. Since then, the Treasury Department has provided statistics showing what the result would be under different possible funding increases.

One set of statistics assumes that Congress will provide a $450 million increase in the program. This is what the House bill provides and what is assumed in the budget resolution. With a $450 million increase, well over two-thirds of all local governments are losers under the Finance Committee formula. That is to say, they get a smaller share of the $450 million than they would without that change in formula. The amount each government loses under the Finance Committee formula varies from place to place. But in many instances the loss is substantial. For 43 percent of all jurisdictions, the loss is total. They get no share whatever out of a $450 million increase.

If Congress approves an increase which is less than $450 million, the adverse impact of the Finance Committee formula change becomes even worse. Under a $225 million increase, an absolute majority of all local governments in the country will get no share whatever in the $225 million. For many of the remaining jurisdictions, the increase will be so small as to be insignificant. Altoona, Pa., for example, now gets $1.3 million in revenue-sharing funds. The Finance Committee formula with a $225 million increase will give that city the magnificent increase of $914 or one-tenth of 1 percent. For smaller jurisdictions, some of the "increases" under the Finance Committee formula are even smaller. There are numerous increases of amounts like $1, $5, or $10 per year.

The Finance Committee's report on this bill gives the following brief explanation of the reasons for the proposed formula change:

> In reviewing the formulas for allocating funds under present law, the committee determined that by and large the formulas have worked well in distributing the funds currently authorized. However, the committee also believes that any additional funds that may be authorized for revenue sharing should be applied to making certain adjustments in the formula that can result in a more equitable distribution of the funds, while protecting all recipient governments from any reduction in their allocation as a result of the formula changes.

From this statement one might conclude that the committee had carefully examined this issue. In fact, that is not the case. The hearings held by the subcommittee of jurisdiction concentrated on the need for extending the program and increasing its funding. The witnesses primarily represented the local governments who are affected by the program. None of those witnesses requested or endorsed these formula changes.

At the hearings, the National Association of Towns and Townships stated:

> We do not see a need to make any changes in the current GRS (general revenue sharing) formula. Historically, the Congress has discussed changing the formula but has concluded that the difficulty of designing a formula for 40,000 local governments makes it impossible to predict what the impact of a formula change will be. While the current formula is not perfect, in our view it is satisfactory.

The representative of the National League of Cities made this statement:

> Overall, while any formula might be changed in some respect, the current GRS formula is widely considered to be fair and effective. We do not believe it ought to be changed without major and convincing reasons.

Since the National League of Cities now opposes the formula change in the Finance Committee bill, it is clear that the "major and convincing reasons" have not been found.

When the committee approved the formula change, it did not have any detailed listing showing how individual jurisdictions would be affected. After the committee acted, those computer runs were made available. What did they show? They showed that some of the poorest jurisdictions in the country were hurt by the formula change. It is my understanding that an amendment will be offered to restore funds to some of these jurisdictions, but even with that modification, the Finance Committee formula creates numerous results which seem inequitable on their face. In almost every State there are affluent jurisdictions which get increases well above the average while some of the poorer jurisdictions get little or no share in the new funds.

In the State of California, for example, Beverly Hills would do quite well under the new formula. It would get a 16-percent increase, if the Nation as a whole gets a 10-percent increase. That is pretty good for a city where the per capita income is $24,000, almost three times the average per capita income in California. Another city in that State is Delano. The per capita income there is under $5,000. It is 41 percent below the State average. Delano gets no increase under the Finance Committee formula. In effect the committee bill shifts funds from Delano to Beverly Hills and calls it "better targeting." I think this kind of result could be more aptly called "missing the mark."

The example I just cited is not an isolated one. In Alabama, Vestavia Hills with a $13,000 per capita income is a winner. Barbour County with a $4,500 per capita income is a loser. In Maryland, Rockville with a per capita income over $10,000 is a winner. Salisbury with a per capita income below $7,000—17 percent under the State average—is a loser. And so it goes, State after State.

The formula for distributing revenue sharing funds is a complex one. The committee bill would change virtually every element of that formula. It may be that some of the changes can be theoretically justified. But the proof of the pudding is in the eating. When the Finance Committee acted it knew only the ingredients. Now that we can taste the pudding, it is not very attractive. The committee report was correct in stating that the existing formula has for the most part worked quite well. We should not modify it without carefully examining the results of each proposed modification and assuring ourselves that the new formula is truly more desirable than the old. I do not think a formula can pass that test when it deprives a large majority of the jurisdictions in this country of a fair share of any new funds.

Even apart from the merits of the particular formula change proposed by the Finance Committee, this is not the time to be making any change in a formula which the committee and the affected jurisdictions both find to have worked reasonably well. It has been 7 years since revenue sharing funds were last increased. These have been 7 years of high inflation. In addition, Federal legislation in the past few years has reduced Federal spending in a number of areas, leaving State and local governments to pick up the slack.

If Congress were now considering a massive increase in revenue-sharing payments, it might be appropriate to consider formula changes. That is clearly not the case. At the most, we are dealing with a less than 10-percent increase as approved by the House. The administration and the Finance Committee have each recommended no increase. The ultimate legislation may or may not include an increase, but if there is one it will evidently be modest.

If we can only afford a small increase in this program, we should at least be reasonably evenhanded about how it is distributed. Otherwise we should not pretend that this is an increase in the revenue-sharing program. With the Finance Committee formula, what we really would be doing is creating a new additional program which distributes funds selectively to only a few jurisdictions, rather than increasing the existing generalized program. If that is what Congress wants to do, it should do it in other legislation so not to mislead the mayors and county councils of this country.

I urge the Senate to adopt my amendment striking the Finance Committee formula change from the bill.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a letter from the National League of Cities and the National Association of Counties in support of my amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AUGUST 2, 1983.

Hon. RUSSELL B. LONG,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR LONG: As Senate floor action on S. 1426, the bill to reauthorize the general revenue sharing program, approaches, the National Association of Counties and the National League of Cities wish to make you aware of our position with regard to amendments pertaining to formula changes that may be offered on the floor. We support retention of the revenue sharing formula in current law, and oppose any alterations. We support your amendment to strike the formula changes proposed by S. 1426. We take this position for several reasons:

First, we believe that if there is an increase in the level of funding for the program, all local governments should share proportionately in that increase. Virtually all local governments are experiencing some

degree of fiscal stress as a result of the recession and cutbacks in federal aid. They rely heavily on general revenue sharing to assist them in dealing with revenue shortfalls. Funding for the program has not been increased since 1976. During that period, NACo and NLC estimate that fifty percent of the buying power of revenue sharing dollars has been eroded by inflation. All local governments need some increase in their revenue sharing allociations to at least partially offset the effects of inflation and aid them in resolving their fiscal problems.

Second, most formula change proposals, even those with "hold harmless" provisions, would effectively disadvantage certain types of jurisdictions relative to other types in terms of the overall percentage increase received. We believe that the immediate and long-term impacts of such non-proportional distribution of an increase in funding should be studied in depth before implementing the formula changes.

Third, no formula is perfect and any type of formula change is bound to result in some anomalous allocations. Under the formula changes contained in S. 1426, for example, some of the neediest jurisdictions in certain states would receive no additional revenue sharing funds, even if the funding level for the program were increased by $450 million. Such anomalous distributions also indicate the need for extensive study and deliberation prior to the implementation of formula changes.

Finally, any change in the existing distribution formula—no matter how carefully drafted—creates delay and uncertainty with regard to re-enactment of the program. Any formula change risks opening the entire issue in conference, including interstate changes. With a majority of local governments already into their new fiscal year, any such changes could create disruptions to previously approved local budgets by sharply reducing current allocations.

To summarize, the National Association of Counties and the National League of Cities oppose changes to the current general revenue sharing formula on grounds of the general need of local governments for an increase in general revenue sharing funding and the danger of implementing formula changes without careful study and analysis of impacts.

We appreciate and are grateful for your support.

Sincerely yours,

CHARLES ROYER,
President,
National League of Cities.
SANDRA R. SMOLEY,
President,
National Association of Counties.

Mr. DURENBERGER. Mr. President, I am not the author of these formula changes, only their sponsor. The authors are men and women in and out of Government who have worked with and studied the GRS formulas over the last 10 years. These are carefully balanced changes. They have been long recommended by a broad spectrum of those knowledgable in the details of the revenue sharing program. Prior to this year, GAO, Treasury, several past administrations, the Conference of Mayors and the National league of Cities all supported modifications of the type contained in S. 1426.

Today, GAO and the Conference of Mayors continue to support the changes actively. And, the administration is on record before the Finance Committee as endorsing the concept of the modifications and saying that although it strongly opposes any increase in funding—and hence cannot realistically actively work to promote formula changes—the formula modifications contained in S. 1426 are sound and would make a modest increase in funding more acceptable. NLC has now suddenly reversed its longstanding position in favor of formula modifications and now supports only a large increase in funding.

The League does not now contend that these changes are unsound; rather it takes the position that since revenue sharing has not been increased since the beginning, all local governments, no matter how well off, should benefit proportionately from any increase in funding.

We all know how the $4.66 billion is divided among States: Two formulas are used (a 3-factor and 5-factor formula) and States receive their allocation under the formula that gives them the larger amount. This bill does not propose to change that allocation. It is not a perfect system, as I have said in th past, but its probably the best we can hope for at this time. But once the GRS dollars get to the States, there are equity problems we have been asked for several years—problems that leave many local governments holding the short end of the stick.

Now, there are two ways to help those with the short end of the stick: First, lengthen the stick for everyone or second, improve the length at the short end only without taking it off the long end. NACO, NLC, the House, and Senator LONG prefer the former. But we do not have the money to lengthen the long end of the stick! The days of spreading the goodies everywhere without regard to need are over.

Mr President, the essential logic of the intrastate revenue sharing formula is sound; it provides generally for a good match between payments and local fiscal responsibilities. It is designed to direct higher-than-average per capita payments to jurisdictions that have extensive service responsibilities, and whose citizens have lower-than-average incomes and bear substantial tax burdens.

The formula does, however, suffer from a number of well-understood defects. The net results of these defects are to constrain payments to the Nation's most fiscally-stressed jurisdictions, to provide some jurisdictions payments well out of proportion to their fiscal responsibilities, and to allow gross inequities among the payments to jurisdictions in similar circumstances. Specifically:

The current 145 percent constraint on the maximum per capita grant limits funding to the Nation's most fiscally stressed jurisdictions—a small number of larger city governments and hundreds of very poor rural communities. The effects of the maximum constraint are well illustrated in the case of our most hard-pressed cities, such as New York, Philadelphia, Baltimore, and St. Louis. Each have their allocations depressed below the level allocated to them by the formula without the per capita maximum constraint. For example, in the most recent entitlement period, New York City received $272 million. If the maximum constraint were raised to 175 percent, New York City would have received $301 million, an increase of slightly more than 10 percent. Detroit is another case in point. The formula initially responds to the fiscal problems of Detroit by granting a total allocation of well over $50 million. However, this allocation is reduced 36 percent because of the maximum grant limitation. And large cities are not the only jurisdictions that suffer reduced allocations under this artificial cap. Consider what happens simply by raising the cap from 145 to 160 percent:

Otis, Maine (population 307) realizes a 20-percent increase (from $36.35 to $42.87 per capita);

The village of Cuba, N. Mex. (population 609) realizes a 17-percent increase (from $40.88 to $47.80 per capita);

The town of Oak Grove, La. (population 2,214), gets an increase of 21 percent (from $32.21 to $38.89 per capita).

The 20 percent constraint on the minimum per capita grant provides payments to several thousand limited-service jurisdictions that are well out of proportion to their fiscal responsibilities at the expense of other jurisdictions that are the primary providers of essential local services. In 1979, for example, GAO found that 8,635 governments had their payments artificially propped up by this minimum constraint. It found that most of these jurisdictions were very limited service governments and, on average, had their allocations inflated by 40 to 60 percent at the expense of full service local governments in the same State. An example of this type of grotesque distortion is well illustrated in the case of Grosse Pointe Township in Michigan. The annual income of a family of four in Grosse Pointe is over $100,000, about 4 times that of a similar Detroit family, and their tax burden is about ⅓ of that same Detroit family. Initially, the intrastate formula provides Grosse Pointe a fairly modest allocation. But because of the minimum payment provision, their allocation is increased a whopping 88 percent.

The geographic tiering of the formula—the allocation among county areas

and then among types of governments within each county according to tax collections—results in some instances of gross inequity. Jurisdictions with the same formula factors, often in the same county, are allocated significantly different payments. The jurisdictions disadvantaged by tiering tend to have lower-than-average incomes and higher-than-average tax efforts, although some well-to-do jurisdictions are also disadvantaged. This is due to the fact that tiering makes it possible for the same types of governments, identical in every respect except that they are in different counties, to receive widely different revenue sharing payments. The inequities caused by the formula's tiering occur in all States. GAO found that the differences in per capita payments of cities with identical formula factors ranged from a low of $2.52 in Rhode Island to $45.61 in Alaska.

While the mathematics of tiering are complicated, the problem is easy to understand:

The revenue sharing formula was designed to provide smaller per capita payments to jurisdictions with higher incomes and lower tax efforts.

In Mongomery County, Pa., for example, there are two jurisdictions, Hatborough and Lower Salford. Lower Salford's income is 7.7 percent higher than Hatborough's and its tax effort is 9.7 percent lower. One would expect Lower Salford's per capita payment to be somewhat lower than Hatborough's given the logic of the intrastate formula.

But the reverse is true—Lower Salford's per capita payment is $12.02, while Hatborough's is $6.51.

Why? Simply because the Census Bureau classifies Hatborough as a type 2 or municipal government and Lower Salford as a type 3 or township, despite the fact that their fiscal responsibilities are virtually the same. In Mongomery County, municipal governments (including Hatborough) have substantially lower per capita incomes than townships. Thus Hatborough and other municipalities are significantly disadvantaged by tiering, because the amount of funds allocated to them fails to take into account their lower income.

In New Jersey, many so-called type 2 municipal governments have come to recognize the arbitrariness of the tiering process and by simply changing their classification from municipality to township have increased their revenue sharing payments by 90 to 110 percent.

The budget constraint, a provision that limits payments to 50 percent of the total of a jurisdiction's adjusted taxes and transfers, was intended to limit dependency on revenue sharing. However, the rule affects jurisdictions only in a few States and allows revenue sharing to erode local fiscal responsibility and to maintain essentially moribund governmental units. The combined effects of a high minimum payment and a budget constraint that does not constrain are disturbing to say the least. Consider some examples:

The town of Randolph, Wis. is in the unique position of receiving $138 in revenue sharing for every dollar in taxes it raises on its own. And there are literally hundreds of similar examples of this throughout the Midwest.

The city of Downsville, La., with income 88 percent higher than the statewide average and tax effort 81 percent lower than the average for similar jurisdictions receives a revenue sharing payment that equals 67 percent of all the taxes it raises on its own.

The city of Post Oak Bend, Tex., with income 90 percent higher than the statewide average and tax effort that is 96 percent lower than the average for similar jurisdictions receives a revenue sharing payment equal to 40 percent of its local taxes.

When one realizes that nationwide, revenue sharing payments comprise only about 8 percent of nonschool taxes, we must conclude that the existing high minimum payment combined with a budget constraint that does not constrain leads to significant erosion of fiscal responsibility and lack of accountability on the part of substantial numbers of limited-service local governments.

The formula modifications contained in S. 1426 address these problems in a carefully designed package. The Finance Committee's changes will permit the formula freer reign in targeting GRS dollars in an equitable and effective manner. At the same time, the bill contains a 100 percent hold-harmless provision, guaranteeing that no local government will have its payment reduced due to the formula modifications. The formula modifications will have absolutely no effect on the interstate distribution of funds. If Congress were to authorize a percentage increase in funding above current levels, every State would enjoy that same percentage increase in its GRS payment.

Finally, I would stress that this is a carefully balanced set of formula modifications and adoption of only part of the set could yield less than desirable results. For example, GAO found that if detiering were to be eliminated from the package, formula inequities would actually increase compared to current formula inequities in 26 or 27 States. By comparison, GAO found that with a package similar to that contained in S. 1426, all formula inequities would be eliminated in 49 States. The single State where formula inequities would remain under a package similar to that in S. 1426 is Louisiana—which may account for why the good Senator from Louisiana is puzzled when he looks at the printouts. And the reason formula inequities remain in Louisiana is the result of the revenue sharing act's special treatment of Louisiana sheriffs. So, if the Senator from Louisiana is really concerned about equity for his Louisiana local governments, perhaps he should look to this pecularity in the formula. I hasten to add, I am not suggesting this.

I urge my colleagues to vote against this amendment. I could stand here all day and make technical arguments in favor of these modifications. But the real issue can be summed up fairly easily. It is politically easy to vote an increase in funding for a program that serves over 39,000 units of local government. The question is, do we have the courage to demand in exchange for such an increase during times of enormous Federal deficits and sacrifice by individual recipients of Federal assistance, that the targeting of these scarce Federal dollars be improved? If we cannot do the politically difficult thing with revenue sharing, how on Earth will we muster the will to bring other entitlements under control and improve them? In the larger scheme of things, these changes are, frankly, pretty minor—indeed, I have taken considerable heat from some of my colleagues for making such a big deal out of them, especially when powerful local interest groups are opposing them. But, as a symbol of where this Congress is going on getting a handle on entitlements, this is a critical test. If we fail to overcome the pressure of special interests in this case, I dread to think how we will measure up when it comes time to make the big decisions.

Regarding the public interest groups, I would just like to make a couple of points. As chairman of the Subcommittee on International Relations, I have developed the greatest respect for the public interest groups. The knowledge and expertise they bring to bear on matters of intergovernmental relations is indispensible. They serve as both watchdog of the system and advocates for good public policy. In many respects, the public interest groups are what make cooperative federalism work as effectively as it does in the American system. So, when they speak, I listen with respect.

But, we must never forget that, as valuable as these groups are, they remain interest groups, committed to furthering the interests of their particular members. So, sometimes I find myself in the position of opposing the narrow interests they represent in order to pursue the broader national interest. This is the case today. The National Association of Counties and the National League of Cities are both opposing the formula provisions of S. 1426 for very parochial reasons. For example, in a letter to Senators oppos-

ing the formula modifications, NACO states its objections as follows:

A $450 million or 9.9 percent increase in the program, as assumed in the First Concurrent Budget Resolution, would result in counties receiving an average increase of only 7.2 percent, while cities would receive an average increase of 12.9 percent.

Now, as representatives of the counties' parochial self-interest, it is understandable why NACO would complain that an increase of over 7 percent is not enough. But as Members of Congress, representing all of the American people, we must recognize that improving the formula along the lines suggested in S. 1426 results in counties gaining slightly less than cities, because taken as a group, counties currently receive a disproportionately large share of revenue sharing funds under the present formula.

I greatly respect to the NACO plays as the protector of the interest of their members. But I must state frankly that in this instance, these interests diverge from the greater national interest—to use scarce Federal assistance dollars equitably and efficiently. I know the temptation will be great for many of my colleagues simply to follow the cue of these two important public interest groups on this vote. I urge my fellow Senators to resist this temptation.

Mr. D'AMATO. Mr. President, I join in cosponsoring the amendment of the distinguished senior Senator from Louisiana, because formula changes adopted in committee would create a terrible inequity with respect to the distribution of any increase in the revenue-sharing program.

I point out what would take place in New York State under the formula change. There may be a $225 million annual increase, and we have reason to believe there will be some increase because the House of Representatives has provided a $450 million increase, so if some compromise is reached between the Senate and the House of Representatives, let us use $225 million.

The Treasury Department estimates that New York State would receive an additional $22 million of which $20 million, as a result of this new formula, would go to one city, New York City.

Certainly, no one can accuse me of not having fought for this city. But that leaves only $2 million for the other municipalities and counties in the State.

If I might just share with the Senate, there are 1,608 jurisdictions in the State of New York that are recipients of revenue-sharing moneys. Fourteen hundred of these would receive absolutely no increase.

Mr. President, on a national level, there are 22,000 jurisdictions that, by way of the formula change, would not result in an increase in revenue sharing under the formula change; 17,000 of the 39,000 would receive the whole increase. The distribution is so disproportionate. Pointing again to my State where New York City would get 90 percent of those funds and the remainder of the jurisdictions would receive not 1 penny's increase.

I think these figures highlight why successful passage of this amendment is absolutely critical to our cities, villages, and counties throughout the Nation. The formula change reported out of committee is unfair to those jurisdictions that would not receive an increase. We need to establish more equity in our policymaking. I urge my colleagues to support Senator LONG's amendment.

Mr. PRESSLER. Mr. President, I rise in support of the Long amendment and ask that my name be added as a cosponsor.

Quite frankly, I am greatly disturbed by this effort to change the distribution formula for the general revenue-sharing program. While its supporters argue that no community will lose funds under the formula change contained in S. 1426, the fact is that my home State of South Dakota and many other States will be denied a fair share of any funds over $4.6 billion that may be authorized.

There is a move among some Members of Congress to completely change the current formula. Many of these efforts center around the RTS (representative tax system).

The RTS measures a State's fiscal capacity by computing the amount of revenue the State would raise if it applied national average tax rates to each of its tax bases. This formula, when used in revenue sharing and other programs, would redirect Federal assistance from South Dakota and other agricultural States to industrialized States of the Northeast and Midwest.

The Advisory Commission on Intergovernmental Relations (ACIR) estimates that RTS could be used to change the formula in as many as 27 Federal grant programs. These include vocational education, aid to families with dependent children, school lunch, water resources planning, and urban development action grants.

Will this change be limited to the revenue-sharing program? I think not. I believe that it is just the opening wedge in a major effort to completely revamp the way the Federal Government distributes revenue.

South Dakota is not a rich State. In fact, if you were to look at a list of the Nation's lowest-income counties, you would find many South Dakota counties on that list. Yet despite the very hard economic conditions that exist in parts of my State, under the RTS system, South Dakota would lose funds.

South Dakota currently receives $15.8 million in revenue-sharing funds. With the use of the RTS system, South Dakota would receive only $12.9 million, a reduction of 18.1 percent. In another program of particular importance to my State, vocational education, the numbers are also discouraging. South Dakota currently receives $2.5 million under this program; with RTS, that figure would fall to $2.4 million, a loss of 6.6 percent.

I know that supporters of the language in S. 1426 will say that RTS is not being used to revamp the program at this time. But I would argue that the first effort to change this formula will not be the last.

The RTS is a reward of sorts—a reward to States that practice high taxation politics. Some States, like my own, prefer to keep the budget in control by limiting the spending side. It is a lesson the Federal Government could afford to learn. However, under RTS, South Dakota would be penalized by that fact and States that believe in high taxes and high spending will get more money from the Federal Government.

I urge my colleagues who believe in encouraging fiscal restraint at all levels of Government to support the Long amendment. This first step is of greatest importance.

At this point in the RECORD, I ask unanimous consent to insert a chart showing the effect on each State of using RTS in the revenue-sharing and vocational education programs.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

COMPARISON OF FISCAL YEAR 1983 GENERAL REVENUE SHARING ALLOCATIONS—CURRENT AND WITH OPTION OF RTS

[In millions of dollars]

State names	Current allocation	Option (RTS) allocation
Alaska	36.962	16.819
New Mexico	36.750	18.231
Wyoming	11.642	5.902
North Dakota	13.924	8.170
Montana	18.708	11.823
Louisiana	93.439	59.671
Oklahoma	50.333	45.409
West Virginia	41.106	33.129
South Dakota	15.788	12.938
Arkansas	46.025	38.317
Texas	248.584	206.984
Utah	34.578	29.265
Iowa	54.385	47.893
Nevada	13.852	12.337
Idaho	18.556	16.738
Mississippi	63.603	57.414
Kansas	39.283	36.190
Kentucky	76.395	70.525
Vermont	12.697	11.763
New Hampshire	14.086	13.194
Nebraska	28.493	26.797
Colorado	51.802	49.834
Delaware	13.413	12.927
Florida	164.116	158.430
California	510.877	498.133
Hawaii	22.479	22.103
Maine	28.204	27.809
Oregon	54.325	53.596
Minnesota	84.533	83.457
Missouri	78.730	77.930
Illinois	215.044	215.668
Virginia	98.513	98.854
Ohio	172.829	173.798

COMPARISON OF FISCAL YEAR 1983 GENERAL REVENUE SHARING ALLOCATIONS—CURRENT AND WITH OPTION OF RTS—Continued

[In millions of dollars]

State names	Current allocation	Option (RTS) allocation
New Jersey	144.289	145.495
Massachusetts	137.074	138.475
Connecticut	54.095	54.729
South Carolina	69.301	70.429
North Carolina	120.655	123.101
Maryland	87.724	89.914
District of Columbia	18.394	18.896
Georgia	110.993	115.689
Arizona	55.051	57.429
Tennessee	85.690	89.496

Mr. BENTSEN. Mr. President, I join my colleagues from Louisiana in support of the pending motion to strike the set of intrastate funding allocation amendments adopted by the Finance Committee. I have three basic concerns over enactment of these provisions. First, I am vigorously opposed to jeopardizing reauthorization of the general revenue sharing program. Mayors and county administrators from all across my State of Texas have indicated their dismay that reauthorizing a program on which they depend for vital community services could be threatened by Senate passage of these highly controversial provisions. The National League of Cities, the National Association of Counties, and others have expressed their disagreement with the use of the pending bill as a vehicle for formula revisions, and in my judgment their concerns are well founded.

Second, I am not yet convinced that the current formulas—admittedly a compromise achieved after lengthy deliberation and requiring compromise by all parties—should be jettisoned. When approximately 70 percent of all jurisdictions participating in this program stand to receive less funding than under the current formula, it would seem prudent to insist on irrefutable evidence that such changes are justified.

The Finance Committee has not held hearings on these provisions, nor were the members of the committee privy to information about the effect of the amendments until after they voted to include the amendments in the committee bill. In my own State of Texas, a postmarkup computer run revealed severe penalties on communities along the State's southern border. Starr County, for instance, with a population of more than 27,000, a 50-percent rate of unemployment, and an average per capita income of $2,668 would receive no additional funds were the revenue-sharing program appropriation to be increased. Cameron and Hidalgo Counties, where the annual per capita income barely exceeds $4,000, would be barred from an increase in GRS funding, while Beverly Hills, Calif., with an average per capita income of $24,000, would reap a windfall of 16 percent; Stamford, Conn., where annual incomes average nearly $11,000, would gain 43 percent more GRS funding; West Grosse Point, Mich., with a per capita annual income average of nearly $14,000, would experience a net gain of more than 41 percent; and Avondale Estates, Ga., where incomes average more than $11,000, would gain a whopping 75.9 percent in new revenue sharing dollars.

Enactment of the allocation changes contained in S. 1426 will mean 367 jurisdictions in my State fail to receive what they would have under the current GRS formula. For those jurisdictions, and 70 percent of all recipient jurisdictions throughout the country, I think it would be hard to justify such a change, particularly when no organization or group of recipient jurisdictions has sought a change in the formula for allocating these funds. Financing dislocations of this magnitude should not be permitted without hearings and careful consideration in the committee with jurisdiction.

Third, I am exceedingly concerned over the direction in which the allocation revisions seem to be leading us. In particular, I question the wisdom of using a tax constraint in place of the budget constraint to set the level of funding for a given community. As the Senator from Minnesota has explained, under the allocation reforms concluded in the bill, recipient jurisdictions would be held to a statewide tax effort standard as opposed to a test of the percentage Federal revenue sharing represents of the recipient jurisdiction's budget. This change had the perverse effect of linking receipt of Federal funds to local tax effort, in effect utilizing Federal grants-in-aid as a lever to manipulate local tax policies. I believe a reasonable case can be made for restricting GRS funding as a percentage of budget, but I find it difficult indeed to accept the notion that the level of Federal assistance should drive local tax efforts.

In sum, Mr. President, I urge my colleagues to support the pending motion to strike this excess baggage from the general revenue sharing reauthorization.

Mr. DOLE. Mr. President, I shall just take 1 minute.

One reason the Durenberger amendment was offered and supported in the Finance Committee was to make certain when we went into conference we would maintain level funding at $4.6 billion. We have had some rather strong demonstrations, bipartisan demonstrations I might say, in soundly rejecting efforts, first, to add $1.3 billion and then about $700 million to the funding level over the 3-year period.

I can assure the distinguished Senator from Minnesota that we are going to stand firm in the conference and there is going to be a study amendment, as I understand, to see whether or not there should be any change in the formula.

But we believe that if we want this bill signed to accommodate the cities and the counties who want some stability, want a 3-year funding program, and are willing to accept $4.6 billion, we should go ahead and adopt this bill, go to conference, get it done before September 30.

Therefore, I believe we are prepared to act on the amendment of the distinguished Senator.

The PRESIDING OFFICER. Is there any further debate on the amendment?

Mr. DOLE. In fact I am willing to accept the amendment.

The PRESIDING OFFICER. Is there any further debate on the amendment?

The Chair hears none.

The question is on agreeing to the amendment of the Senator from Louisiana.

The amendment (No. 2182) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I yield to the Senator from New Hampshire but first of all I promised to recognize the Senator from Pennsylvania on an amendment that we can accept.

The PRESIDING OFFICER. The Chair recognizes the Senator from Pennsylvania. Does the Senator from Pennsylvania seek recognition?

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Pennsylvania.

AMENDMENT NO. 2183

(Purpose: To disregard reductions in adjusted taxes due to economic dislocation)

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ), for himself, Mr. D'AMATO, Mr. METZENBAUM, Mr. RIEGLE, and Mr. LEVIN, proposes an amendment numbered 2183.

Mr. HEINZ. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 11, line 2, insert "(a)" before "Subsection".

On page 11, between lines 5 and 6, insert the following:

(b) Subsection (c) of section 6713 of such title is amended—

(1) by striking out "and" at the end of paragraph (1),

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and", and

(3) by adding at the end thereof the following new paragraph:

"(3) consider any reduction in the amount of adjusted taxes of any unit of general local government if such reduction—

"(A) results from a specific economic dislocation which causes—

"(i) the closing of places of employment,

"(ii) declines in assessed values of, or receipt of taxes from, real property, or

"(iii) declines in sales or income tax collections of such government, and

"(B) would reduce the allocation of the unit of local government for an entitlement period by an amount equal to or greater than 20 percent of such allocation for the preceding entitlement period.

Mr. HEINZ. Mr. President, I offer this amendment in behalf of myself, Mr. D'AMATO, Mr. METZENBAUM, Mr. RIEGLE, and Mr. LEVIN.

Mr. President, I rise now to offer an amendment to the general revenue-sharing reauthorization bill. If the amendment is accepted, communities that experience extraordinary economic dislocations that dramatically reduce their revenue bases would be protected from significant reductions in their revenue-sharing allocations. The amendment will have no effect on the interstate distribution of GRS funds and negligible impact on distributions within the State. I anticipate its quick acceptance.

Mr President, let me explain the derivation of this amendment. First, I firmly believe that GRS is one of the best Federal vehicles for providing emergency economic relief. Witness, my amendment to the emergency jobs bill to accelerate GRS payments, a measure that would have gone into effect in 2 weeks rather than the 2 years it will take many jobs bill provisions to spend out.

Current GRS law contains a provision which protects jurisdictions beset by extraordinary natural disasters. Under this provision (sec. 617(c)), a community devastated by a flood or a hurricane which decimates its tax revenues, particularly from property taxes, will not suffer a consequent loss in its GRS payments. In effect, its GRS allocation is essentially "held harmless" for a year—a year during which the community has a chance to recover and during which it has a chance to meet the increased demands for social services resulting from the flood or hurricane.

Mr. President, I want to provide the same measures of protection to communities beset by similarly disastrous economic dislocations. Under my amendment (sec. 617(c)), a small community devastated by the closing of its major factory which generates massive unemployment and rapid population loss will not suffer a consequent loss in its GRS payments. Without this amendment, in these relatively rare circumstances a jurisdiction can experience a rapid fall off in tax receipts which translates into a decline in GRS allocations about 2 years later because of a time lag for data collection.

The amendment would provide such a jurisdiction with a 1-year cushion during which it will either be able to recover in economic terms or be able to adjust to its changed economic circumstances. Further that cushion would enable the community to maintain social services in the fact of the increased demands created by the economic catastrophe.

For example, in Midland, Pa., the single largest employer, the Crucible Steel Co., closed the plant, putting 5,000 people out of work in a town that only had about 10,000 jobs to begin at best. In Aliquippa, Pa., Renova, Pa., and/or for towns in any other States this amendment would provide an additional year's grace to recover from such economic blows.

COUNTERCYCLICAL FISCAL ASSISTANCE

Mr. President, as I said earlier, I believe that the general revenue-sharing program is one of the best vehicles available to us for providing fiscal relief to distressed communities during economic downturns. During the past several recessions, Federal countercyclical fiscal assistance to State and local governments has been a recurrent issue. I believe that the wrong lesson has been drawn by many of my colleagues from our experience with such programs. They can be an efficient and equitable means of assisting hard-pressed States and localities. The issue is how that assistance can be provided to governments that truly need it on a timely basis. A quick look at some history will make my point clear.

In the aftermath of the 1974–75 recession, the Treasury Department administered the antirecession fiscal assistance (ARFA) program (supplementary revenue sharing) as part of the economic stimulus package (ESP) of the Carter administration. The other ESP elements were countercyclical CETA and local public works (LPW). As a result of delays in recognizing the need for and enacting the ESP, and further delays in establishing the administrative apparatus, most ESP funds were spent long after the need for them was most acute.

State-local spending soared at an average annual rate of 9.8 percent during 1977–79. By the end of that period, inflation was rocketing upward. A number of studies have suggested that the boom in State and local spending contributed to the inflation, and that Federal grants such as the ESP helped fuel that boom.

Some observers have concluded from this experience that countercyclical fiscal assistance to State and local governments is more likely to add fuel to a postrecession inflation than to assist governments truly in need during the depths of a recession. I believe that this lesson is overstated.

A key difficulty is insuring that Federal countercyclical funds are disbursed in a timely fashion. The Congress will not enact new programs for such assistance until a recession is so serious that State and local governments can document their need for the aid, and those needs appear only after a recession is well underway—historically, when it is at or approaching its trough. As is clear from the experience with the ESP, by the time the Congress is ready to act, it is already too late to provide timely countercyclical aid to State and local governments.

Another key issue is designing countercyclical aid to satisfy the principle of minimal Federal interference with the decisionmaking processes of State and local governments. The project-approval procedures of CETA and LPW slowed the spending responses of States and local governments and distorted their decisions. Supplementary revenue sharing paid through an ARFA-type program does not face these difficulties.

Between 1980 and 1982, however, two back-to-back recessions placed enormous fiscal stress on the State and local sector. For the first time since World War II, spending by the States and local governments contributed to the depth and duration of the national recession. State and local governments appear to have survived the recessions without countercyclical aid from the Federal Government, but at an enormous cost in unemployment and deterioration in the public infrastructure that is now being documented. Indeed the emergency jobs bill passed this spring is another example of countercyclical Federal aid that will not be spent until long after the recession.

As the economic recovery proceeds, private forecasters believe State and local spending will be a declining share of national output, and will not contribute to inflationary pressures. In my view, however, the price that was paid by the American public for that result has been too high. We can do better.

We should provide a standby program of countercyclical revenue sharing to be triggered by adverse economic events early in any future recession. Payments under the program should be allocated by a statutory formula that insures targeting of the funds to those jurisdictions that are most severely affected by the recession.

Had such a program of standby countercyclical revenue sharing been in existence during the past 8 years, payment patterns would have differed substantially among the recessions that occurred. Many jurisdictions adversely affected during 1974–75 (New York City, the District of Columbia, Boston) appear to have come through the 1980–82 recessions in reasonable fiscal condition. The appropriate countercyclical formula would have provided substantial assistance to those jurisdictions during 1973–75 and much less aid, if any, during 1980–82. I am confident that such a formula can be devised, but further research on this issue is needed.

The conclusion is clear. While the pain of past recessions is still vivid, we should act to insure that future recessions do not exact an intolerable toll on State and local governments, which provide most of the public services that all Americans depend upon. We should decide now to see that a program of countercyclical revenue sharing is in place for the next recession. To accomplish this, we should amend the revenue-sharing bill before us to guarantee that appropriate studies are carried out. After the completion of the required studies, I will consider offering legislation to enact a permanent program of standby countercyclical revenue sharing that is both well targeted to need and triggered automatically by adverse economic events.

In the meantime, I urge my colleagues on both sides of the aisle to support my economic disaster amendment thereby providing some measure of protection to communities devastated by major plant closings.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. HEINZ. I yield.

Mr. DOLE. Mr. President, I understand this is an important, but a minor change. It is very important to the Senator from Pennsylvania and other Senators, probably Senators from Ohio and the industrial areas.

But it addresses only to a limited number of cases where there is severe and sudden economic change that reduces the resources available to the jurisdiction.

The only new benefit provided would be the timing. The resulting reduction in revenue-sharing payments for which the jurisdiction is eligible, would be further lagged to ease the transition to the new fiscal reality.

We estimate that this would only affect 10 to 25 jurisdictions per year and most of them would be small, under 30,000 in population.

I have no objection to the amendment and am prepared to accept the amendment.

The PRESIDING OFFICER. Is there any further debate on the amendment? The Chair hears none.

The question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment (No. 2183) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEINZ. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Chair now recognizes the Senator from New Hampshire.

AMENDMENT NO. 2184

(Purpose: To repeal the Davis-Bacon requirements for construction projects funded by revenue-sharing funds)

Mr. HUMPHREY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Hampshire (Mr. HUMPHREY) proposes an amendment numbered 2184.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the matter proposed to be inserted, add the following new section:

REPEAL OF DAVIS-BACON REQUIREMENT FOR CONSTRUCTION PROJECTS

SEC. . Subsection (a) of section 6704 of title 31, United States Code, is amended by striking out paragraph (5) and redesignating paragraphs (6), (7), and (8) as paragraphs (5), (6), and (7).

Mr. HUMPHREY. Mr. President, the purpose of the amendment is to exempt the revenue-sharing program from the provisions of the Davis-Bacon Act.

I know this matter has been discussed. Davis-Bacon has been discussed extensively in the Chamber. It is not necessary to go into great length, and I shall be brief, further because I know Members are anxious to go home, but just let me make these very brief points.

Mr. President, the General Accounting Office has conducted a number of studies over the years on Davis-Bacon, and each and every one of those studies concluded that Davis-Bacon should be repealed because it adds an enormous additional cost to construction projects.

In recent testimony before the House Subcommittee on Intergovernmental Relations and Human Resources, it was revealed that some local governments actually avoid committing revenue-sharing funds to construction projects because paying the artificial contrived prevailing wage makes the project too expensive.

It was also found that workers on Federal projects under the Davis-Bacon requirements were being paid at twice as much as their counterparts on a nearby private project.

According to the Associated Builders and Contractors, unemployment for individuals in the building trades is hovering around the 20-percent mark.

My point is, Mr. President, for those who are concerned, as all of us are, I think, about unemployment in the construction trades, we should free up revenue-sharing money, and exempt the program from Davis-Bacon provisions so that more of the funds under revenue sharing will be committed to construction projects versus administrative costs.

We have heard a lot of fine speeches today about concern for the pinch in which communities find themselves. Let us ease up on the communities and allow them to spend this money in a way they choose by exempting the

revenue-sharing program from the strictures of the Davis-Bacon Act.

Mr. President, if the managers are willing to agree to accept this fine amendment, I shall not ask for a roll-call vote.

Mr. HEINZ. Mr. President, as one of the managers of this bill, I do not know if I speak for Senator DOLE or not, but I would have to reluctantly oppose this amendment; maybe not so reluctantly, because, frankly, I do not think this is the right bill on which to have a Davis-Bacon amendment.

Most of the money in this bill simply does not go into capital budgets. It goes to operating budgets. So I would argue in the first instance that this just is not the right bill. You would have, I say to my friend from New Hampshire, a much stronger case on the housing bill.

The second thing I would say is that, as I understand the administration's position, they are not in favor of repealing Davis-Bacon. They are in favor of reforming it, but they are not in favor of repealing it. That being the case, as I understand the administration's position, I would oppose it.

I am not one of those who is temperamentally inclined to support the repeal of Davis-Bacon in any event. That is a personal matter of mine. But on the first two, I think those are issues of public policy that I hope my colleagues would agree with.

Mr. DOLE. Mr. President, as I understand it, the Senator from New Hampshire would like a record vote. Obviously, he has a right to a record vote. I would just say this amendment came as a surprise to the manager of the bill.

I support efforts to limit the applicability of Davis-Bacon. I cannot support this amendment. We have been trying to determine the administration's position. It seems to me there will be further opportunities to do that.

I have no quarrel with the Senator offering the amendment. It just seems to me that until I know more about the amendment and more about the impact it would have, I am inclined to vote against it.

I hope what we might do, so that we might help some Senators who have appointments starting about now, is get the yeas and nays on the amendment, and then let the Senator from Minnesota offer an amendment which is going to be accepted—it is simply a study amendment—then we can have a vote on the Senator's amendment and final passage, and some could leave right after they voted on final passage. Is there any objection to that?

Mr. HUMPHREY. Mr. President, I do not object to the agreement. But I would like to have opportunity to reply to some of the points raised in rebuttal to my argument at this juncture.

Mr. President, the Senator from Pennsylvania makes the point that only a small part of the funds under revenue sharing are committed to construction projects. I reiterate that recent testimony before the House Subcommittee on Intergovernmental Relations and Human Resources revealed that communities did not commit a very large share of revenue sharing funds to construction for the very reason that Davis-Bacon makes it so extraordinarily expensive, in some cases twice as expensive, to construct projects with revenue-sharing funds than the costs of local projects that have been privately funded.

That is why a great deal of revenue-sharing funds are not committed to construction, because of this Davis-Bacon stricture that I am trying to remove.

It seems to me this is the perfect opportunity, with respect to revenue sharing, to address Davis-Bacon. I am not trying to repeal or modify Davis-Bacon across the board. I am simply trying, for the sake of the communities, to give them the flexibility to spend this money in the way that best suits them without them being biased away from construction projects by the inflation that Davis-Bacon brings to the cost of such construction projects.

So, while I regret any inconvenience the vote might cause my colleagues, I think it is important. And I would, at this juncture, ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, the yeas and nays have been ordered. I ask unanimous consent to temporarily set aside the amendment so that we might take up the amendment of the distinguished Senator from Minnesota, which is a study amendment worked out with the Senator from Texas (Mr. BENTSEN), to which there is no objection.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AMENDMENT NO. 2186

(Purpose: To require a study of certain federalism issues)

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. DURENBERGER) proposes an amendment numbered 2186.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the committee amendment add the following:

STUDIES OF FEDERALISM ISSUES

SEC. . (a)(1) The Secretary of the Treasury, the Secretary of Commerce, the Comptroller General of the United States, and the Chairman of the Advisory Commission on Intergovernmental Relations shall undertake a series of studies on federalism and the future role of the Revenue Sharing Program in the Federal system.

(2) The studies which are required to be made under paragraph (1) shall include an evaluation of the Revenue Sharing Program provided under chapter 67 of title 31, United States Code, and shall, in addition, address the following issues:

(A) The concept of returning revenue sources, such as Federal excise taxes or a percentage of the Federal individual income tax, to State and local governments, along with responsibility for programs and activities for which financial assistance is now provided by the Federal government through grants-in-aid and other forms of Federal domestic assistance.

(B) The long-term outlook for the fiscal condition and fiscal capacity of Federal, State and local governments.

(C) The impacts of the cyclical nature of the economy and other exogenous factors, such as unemployment, on the expenditures, needs and revenue raising capability of Federal, State and local governments, and the responsiveness of the distribution of Federal financial assistance to such factors.

(D) The responsiveness of the distribution of Federal aid to the fiscal capacity of State and local governments.

(E) The responsiveness of the distribution of Federal assistance to the need for services of State and local governments and to cost-of-living/cost-of-government differentials.

(F) The mathematical forms, data, and administration of Federal grant formulas, including the alternative allocation formulas provided under this Act.

(G) Alternative measures of fiscal capacity, such as State gross domestic product estimates and the Representative Tax System, for the allocation of funds under chapter 67 of title 31, United States Code, and for other major Federal grant programs, including an analysis of the strengths and weaknesses of the fiscal capacity measures.

(H) The impact on State and local governments of modification of the provisions of the Internal Revenue Code relating to the deductibility of State and local government obligations.

(I) Possible trade-offs between modifications described in clause (H) and general purpose fiscal assistance.

(3)(A) The studies which are required to be made under paragraph (1) shall be designed and conducted in consultation with recognized organizations of elected officials of State governments and of those elected officials of local governments that currently receive payments under this chapter, and representatives designated by such organizations.

(B) The organizations with whom consultation is required under subparagraph (A) and the representatives of such organizations.

(i) shall be representative of all regions of the United States, and

(ii) shall not include the advisory Commission on Intergovernmental Relations.

(C) Not later than the date that is 30 days after the date of enactment of this Act, an advisory Group shall be established by the Secretary of the Treasury, whose designated representative shall serve as chair. The membership of the Advisory Group shall include representatives designated by the other agencies and organizations referenced in paragraphs (1) and (3) of this subsection. The Advisory Group shall serve as the primary vehicle for the consultation provided for by this section, and shall meet not less frequently than once each quarter to review the progress of the studies.

(b) After consulting with the organizations and representatives with whom consultation is required under subsection (a)(3), the Secretary of the Treasury, in concurrence with the Secretary of Commerce, the Comptroller General of the United States, and the Advisory Commission on Intergovernmental Relations, shall submit to the President and the Congress, before the date that is 60 days after the date of enactment of this Act, an initial report which shall provide—

(1) a detailed plan for—

(A) Assigning agency responsibility for conducting the studies which are required to be made under subsection (a)(1), and

(B) disseminating the final reports on such studies to all persons directly affected by the findings of such studies and to the general public;

(2) any separate and dissenting views of the organizations with whom consultation is required under paragraph (3)(A) and an explanation, where appropriate, of why such views were not incorporated into the detailed plan required by paragraph (1); and

(3) an estimate of the appropriations which will be required to carry out the provisions of this section.

Such initial report shall take into account the views of the organizations and representatives consulted and shall include a statement that describes those views.

(c)(1) The Secretary of the Treasury, the Secretary of Commerce, the Comptroller General of the United States, and the Chairman of the Advisory Commission on Intergovernmental Relations shall submit to the President and the Congress before June 30, 1985, final reports on the findings of the studies which are required to be made under subsection (a)(1). The final reports shall include recommendations and a separate statement of any minority views.

(2) Before the final reports are submitted to the President and the Congress as required under paragraph (1), the organizations and representatives with whom consultation is required under subsection (a)(3) shall have an opportunity to review the final reports. The final reports submitted to the President and the Congress under paragraph (1) shall include separate statements of the views of such organizations and representatives regarding the final reports.

(d) There are authorized to be appropriated for each of the fiscal years 1984, 1985 and 1986, the lesser of—

(1) such sum as may be necessary to carry out the provisions of this section during such fiscal year, or

(2) a sum equal to 5 percent of the cost of administering chapter 67 of title 31, United States Code, for such fiscal year.

Mr. DURENBERGER. Mr. President, this amendment provides for a series of studies to be conducted over the next 3 years on the present condition of the American intergovernmental system with the intended purpose of making recommendations and laying the foundation for future federalism reforms. It provides that in close consultation with elected State and local officials and their representatives, the Department of the Treasury, the Department of Commerce, the General Accounting Office, and the Advisory Commission on Intergovernmental Relations undertake a series of studies on the following matters:

The concept of returning revenue sources to State and local governments along with the responsibility for programs and activities currently supported by the Federal Government;

The long-term outlook for the fiscal condition and fiscal capacity of Federal, State, and local governments;

Federal allocation formulas currently in use to distribute approximately $90 billion in Federal financial assistance; and

Other indirect Federal subsidies to State and local governments such as the deductibility of State and local taxes on the Federal income tax and the extensive use of tax-exempt bonds for purposes other than general governmental functions.

I have been intimately involved in the recent attempts to put together a comprehensive "New Federalism" package. The President's initial efforts to forge a grant exchange of responsibilities failed, and many have now pronounced New Federalism dead. But, Mr. President, New Federalism is far from dead. It is progressing piecemeal through the budget process as we continue to reduce the real dollar value of Federal assistance to State and local governments. New Federalism is a reality and will continue to be so. Whether you care to call it New Federalism, the fact is, we will continue to return responsibilities to State and local governments. The problem is, we are not doing so in any systematic manner with close attention to the policy implications of our accumulated budgetary actions.

I do not believe the budget process is the way to bring about such fundamental change. What I hope to accomplish with these studies is a thorough analysis of some of the most important areas of intergovernmental fiscal relations so that by the next time general revenue sharing is up for reauthorization, we are in a better position to consider New Federalism in its policy context not just as a budget exercise.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter dated August 3, 1983, from the National Association of Counties, National Conference of State Legislatures, United States Conference of Mayors, National Governors Association, and the National League of Cities, together with a letter dated September 21, 1983, from the National Governors Association.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AUGUST 3, 1983.

Hon. DAVID DURENBERGER,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR DURENBERGER: During the Finance Committee markup of S. 1426, you recommended that Congress institute and fund an in-depth study of the effects and merits of various changes to the general revenue sharing formula. Federal agencies mentioned as participants in the study were the Treasury Department, the General Accounting Office, and the Advisory Commission on Intergovernmental Relations. It was also recommended that state and local government organizations participate in a meaningful way in the project.

We are contacting you to express our support for the study and to offer recommendations concerning its organization and implementation. First and foremost, we wish to express our conviction that state and local government organizations must be involved substantially in the study during all stages of its development. We define substantial involvement as an equal sharing in the direction of and responsibility for the project with the participating federal agencies. State and local governments will be the parties most affected by the study conclusions and it is vital that their experience with the general revenue sharing program be brought to bear in a significant way in the study process.

Second, we wish to emphasize the importance of maintaining objectivity with regard to the study process and recommendations. Both the GAO and ACIR have advocated certain changes to the revenue sharing formula in the past. We advise that these recommendations not be permitted to influence the structure or conclusions of the proposed study in any way beyond providing background for the current effort. Again, we feel that substantial participation in the study by the state and local organizations will help to insure that the views of no single agency or group unduly influence study deliberations.

We thank you for your support of this study and would welcome an opportunity to discuss further with you the appropriate role for our organizations.

Sincerely yours,

MATTHEW B. COFFEY,
Executive Director,
National Association of Counties.

EARL MACKEY,
Executive Director,
National Conference of State Legislatures.

JOHN GUNTHER,
Executive Director,
United States Conference of Mayors.

RAYMOND SCHEPPACH,
Executive Director,
National Governors Association.

ALAN BEALS,
Executive Director,
National League of Cities.

NATIONAL GOVERNORS' ASSOCIATION,
September 21, 1983.

Hon. DAVE DURENBERGER,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR DURENBERGER: As you know, NGA has for some time been discussing state fiscal capacity and the other federalism issues addressed by the study amendment you plan to propose in the floor debate on the General Revenue Sharing Program. We strongly support further research in this area, and we would be pleased to participate in studies undertaken as a result of it. Beyond this, we have specific comments on two points:

1. Participation of State Governments: Due to a grammatical construction (page 2, lines 26-27), state governmental representatives might be excluded from the study advisory group. I believe discussions between our staff and yours have already resolved this issue, but just to make the point doubly secure, I want to urge directly that state representatives be active participants in the study. Without such participation, the study would not have the widespread credibility crucial to its success.

2. Assignment of Study Topics: The intergovernmental community is quite sensitive about many elements of the agenda set forth in your amendment. Consequently, it is absolutely essential to avoid the charge, both during floor debate and once the studies are underway, that the work is being undertaken by analysts whose views may already be formed. Neutrality must be assured, particularly on such matters as state-local fiscal capacity and federal tax provisions affecting the deductibility and tax-exemption of state and local revenues. One approach would be to assign the fiscal capacity staff work under the study to Treasury and the tax work to ACIR, either in the legislation or through a floor colloquy.

On another issue relating to revenue sharing, I hope we will have your help in retaining the state authorization for payments, preferably without the Levitas Amendment. We were disappointed in the action taken by the House of Representatives during its floor debate and hope you will work to preserve the state authorization both in Senate deliberations and in conference committee.

I greatly appreciate your continued leadership in pursuing fiscal issues that must be resolved if the intergovernmental system is to function effectively in the future. We have been in touch with Governor Snelling, NGA's Lead Governor on Federalism, about your amendment, and you may hear directly from him. Please let us know how the National Governors' Association can be of help in assuring the success of your efforts.

Sincerely,

RAYMOND C. SCHEPPACH,
Executive Director.

Mr. BENTSEN. Mr. President, if the Senator will yield, is this the amendment as we agreed on certain changes?

Mr. DURENBERGER. This is the amendment on which we have labored the last 6 weeks and on which we have reached an agreement.

Mr. BENTSEN. Mr. President, I would like the Senators assurance that the Advisory Commission on Intergovernmental Relations (ACIR) will not be involved in any aspect of the study relating to the representative tax system. ACIR developed the RTS and has a vested interest in seeing the model adopted, I would hope the study commissioned as a consequence of this amendment would be a fair and unbiased review of formula factors.

Mr. DURENBERGER. I agree that the ACIR has a vested interest in promoting the representative tax system model, and understand that having ACIR involved in a study of RTS may produce a perception that the results are biased. It would be my expectation that ACIR itself would want outside objective confirmation of the RTS as I would. I would expect that Treasury would undertake that portion of the studies dealing with the RTS. At the same time, I would expect ACIR to do that part of the study dealing with tax-exempt bonds.

Mr. BENTSEN. Will the Senator clarify for the record the role he expects representatives of States, counties, and municipalities to play in the design and implementation of this study. Specifically, will the organizations representing the various jurisdictions be free to select the individuals who will represent them?

Mr. DURENBERGER. I assure the Senator that the representatives of States, counties, towns, townships, and municipalities will have an active and meaningful role in the design and execution of this study and in the preparation of recommendations contained in reports of the study findings. Yes, the representatives of the jurisdictions will be selected by their respective organizations, with the method of selection to be determined by each organization. The only constraint will be the mandate that those participating in the study will represent a broad geographical cross section of the country and include members from States where severance taxes represent a substantial portion of State revenues.

Mr. BENTSEN. I would appreciate the Senator's assistance in clarifying the distribution of authorized funds. The amendment permits funding at 5 percent of the cost of administering the general revenue-sharing program for each of 3 years. How will those funds be allocated? To which agencies will they be allocated, and what portion of the study will be undertaken by each of the participating agencies?

Mr. DURENBERGER. It is not possible to determine exactly how the funds will be distributed until the details of the study are worked out by those conducting the research. But in discussions with ACIR I have been given the $250,000 to $300,000 figure. This sounds reasonable.

Mr. BENTSEN. Will the State, county, and local participants in this study receive funding under this proposal? How much has been set aside for these groups, and what responsibilities will that set-aside cover?

Mr. DURENBERGER. This too must be determined when the detailed plan is drafted; however, I expect that something on the order of $300,000 would be available.

Mr. BENTSEN. Mr. President, the Senator from Minnesota has come a long way in addressing my concerns and those of Senator BAUCUS over provisions incorporated in the pending amendment. His original proposal to bar State and local officials from participating in the study has been modified. The proposal now before us assures consultation, although it falls short of accepting these officials as full partners in the design and implementation of the study. The initial draft was far less clear on the question of responsibility for coordinating the study. The proposal now before us assigns to the Department of the Treasury the task of transmitting any reports and designates the Secretary of the Treasury Chairman of the Advisory Panel established to permit consultation with State and local officials. Initially, all funding for the study was to be authorized for 1984 and, at $1 million, would have amounted to nearly 15 percent of the $7 million expended annually to administer the entire general revenue-sharing program. This provision, too, has been modified to restrict funding to the lesser of actual costs or 5 percent of the GRS administrative budget for 3 years.

While I continue to question the need for the proposed study and the likelihood that an objective analysis will be made by those who have a major interest in implementing the representative tax system, I am cognizant that the House-passed language is far more prejudicial to the Southern and Western States, and I will therefore not move to table the amendment so that this more moderate alternative proposal will be on the table during conference.

Mr. LEVIN. Mr. President, I rise in support of the Durenberger amendment.

I had considered offering an amendment to the current interstate formula, which would have substituted the Representative Tax System (known as RTS) as the indicator of fiscal capacity for relative per capita income and tax effort. RTS has been proven to be a more equitable and complete measure of a State's ability to raise revenues than the factors in the current formula. I strongly believe that the current formula is inequitable—frequently benefiting the States that are taxing their people and institutions less than States taxing their people and institutions more. I have agreed instead to support the amendment of Senator DURENBERGER calling for a major study of the revenue-sharing program and the current operating formulas, with consideration to be given to the advantages of using the Representative Tax System. I have

also asked Senator DURENBERGER, and he has agreed, to add to the study amendment language requiring consideration of unemployment and cost-of-living as possible factors in distribution of revenue-sharing funds. I have increasing concern that the current revenue-sharing formula does not adequately adjust for major economic hardships within a State such as sudden and significant unemployment. Nor does it allow for consideration of the differences in cost-of-living between the States. I am told that cost-of-living statistics are not kept on a State-by-State basis. I hope this study will be able to assess whether it would be valuable to obtain such information, and if so, how it could best be used.

I want to thank Senator DURENBERGER for his cooperation in adding these two factors to his study, and I urge, Mr. President, the immediate passage of Senator DURENBERGER'S study amendment and the reauthorization bill.

Mr. BAUCUS. Mr. President, general revenue sharing is a program that affects nearly every American. Our counties, our cities, our towns depend on revenue-sharing funds to provide necessary services of local government. I strongly support prompt reauthorization of this program.

But, I am opposed to using this important program as a vehicle to redistribute Federal funds among regions of this Nation.

Mr. President, I am continually impressed by the commitment and the expertise demonstrated by my colleague, the Senator from Minnesota, in the areas of intergovernmental relations and federalism. I agree that we should thoughtfully review and study these matters, and the Federal programs that affect governments at all levels.

But, I am disappointed that he insists on pursuing the Representative Tax System, known as RTS, as a way of changing those intergovernmental relations. The Senator from Minnesota has expressed his belief many times that RTS should replace per capita income in funding formulas for many Federal programs, including general revenue sharing. Mr. President, this is the opening shot in a battle which will rage royally in this Congress and in the future.

I will not object or argue against the language proposed by the Senator from Minnesota.

The reauthorization bill passed by the House of Representatives commissions a study of the revenue-sharing formula and RTS. The study would be done by the Advisory Commission on Intergovernmental Relations (ACIR), whose technicians originally created the RTS, the Treasury Department, and GAO.

I disagree with the assumptions in that study language. For one thing, I subscribe to the theory that "if it ain't broke, don't fix it." The formula for general revenue-sharing funds works well, and I have not heard any justifications for changing it. And, the proponents of the House study are assuming that RTS is the appropriate change to make. That is certainly jumping to conclusions.

I appreciate the willingness of the Senator from Minnesota to work with me and with Senator BENTSEN and with other concerned Senators on this matter. He has, in my estimation, improved this study very much. I am not fully pleased with the text of the amendment, but I will accept it. I think it is much better, and will yield a much unbiased result than the study called for in the House bill. I hope that the Senator from Minnesota will work in the conference to protect the Senate language in this matter.

To some, RTS may have intellectual appeal. But in theory and in practice, RTS is seriously flawed.

First of all, RTS rewards States that levy high taxes. If one State chooses to provide a lower level of government services than another State, or provides the same services more efficiently, that State will be penalized under RTS for imposing lower taxes in the aggregate. The State with lower measured "tax effort" in relation to estimated "tax capacity" will be penalized through Federal programs and receive a smaller allotment of Federal funds.

Mr. President, I do not think the Federal Government should be in the business of dictating an appropriate level of taxation and services to sovereign States.

In addition, the Federal Government should not dictate the kinds of taxes that States and local governments should levy. Montanans have overwhelmingly decided not to impose a State or local sales tax. Sales taxes are terribly regressive. Instead, we rely principally on property taxes, income taxes, and various license and user fees. Yet, the RTS measures Montana's tax base for a hypothetical sales tax, and requires the State to raise those or equivalent revenues.

REGIONAL BIAS

Besides these philosophical issues, Mr. President, I am deeply disturbed by the strong regional bias inherent in the RTS.

RTS discriminates against rural, sparsely populated States. Densely populated States are guaranteed to have a lower tax capacity score than their rural neighbors. This means that the inevitable result of adopting RTS in Federal aid formulas is to transfer funds from most Western and Southern States to more densely populated States.

For instance, the RTS estimates Montana's severance tax capacity to be $29 million and gives my State a score of 250, while Ohio with $49 million in capacity receives an RTS score of 32. With an estimated farm property tax capacity of $84 million, Montana receives an RTS score of 551 while Florida, with oranges and agricultural products galore, scores 54 with an estimated capacity of $93 million. California scores 50 in the RTS with an estimated capacity of $219 million.

The RTS converts fiscal capacity to a population factor which is already provided for in the general revenue-sharing formula. It is a law of mathematics that a tax base divided by a large population will always produce a lower tax capacity than the same base divided by a small population.

Let me give you some examples of how this works. Farm property taxes provide a good example. Illinois, with an estimated farm property tax capacity of $371 million, the largest in the Nation, receives an RTS score of 172. Kansas, with an estimated capacity of only $152 million scores 334. Poor South Dakota, with even less population, scores 637 with a tax capacity of $85 million. The average RTS score, I should point out, is 100.

This bias occurs in most tax capacity categories, especially where the tax base is not related to population. In corporate income tax capacity Delaware scores 140 on the RTS with an estimated tax capacity of $46 million. Massachusetts has a much higher capacity, $261 million, and scores only 79 under RTS—21 points below the average. This means Massachusetts would qualify for better matching rates or higher levels of funding under a Federal formula based on RTS.

In severance tax capacity, Illinois scores 34 with an estimated capacity of $56 million. Utah, with half that capcity—$29 million—receives an RTS score of 146.

AGRICULTURE

In addition to discriminating against sparsely populated States, RTS treats agricultural States unfairly. The RTS estimates developed by the Advisory Commission on Intergovernmental Relations maximize the estimated tax bases of rural States and discount those of the more industrial States.

The RTS uses the annual average sale price per acre of farmland, while 43 States assess their farmland based on its productive capacity. If farmland was taxed on its market value, little of it would remain in agriculture. To equal the RTS estimate of its tax base, Montana would have to assess its farms at quadruple the current rate. Kansas would have to triple its farm assessments.

According to the average sale prices, Ohio's farm land is three times as valuable as that of Kansas. Yet, Ohio's

RTS score is four times lower than the Kansas score.

To add insult to injury, the RTS turns around and then discounts the value of corporate and industrial property, which is more important to the tax capacity of urban States, by using the net value of that class of property.

PER CAPITA INCOME

Proponents of RTS would use that tax effort measurement to replace per capita income in Federal funding formulas.

Formulas for Federal programs are developed through the political process. They are not always "tidy" or intellectually appealing. We try to tailor those formulas to target funds and services to where they are needed.

Per capita income has historically been included in many formulas to approximate the level or intensity of need for services. It is hard to measure the relative wealth of a State or its people. But for many years we have used per capita income as a proxy, and I think that proxy has worked well.

Using per capita income removes the problems of comparing States with diverse economies, or different industrial bases. If used properly, per capita income does not bias a funding formula against rural and low-population States.

CONCLUSION

The recession has hurt us all. I fully understand and sympathize with my colleagues from industrial States, with slowed down and shut down factories and painfully high unemployment.

But times are tough all over.

Unemployment is high in Montana, too. In the western part of Montana, the timber industry has been depressed for years. We have had 30 percent and higher unemployment in some of those counties, with no relief in sight.

America's farmers and ranchers are in deep financial straits. Despite Federal farm programs, many farmers and ranchers are working from before dawn until after dark and still sliding inexorably into debt.

Ancillary industries, like farm implement dealers, are going broke because nobody can afford to buy their products.

Times are tough all over. But we are all in this together. We cannot solve our economic problems by picking away at each other.

Robbing Western and Southern States will not solve the problems of the Northeast and the Midwest. Instead of encouraging regional division and polarizing our Nation, I hope my colleagues will join in seeking more permanent, more far-reaching solutions.

The PRESIDING OFFICER. Is there further discussion or debate on the amendment?

The question is on agreeing to the amendment of the Senator from Minnesota (Mr. DURENBERGER).

The amendment (No. 2186) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, as I understand it, the pending matter is the amendment by the distinguished Senator from New Hampshire, Senator HUMPHREY.

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Mr. President, I indicated to the Senator from New Hampshire that if we could limit the debate on the amendment I would be prepared to give him an up or down vote. There are a number of Senators who have indicated that if that is the case they want to talk at length on this amendment. There may be a motion to table the amendment, but I am not certain of that.

As far as the Senator from Kansas knows, there are no other amendments except the pending amendment and then third reading and final passage.

As I indicated in my statement, the Humphrey amendment came as a surprise to this Senator. I hope we might be able to defeat the amendment. We can consider it at some appropriate time. But this was sort of a last minute effort and I am not prepared to really debate the amendment. Maybe I should be. We are trying to find out what the administration's position might be on it and we have not determined that. But certainly the Senator from New Hampshire has a right to press the amendment.

I am prepared to vote against the amendment, which is not my position on Davis-Bacon matters, because I do not think it should be on this legislation.

Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, when the Davis-Bacon provision was first added to the revenue-sharing program, I fought against it as hard as I knew how to fight against it. It was a great disappointment to me that we were not able to defeat the amendment that added the Davis-Bacon Act to the revenue-sharing program. My thought still is that the program should be relieved of this provision.

Mr. President, if we proceed to vote on this on the merits, and there are a lot of Senators who agree with me on this issue, we are not going to vote for it because this is obviously the 11th hour. Many people who agree with the Senator from New Hampshire are not aware the amendment is being offered, and have not had the opportunity to make themselves heard or to rally behind the amendment and support it. It is simply not going to prevail. I suspect it will lose by a much bigger vote than it ought to lose by.

Because I just do not feel, Mr. President, that it would do justice to the proposal to offer it at this late hour—when a great number of people who would have supported it, if they had known it was going to be offered in advance, will not be in a position to support it—I think it would be best that we table the amendment. Therefore, Mr. President, I move that the amendment be laid on the table.

Mr. HUMPHREY. Mr. President, will the Senator withhold that motion? I believe I can save some time.

Mr. LONG. I will withhold.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, a vote on the tabling motion will certainly not serve my purpose. I ask unanimous consent to withdraw the amendment at this time.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

Mr. HUMPHREY. I thank the Chair.

Mr. HELMS. Mr. President, few Members of this body will argue with the suggestion that State and local governments need more money to provide services their citizens need. Likewise, few would challenge the overall merit of the general revenue-sharing program generally.

However, it makes little sense to take money from the taxpayers with one hand and give it back with the other, as is the case with the revenue sharing. Somehow, after the bureaucrats are finished sifting through the money, taxpayers never get back all they put in.

I have long believed the term "revenue sharing" is a misnomer. Let us face it—our Treasury is penniless. We are deeply in debt. There is no revenue to share.

I was impressed with an article that appeared in the Wall Street Journal recently that referred to revenue sharing as "deficit sharing."

At last report, the experts were predicting a $200 billion Federal deficit for next year alone. Our total Federal debt now exceeds $1 trillion. The Federal Treasury has $1 trillion less than nothing.

Mr. President, there has been a fiction catching hold that is deeply disturbing. That is, that the Federal Government is the repository of money, and a benevolent Congress sits up here and decides how much we will let the taxpayer keep from his or her earnings. The cart is before the horse. Congress has taken the position that we

will decide how much we are going to spend before we decide how much we have to spend.

I cannot support reauthorization of the general revenue-sharing program, not because it is unworthy or fraught with waste. I simply cannot go along with the fiction that the Federal Government has any money to share. And I cannot go along with adding another $14 billion to an already enormous Federal debt. If we are ever to get our economic house in order, it will take the fortitude to vote against expenditures of this kind.

Mr. PRYOR. Mr. President, I rise today to urge my colleagues to support prompt, favorable consideration of legislation to reauthorize the general revenue-sharing program. Revenue sharing is an outstanding example of the Federal Government's ability to assist local governments to meet their fiscal needs.

The unique feature of this program, as we in Congress know, is that it allows Federal dollars to flow to local governments to address their specific needs. This is an efficient utilization of Federal funds, because, in contrast to categorical grant programs, under the revenue-sharing program, local officials have the freedom to apportion funds to the problems they deem most pressing.

General revenue sharing was created by the State and Local Fiscal Assistance Act of 1972 (Public Law 92-512) and was subsequently extended for 4 years in 1976 by the State and local fiscal assistance amendments (Public Law 94-488). Once again in 1980, with the enactment of the State and Local Fiscal Assistance Act Amendments of 1980 (Public Law 96-604), the general revenue-sharing program was reauthorized for 3 more years. However, authorization of this program will expire on September 30, 1983, unless it is reauthorized. I believe the general revenue-sharing program has been a tremendously important program providing State and local governments with valuable general purpose fiscal assistance. In fact, passage of revenue sharing marked a fundamental change in intergovernmental relations.

Continuation of the general revenue-sharing program is extremely important both in terms of fiscal impact and budgetary planning stability to State and local governments. According to a National League of Cities survey, over 40 percent of all small cities now receive no other Federal aid, and 80 percent of cities surveyed said they would be forced to cut services next year if the program were reduced or eliminated. In addition, 50 percent of such small cities said they felt they would be forced to raise taxes if revenue sharing is not continued.

The success of the revenue-sharing program in the State of Arkansas is widely acclaimed. The total amount of general revenue-sharing program funds received by all municipalities in the State of Arkansas was $43,441,575 in fiscal year 1982, and will be approximately $46,413,653 in fiscal year 1983, if the program is reauthorized.

Mr. President, I have been a consistent supporter of the revenue-sharing program and I strongly support continuation of the program.

It is important, Mr. President, that the Senate act expeditiously in this matter. Local officials are trying to plan their budgets for fiscal year 1984 and beyond. We, in Congress, can make their jobs more rational by quickly approving a bill, so that they will know what kind of Federal assistance their jurisdiction can expect.

This program deserves strong congressional support, both for now and in the future. The funds provided to local governments through the revenue-sharing program are used for a variety of important projects, from the creation of jobs to the rebuilding of local infrastructures. Mr. President, I am told by local officials that this is the one program that affords them the flexibility to actually target Federal funds to specific local needs. Such a program, in light of the financial strains of local governments, is sorely needed.

Mr. SASSER. Mr. President, I rise in strong support of rapid action on the renewal of the general revenue-sharing program at adequate funding levels. During the August recess, I had the opportunity to meet with numerous local officials in Tennessee. From Mountain City to Memphis, they all voiced their strong support for continuation of this important program of aid to local governments.

There is just no question that this program is viewed positively, both by our Nation's local officials and from the Washington perspective. Officials of local communities like the program because they can decide where and how the money is to be spent. We here in Washington are impressed with this program, too, because it is so efficient. Less than 1 percent of revenue-sharing funds go for overhead and administrative costs. That means that the greatest possible proportion of the money is targeted by local government officials toward areas of greatest need.

Since the general revenue sharing program began in 1972, Tennessee has received more than $1 billion from the program. Local officials in my State have used these funds wisely to provide a wide variety of essential services including police and fire protection, highway maintenance, and education.

A sampling of projects funded in middle Tennessee, for example, includes: the purchase of an ambulance, the placement of street and traffic lights, improvements to police and fire facilities, and expenditures for libraries.

Many of these local governments would be forced to either raise taxes or cut services if revenue sharing is not made available.

One Tennessee government, for example, the city of Chattanooga, allots $2.6 million of their annual $3.8 million annual revenue sharing funding for use in the operating budget. The rest goes to vital capital projects. If revenue-sharing funds were not available to Chattanooga, then it would take a 32-cent increase in the property tax to replace it. Or services to Chattanoogans would have to be cut in proportion to the funding reduction.

The town of Murfreesboro, Tenn., would face a 45-cent increase in property taxes without revenue sharing.

Shelbyville, Tenn., would have to raise the property tax rate 50 to 60 cents if revenue sharing is not made available.

Revenue sharing is especially important to these—and other—local communities in my State because of the tax base which is limited by the permanent restraints of the State constitution. The same situation exists in many other States. We have a responsibility to all of the 39,000 local governments across this country to continue to fund revenue sharing to help them provide public services to our mutual constituents.

We must act quickly on the renewal of this vital program. Already, the delay in reauthorization has caused undue complications in the preparation of municipal and county budgets. Most of these budgets had to be complete by July 1. Revenue-sharing allocations could not be assumed for this deadline because Congress has not yet acted to renew the program.

I support Senator MOYNIHAN's amendment to increase revenue-sharing funding by $450 million annually. Adjusting the program upward makes partial amends for the erosion of the program by the effects of inflation.

However, I do not favor modifications in the revenue-sharing formula that would be triggered by any increases in funding under the current provisions of S. 1426. These formula changes would mean that only about half of the local governments now receiving revenue sharing would be eligible to share in the $450 million increase.

That hardly seems fair. All local governments are now experiencing financial stress due to inflation and the recession. That is why I also support Senator LONG's amendment to delete these formal modifications.

With these changes in S. 1426, I wholeheartedly support this renewal. I encourage rapid action on this legislation.

Mr. SPECTER. Mr. President, one of the most pressing issues confronting the Congress today is the reauthoriza-

tion of the Federal general revenue-sharing program. Revenue sharing constitutes the most productive partnership between Federal and local governments. It comprises the single largest Federal program assisting local authorities, providing $4.6 billion annually. General revenue sharing is a comprehensive and flexible program, allowing funds to be used for a wide range of programs and activities, determined at the local level, and giving localities the opportunity to respond quickly to new problems.

For my State of Pennsylvania, the general revenue-sharing program has provided an annual allocation of $225 million. These funds have been used for various essential expenditures such as services for the poor, elderly, and youth, fire and police protection, transportation, and recreation activities.

The need to continue this program has been fully documented. A recent Pennsylvania survey found that revenue sharing accounted for almost 17 percent of the average local budget. It is the only direct Federal funding for more than 93 percent of all municipalities in Pennsylvania. If revenue sharing did not receive reauthorization, at least 87 percent of Pennsylvania localities would be compelled to compensate by raising taxes or cutting services. If a municipality's current general revenue-sharing entitlement had to be raised from property taxes alone, it would add an average of 4.4 mills, or a total increase of 61.2 percent, to the property tax rate.

Mr. President, I am convinced that the general revenue-sharing program is worthwhile and deserving of reauthorization. As an indication of my support, I have cosponsored S. 41, a measure introduced by Senator DURENBERGER that extends the program another 3 years.

Despite its loss in value due to inflation, revenue sharing in recent years has become more vital to municipalities. Present economic conditions have exacted a harsh toll upon the tax base of many local governments. In addition to the problems caused by a recessionary economy, local governments are facing substantial reductions in Federal aid. According to the Library of Congress, Federal assistance fell 9.32 percent from fiscal year 1981 to fiscal year 1982, and 11.8 percent from fiscal year 1982 to fiscal year 1983.

If it were not for the fact that we face a $200 billion deficit, I would like to see an increase in the funding for revenue sharing. If we could afford it, I would like to see an increase in funding to account for the rate of inflation since 1975, and index future payments to the rate of inflation.

Such action would place revenue sharing on the same footing as much of the rest of the Federal budget. Most of the so-called entitlement programs are already indexed to inflation, the rate of increase in the defense budget takes inflation into account, and the Congress in 1981 indexed personal income taxes to inflation. Unfortunately, the Federal deficit is too high at the present time to take these steps, but I am hopeful that we can make such additions in the future.

In terms of efficiency and effectiveness, the general revenue-sharing program is an ideal Federal response to the fiscal problems and revenue constraints of local governments. It is entirely consistent with the administration's New Federalism proposal. The program allows local governments wide latitude to determine their most pressing needs and allocate their revenue-sharing dollars accordingly. Administrative costs for this program are less than 2 percent, requiring fewer than 100 Federal employees to manage what is the largest Federal grant program—a total of $4.6 billion allocated to 39,000 units of government. Our budgetary problems would be reduced considerably if all Federal programs had a similar track record.

Clearly, general revenue sharing has been a success in Pennsylvania and throughout the Nation. It serves as a positive model for future partnerships between the Federal Government and local communities. To govern most efficiently our local officials must continue to have the authority to respond to their particular needs and problems. Reauthorization of revenue sharing is urgently needed to allow these officials to meet their financial obligations and commitments after September 30.

Mr. PERCY. Mr. President, I rise to urge the passage of this legislation. Seventy-six of our colleagues are cosponsors of the original reauthorization bill. It serves over 39,000 units of local government across the country. I was a Member of this body when the general revenue sharing was first introduced and enacted into law. I was proud to play a part in passing this nationally significant legislation then, and am proud to urge its continuation today. The program continues to provide for payments to local governments on an entitlement basis at an annual level of $4.6 billion.

I reported to the Senate last week on the annual meeting of the National Association of Towns and Townships here in Washington. It was my pleasure to address the group prior to an appearance by the President. Let me tell you that the one and only standing ovation the President received that morning was when he pledged to sign this legislation. There is little doubt that revenue sharing is the most popular Federal program in the country. The reason for this is obvious, it keeps the maximum amount of decisionmaking at the local level.

Last month, I had the opportunity and the pleasure of visiting with thousands of my constituents in Illinois. I visited scores of towns, townships, and counties. I have seen firsthand how these moneys are being spent in Illinois and I can report to the Senate today that we should have no fear about the program's cost-effectiveness. Throughout the life of revenue sharing, I have repeatedly received reports and updates from governmental units in Illinois about how the money was being spent. For many jurisdictions this money makes the difference in their ability to meet pressing needs. With the highest number of local governmental units receiving the Federal assistance, 2,815, we in Illinois can attest to the benefit it has provided.

Earlier this year, I met in Springfield, Ill., with a special task force of mayors established by the Illinois Municipal League to discuss revenue sharing reauthorization. I gave my pledge then that I would support renewing the program. Since then, of course, I have heard from many township officials represented by the Township Officials of Illinois and their able executive director, George Miller. Many county board chairmen and members have written, as well.

A great deal of attention has been focused in the past couple years on the subject of federalism and the so-called New Federalism. Let me point out to my colleagues that there is nothing more illustrative of our Federal system than this program. Revenue sharing strengthens our Federal system of government. By providing local governments local funds with few limitations helps them more effectively meet the diverse needs and priorities of the Nation.

Everyone here knows that in recent years recessions and slow economic growth have affected the public sector as well as the private sector. Unfortunately, local governments must rely on relatively inelastic revenue sources, such as local property taxes, which limit their flexibility in responding to fiscal problems. To assist local governments in meeting the needs of their communities we must extend this program.

Finally, Mr. President, as much as I would like to support an increase in the annual appropriation in order to take into account inflation, it would be fiscally irresponsible to do so at this time. With large budget deficits looming, we simply do not have the funds available to provide an increase. I regret this deeply, but we have no alternative. Reducing deficits and limiting spending has to be our first priority at this time.

Mr. NICKLES. Mr. President, we do not have Federal revenue to share. The projected deficits for 1984 through 1986 will be about $550 to

$600 billion. The program would be more appropriately called deficit sharing. Interest payments alone on the approximate $4.6 billion authorized for general revenue sharing would be more than $420 million per year.

The program was started in 1972 to provide "no strings" money to State and local governments. While this sounds like a meritorious idea, it has led to a gradual decay of accountability of local government units by infusing Federal dollars into their budgets without any responsibility on their part to raise such revenue. Since the program's inception more than $70 billion has been passed on to these entities. In a situation where State and local governments have fared far better than their Federal counterpart in terms of funding and deficit spending, this is not equitable or affordable.

We cannot allow the local governments to become dependent on the purse of the Federal Government.

Quite frankly the Federal Government is broke and cannot afford to borrow money to give away to other government entities.

OUR LOCAL AND COUNTY GOVERNMENTS ARE DEPENDING ON THIS BILL

Mr. BYRD. Mr. President, the legislation on which we are about to vote is really a means of keeping the faith with local and county governments in our States. Since the inception of the revenue-sharing program, they have come to depend on this source of funding. At no time is its receipt by these governments more vital than it is as the Nation is struggling to turn the corner from the tragic recession that began in 1981.

This recession, which has so battered workers and their families throughout the Nation, also has battered local governments. As more and more workers were laid off, the revenue bases of these governments declined precipitously—at the very time they were coming under heavy pressure to increase services to the unemployed and disadvantaged.

From my own State of West Virginia, I have received letter after letter, and call after call, urging the Congress to move swiftly to reauthorize this program. The West Virginia County Commissioner's Association wrote to tell me the bill "is vital to the counties of West Virginia, which you are well aware today are enduring hardships not known before." The mayor of the city of Sisterville wrote to say:

> I cannot begin to express how vital revenue sharing is to our town and our county. In working on the 1983-84 budget for the city . . . I came to realize what it will mean not to receive these funds in the future. It would be a loss that can never be recovered at the local level.

Mr. President, the local and county governments of this Nation are its backbone. They are the governments which deal with the basic, everyday needs of all of this Nation's citizens. At a time when they are harder pressed than at any other time in recent memory, we must not turn our backs on them. They need help, and the Congress must do all it can to meet that need.

The bill on which we are about to vote, the Local Government Fiscal Assistance Amendments of 1983, is, in the view of these governments and their officials, perhaps the single most important legislative step we can take to provide the help they need. Consequently, I support this bill, and I hope both this body and the other body will move as expeditiously as possible to complete action on it, speed it to the White House, and thereby enable local and county governments to plan dependably upon receipt of revenue-sharing funds as they commence new fiscal years on October 1, as many do, or as they prepare their budgets for new fiscal years that begin at a later time.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. STEVENS. Mr. President, it is my understanding that this will be the last vote on this bill. If that is the case, it will be the last vote this evening. Is that correct?

Mr. DOLE. The Senator is correct.

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 2780.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 2780), to extend and amend the provisions of title XXXI, United States Code, relating to the general revenue sharing program.

The PRESIDING OFFICER. Without objection, the Senate will proceed immediately to the consideration of the bill.

Mr. DOLE. Mr. President, I move to strike all after the enacting clause of H.R. 2780 and to substitute therefor the text of S. 1426, as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. DOLE. Mr. President, I ask for the yeas and nays on passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Colorado (Mr. HART), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

The PRESIDING OFFICER. Is there any other Senator in the Chamber who desires to vote?

The result was announced—yeas 87, nays 6, as follows:

[Rollcall Vote No. 262 Leg.]

YEAS—87

Abdnor	Ford	Moynihan
Andrews	Garn	Murkowski
Baker	Glenn	Nunn
Baucus	Gorton	Packwood
Bentsen	Grassley	Pell
Biden	Hatch	Percy
Bingaman	Hawkins	Pressler

Exon	Mitchell	Zorinsky

NAYS—6

Armstrong	Helms	Nickles
Hatfield	Humphrey	Proxmire

NOT VOTING—7

Cranston	Hart	Stennis
Dodd	Hollings	
Goldwater	Mathias	

So the bill (H.R. 2780), as amended, was passed.

Mr. DOLE. Mr. President, I move that the Senate insist upon its amendments and request a conference with the House of Representatives thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer appointed Mr. DOLE, Mr. DANFORTH, Mr. HEINZ, Mr. DURENBEGER, Mr. LONG, Mr. BENTSEN, and Mr. MITCHELL conferees on the part of the Senate.

Mr. DOLE. Mr. President, I ask unanimous consent to indefinitely postpone S. 1426.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I thank all Senators on the Senate Finance Committee and others who participated in the debate. We have been able to dispose of a very important piece of legislation that affects hundreds and thousands of counties and communities in this country. We have been able to do that in about a 2-hour time period, which indicates that we did thoroughly discuss this and consider it in the committee. The amendments offered were offered quickly and disposed of quickly. I thank all my colleagues for their cooperation, particularly the Senator from Louisiana (Mr. LONG), the Senator from Pennsylvania (Mr. HEINZ), and the distinguished Senator from Minnesota (Mr. DURENBERGER).

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I wish to congratulate the distinguished chairman of the Finance Committee for his handling of this measure, and, of course, the ranking minority member of the Finance Committee (Mr. LONG), who also served as chairman of that committee for so many years. It is a milestone, indeed, to pass this authorization bill in such a relatively brief period of time.

I recall so clearly the long and arduous struggles to get this bill passed in the first case. The first speech I ever made on the floor of the Senate was advocating revenue sharing, and I recall well the thrill and exhilaration that went with the passage of the first revenue sharing bill which was signed in Constitution Hall in Philadelphia by the President of the United States, President Nixon at that time, to signify his belief and mine that the passage of revenue sharing marked a new beginning for a reinvigorated federalism, a partnership between the States of the Union and the Central Government.

It was a special pleasure for me to serve as the principal cosponsor with our late colleague, Senator Hubert Humphrey, later Vice President Hubert Humphrey, in the sponsorship of this legislation. Since that time I have been an unfailing supporter of this measure, as has the Senator from Kansas and so many others in this Chamber.

I wish to express as well as the Senate's thanks for his and Senator LONG's handling of this bill my own personal expression of gratitude.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business to extend no later than 7:45 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEATH OF DR. ROBERT WEINTRAUB

Mr. JEPSEN. Mr. President, the United States recently lost one of its finest economic thinkers with the death of Dr. Robert Weintraub. This loss has special significance to me because for the last 2½ years Bob has worked for me as a senior economist on the Joint Economic Committee.

Bob was a unique individual. It is very seldom that an economist of his stature will endure the harsh working conditions in Congress for very long. There are too many ways someone like Bob could have made more money or had more pleasant working conditions in academia or private business. Yet Bob worked for the Congress for many years. In addition to his service on the JEC staff he worked for many years on the House Banking Committee staff and the staff of the Senate Banking Committee, with some time out at the Treasury Department as well.

A measure of Bob's stature within the economics profession is the frequency with which he was asked to contribute to academic journals and the number of times he was called by reporters seeking understanding about the complexities of monetary policy, which was Bob's specialty. Just recently, for example, he published a two-part study of the international debt situation for George Mason University which made him much in demand as a commentator at the many meetings and conferences held on this subject in recent months. It was at just such a conference in Geneva, Switzerland, where Bob suffered a crippling stroke which ultimately killed him.

I was proud and flattered to have Bob as a member of my staff. I always found his analyses to be insightful and his advice well-reasoned. I will miss Bob.

I ask unanimous consent to have printed in the RECORD at this point Bob's vita and an article about his work from the New York Post.

The information follows:

There being no objection, the information was ordered to be printed in the RECORD, as follows:

RÉSUMÉ OF ROBERT E. WEINTRAUB

1. Date and place of birth: January 10, 1925—New York, N.Y.

2. Education: Ph. D., University of Chicago, 1954; M.A., University of Chicago, 1952; B.A., Williams College, 1948.

3. Current position: Senior Economist, Joint Economic Committee, U.S. Congress.

4. Previous Experience:

A. Staff Director, Subcommittee on Domestic Monetary Policy, Committee on Banking, U.S. House of Representatives, 1976–1980.

B. Director, Office of Capital Markets Policy, U.S. Treasury, 1976.

C. Senior Economist, Committee on Banking, U.S. Senate, 1975.

D. Senior Economist, Subcommittee on Domestic Finance, Committee on Banking and Currency, U.S. House of Representatives, 1963–1965, 1968, 1972, 1973–1974.

E. Professor, Department of Economics, University of California, Santa Barbara, 1965–1973; resigned after 3 years leave of absence in 1976.

F. Associate Professor, Department of Economics, City College of New York, 1956–1965.

G. Assistant Professor, Northwestern University, 1955–1956.

H. Brookings Institution, collaborated in a study of wage cost of living sliding scales and annual improvement factors, 1955–1956.

I. Research Economist, National Bureau of Economic Research, 1954–1955.

5. Military Experience: U.S. Marine Corps, July 1943–April 1946. Served with Third Division and participated in action on Iwo Jima.

6. Family: Married with five children.

A BRAVE ECONOMIST DEPARTS

(By Maxwell Newton)

This week the United States lost the services of a great American economist—a cou-

rageous economist and an outspoken critic of the operations of the Federal Reserve.

Dr. Robert Weintraub died suddenly from a stroke and America lost a Marine hero of Guadalcanal and Iowo Jima as well as a hero in the fight for free markets and for sound economic policies.

I was very fortunate to have known Bob Weintraub in the three years I have been working in America. He spent many hours with me, helping me to understand the Federal Reserve and the operation of monetary policy in this country. He gave me particular help in the unstinting manner for which he was famous, in the preparation of my book "The Fed," a highly critical study of the Federal Reserve.

At the time of his death Bob Weintraub was senior staff economist with the Joint Economic Committee in Washington and dwelt in a cubicle in the bowles of a gray Washington bureaucracy-box. His most recent commitment was in opposition to the International Monetary Fund $8.5 billion "bailout bill" which he saw as entirely unnecessary and likely to continue to encourage Less Developed Countries to develop bad habits as well as over-regulated socialist economies.

During the 1970s, Bob Weintraub was, in the context of official Washington, the "father of the money targets."

In 1974 he presented a House Banking Committee staff report, based on interviews with the presidents of the 12 Federal Reserve banks and five of the Federal Reserve governors, which recommended that Congress treat monetary policy in the same way that the 1974 Budget Control Act mandated that it treat fiscal policy.

ANNUAL PLAN

"Specifically," said Weintraub, "I recommended that the Federal Reserve annually present to Congress a plan for M1 growth expressed as target ranges for each of the next 12 months and delineated in terms of percentage changes from the same month of a year previously."

In March 1975, Congress passed the famous House concurrent Resolution 133, which obliged the Federal Reserve to issue targets for money growth and to report to Congress on the achievement of those targets.

Initially, Bob Weintraub was very optimistic about the prospects for the new system.

But by the time he wrote the 1980 report of the House Banking Committee's subcommittee on domestic monetary policy, he was deeply disillusioned by the devious manner in which the Federal Reserve officials cheated on the targets—as they do to this day.

He wrote these bitter words in that report:

"In concluding the 1976 report, we commended 'the steadiness of recent Fed money policy' and concluded optimistically that 'we can bring inflation under control and keep it in check by achieving moderate M1 growth, commensurate with our potential to increase production.'

"We recommended 4 to 6 percent M1 growth for 1977 and a gradual deceleration thereafter to 2 to 4 percent per year. We said that in time this would 'reduce inflation to the attainable 1 to 3 percent rate.'

FOILED HOPE

"Our optimism was based on the hope that the Federal Reserve was embarked on a course for money growth much like the one we were recommending.

"It was not.

"Although we had noted a spurt of money growth in the month of October 1976 we did not think that this portended a new inflationary surge of money growth; a surge that would persist well into 1979, propel inflation upwards once again and set the stage for the recession that now (summer 1980) afflicts our economy."

In that report, Bob Weintraub also pointed to the key failure in the Fed operating procedures that precipitated the tragic World Economic Crisis of 1978–1983.

"Beginning in April 1976, the Open Market Committee narrowed the band in which the manager was instructed to keep the Federal Funds rate and widened the inter-meeting target for money growth.

"Thereby, the committee deemphasized control of the money supply as an operating goal and increased the importance of resisting interest rates movements.

"Money growth subsequently emerged primarily as the incidental corollary of the Committee's Federal Funds interest rate goals."

INFLEXIBLE FED

It is a cruel fact that, despite its record of abysmal failure in money management, the Federal Reserve is today committed to an extremely inflexible Federal Funds rate target (9½ percent.)

Among Bob Weintraub's many great achievements, he provided a system of analysis that made it possible to see how wrong the Federal Reserve policies were—and are. He had the courage to express these unpopular views to Administrations of different political colors.

ADDRESS BY SENATOR HATCH COMMEMORATING 30TH ANNIVERSARY OF UNITED STATES-KOREA MUTUAL DEFENSE TREATY

Mr. SYMMS. Mr. President, I ask unanimous consent that Senator HATCH's fine speech entitled "What Should the Friends of South Korea Be Doing" given in Seoul, Korea on September 2, 1983, in commemoration of the 30th anniversary of the United States-Korea Mutual Defense Treaty be entered into the RECORD. My friend, Senator HATCH, who has distinguished himself in the field of national security affairs over the past several years, gave an excellent and broadly ranging speech in South Korea, and his speech is particularly relevant to our memorial efforts on behalf of the late Congressman Larry P. McDonald and the late Senator Henry M. Jackson. Both of these great and distinguished legislators are honored in Senator HATCH's outstanding speech. I therefore would like to make the speech available to my colleagues in respectful memory of Larry and Scoop. I had the privilege of being present and Senator HATCH was well received.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

WHAT SHOULD THE FRIENDS OF SOUTH KOREA BE DOING?

(By U.S. Senator Orrin Hatch)

Chairman Park, Chairman Helms, other Distinguished Guests and Participants, Ladies and Gentlemen:

This morning as we mourn the loss of my friend Congressman Larry McDonald and as the Republic of Korea is officially in mourning for the loss of the 269 people aboard Korea Air Lines Flight Seven, we must remember that this is not the first time Americans in Seoul have felt the loss of friends and fellow warriors here in Korea or in Asia as a whole. Three times in this century Americans have gone to war in Asia with losses in the tens of thousands each time. I fear that one lesson of the 269 deaths on Flight Seven is that the prospects of war in Asia have not yet disappeared. At present, stability in Asia is clear, but beneath the surface there are still sufficient dangers to the American people and to the Korean people that I feel this morning we should turn to the nuts and bolts and the specifics that should be done. My friend Larry McDonald and my friend and colleague the late Senator Henry Jackson would have wished no less. We should ask ourselves this morning what would Larry and Scoop have wanted to come out of the concluding session of this conference. I suggest two answers.

First, Larry and Scoop would want us to urge a strong response on President Reagan and his advisors. The President is flying today from his ranch to Washington. But even as we meet I know from conversations with the State Department that many of his advisors plan to urge business as usual with the Russians. Yes, they will agree to the President calling the Soviets liars, which he did this morning, and yes, they will agree to a U.N. Security Council session and for all the moral condemnation the free world can muster. But when it comes to specifics, to the kinds of actions that Larry and Scoop would have studied and advised, the State Department has already said no. It intends to continue the meeting planned next week in Madrid between Secretary Shultz and Foreign Minister Gromyko in Madrid to sign the follow-up Madrid Conference Agreement that implies the Soviets are abiding by their Helsinki 1975 Final Act Commitments—when they are not doing so and when they have arrested most of the Soviet citizens who have been monitoring the Helsinki Agreement.

Moreover, the State Department has advised that the negotiations to begin immediately to re-establish an Agreement on Cultural and Educational Exchanges with Moscow should also go ahead unaffected by the loss of Flight Seven. And the plan just announced to start talks on a new Soviet Consulate in New York in return for an American Consulate in Kiev—these talks too are to go ahead. Unless those of us here can appeal to President Reagan's own views and his own instincts about how to deal with what the Soviets have done to Flight Seven.

My hope is that President Reagan will remember the long slow slide into World War Two in which ever more outrageous acts by aggressive tyrants were met with moral condemnation and clucking of tongues while business and diplomacy as usual continued to mark the policies of the free world. Ladies and gentleman, each time we let the Soviets escape punishment for their barbaric acts, we ourselves condone and become accomplices in their behavior. We need from the Soviets not only an apology for Flight Seven and punishment by public trial for those responsible and full generous compensation for the families of the dead, but we also need to teach them a lesson that they will keep in mind next time. This is what I

hope the President and his advisors will focus on in their discussions today and tomorrow. Let me turn now to Korea.

In the spirit of what Larry and Scoop would want us to think about let me be as specific as possible about what the friends of the Republic of Korea should be doing now.

First, we should be talking in Congress and in public about the North Korean threat. Much too little is said about North Korea. Too few appreciate the tremendous drive of the North Koreans to militarize their society. It makes the Soviets look pacific by comparison. Some estimate that the North Koreans are spending 24 per cent of their GNP on their military effort which would be almost double the Soviet level of effort. The North Koreans are practicing offensive exercises with their Army, Navy and Air Force. They have formed over twenty commando units designed to raid and disrupt the unprotected rear areas of South Korea. Four years ago Kim II Sung called for the storage of six months of war supplies and the North Korean forces have made impressive progress towards this goal. Six months of war supplies, ladies and gentlemen. How many Americans know about that?

And I am not talking about slow steady growth of the North Korea threat but a doubling in the past ten years of the North Korean Army to 750,000 and a doubling of its weapons. Their reserve forces are being armed with the older weapons from the regular forces and may now reach as many as four million armed reservists. Four million!

Their Air Force, now well over seven hundred fighters and bombers is housed and protected either underground or in shelters in sharp contrast to our forces and those of South Korea. They are basing their new Navy craft with ship to ship missiles in forward areas like the Northwest Islands to pose immediate threats to shipping and our patrols.

Just reminding our Congress and the American public about what North Korea is doing is one of the vital things fine friends of Korea must do.

The second thing that friends of the Republic of Korea can do is support the specific initiatives now underway but not yet funded by Congress or fully implemented by the Reagan Administration. There are several of these. First, we must continue to improve the Combined Forces Command set up five years ago manned by equal numbers of American and Korean military officers. This Command will fight the war that will come if our deterrence strategy fails. The Combined Forces Command must be able to combine our forces, to train together in air to air and air to ground exercises, to develop tactics now under discussion in NATO so as to be able to strike deep against an enemy to disrupt and slow his forces before they reach the front lines, to seize the initiative at the right time by being able to see deeply into enemy territory with new intelligence systems and with combined all-source intelligence centers at the Field Army level to allow commanders to both see deep and attack deep so that North Korea will know that any war will be costly to them and will be lost by them.

In addition to the Combined Forces Command, we must continue to improve our logistics and supplies such as the important agreement last year to transfer up to two billion dollars worth of war reserve stocks to South Korea in the event of a military emergency. We must make the trans-Korean pipeline survivable so that fuel can move from South Korea ports to combat forces. We must harden and expand the vital lifeline of our fuel transportation and storage facilities, one of the weak points that could attract North Korean attention. Logistics are not the most glamorous aspect of deterrence, but they are crucial and I commend the new agreement by the Republic of Korea to make available its flag carrying air and sea assets to augment our strategic lift during crises.

The third area where friends of South Korea should be active is supporting the improvements in American forces for the Korea region. Our Eighth Army and Seventh Fleet and U.S. Air Forces are undergoing dramatic improvements under President Reagan's leadership. For those who were depressed and alarmed by Jimmy Carter's plans to withdraw the Second Division from Korea, I reply that five years later help is on the way! One hundred and eighty new systems will be introduced into the U.S. forces under the Eighth Army in Korea in the next five years from counter fire radar to the M60 A3 tank, improved tow anti-tank missiles, the Blackhawk helicopter, the multiple launch rocket system, the Viper, and the Divad Gun. We will even be modestly increasing our military and civilian manpower in the Eighth Army. Our Air Forces will be significantly augmented by the introduction of F-16 and A-10 aircraft already underway. The Seventh Fleet is improving its firepower. I welcome the arrival of the battleship New Jersey and the increased anti-submarine surveillance of the Eastern Sea (or the Sea of Japan as some call it) by P-3 aircraft. All these efforts are part of President Reagan's defense budget that Senator Symms and I supported on the Senate Budget Committee (cut in half by the Senate from ten percent real growth to about five).

In addition to supporting U.S. defense budget improvements for the Korean region, a fourth area for action by friends of South Korea is the foreign military sales credits for Korea. These have been too small and ought to have a greater portion at a reduced interest rate or a longer repayment period to keep South Korea from falling behind their force improvement plan schedule. More importantly, we have got to find a way within current laws to encourage South Korea to keep its defense production lines operating and to avoid bankruptcies by defense corporations that built up here in response to American recommendations that Korea should provide for its own defense production. Now Korea can provide most of its own military production needs and in an emergency a "warm" production line here can provide a surge capability to aid our own forces. To do all this means that Korean defense production will have to find some export markets in cooperation with the United States so that our own corporations are not damaged but so that Korean production capacity can at least not be lost.

It seems to me that a sixth area for friends of the Republic of Korea to work is simply expressing appreciation and gratitude for the fact that Korea provides us the best financial support for our forward deployed forces of any, and I mean any, of our allies. This may upset some West Germans and Japanese when they hear it but it is so true that we need to remind our Japanese and German allies just what Korea provides for American forces. This is not only a favor to South Korea, when we advertise what they do and express our appreciation, but it ought to have a healthy effect on our other allies when they hear what South Korea does for us. Let me point out several examples, Korea pays through the Combined Defense Improvement Program for U.S. Forces and activities including construction of over one thousand family units, command facilities, ammunition storage, fuel storage and distribution, more importantly, Korea combat service support probably takes the place of about forty thousand American support personnel who would otherwise be needed here. I believe we ought to be able to increase the number of American military systems that can be repaired and maintained here in Korea without having to overload the American depot system. We already have contracted to maintain and modernize about five hundred M113 armored personnel carriers which will save us about fifteen million dollars and help the Korean defense industry I mentioned earlier. We need more of this.

The seventh and last area is the most important and the most difficult for friends of Korea to be active in. It is the area of diplomacy and the area of where members of Congress, no matter how senior a Senator may be, must yield sometimes in frustration and anger, to the power of the State Department which in my experience seems to have a life of its own and a mind of its own beyond the reach of the President or the Congress, at least much of the time. Generally speaking, American world wide diplomacy is very effective and highly supportive of the peace and stability of the Korean peninsula. A famous Korean proverb describes the international political situation of South Korea as "a shrimp among whale." This is really too modest a description, of course, for the economic and military power of Korea, but it captures the reality of the importance of China and Russia and the U.S. and Japan in the strategic equation for Korea's future.

There is one single area for American diplomacy which affects Korea most of all and that friends of Korea must be vigilant about. That ladies and gentlemen is the principled refusal of our Government not to deal separately with North Korea. There are many reasons to force North Korea into dialog and some brilliant offers have been made by South Korea I will mention in a minute but it would be tragic to see reciprocity for South Korea left out of any of these initiatives toward the North which is precisely what the Carter Administration tried to do in the June 1979 proposals for a tri-partite conference among the United States and the two Koreas. The key point is that any such initiative with North Korea should not only involve the South but also must be reciprocated by Soviet and Chinese agreements to be present at such a conference.

The friends of Korea should be active to be sure that any American diplomatic initiatives that involve North Korea have the full support of South Korea and require reciprocity from Communist China and Russia. We in the Senate of course cannot have any hope that the State Department will inform us in advance of secret initiatives along these lines so we can only make clear again and again that our wishes are against such moves. President Reagan dissociated himself from the tri-partite conference idea of the Carter Administration soon after President Reagan took office. I believe this idea is dead and should remain dead. The only promising approach to take is the idea of cross recognition by all the whales of both

shrimps, to use that famous Korean proverb again. North Korea would be recognized by the U.S. and Japan while China and Russia simultaneously recognize South Korea. This could add to stability in this region and the world, but it is a long way off, in my view, and it is made more difficult every time someone makes a proposal like the tri-partite conference without China and Russian reciprocity.

There are two other ways American diplomacy strengthens the peace in Korea and aids our ally the Republic of Korea. First, we can provide general support to the initiatives of President Chun like his successful and highly publicized trips to Southeast Asia in 1981 and to Africa and Canada in 1982. Such travel helps to diversify South Korean trade and diplomatic relationships and should be encouraged. It was kind and gracious of President Chun last night at dinner in the Blue House to say prayers and thank God for the United States so that the Soviet Union would not be the sole superpower able to put the rest of the world at its mercy as it showed in the downing of Flight Seven what it would do. In fact, however, the friends of Korea know that Korea must have other friends and partners in the free world and not rely solely on the United States. Frankly, Korea should be in close touch with France about the long rumored French desire to recognize North Korea. We stopped in Paris on this long trip and I can assure you that President Mitterand's advisers have not yet completely given up the idea of independent French recognition of North Korea. France has always valued her independence and North Korea is the only country in the world that France has no diplomatic relations with so the friends of Korea may wish to watch vigilantly French contacts with North Korea. We were assured in Paris that France also highly values her friendship and trade with South Korea, so I hope that France will ultimately make the right decision in this matter as the French usually do—ultimately.

The final area for American diplomatic support for South Korea is also one of the most important aspects of our own global strategy. That is our policy towards the conflict between China and Soviet Union. We did not start this conflict and I doubt very much whether it will ever completely end. The Soviets and the Chinese have their own scores to settle with each other very separate from their relations with the free world. But we in the free world can still be very, very careful to take no action that would tend to drive together these two natural antagonists. We can treat Moscow and Beijing separately. We can recognize that Moscow and Beijing compete with respect to North Korea and that Kim Il Sung has been very adept at playing them off against each other. We in the free world should be aware of this. We should recognize that as long as Kim Il Sung cannot count completely on joint support from Russia and China, he is restrained from some actions he might otherwise wish to take toward South Korea.

Now in terms of the kinds of specific things to do that Larry and Scoop would have wanted us to focus on this morning, I want to conclude by praising the joint U.S.-Korean initiative that have been taken in the last two years and urge that more be done. I am referring to the kinds of diplomatic moves that force Kim Il Sung and his potential successor to react with peaceful initiatives of their own. The strategy I believe is useful to overload North Korea with peaceful initiatives, to put the ball in their court, to deny North Korea the pretext for the massive military buildup they have been pursuing with twenty four or twenty five percent of their GNP. We must avoid any and all appearance of belligerence and hostility on our part for this strategy to work. That is why it was smart to invite North Korean observers to the Joint Korean-American military exercise a year ago following the large North Korean military exercises. This is why it was wise to invite the North Korean and Chinese members of the Military Armistice Commission to observe our exercise "Team Spirit" and to propose that both sides ought to give advance notice of major military training exercises to reduce the risk of a tragic misunderstanding. We even outlined the agenda of our exercise "Team Spirit 1982" to the North Korean and Chinese members of the Military Armistice Commission. We have proposed that a third party be available to investigate any armistice agreement violations. To be sure, ladies and gentlemen, we have received no positive response from North Korea to any proposal to reduce tensions. But I believe these offers have a political effect in North Korea and they make it a little more difficult for the North Korean leadership to sustain the burden of its massive military buildup with its enormous costs to the economy and society of North Korea.

This is a happy note on which to conclude my remarks. I hope this is the kinds of nuts and bolts detail and recommendations that Larry and Scoop would have wanted our concluding session to focus on this morning.

THE KOREAN AIR LINES INCIDENT

Mr. PERCY. Mr. President, the criminal and brutal attack on the Korean airliner has sent shock waves around the world. I was in Chicago on Monday, September 19, when well over 1,000 people of the 23d Ward of Chicago observed the tragedy with a moment of silent respect at the Sportsmens Park Race Track.

The U.S. Congress and the President have acted with one voice on this matter. The governments and people of the nations of the free world have spoken in unison against the action of the Soviet Union. The people of Illinois share the sense of grief, and are extending their sympathy to the families of the victims.

The 23d Ward Regular Republican Organization in Chicago and its ward committeeman, Phillip Bianco, Jr., have adopted an important resolution this week which I commend to the attention of my colleagues. The resolution states clearly that "it is evident from all the facts that the Soviet Union had no reason to take such brutal military action against a civilian aircraft." I ask unanimous consent that the resolution be printed in the RECORD following my remarks.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, Two hundred sixty nine civilians were brutally murdered and shotdown in a South Korean Air Line Flight 007 by the Soviet Union of Socialist Republics'; and

Whereas, This despicable act of murder is a cruel violation of the human rights of people throughout the world; and

Whereas, It is evident from all the facts that the Soviet Union had no reason to take such brutal military action against a civilian aircraft; and

Whereas, The entire world has been horified by this incident and demands certain concessions to the families of the deceased; and

Whereas, The officers and members of the 23rd Ward Regular Republican Organization and the people of the 23rd Ward feel a deep frustration and sympathy for the families of the two hundred sixty nine civilians; and

Whereas, In an act of respect, one minute of silence will be observed by the entire 23rd Ward Regular Republican Organization and their approximate one thousand friends and supporters who attend their annual Party-Nite at the Races, Sportsmen's Park Race Track on Monday night, September 19, 1983; therefore, be it

Resolved, by the 23rd Ward Regular Republican Organization, City of Chicago, County of Cook, State of Illinois

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting treaties which were referred to the appropriate committee.

MESSAGES FROM THE HOUSE

At 12:10 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3871. An act to amend the Omnibus Budget Reconciliation Act of 1982 to provide that the figure used in determining hourly rates of pay for Federal employees not be changed before the comparibility adjustment in the rates of pay for such employees has been made for fiscal year 1984; and

H.R. 3914. An act to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs.

ENROLLED JOINT RESOLUTIONS SIGNED

The message also announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res. 81. Joint resolution to authorize and request the President to designate October 16, 1983, as "World Food Day";

S.J. Res. 82. Joint resolution designating November 1983 as "National Alzheimer's Disease Month"; and

S.J. Res. 119. Joint resolution to designate the week of December 11, 1983, through December 17, 1983, as "National Drunk and Drugged Driving Awareness Week".

The enrolled joint resolutions were subsequently signed by the President pro tempore (Mr. THURMOND).

At 5:11 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker appoint as additional conferees in the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1340) entitled "An Act to revise and extend the Rehabilitation Act of 1973 and to extend the Developmental Disability Assistance and Bill of Rights Act, and for other purposes.".

From the Committee on Education and Labor for consideration of title I of the Senate bill and modifications committed to conference: Mr. KILDEE and Mr. NIELSON of Utah; from the Committee on Energy and Commerce, to serve jointly with Education and Labor Committee members for consideration of section 402(c)(8) of title IV of the House amendment and modifications committed to conference: Mr. DINGELL, Mr. SCHEUER, Mr. OTTINGER, Mr. SHARP, Mr. MARKEY, Mr. LUKEN, Mr. BROYHILL, Mr. CORCORAN, and Mr. MOORHEAD; and as exclusive conferees for consideration of title II of the Senate bill and modifications committed to conference: Mr. DINGELL, Mr. WAXMAN, and Mr. BROYHILL.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H.R. 3415) making appropriations for the Government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1984, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. DIXON, Mr. NATCHER, Mr. STOKES, Mr. WILSON, Mr. LEHMAN of Florida, Mr. SABO, Mr. WHITTEN, Mr. COUGHLIN, Mr. GREEN, Mr. ROGERS, and Mr. CONTE as managers of the conference on the part of the House.

ENROLLED JOINT RESOLUTIONS SIGNED

At 6:40 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks announced that the Speaker has signed the following enrolled joint resolutions:

H.J. Res. 132. Joint resolution designating the week beginning September 25, 1983, as "National Adult Day Care Center Week"; and

H.J. Res. 218. Joint resolution to designate the month of September of 1983 as "National Sewing Month".

The enrolled joint resolutions were subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE MEASURE HELD AT THE DESK

The following bill was ordered held at the desk until the close of business on September 22, 1983, by unanimous consent:

H.R. 3871. An act to amend the Omnibus Budget Reconciliation Act of 1982 to provide that the figure used in determining hourly rates of pay for Federal employees not be changed before the comparability adjustment in the rates of pay for such employees has been made for fiscal year 1984.

ENROLLED JOINT RESOLUTIONS PRESENTED

The Secretary reported that on today, September 21, 1983, he had presented to the President of the United States the following enrolled joint resolutions:

S.J. Res. 81. Joint resolution to authorize and request the President to designate October 16, 1983, as "World Food Day";

S.J. Res. 82. Joint resolution designating November 1983 as "National Alzheimer's Disease Month"; and

S.J. Res. 119. Joint resolution to designate the week of December 11, 1983, through December 17, 1983, as "National Drunk and Drugged Driving Awareness Week."

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-382. A joint resolution adopted by the Legislature of the State of California; to the Committee on Foreign Relations:

"ASSEMBLY JOINT RESOLUTION No. 84

"Whereas, The Legislature of the State of California vigorously condemns the Union of Soviet Socialist Republics for the unprovoked and cowardly attack upon Korean Air Lines Flight 007 which resulted in the deaths of 269 innocent civilian passengers and crew; and

"Whereas, The Legislature hereby offers its deepest sympathies to the families of the victims of this despicable attack; and

"Whereas, The Legislature urges the United States Government to publicly reiterate its commitment of solidarity with the government and people of the Republic of Korea whose aircraft was unjustifiably attacked by the military forces of the Soviet Union; and

"Whereas, The Legislature of the State of California condemns this despicable violation of human rights by the Soviet Union and publicly expresses its revulsion against the Soviet Union for this act of violence; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to formally condemn the Soviet Union for its willful breach of international law and treaty obligations arising from the attack on the Korean Air Lines aircraft, to seek the imposition of appropriate sanctions against the Soviet Union by the world community, and to urge the Security Council and General Assembly of the United Nations to take whatever actions are necessary to express the world's sorrow and indignation; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-383. A joint resolution adopted by the Legislature of the State of California; to the Committee on Appropriations:

"SENATE JOINT RESOLUTION No. 6

"Whereas, As of October, 1980 the privately owned deep-draft fleet of the United States merchant marine, excluding the national defense reserve fleet and Great Lakes vessels, totalled only 577 ships with a capacity of 21,023,200 deadweight tons, and additionally as of November 1980 there were only 40 new merchant marine ships of 1.5 million deadweight tons under construction or on order; and

"Whereas, Experts in both military and civilian maritime circles have concluded that a United States flag fleet of this size is inadequate to meet the national security needs of the nation and its necessary peacetime capability; and

"Whereas, President Reagan has indicated that he is very concerned about the decline in America's seapower posture and that a major goal of the United States must be to have a strong competitive and efficient merchant marine to meet the needs of our international commerce and national defense; and

"Whereas, The building of a stronger merchant marine involves increased ship construction, a substantial increase in our nation's work force, and a greater ability to compete equally in international commercial shipping; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to provide necessary appropriations to be used specifically for the construction of new vessels for the United States merchant marine; and be it further

"Resolved, That the Secretary of the Senate transmit a copy of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-384. A joint resolution adopted by the Legislature of the State of California; to the Committee on Agriculture, Nutrition, and Forestry:

"ASSEMBLY JOINT RESOLUTION No. 41

"Whereas, California has adopted a cotton boll weevil eradication plan in the cotton growing areas of southern California along the Colorado River; and

"Whereas, To date, the state has expended about $125,000 and is prepared to expand additional funds if necessary; and

"Whereas, The cotton industry has contributed one-half million dollars of its funds to the eradication efforts; and

"Whereas, The United States Department of Agriculture (U.S.D.A.) has not actively participated in the program; and

"Whereas, The boll weevil will not be stopped unless there is full cooperation from U.S.D.A., Arizona, and Mexico; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the United States Department of Agriculture to take the leadership role in the boll weevil eradication effort in the cotton growing areas of southern California along the Colorado River by committing its manpower and resources to help California's cotton industry; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit a copy of this resolution to each Senator and Representative from California in the Congress of the United States and to the United States Secretary of Agriculture."

POM-385. A joint resolution adopted by the Legislature of the State of California; to the Committee on Agriculture, Nutrition, and Forestry:

"ASSEMBLY JOINT RESOLUTION NO. 23

"Whereas, Agriculture is the number one industry in California, representing $14 billion in gross production annually, accounting for over 10 percent of the nation's agricultural exports, and continuing to grow in importance to the state, the nation, and the world; and

"Whereas, The San Joaquin Valley is one of the richest agricultural geographical areas of the world, accounting for over 50 percent of the $14 billion that agriculture contributes to the economy of California and the United States; and

"Whereas, It is estimated that a significant portion of the valley's fertile agricultural land will go out of production by the year 2000, amounting to hundreds of millions of dollars in annual income lost, due to the buildup of salts naturally deposited in the soil and the salts occurring in irrigation water; and

"Whereas, Salinity in the soil and irrigation water is a major threat to the preservation and development of affected agricultural soils; and

"Whereas, Other damaging effects directly attributable to uncorrected salinity will further degrade local groundwater supplies and will cause additional deterioration of the water quality in the state's surface water supplies; and

"Whereas, Salinity is caused by physical properties of the soils and not the management techniques of the affected growers; and

"Whereas, The only feasible method of salt removal from the soil is that of leaching and drainage; and

"Whereas, Many growers have taken steps to alleviate their salinity problem, but lack technical and financial resources to do the job properly or quickly enough; and

"Whereas, Technology exists to alleviate salinity from the soil under the auspices of the United States Department of Agriculture, the University of California Agricultural Extension, and resource conservation districts; and

"Whereas, Growers are encouraged to use water in an efficient manner and adopt appropriate conservation practices designed to minimize the amount of water depositing salt to the agricultural fields that requires leaching and drainage; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That it is the intention of the Legislature of the State of California to protect California's valuable agricultural land, water, and wildlife resources, regardless of whether those resources are located in federal, state, or private water service areas; and be it further

"Resolved, That the United States Department of Agriculture is requested to make the mitigation of salinity a national high priority under the auspices of the Resource Conservation Act of 1977 and, in targeting technical and financial resources, to recognize in the conduct of all resource conservation programs the importance to the nation of salinity's impact on California's agricultural productive capacity; and be it further

"Resolved, That the Resources Agency of the State of California is requested to provide the necessary assistance to support efforts to develop a plan to solve the soil and water related problems of salinity; and be it further

"Resolved, That the Resources Agency of the State of California is requested to make the correction of salinity a high priority by providing assistance and coordination in bringing together appropriate federal, state, and local agencies and affected private and public landowners in developing an effective, safe, and economical solution to the problem of salinity; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of Agriculture, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Secretary of the Resources Agency of the State of California."

POM-386. A joint resolution adopted by the Legislature of the State of California; to the Committee on Banking, Housing, and Urban Affairs:

"SENATE JOINT RESOLUTION NO. 3

"Whereas, Section 8 of the Housing and Urban Development Act of 1937, as amended, is located in Section 1437f of Title 42 of the United States Code, and it is designed, among other things, to provide affordable housing for senior citizens; and

"Whereas, Increasing numbers of senior citizens are electing to reside in mobilehomes because it offers them the most economically feasible housing alternative in a desirable retirement area; and

"Whereas, Section 8 of the Housing and Urban Development Act of 1937 does not presently include mobilehome park development as a qualified loan project; and

"Whereas, It would be in keeping with the purposes of Section 8 of the Housing and Urban Development Act of 1937 to include mobilehome park development as a project which could be financed under the program; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to amend Section 8 of the Housing and Urban Development Act of 1937 to include mobilehome park development among the projects which may be financed under the program; and be it further

"Resolved, That the Secretary of the Senate transmit a copy of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-387. A joint resolution adopted by the Legislature of the State of California; to the Commerce, Science, and Transportation:

RESOLUTION CHAPTER

"SENATE JOINT RESOLUTION NO. 22

"Whereas, Farming and timber harvesting are critical industries to the nation's social and economic livelihood; and

"Whereas, The storms and flooding of 1982 and 1983 have accounted for more than $300 million in crop losses to state farmers, with probable additional losses in the near future; and

"Whereas, Those who earn their living through agriculture and forestry depend on accurate weather forecasting to plan every aspect of the production of food, fiber, and livestock; and

"Whereas, The National Weather Service of the National Oceanic and Atmospheric Administration is necessary to protect life and property in California and the United States, and any reduction in current levels of service would endanger the public health and welfare; and

"Whereas, The President has announced his plan to sell parts of the National Weather Service to private industry, including the federal government's four weather satellites and its three earth tracking stations now operated by the National Oceanic and Atmospheric Administration; and

"Whereas, Proposed reductions in California include terminating the entire agriculture weather and fruit frost programs and substantially reducing the fire weather program; and

"Whereas, These proposed terminations and staff reductions would seriously impact such important activities as prescribed burning, agricultural irrigation planning, and flood forecasting; and

"Whereas, Consumers and growers alike depend upon fruit frost forecasts for timely meteorological data necessary for their prospective gardening and farming decisions; and

"Whereas, In addition, under the proposed 1983 fiscal year budget for the National Weather Service, traveling motorists would be without the free, up-to-the-minute weather information necessary for their safe journeys; and

"Whereas, This policy would create confusion for those persons who depend on accurate weather forecasting in their business and among states and nations; and

"Whereas, The General Accounting Office has rated the agricultural weather, fruit frost, and fire weather programs among the most cost-effective services provided by the National Weather Service; and

"Whereas, Turning national weather forecasting into a private business would endanger those important aspects of the National Weather Service which might not be immediately seen as profitable; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That it is in the interest of each state and the United States to provide a centralized and dependable system to forecast weather through a federal program such as that of the National Weather Service of the National Oceanic

and Atmospheric Administration; and be it further

"*Resolved,* The President and Congress of the United States are respectfully memorialized to restore the agricultural weather, fruit frost, and fire weather programs to existing levels and, further, not to consider selling or otherwise disposing to private interests any part of the National Weather Service; and be it further

Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Administrator of the National Oceanic and Atmospheric Administration."

POM-388. A joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

"ASSEMBLY JOINT RESOLUTION No. 52

"Whereas, It has come to the attention of the Members of the Legislature of the State of California that the President and his administration are considering selling portions of the National Weather Service, including weather satellites, to private industry; and

"Whereas, Certain functions, such as national defense, law enforcement, protection of our borders, and weather analysis and forecasting are the responsibility of the government; and

"Whereas, The National Weather Service and its Agricultural Weather Services, including Fire Weather and the Fruit Frost Forecast, rely upon a dependable uninterrupted flow of accurate data obtained from weather satellite pictures; and

"Whereas, The National Weather Service is one of the strongest in the world, providing accurate and reliable weather information for public safety and commerce which has resulted in a significant reduction in violent weather deaths and savings of an estimated 750 million dollars per year in production costs for farmers; and

"Whereas, Agriculture is the number one industry in California in terms of cash value and productivity, representing 15 billion dollars in gross production; and

"Whereas, Agriculture in California and throughout the United States relies upon weather forecasts derived from satellite data to schedule planting, irrigation, fertilizing, harvesting, and pest control measures and to minimize damage due to adverse climate conditions; and

"Whereas, The value of weather forecasting to California agriculture is in excess of 250 million dollars and benefits of the Fruit Frost Program in California are in excess of 70 million dollars; and

"Whereas, The benefits of reliable Agricultural Weather Service forecasting may be passed on to consumers in the form of lower food prices; and

"Whereas, Reliable weather forecasting allows farmers to take measures to conserve water and energy; and

"Whereas, Weather monitoring, data analysis, and forecasting require a well coordinated organization and the facilities to support that organization; and

"Whereas, The operation of our weather satellites by a private, for-profit corporation would not insure reliable and uninterrupted service, and an interruption in data transmissions from weather satellites could result in poor forecasting with disastrous results; now, therefore, be it

"*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to reconsider selling any part of the National Weather Service and, instead, to explore methods of making the service financially self-supporting; and be it further

"*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-389. A resolution adopted by the House of Representatives of the State of Illinois; to the Committee on Energy and Natural Resources:

"HOUSE RESOLUTION No. 373

"Whereas, Current federal and State regulatory schemes include secondary coal recovery operations in the definition of surface mining activities causing all the surface mine permitting provisions and performance standards of the State and federal programs to be applied to secondary coal recovery operations; and

"Whereas, The application of these program requirements has caused approximately 20 secondary coal recovery operations in Illinois to cease operations and potential operations to not begin due to a lack of of the fiscal resources and technical staff or expertise for compliance; and

"Whereas, Program requirements have had a much greater and more devastating impact on secondary coal recovery operations than regular, small surface mine operators since secondary coal recovery operators do business in a limited market place where their product sells for only $5 to $6 per ton; and

"Whereas, It is virtually impossible to generate the resources to gather all the data and prepare all the engineering studies required to obtain a permit under the existing program and to subsequently comply with the performance standards of the existing program as the result of receiving a permit; and

"Whereas, Secondary coal recovery operations recover coal from abandoned coal waste piles (coarse refuse or gob) and slurry ponds and will be given high priority for reclamation under the Abandoned Mine Reclamation program authorized by Title IV of P.L. 95-87; and

"Whereas, If an affordable permitting and environmental control provision can be developed and implemented for secondary coal recovery operators, many of the abandoned mine problem sites in the coal producing regions of the State can be reclaimed by private enterprise, resulting in Title IV funds not being spent to reclaim those sites but being used to reclaim other priority site; and

"Whereas, the Abandoned Mine Reclamation program under Title IV can be bolstered by secondary coal operators paying the 35¢ per ton of coal produced reclamation fee into the reclamation fund, a fiscal resource lost if the coal had been covered and revegetated under the Title IV program; and

"Whereas, In addition to reclaiming abandoned sites and paying into the reclamation fund, continuance of secondary coal recovery operations will directly provide several hundred jobs, thousands of dollars in federal, State and local taxes and several hundred jobs in associated industries; and

"Whereas, The utilization and conservation of the coal resource as mandated by Section 515(b)(1) of the Federal Act will be maximized by an increase in the number of secondary carbon recovery operations, without which much of this coal resource will be rendered unrecoverable under current economic conditions; and

"Whereas, There are no valid or logical reasons why these operations should be forced out of business and there are numerous reasons for taking action to allow these operators the opportunity to continue to operate; and

"Whereas, The Illinois General Assembly, representing all the citizens of the State of Illinois cannot unilaterally legislate a solution without federal executive branch approval; and

"Whereas, The Illinois Department of Mines and Minerals is seeking stopgap administrative assistance; therefore, be it

"*Resolved, by the House of Representatives of the Eighty-Third General Assembly of the State of Illinois,* That we hereby request the United States Congress and the United States Department of the Interior assist and support the efforts of the State of Illinois to arrive at a solution which will repair existing environmental damage, conserve Abandoned Mine Reclamation Funds and create additional jobs and revenue; and, be it further

"*Resolved,* That a copy of this resolution be transmitted by the Secretary of State of Illinois to the President of the United States, the Secretary of the Senate of the United States, the Clerk of the House of Representatives of the United States, the Secretary of the Department of the Interior and to each member of the Congress from this State."

POM-390. A resolution adopted by the Humboldt County Board of Supervisors of Eureka, California urging enactment of the wine equity bill of 1983; to the Committee on Finance.

POM-391. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

"ASSEMBLY JOINT RESOLUTION No. 33

"Whereas, The people of California are major exporters and importers of goods and services among the states; and

"Whereas, A significant proportion of the jobs in California depend indirectly and directly on international trade; and

"Whereas, The future growth of the California economy will increasingly depend upon expanded international trade; and

"Whereas, California is a leading state in the development of our Nation's high technology and agricultural industries; and

"Whereas, California's trading strength is directly affected by national policies and agreements of the United States and other countries such as the General Agreement on Tariffs and Trade and the recent memorandum of Principles on High Technology Trade signed by the United States and Japan on February 9, 1983, and the approval of the Japanese Diet of an omnibus bill to revise 16 of that nation's standards and certification laws on May 18, 1983; and

"Whereas, Despite the concerted efforts of the United States and its trading partners to reach agreement on trade policies, inconsistencies in the application and enforcement of multinational and bilateral trade agreements, particularly in the areas

of agriculture, computers, semiconductors, and telecommunications, have unfairly hindered California businesses in their ability to participate fully in other countries' markets; and

"Whereas, Due to gaps in international trade agreements with other countries, no adequate mechanism exists to ensure free and open trade in services and direct foreign investment; and

"Whereas, An effective national trade policy must enable the United States to identify and analyze barriers to United States trade and provide the President with additional authority to take action against unjustifiable, unreasonable, or discriminatory restrictions which burden or restrict United States trade; and

"Whereas, Legislation now pending in the House of Representatives would make these elements part of national trade policy; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California jointly, That the Legislature of the State of California respectfully memorializes the Congress, and the California delegation in particular, to support enactment of legislation which reflects the objectives of the "International Trade and Investment Act"; and be it further

"Resolved, That the Legislature of the State of California respectfully memorializes the President of the United States to seek, through new and revised agreements with other countrfies, free and open trade and the goal of substantially equivalent commercial opportunities for United States exporters in the markets of other countries; and be it further

"Resolved, That the Legislature of the State of California respectfully memorializes Congress to enact legislation which will give the President authority to negotiate both bilateral multilateral agreements in an effort to remove restrictive and discriminatory practices on trade in services and on foreign direct investment; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the Governor of the State of California, and to the President and Vice-President of the United States, to the Speaker of the House of Representatives, to the President Pro Tempore of the United States Senate, to each Senator and member of the House of Representatives in the California delegation, to the United States Secretary of State, to the United States Secretay of Commerce, and to the United States Trade Representative."

POM-392. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

RESOLUTION CHAPTER—ASSEMBLY JOINT RESOLUTION No. 27

"Whereas, The people of the United States have come to rely upon the Social Security system for at least a portion of their retirement income; and

"Whereas, The Social Security system was designed over 40 years ago, when typical marriages lasted a lifetime and consisted of a wage-earner husband and a homemaker wife; and

"Whereas, Changing demographic patterns, including the increase of women in the labor force, the breaks in service in women's employment, and the increase in divorce rates, have occurred over recent years; and

"Whereas, The economic needs of many of this nation's families require women to either return to the work force or to choose to remain homemakers and to bear full responsibility for maintaining the home and rearing their children, often a great financial sacrifice to the family; and

"Whereas, There is no consideration built into the social security system for women who contribute to the family by working as homemakers; and

"Whereas, There are also financial disincentives built into the social security system for two-earner families with respect to base Social Security benefits and survivor benefits; and

"Whereas, The failure of the Social Security system to adapt to changing demographic trends has resulted in effectual discrimination against women who are homemakers and women who have entered the work force; and

"Whereas, Sixty percent of this nation's nonworking women rely upon Social Security as their only income; and

"Whereas, Fifty percent of Social Security recipients in 1980 were women; and

"Whereas, This nation does not intend to foster discrimination of any kind on the basis of sexual gender; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to act decisively to eliminate the disparate impact between the sexes in the system; and be it further

"Resolved, That the Legislature respectfully memorializes the President and Congress of the United States to build recognition into the Social Security system for the nation's homemakers; and be it further

"Resolved, That the Legislature respectfully memorializes the President and Congress of the United States to eliminate the financial disincentives of the Social Security system towards two-earner families; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the Governor of the State of California, and to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each United States Senator and Member of the House of Representatives in the California delegation, and to the Commissioner of the Social Security Administration."

POM-393. A resolution adopted by the Board of Supervisors of the County of Los Angeles, Calif., protesting the Soviet Union's attack on the Korean Air Lines passenger airplane; to the Committee on Foreign Relations.

POM—394. Joint resolution adopted by the Legislature of the State of California; to the Committee on Governmental Affairs:

"SENATE JOINT RESOLUTION No. 9

"Whereas, On February 19, 1942, President Roosevelt issued Executive Order 9066 which resulted in the relocation and internment of persons of Japanese ancestry on the Pacific Coast; and

"Whereas, In the spring of 1942, over 120,000 persons of Japanese ancestry, the majority of whom were American citizens, were involuntarily relocated and detained in military areas established for this purpose; and

"Whereas, Those relocated suffered significant disruption of their lives, loss of individual freedom and personal dignity, as well as $400 million in property losses in 1942 as estimated by the Federal Reserve Bank; and

"Whereas, The relocation and internment of persons of Japanese ancestry raises serious questions regarding violations of rights guaranteed by the Constitution of the United States; and

"Whereas, On July 31, 1980, President Carter signed Public Law 96-317 establishing the Commission on the Wartime Relocation and Internment of Civilians to review the facts and circumstances surrounding the implementation of E.O. 9066; and

"Whereas, In the summer and fall of 1980, the Presidential Commission heard the testimonies of those whose lives were dramatically affected by E.O. 9066; and

"Whereas, The Commission on Wartime Relocation and Internment of Citizens will be completing its investigation and submitting its findings to Congress in 1983; now, therefore, be it

"Resolved by the Senate and the Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to approve adequate monetary compensation to those individuals who suffered hardship as a result of Executive Order 9066; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-395. A resolution adopted by the Woman's National Auxiliary Convention of the National Association of Free Will Baptists supporting the President concerning his views on women's rights, his stand on abortion and the ERA; to the Committee on the Judiciary.

POM-396. A resolution adopted by the National Association of the Physically Handicapped, Inc., relating to allowing handicapped individuals who do not qualify for low-income housing to live in handicapped accessible housing when these units are available; to the Committee on Labor and Human Resources.

POM-397. Joint resolution adopted by the Legislature of the State of California; to the Committee on Veteran's Affairs:

"ASSEMBLY JOINT RESOLUTION No. 48

"Whereas, the United States Veterans' Administration has recently announced that it is opposed to any proposal to grant compensation to any of the approximately 3,000 Vietnam veterans suffering illnesses that may be related to their exposure to the herbicide Agent Orange during their Vietnam duty more than a decade ago; and

"Whereas, This defoliant chemical was sprayed extensively by United States forces in Vietnam between 1965 and 1971 to kill jungle growth concealing enemy movements, and its long-term effects were then unknown; and

"Whereas, Extensive studies have shown a causal relationship between dioxin, a major component of Agent Orange, and three illnesses—a liver disorder, a skin condition, and a soft-tissue cancer; and

"Whereas, This unreasonable attitude toward these 3,000 ill veterans is inconsistent with the government's recent decision to award compensation to the residents of Times Beach, Missouri, who have suffered dioxin contamination; and

"Whereas, Legislation is pending before Congress which would award compensation,

based on severity of illness, to these 3,000 suffering veterans; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to support and enact legislation directing the United States Veterans' Administration to pay compensation to the estimated 3,000 Vietnam veterans who suffer from liver disorders, skin conditions, and soft-tissue cancer having a strong correlation to exposure to Agent Orange during their service in Vietnam; and be it further

"Resolved, That the United States Veterans' Administration fulfill the intent of the Starbuck Memorandum dated April 3, 1980, which states that "given the considerable uncertainties as to the disposition of defoliants in Southeast Asia and troop positions at pertinent times, the Veterans' Administration will accept, in the absence of positive evidence to the contrary, a Vietnam Veteran's Contention of Exposure," and with all due and deliberate speed will provide physical examinations to those veterans exposed to Agent Orange during the Vietnam War; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the United States Veterans' Administration."

POM-398. a Joint resolution adopted by the Legislature of the State of California; to the Committee on Veterans' Affairs:

"ASSEMBLY JOINT RESOLUTION No. 22

"Whereas, There are many disabled veterans in California living in areas not served by a United States Veterans' Administration hospital; and

"Whereas, Many private medical facilities and doctors in those areas refuse to honor Veterans' Administration fee service-connected basis cards in the treatment of disabled veterans because of the inordinate delays encountered in the payment process from the Veterans' Administration; and

"Whereas, These same facilities and physicians often refuse to honor CHAMPUS and CHAMPVA authorizations for the same reasons; and

"Whereas, This impasse has imposed a severe hardship on many disabled veterans in California, and has even resulted in many cases in the failure of veterans to receive proper health care services; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to direct the United States Veterans' Administration to improve the system of reimbursements to private physicians for authorized treatment of service-connected disabled veterans in order that these reimbursements are received within a reasonable time so that the confidence of private physicians in the Veterans' Administration will be regained; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit a copy of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-399. A resolution adopted by the Sierra-Central Valley Republican Caucus of San Andreas, Calif. supporting the reelection of President Ronald Reagan; ordered to lie on the table.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

S. Res. 223. A resolution to express the appreciation of the American people for the efforts of the Japanese Government in connection with the Korean Air Lines tragedy.

By Mr. CHAFEE, from the Committee on Environment and Public Works, with an amendment in the nature of a substitute and an amendment to the title:

S. 431. A bill to amend the Clean Water Act, as amended, to authorize funds for fiscal years 1983, 1984, 1985, 1986, and 1987, and for other purposes (with additional and supplemental views) (Rept. No. 98-233).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

William Perry Pendley, of Wyoming, to be an Assistant Secretary of the Interior.

(The above nomination was reported from the Committee on Energy and Natural Resources with the recommendation that it be confirmed, subject to the nominee's commitment to respond to appear and testify before any duly constituted committee of the Senate.)

By Mr. PERCY, from the Committee on Foreign Relations:

Francis Stephen Ruddy, an Assistant Administrator of the Agency for International Development, to be a member of the Board of Directors of the African Development Foundation for the term of 2 years;

Charles G. Wells, of Illinois, to be a member of the Board of Directors of the African Development Foundation for a term of 4 years;

Patsy Baker Blackshear, of Maryland, to be a member of the Board of Directors of the African Development Foundation for a term of 4 years;

Chester A. Crocker, an Assistant Secretary of State, to be a member of the Board of Directors of the African Development Foundation for the term of 2 years;

William F. Pickard, of Michigan, to be a member of the Board of Directors of the African Development Foundation for a term of 6 years;

Henry F. Schickling, of Pennsylvania, to be a member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1985;

Millicent Fenwick, of New Jersey, for the rank of Ambassador during the tenure of her service as U.S. Representative to the Food and Agriculture Organizations in Rome;

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Millicent Fenwick.

Post: Rank of Ambassador, U.S. Representative to the Food and Agriculture Organization.

Contributions; amount; date; donee:

1. Self: $250; 1980 or 1982; Rep. James Jeffords. (R-Vt.).

2. Self: $1,000; 1982; dinner for President Ronald Reagan.

3. Children and spouses names: Mary and Kenneth Reckford; $900, joint contribution; 1982; Fenwick for Senate.

4. Leigh and Hugh Fenwick; $400, joint contribution; 1982; Fenwick for Senate.

5. Leigh Fenwick: $200; 1982; Fenwick for Senate. Hugh Fenwick: $250; 1982; Fenwick for Senate.

6. Brothers and spouses names: None.

7. Sisters and spouses names: None.

Peter Jon de Vos, of Florida, a Career Member of the Senior Foreign Service, Class of Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People's Republic of Mozambique;

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Peter Jon de Vos.

Post: Mozambique.

Contributions:

1. Self: None.

2. Spouse: None.

3. Children and spouses names: None.

4. Parents names: None.

5. Grandparents names: None.

6. Brothers and spouses names: None.

7. Sisters and spouses names: None.

Clair W. Burgener, of California, to be a member of the Board for International Broadcasting for a term expiring April 28, 1985;

Malcolm Forbes, Jr., of New Jersey, to be a member of the Board for International Broadcasting for a term expiring April 28, 1986;

Joseph Lane Kirkland, of the District of Columbia, to be a member of the Board for International Broadcasting for a term expiring April 28, 1984;

Arch L. Madsen, of Utah, to be a member of the Board for International Broadcasting for a term expiring April 28, 1984; and

James Albert Michener, of Pennsylvania, to be a member of the Board for International Broadcasting for a term expiring April 28, 1984.

(The above nominations were reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. DOLE, from the Committee on Finance:

Katherine D. Ortega, of New Mexico, to be Treasurer of the United States.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BENTSEN:

S. 1866. A bill to amend subchapter III of chapter 83 of title 5, United States Code, to

provide for the payment of survivor annuities in certain cases involving missing retired Federal employees or Members of Congress entitled to receive annuities under such subchapter, and for other purposes; to the Committee on Governmental Affairs.

By Mr. GRASSLEY:

S. 1867. A bill to provide additional authorizations of appropriations for fiscal years 1983 and 1984 for the surplus commodities program under the Older Americans Act of 1965, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. RIEGLE (for himself and Mr. LEVIN):

S. 1868. A bill to add $17,996,558 to the budget ceiling for new acquisitions at Sleeping Bear Dunes National Lakeshore; to the Committee on Energy and Natural Resources.

By Mr. DODD:

S. 1869. A bill to provide assistance to local educational agencies and institutions of higher education to promote computer literacy among elementary and secondary school students and their teachers, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. THURMOND (for himself, Mr. BIDEN, Mr. GARN, Mr. LAXALT, Mrs. HAWKINS, Mr. DOLE, Mr. ARMSTRONG, Mr. EAST, Mr. D'AMATO, Mr. GRASSLEY, Mr. HATCH, Mr. KENNEDY, Mr. SIMPSON, and Mr. SPECTOR):

S. 1870. A bill to amend title 18 of the United States Code to provide penalties for credit and debit card counterfeiting and related fraud; to the Committee on the Judiciary.

By Mr. MELCHER:

S. 1871. A bill to allow all restricted Indian lands to be leased for 99 years with the approval of the Secretary of the Interior; to the Select Committee on Indian Affairs.

By Mr. BAKER (for Mr. STAFFORD (for himself and Mr. BAKER)):

S. 1872. A bill to increase endowment funds for eligible individuals under part C of title III of the Higher Education Act of 1965; read twice and placed on the calendar.

By Mr. HUDDLESTON (for himself, Mr. BURDICK, Mr. SYMMS, Mr. RANDOLPH, and Mr. ZORINSKY):

S.J. Res. 167. Joint resolution proposing an amendment to the Constitution of the United States with respect to the English language; to the Committee on the Judiciary.

By Mr. CRANSTON (for himself, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. CHAFEE, Mr. CHILES, Mr. D'AMATO, Mr. DECONCINI, Mr. DIXON, Mr. DODD, Mr. DOLE, Mr. DOMENICI, Mr. EAGLETON, Mr. FORD, Mr. GLENN, Mr. GORTON, Mrs. HAWKINS, Mr. HEINZ, Mr. HOLLINGS, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. LAUTENBERG, Mr. LEAHY, Mr. MATSUNAGA, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. PERCY, Mr. PROXMIRE, Mr. RANDOLPH, Mr. RIEGLE, Mr. SASSER, Mr. SPECTER, Mr. STAFFORD, Mr. TRIBLE, Mr. TSONGAS, Mr. WARNER, Mr. WEICKER, Mr. WILSON, Mr. QUAYLE, and Mr. NUNN):

S.J. Res. 168. Joint resolution to provide for the designation of a month as "National Sickle-Cell Anemia Awareness Month"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BENTSEN:

S. 1866. A bill to amend subchapter III of chapter 83 of title 5, United States Code, to provide for the payment of survivor annuities in certain cases involving missing retired Federal employees or Members of Congress entitled to receive annuities under such subchapter, and for other purposes; to the Committee on Governmental Affairs.

PAYMENT OF SURVIVOR ANNUITIES

● Mr. BENTSEN. Mr. President, today I am introducing legislation providing for the payment of benefits to survivors of retired missing Federal employees or Members of Congress. Under current law, the Office of Personnel Management does not have the authority to pay a missing retiree's annuity to the surviving spouse. Further, the OPM cannot begin payment of survivor benefits in a case where a retiree is presumed missing but not officially declared dead. My bill is intended to rectify this situation.

This discrepancy in the law was brought to my attention by one of my constituents, the wife of the Federal retiree missing since October 1980. My constituent's husband, along with a U.S. Army officer, vanished on a flight from Spain to Germany. Upon learning of the retiree's disappearance, the OPM suspended his monthly annuity check. However, in the absence of any official determination of death, the OPM did not commence payment of survivor benefits to his widow. In short, he was dead enough for the OPM to terminate his pension, but not dead enough to allow payment of survivor benefits to my constituent.

Because a civil service annuity earned by an individual is for his own use and is not considered to be a family benefit, it cannot be claimed by living dependents. In addition, the OPM cannot make a determination of death, and requires a death certificate in order to commence payment of survivor benefits. In this particular case, the required certificate of death was to be provided by the Spanish Government, which concluded that there was insufficient evidence to presume death.

By contrast, existing law permits a Government agency to make an official finding of death in the case of a missing Federal civilian employee or active duty member of a uniformed service. The Army officer accompanying my constituent's husband was officially determined dead by the Department of the Army based upon the circumstances surrounding the officer's disappearance. Although these facts were identical to those of the missing Federal retiree, the information was insufficient for the OPM.

Upon learning of the incident, I requested the Government Accounting Office to investigate this discrepancy which allowed the Department of the Army greater discretion than the OPM. The GAO determined that currently there is neither statutory nor regulatory authority for a Government agency to make an official finding of death in the case of missing Federal retirees. The GAO recommended that statutory authority be given to the OPM to declare the missing person dead and extend protection to the annuitant's dependents.

The OPM concurred with the GAO that statutory authority is needed to resolve this problem and to give the OPM the necessary mandate. Therefore, I am introducing legislation which would allow a survivor benefit to be paid to any individual who would otherwise be entitled to an annuity in the event of the death of a retired employee. If a missing retiree does not reappear and claim his benefits within 6 months of the date the Office determined him to be missing, the OPM is authorized to commence payment of survivor benefits.

We need a consistent Government policy to protect the rights of dependents of our civil service retirees. For 3 years, my constituent has been unable to receive the survivor benefits to which she is entitled. I hope that the appropriate committees will act swiftly to rectify this situation.●

By Mr. DODD:

S. 1869. A bill to provide assistance to local educational agencies and institutions of higher education to promote computer literacy among elementary and secondary school students and their teachers; to the Committee on Labor and Human Resources.

COMPUTER EDUCATION OPPORTUNITIES

● Mr. DODD. Mr. President, today I am introducing legislation to help equalize computer education opportunities and to upgrade education curricula to include adequate computer use in schools throughout the Nation. This legislation is entitled "The Computer Literacy Act of 1983." Representative TIM WIRTH recently introduced identical legislation in the House of Representatives (H.R. 3750).

The 1980's has been aptly called "The Era of the High Tech Revolution." One critically important, and rapidly expanding, component of this revolution is information technology.

John Naisbitt may not have exaggerated the importance of information technology in his book "Megatrends" when he wrote: "Schools around the Nation are begining to realize that in the information society, the two required languages will be English and computer."

Although no one can safely predict the full impact of this technological revolution on the Nation's education systems, some problems are already clearly identifiable.

For example, many students in the more affluent schools effectively are being taught to utilize computers as a part of routine classwork. On the other hand, many students in less affluent or less progressive schools are being frustrated by the lack of computer access and computer-literate teachers. This division in educational opportunities may ultimately create a technological caste system within the Nation's schools which we can ill-afford.

In addition, many school officials lack expertise in choosing the hardware and software most suitable for their schools' needs.

To remedy these emerging problems, provisions of the Computer Literacy Act of 1983 allocate funds for the purchase of computer hardware, priority being given to schools with the greatest need; establish teacher training institutes; and authorize new appropriations for the National Science Foundation and the National Institute of Education to research, evaluate, and disseminate information regarding available computer hardware and software. In addition, this legislation includes provisions for the development of appropriate computer education programs for use in the classroom.

Computer education need not, and must not, be imposed upon existing curricula at the expense of such basics as English, writing, science, or mathematics. Careful course planning and proper computer software and program development, however, will enhance teaching and learning of many subjects. In addition, through proper computer use, students have an opportunity to develop many skills needed in today's technological era.

The value for students of computer skills recently has been shown in many reports and surveys. One survey regarding the use of computers in the classroom was conducted by the National Education Association (NEA). The NEA survey showed approximately 70 percent of responding teachers favorably reported that students with a good grasp of computer knowledge showed more motivation, improved interest in classwork, increased attention span, and enhanced cognitive learning skills.

The advantages from the development of computer skills are not limited to the classroom. One estimate is that by 1990 approximately 30 million jobs—including such areas as health care services, publishing, telecommunications, business, and manufacturing—will be computer related.

In my opinion, Mr. President, the Federal Government can make a valuable contribution to the Nation's future by improving access to quality computer education. The provisions of the Computer Literacy Act of 1983 provides an appropriate Federal initiative toward this goal.

I ask the full text of the bill be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1869

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Computer Literacy Act of 1983".

TITLE I—ACQUISITION OF COMPUTER HARDWARE

PURPOSES

SEC. 101. It is the purpose of this title to authorize assistance to local educational agencies for the acquisition of computer hardware for use in school classrooms in order to promote student competence in the operation and use of new technologies, and thereby to improve student's academic performance in both technical and other fields.

DEFINITIONS

SEC. 102. For purposes of this title—

(1) the term "Secretary" means the Secretary of Education;

(2) the term "local educational agency" has the meaning provided in section 198(a)(10) of the Elementary and Secondary Education Act of 1965;

(3) the term "State education agency" has the meaning provided in section 198(a)(17) of such Act;

(4) the term "average daily attendance" has the meaning provided in section 198(a)(1) of such Act;

(5) the term "computer hardware" means—

(A) a data processor which—

(i) can be programed in at least three standard computer languages;

(ii) has a random access memory capacity of at least sixteen thousand bytes; and

(iii) is or can be connected with a screen for visual display;

(B) in connection with such a data processor (i) a display screen, and (ii) one or more disk or tape drives; and

(C) any equipment necessary for the installation of equipment described in subparagraphs (A) and (B); and

(6) the term "State" means each of the fifty States, the District of Columbia, Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

ALLOCATION OF FUNDS

SEC. 103. (a)(1) From 5 per centum of the amount appropriated pursuant to section 107 for any fiscal year the Secretary shall allocate to each State educational agency an amount for monitoring and enforcement which bears the same ratio to such 5 per centum as the amount allocated to the local educational agencies in that State under paragraph (2) for such fiscal year bears to the sum of the amount allocated to local educational agencies in all the States under such paragraph for such fiscal year.

(2) From the remainder of the amount appropriated pursuant to section 107 for any fiscal year the Secretary shall allocate to each eligible local educational agency an amount which bears the same ratio to such remainder as the number of children in average daily attendance in the schools of such local educational agency bears to the sum of such children in the schools of all local educational agencies.

(b) Notwithstanding subsection (a)(2), the allocation of any local educational agency shall be reduced to the extent that assistance under this title has been or would be in excess of the amount necessary for such agency to acquire one unit of computer hardware for each thirty children in average daily attendance in the schools of such agency.

LOCAL APPLICATION FOR FUNDS

SEC. 104. (a)(1) A local educational agency shall be eligible for an allocation under section 103 if it has on file with the State educational agency a current application, approved by the State educational agency, describing the computer hardware procurement program to be conducted with assistance provided under this title. Such application shall contain—

(A) assurances that the local educational agency will allocate funds among the school within its district so that—

(i) funds are provided first to those schools with the least computer hardware per student;

(ii) funds are not provided to any school after such school has the equivalent of one unit of computer hardware for each thirty children in average daily attendance at such school;

(B) an identification of the computer hardware which are already available in the schools of such agency, a specification of the computer hardware to be acquired with funds provided under this title during the next funding period, and assurances that the acquisition cost of such hardware will be reasonable and in accordance with such guidelines as may be prescribed by the Secretary by regulation; and

(C) describe the programs and procedures which the local educational agency has developed to ensure the participation of parents in the establishment of its computer hardware acquisition program and in the development and implementation of a curriculum for the use of such hardware.

(2) Such an application may be amended at any time to describe changes in or additions to the activities originally set forth in the application.

(b) An application or amendment thereto shall be approved by the State educational agency unless such agency determines that the application does not provide for the use of such funds in a manner which meets the requirements of this title or is inconsistent with such requirements as the Secretary may prescribe by regulation. No such determination shall be made except after notice and opportunity for a hearing is given to the applicant.

STATE RESPONSIBILITIES

SEC. 105. (a) Each State which desires to have its local educational agencies qualify for assistance under this title shall have on file with the Secretary an application submitted by its State educational agency. Each such application shall contain (1) satisfactory assurances that the State educational agency will comply with the requirements of this section; and (2) such information as the Secretary considers necessary to determine whether such assurances will be carried out.

(b) A State educational agency shall not finally disapprove, in whole or in part, the application of any local educational agency

under section 104 without first affording such agency reasonable notice and opportunity for a hearing.

(c) Each State educational agency shall—

(1) adopt standards, consistent with minimum standards prescribed by the Secretary, for monitoring, with the funds provided under section 103(a)(1), the effectiveness of computer hardware procurement programs assisted under this title;

(2) adopt written procedures for receiving complaints regarding such programs;

(3) establish procedures for notifying the Secretary of any failure by a local educational agency to comply with this title, regulations prescribed thereunder, or any provision in its application; and

(4) make provision for audits of expenditures of funds received under this title to determine, at a minimum, the fiscal integrity of grant and subgrant financial transactions and reports, and compliance with applicable statutes, regulations, and terms and conditions of the grant or subgrant.

(d) Each State educational agency shall submit, at such times and in such detail as the Secretary may require, such reports as may be necessary to enable the Secretary to carry out this title, and shall keep such records and afford such access thereto, as the Secretary may require.

PARTICIPATION OF CHILDREN FROM PRIVATE SCHOOLS

SEC. 106. (a) To the extent consistent with the number of children in the school district of the local educational agency who are enrolled in private elementary and secondary schools, such agency shall, after consultation with appropriate private school representatives, make provision for including special educational services and arrangements (such as dual enrollment, educational radio and television, and mobile educational services and equipment) in which such children can participate and which meet the requirements of this title. Expenditures for educational services and arrangements pursuant to this subsection for children in private schools shall be equal (taking into account the number of children to be served and the needs of such children) to expenditures for children enrolled in the public schools of such agency.

(b) If by reason of any provision of law a local educational agency is prohibited from providing for the participation of children from private schools as required by subsection (a), or if the Secretary determines that a local educational agency has substantially failed or is unwilling to provide for such participation on an equitable basis, the Secretary shall waive such requirements and shall arrange for the provision of services to such children, which shall be subject to the requirements of this section. Such waivers shall be subject to consultation, withholding notice, and judicial review in accordance with section 557(b) (3) and (4) of the Education Consolidation and Improvement Act of 1981.

AUTHORIZATION OF APPROPRIATIONS

SEC. 107. There are authorized to be appropriated to carry out this title $300,000,000 for each of the fiscal years 1984 through 1993.

TITLE II—TEACHER TRAINING INSTITUTES

NATIONAL SCIENCE FOUNDATION PROGRAM

SEC. 201. (a) From the amount appropriated pursuant to section 203 for any fiscal year, the National Science Foundation shall arrange, through grants and contracts with nonprofit professional scientific or engineering organizations, science museums, regional science education centers, State educational agencies, and institutions of higher education (including community colleges), for the development and operation by such entities of short-term or regular session institutes for advanced study to improve the qualifications of individuals who are engaged in or preparing to engage in the teaching, or supervising or training of teachers, of the operation and use of new technologies.

(b) In making grants and contracts under subsection (a), the National Science Foundation shall give special consideration to institutes training teachers, or supervisors or trainers of teachers, serving or preparing to serve in elementary and secondary schools enrolling substantial numbers of culturally, economically, socially, and educationally handicapped youth or in programs for children of limited English language proficiency.

STIPENDS

SEC. 202. Each individual who attends an institute operated under the provisions of this title shall be eligible (after application therefor) to receive a stipend at the rate of $275 per week for the period of attendance at such institute.

AUTHORIZATION OF APPROPRIATIONS

SEC. 203. There are authorized to be appropriated to carry out this title $20,000,000 for each of the fiscal years 1984 through 1993.

TITLE III—INFORMATION DISSEMINATION AND EVALUATION

NATIONAL INSTITUTE OF EDUCATION

SEC. 301. (a) For the purpose of providing advice and technical assistance to State and local educational agencies on the expenditure of funds under title I of this Act and on the acquisition of suitable computer software, the National Institute of Education and the National Science Foundation, in accordance with an interagency agreement between such Institute and such Foundation, shall—

(1) evaluate available computer hardware and software, in terms of its usefulness in the classroom;

(2) disseminate the results of such evaluation; and

(3) develop model computer educational software, and make such model software (and its design premises) available to computer software producers and distributors, teachers, and school administrators.

(b) The Institute and the Foundation shall carry out the functions described in paragraphs (1), (2), and (3) of subsection (a) under grants or contracts made with funds appropriated under subsection (c).

(c) There are authorized to be appropriated to carry out this section such sums as may be necessary for each of the fiscal years 1984 through 1993.

PRIVATE EVALUATION AND DISSEMINATION CENTERS

SEC. 302. (a) The National Science Foundation shall, through grants to or contracts with nonprofit professional scientific or engineering organizations, science museums, regional science education centers, public television, State educational agencies, and institutions of higher education (including community colleges), conduct, assist, and foster research and experimentation on, and dissemination of, models of instruction in the operation and use of computers. In selecting such entities for such grants or contracts, the Foundation shall give priority to those proposals—

(1) prepared with the active and broad community involvement of such groups as parents, teachers, school boards and administrators, and local business; or

(2) which propose the establishment of model training programs for adults.

(b) Funds available under a grant or contract pursuant to this section may be used for the acquisition of computer hardware and software.

(c) The Director of the National Science Foundation shall report to the Congress annually on the results of research and experimentation performed with funds made available under this section. The Director, in conjunction with the National Institute of Education, shall take such steps as may be necessary to disseminate information concerning such results to local educational agencies.

(d) There are authorized to be appropriated to carry out this section such sums as may be necessary for each of the fiscal years 1984 through 1993.●

By Mr. THURMOND (for himself, Mr. BIDEN, Mr. GARN, Mr. LAXALT, Mrs. HAWKINS, Mr. DOLE, Mr. ARMSTRONG, Mr. EAST, Mr. D'AMATO, Mr. GRASSLEY, Mr. HATCH, Mr. KENNEDY, Mr. SIMPSON, and Mr. SPECTER):

S. 1870. A bill to amend title 18 of the United States Code to provide penalties for credit and debit card counterfeiting and related fraud; to the Committee on the Judiciary.

CREDIT AND DEBIT CARD COUNTERFEITING AND FRAUD ACT OF 1983

Mr. THURMOND. Mr. President, on behalf of myself; the ranking minority member of the Judiciary Committee, Senator BIDEN; the chairman of the Subcommittee on Criminal Law, Senator LAXALT; the chairman of the Committee on Banking, Housing and Urban Affairs, Senator GARN; and other distinguished members of the Judiciary and Banking Committees, I am today introducing the Credit and Debit Card Counterfeiting and Fraud Act of 1983. This bill, which has been developed in consultation with the affected industries, the Department of Justice, and the Secret Service, would amend title 18 of the United States Code to provide new offenses relating to counterfeiting and trafficking in phony credit and debit cards. It is intended to complement recently introduced legislation amending title 15 offenses involving the misuse of credit cards and electronic transfer devices. Furthermore, it is a companion to the measure introduced in the other body by the ranking minority member of the Committee on the Judiciary, Congressman HAMILTON FISH, Jr.

Mr. President, according to estimates from the credit card industry, this country has recently experienced a phenomenal increase in the counterfeiting and sale of credit cards and other payment devices, including those used to take cash from "money

machines." For instance, according to VISA, losses stemming from counterfeit VISA cards increased from $10,000 in 1974–75 to over $11 million in 1982–83. Worldwide counterfeiting losses relating to all cards increased from $15 million to $50 million between 1981 and 1982 alone; 94 percent of this activity is estimated to have taken place in the United States.

Title 15 currently contains some offenses relating to the criminal misuse of credit and debit cards. However, it does not adequately address the relatively new phenomenon of counterfeiting and trafficking in phony cards. According to industry representatives, most counterfeiting and card alteration activities are the work of organized gangs who use the proceeds of this activity to finance other illegal activities, such as drug and firearms trafficking. The Wall Street Journal, on January 24, 1983, reported the murder of an associate of a counterfeit-card ring in New Jersey, which was discovered in possession of 200,000 counterfeit cards. Considering the organized crime and interstate aspects of this problem, a Federal response to major trafficking and counterfeiting activities is clearly warranted.

The Credit and Debit Card Counterfeiting and Fraud Act of 1983 amends title 18 of the United States Code by adding a new section 1029. It would make it a Federal offense, where jurisdictional requirements are met, to: (1) produce or transfer a fraudulent card with intent to defraud; (2) possess five or more fraudulent cards with intent to defraud or transfer unlawfully; or (3) produce, transfer, or possess card-making equipment with intent to make fraudulent cards. Conspiracies and attempts to commit offenses are also punishable. The penalties, which are based on the number of fraudulent cards involved and whether the offender has previously committed such an offense, range up to a maximum of $100,000 and 20 years of imprisonment.

The Credit and Debit Card Counterfeiting and Fraud Act of 1983 is patterned after the legislation which was enacted last year in response to the similarly growing problem of false identification. The Justice Department has indicated that this legislation promises to become a valuable tool in the fight against organized crime and career criminals. I believe that the bill, which I am introducing today, will also serve as a useful response to a problem which ultimately costs all innocent consumers.

Mr. President, as chairman of the Committee on the Judiciary, I intend to encourage prompt action on this important measure. I was pleased to learn that my colleagues on the Banking, Housing, and Urban Affairs Committee, many of whom have cosponsored this bill, have under serious consideration a complementary measure amending title 15. Hopefully, we will be able to pass comprehensive legislation before the end of this first session of the 98th Congress. I urge my colleagues to cosponsor the Credit and Debit Card Counterfeiting and Fraud Act of 1983.

Mr. President, I ask unanimous consent that the language of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1870

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Credit and Debit Card Counterfeiting and Fraud Act of 1983".

SEC. 2. (a) Chapter 47 of title 18, United States Code, is amended by adding the following new section 1029 at the end thereof:

"§ 1029. Fraud and related activity in connection with payment devices

"(a) Whoever, in circumstances described in subsection (c) of this section—

"(1) knowingly and with intent to defraud, produces, buys, sells, or transfers a fraudulent payment device;

"(2) knowingly possesses or has control or custody of, with intent to defraud or transfer unlawfully, five or more fraudulent payment devices;

"(3) knowingly produces, buys, sells, transfers, has control or custody of, or possesses device-making equipment, with the intent that such equipment be used in the production of a fraudulent payment device; or

"(4) attempts or conspires to do so,

shall be punished as provided in subsection (b) of this section.

"(b) The punishment for an offense under subsection (a) of this section is—

"(1) a fine of not more than $10,000 or imprisonment for not more than ten years, or both;

"(2) a fine of not more than $50,000 or imprisonment for not more than fifteen years, or both, if the offense involves any device-making equipment, or five or more fraudulent payment devices; or

"(3) a fine of not more than $100,000 or imprisonment for not more than twenty years, or both, in the case of second or subsequent offenses.

"(c) The circumstances referred to in subsection (a) of this section are that—

"(1) the offense affects a financial institution or interstate or foreign commerce;

"(2) the offender in the course of the offense uses an instrumentality of interstate or foreign commerce; or

"(3) the fraudulent payment device or device-making equipment, or any aspect or component thereof, has been in interstate or foreign commerce.

"(d) As used in this section—

"(1) the term 'payment device' means any card, plate, code, account number, or other means of account access existing for the purpose of obtaining, alone or in conjunction with another payment device, money, goods, services, or any other thing of value, or for the purpose of initiating a transfer of funds (other than a transfer originated solely by paper instrument);

"(2) the term 'fraudulent payment device' means—

"(A) any payment device or a representation, depiction, facsimile, aspect or component of a payment device that is counterfeit, fictitious, altered, forged, lost, stolen, incomplete, fraudulently obtained or obtained as part of a scheme to defraud; or

"(B) any invoice, voucher, sales draft, or other reflection or manifestation of such a device;

"(3) the term 'produce' means to make, design, alter, authenticate, duplicate, or assemble;

"(4) the term 'financial institution' means an institution that holds deposits or accounts insured by the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, or the National Credit Union Administration; and

"(5) the term 'device-making equipment' means any equipment, mechanism, or impression designed, used, or that can be used to produce a payment device, a fraudulent payment device, or any aspect or component thereof.

"(e) The United States Secret Service shall have jurisdiction to investigate offenses under this section, in addition to any other agency having such jurisdiction.".

(b) The table of sections at the beginning of chapter 47 of title 18 of the United States Code is amended by adding at the end the following new item:

"1029. Fraud and related activity in connection with payment devices.".

● Mr. D'AMATO. Mr. President, I am proud to join my distinguished colleague, Senator THURMOND, as an original cosponsor of the Credit and Debit Card Counterfeiting and Fraud Act of 1983. This much needed legislation would amend title 18 of the United States Code which presently contains no provisions directed at the burgeoning problem of counterfeiting and trafficking in fraudulent credit and debit cards. The act adds a new section to the code making it a Federal offense to produce, transfer, or possess fraudulent credit cards, credit card numbers, or equipment designed to manufacture such fraudulent devices. Conspiracies and attempts to commit such offenses are also punishable under the act.

The credit and debit card industries have greatly expanded as a result of technological advances in the communications field. Unfortunately, these technological advances have been turned against the industry by sophisticated criminals who have used innovative and technologically advanced methods to commit crimes which were beyond the imagination of the most clever draftsmen of currently applicable criminal statutes. The magnitude of the problem is evident from the fact that worldwide card losses absorbed by the two major credit card companies from counterfeiting alone amounted to $50 million in 1982, up from $15 million in 1981—a 233-percent increase in a single year.

Unfortunately, Mr. President, New York has the dubious distinction of being the credit card fraud capital of the world. VISA estimates that nearly

50 percent of its losses due to counterfeiting occur in New York State.

While much of the fraud problem is centered in New York, Miami, and Los Angeles, every bank that participates in the bank card marketplace and their customers are potential victims of this fraud. Unless this type of criminal behavior is not swiftly and adequately addressed, we can be assured of its further proliferation to other States throughout the Union. The Credit and Debit Card Counterfeiting and Fraud Act of 1983 is an important and necessary step in providing our law enforcement officials with the means to combat this illicit activity. Stiff penalties imposed on one found guilty of these crimes would deter potential offenders from participating in this type of activity.

More importantly, the Credit and Debit Card Counterfeiting and Fraud Act of 1983 will protect the interests of the consumer, who ultimately bears the increased costs for credit and debit card services resulting from industry fraud losses. As a member of the Consumer Affairs Subcommittee of the Senate Banking, Housing and Urban Affairs Committee, I am also pleased to be an original cosponsor of S. 1555, a bill to amend the Truth In Lending Act and the Electronic Fund Transfer Act, introduced by Senator HAWKINS, chairman of that subcommittee. S. 1555 is the first prong of this two-pronged attack against the escalation of credit card fraud. Senator HAWKINS' bill would correct blatent inadequacies of the Truth in Lending Act and the Electronic Funds Transfer Act. Under those acts, fraudulent use of credit or debit card numbers is not now a prohibited activity. S. 1555 closes this loophole by redefining "credit card" to include an actual or fictitious account number or other means of access to an account. Along with other tightening provision, S. 1555 would also increase penalties applicable to those convicted of such crimes.

I look forward to working with both Chairman THURMOND and Senator HAWKINS on this two-pronged legislative package designed to combat this innovation form of criminal activity. The unchecked escalation of this activity poses a significant threat to our Nation's payment system which relies increasingly on the security and effectiveness of credit and debit card use.●

● Mr. ARMSTRONG. Mr. President, today I join with my colleague, Senator THURMOND, to introduce legislation to curb fraudulent use of credit cards and the monetary losses attributed to illegal card use which have risen dramatically. Worldwide card industry losses from counterfeiting rose from $15 million in 1981 to $50 million in 1982. This loss is expected to double to $100 million in 1983, according to estimates by the credit card industry. Most of the growth is a result of organized crime activities committed by highly sophisticated larcenists. Approximately two-thirds of the fraud dollar losses occur from purchases made before the issuer realized that the card is being fraudulently used.

Who are the victims of these losses? Businesses and financial institutions bear the immediate brunt of the losses but it is eventually passed on to the cardholding consumer, absorbed into the cost of merchandise and credit. In addition, abuse spins off into other crimes. Schemes involving fraudulent purchases of merchandise are resold to the general public through a "fence" masquerading as legitimate discount stores. Use of violence is not uncommon in accounts of armed robberies of actual credit cards from the factory or in acquisition of cards or numbers from issuers or cardholders. Undoubtedly, proceeds are further applied to other types of crime such as drugs and firearms.

Although major card companies have developed aggressive programs to resist card fraud that will inhibit counterfeiting and alteration of cards, it is clear that these procecures will not be enough to overcome the staggering increases of these illegal activities. The long-term potential misues of credit cards has far-reaching ramifications on the country's consumer payment systems and the use of credit. Therefore, cooperation of both the Federal Government and the States is needed to close the gaps in the law to effectively deal with the problem. It is clear that Federal involvement is needed since major organized card operations cross State and national boundaries. Ninety-three percent of all counterfeit activity in the United States occurs in 12 States and the U.S. accounts for approximately 94 percent of all international activity.

Our bill, called the Credit and Debit Card Counterfeiting and Fraud Act of 1983, would do three things: First, make it a Federal crime to produce, buy, sell, or transfer counterfeit cards, altered cards, or stolen cards, all covered by the term "fraudulent payment device"; second, punish the possesor of five or more fraudulent credit cards; and third, provide penalties for the production, sale, transfer, or possession of equipment used in making fraudulent cards.

Fraudulent use of credit cards is no different from counterfeiting of U.S. currency or the forgery of checks, yet, the potential for credit card abuse is far greater. The larcenist needs only the card number acquired from a carbon receipt to manufacture another card on which transactions can be made in person or over the phone. By the time the misuse of the card number is discovered, another counterfeited card will be in use and the old one discarded. Congress must move quickly to enact this much-needed legislation to strengthen the criminal laws against this growing national problem. Millions of dollars will continue to be lost each year unless something is done to discourage this growth.●

By Mr. MELCHER:

S. 1871. A bill to allow all restricted Indian lands to be leased for 99 years with the approval of the Secretary of the Interior; to the Select Committee on Indian Affairs.

LEASING OF RESTRICTED INDIAN LANDS

● Mr. MELCHER. Mr. President, the bill I am offering today gives authority to the Secretary of the Interior to lease Indian trust lands for up to 99 years when the Secretary finds that such a lease is in the best interest of the Indian owner. In the act of August 9, 1955, the Congress permitted leases for up to 25 years, except grazing leases are limited to 10 years. Since enactment of that law, 25 U.S.C. 415 has been amended no less than 25 times to allow lands on specific reservations and allotments to be leased up to 99 years. This bill would eliminate the necessity for additional legislation. No tribe or allottee now under a 99-year lease would be affected by the proposed amendment to section 415. Because Indian tribes are beginning long-term business and economic development, authority for long-term leases is vital. Very little capital is available for investment on property where the maximum lease terms are 25 years. This bill will provide the mechanism for tribes to accomplish long-range development without the unnecessary delay of congressional approval.

I ask unanimous consent to print the bill in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1871

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (a) of the first section of the Act of August 9, 1955 (69 Stat. 539; 25 U.S.C. 415) is amended by striking out the second sentence and inserting in lieu thereof the following: "Any lease granted under this subsection (other than a lease of land for grazing purposes) shall be for a term that does not exceed 25 years, except that such lease may be for any term that does not exceed 99 years if the Secretary determines that such term is in the best interests of the Indian owner. Any lease of land granted under this subsection for grazing purposes shall be for a term that does not exceed 10 years.".

(b) The amendment made by subsection (a) shall apply to leases entered into after the date of enactment of this Act.●

By Mr. HUDDLESTON (for himself, Mr. BURDICK, Mr. SYMMS, Mr. RANDOLPH, and Mr. ZORINSKY):

S.J. Res. 167. Joint resolution proposing an amendment to the Constitution of the United States with respect to the English language; to the Committee on the Judiciary.

CONSITUTIONAL AMENDMENT TO MAKE ENGLISH THE OFFICIAL LANGUAGE OF THE UNITED STATES

Mr. HUDDLESTON. Mr. President, the remarks I am about to make will be readily understood by my distinguished colleagues in the Congress. They will be understood by my constituents in Kentucky. They will be understood by the journalists in the press gallery, and by most of their readers across the country.

No simultaneous interpreters will be needed for those in this Chamber, and no translators will be needed for most of those who will be reading these words in the CONGRESSIONAL RECORD.

In order to guarantee that this current state of affairs endures, as it has for over 200 years. I am introducing today a constitutional amendment to make English the official language of the United States.

The amendment addresses something so basic, so very fundamental to our sense of identity as Americans, that some, who are in full agreement with the objectives of this amendment, will nevertheless question the necessity for it. So widely held is the assumption that English already is our national language, that the notion of stating this in our national charter may seem like restating the obvious. However, I can assure my colleagues that this is not the case and that the need for a constitutional amendment grows stronger every day.

Almost alone among the world's very large and populous nations, the United States enjoys the blessings of one primary language, spoken and understood by most of its citizens. The previously unquestioned acceptance of this language by immigrants from every linguistic and cultural background has enabled us to come together as one people. It has allowed us to discuss our differences, to argue about our problems and to compromise on solutions. It has allowed us to develop a stable and cohesive society that is the envy of many fractured ones, without imposing any strict standards of homogeneity, or even bothering to designate the language, which is ours by custom, as the Nation's official one.

As a nation of immigrants, our great strength has been drawn from our ability to assimilate vast numbers of people from many different cultures and ethnic groups into a nation of people that can work together with cooperation and understanding. This process was often referred to as the melting pot and in the past it has been seen as an almost magical concept that helped to make the United States the greatest nation on Earth.

But for the last 15 years, we have experienced a growing resistance to the acceptance of our historic language, an antagonistic questioning of the melting pot philosophy that has traditionally helped speed newcomers into the American mainstream.

Initially, the demands to make things easier for the newcomers seemed modest enough; and a generous people, appreciative of cultural diversity, was willing to make some allowances. For example, the English language requirements for naturalization were removed for elderly immigrants living here for 20 years who were still unable to meet them; and the use of a child's home language in the school setting was encouraged, in a well-intentioned attempt to soften the pain of adjustment from the home to the English-speaking society that school represents.

However, the demands have sharply escalated, and so has the tone in which they are presented. Bilingual education has gradually lost its role as a transitional way of teaching English, and now mandates a bicultural component. This mandate has been primarily shaped and promoted by the Federal Government. The unfortunate result is that thousands of immigrant and nonimmigrant children are languishing in near-permanent bilingual/bicultural programs, kept in a state of prolonged confusion suspended between two worlds, and not understanding what is expected of them. They and their parents are given false hopes that their cultural traditions can be fully maintained in this country, and that the mastery of English is not so important, after all.

This change in attitude was aptly described by Theordore H. White in his book "America in Search of Itself" wherein he stated:

Some Hispanics have, however, made a demand never voiced by immigrants before: that the United States, in effect, officially recognize itself as a bicultural, bilingual nation . . . [They] demand that the United States become a bilingual country, with all children entitled to be taught in the language of their heritage, at public expense. No better hymn to the American tradition has ever been written than "The Education of Hyman Kaplan," by Leo Rosten, which describes with tears and laughter the efforts of the earlier immigrants . . . to learn the language of the country in which they wished to live. In New York today, forty years later, Hispanic entitlement has created a college, Hostos Community College—supported by public taxes—which is officially bilingual; half its students receive instruction primarily in Spanish, as they strive to escape from the subculture of the Spanish ghetto. Bilingualism is an awkward word—but it has torn apart communities from Canada to Brittany, from Belgium to India. It expresses not a sense of tolerance but a demand for divisions.

This misdirected public policy of bilingualism has been created primarily by the Federal Government, at the insistence of special interest groups, and it continues today because elected officials do no want to run the risk of taking a position that could, in some way, offend these groups. An example of how far this special interest influence reaches can be seen by President Reagan's reversal on the issue. At the beginning of his administration he attempted to kill the bilingual program, now he is embracing the concept.

Over the last few years the Federal Government has spent approximately $1 billion on the bilingual education program and this year alone it cost $139 million. What we have bought with this money is a program that strives to keep separate cultural identities rather than a program that strives to teach English. It is a program which ignores the basic fact that in order to learn another language the student must talk, read and use that language on a regular basis.

The failure of bilingual education programs to teach children how to speak English in the shortest time has been documented by a study done at the U.S. Department of Education and by the recent report of the Twentieth Century Fund Task Force on Federal Elementary and Secondary Education Policy. The latter report stated unequivocally that:

. . . The Task Force recommends that the federal government clearly state that the most important objective of elementary and secondary education in the United States is the development of literacy in the English language . . .

. . . The Task Force recommends that federal funds now going to the bilingual program be used to teach non-English-speaking children how to speak, read, and write English.

Even though the bilingual education program has received failing marks by many reputable educators, it still survives because it is a political issue rather than an educational issue. What this means is that we will continue to finance an expensive bilingual program that does more to preserve cultural identities than it does to teach children to speak English.

In the area of voting rights we have also formulated a national policy that encourages voting citizens not to learn to speak English. The Voting Rights Act, which was reauthorized in 1982, requires bilingual ballots if more than 5 percent of the citizens of voting age in a jurisdiction are members of specified language minority groups and the illiteracy rate is higher than the national rate. As a result bilingual ballots are required by Federal law to be provided in 30 States—even if there is no demand for them.

In essence, we have gone far beyond providing a necessary service on a temporary basis; and, we are now engaged in actively encouraging the use of bilingual ballots, even though in many cases they may not be needed. The wisdom of this policy is clearly lacking when you consider that the vast bulk

of political debate, whether it is in the printed press or the electronic media, is conducted in English. By failing to provide a positive incentive for voting citizens to learn English, we are actually denying them full participation in the political process. Instead, we are making them dependent upon a few interpreters or go-betweens for information as to how they should vote. Although this process helps to preserve minority voting blocks, it seriously undercuts the democratic concept that every voting individual should be as fully informed as possible about the issues and the candidates.

In many parts of the country foreign language ballots are under attack. In San Francisco, a local initiative petition has been filed urging that local governments be allowed to print ballots in English only. In that area ballots are now printed in English, Spanish, Chinese and because of the new census figures, Tagalog ballots will probably be printed in the future.

There are other less prominent provisions of Federal law which now require the use of foreign languages. For example, 28 U.S.C. 1827 requires the Director of the Administrative Office of the U.S. courts to establish a program for the use of foreign language interpreters in Federal civil and criminal proceedings for parties whose primary language is other than English; 42 U.S.C. 254 requires the use of foreign language personnel in connection with federally funded migrant and community health centers; and 42 U.S.C. 4577 requires the use of foreign language personnel in the alcohol abuse and treatment programs. Although I can understand that this kind of assistance is helpful, the fact that it must be legislated strongly indicates that we are failing miserably in our efforts to teach immigrants and many of our native born how to speak, read and write English.

The Federal laws requiring the use of interpreters and foreign languages are merely the tip of the iceberg. I recently sent a request to all of the State Governors and the major Federal agencies asking for information regarding non-English forms and publications that their offices produce, which are intended for use in this country. Although my staff is still in the process of reviewing the data, and I have not yet received responses to all of my letters, we know that hundreds of different non-English forms and publications are now being printed and distributed on a wide scale throughout the United States. These publications cover a broad spectrum and range from White House press releases in Spanish to National Labor Relations Board notices in 32 different languages. The non-English materials which I have received are in a stack that is about 3 feet high, and we are adding to it almost daily. However, even when all the responses are in we still will not have a complete picture of the use of official, non-English publications. Many of the States are only sending a few samples of what they produce, and I am told that if copies of all bilingual educational materials were sent we could fill a large room. While distribution of these materials may be seen as providing just another government service, it can also be seen as reducing the incentive to learn English and demonstrates a growing nationwide problem.

At the nongovernment level there is a great deal of emphasis being placed on the use of non-English languages. In some major metropolitan areas English is the second language; minorities, who speak only English, are being told that they must learn a foreign language in order to be eligible for a job in parts of this country; and, in many stores non-English languages are the only ones used to conduct business. It is not uncommon to find areas in this country where an individual can live all of his or her life having all of his social, commercial, and intellectual needs met without the use of English.

Statistics show a disconcerting trend away from the common use of English. In 1975 the Bureau of the Census reported that about 8 million people in this country used a language other than English in their households. When the census was conducted in 1980 the number of people who spoke a language other than English at home was found to be over 22 million. Although these numbers are subject to many interpretations, to me they indicate—very strongly—that the melting pot is not working as it once did.

My assumption is confirmed by a recent population bulletin, "U.S. Hispanics; Changing the Face of America," which concluded that because of their common language and large numbers, Hispanics will take longer than other immigrant groups to assimilate into the American society.

If this situation were static and merely a reflection of the large scale legal and illegal immigration the United States has been experiencing over the last few years—in 1980 more immigrants entered the United States than at any time other than the peak years at the turn of the century—there would not be cause for concern. However, what we are seeing is a decrease in the use of English and a widely accepted attitude that it is not necessary to learn English.

There is a new philosophy taking hold, and it is gaining more and more acceptance. In the June 13, 1983, Time magazine an article stated in regard to this new philosophy, that:

> Now, however, a new bilingualism and biculturalism is being promulgated that would deliberately fragment the Nation into separate, unassimilated groups . . . The new metaphor is not the melting pot but the salad bowl, with each element distinct. The biculturalists seek to use public services, particularly schools, not to Amercianize the young but to heighten their consciousness of belonging to another heritage.

The United States is presently at a crucial juncture. We can either continue down the same path we have walked for the last 200 years, using the melting pot philosophy to forge a strong and united nation or, we can take the new path that leads in the direction of another Tower of Babel.

There are many nations in the world today that would give a great deal to have the kind of internal social and political stability that a single primary language (English) has afforded us. For us to consciously make the decision to throw away this stabilizing force would be seen as foolish and stupid in countries that have paid a high price for not having a universally accepted language.

We have to look no further than the nation which is closest to us geographically and culturally—Canada. They have had a long-running experience with bilingualism and biculturalism, and it is an experience that still generates divisiveness and still threatens to shatter the Nation's unity. The key cause of Canada's internal conflict is language. According to the Annual Report, 1981, of the Commissioner of Official Languages, the total cost so far in implementing the Canadian Official Languages Act "is on the order of $4 billion spread over the 12 years. The question of cost-effectiveness is more problematical. Measured against the goals of relieving English-French tensions and fostering a common pride in the value of our national languages, the results may be more questionable."

Belgium is another nation that has suffered severe internal dissent, much of which has been caused by language differences. In the last 39 years the political coalitions that are necessary to govern that country have been broken apart over 30 times by the fights between the French speaking Walloons and the Dutch speaking Flemish. This political squabbling has had serious consequences for Belgium, and it is not the kind of situation to which any nation should voluntarily subject itself.

This type of political instability has been repeated throughout history, and is still occuring in many countries today. In countless places, differences in language have either caused or contributed significantly to political, social, and economic instability. While the absence of language differences does not guarantee that these problems will not occur, I believe that it does significantly reduce the chances that they will occur.

The constitutional amendment which I am proposing is not unusual,

and in fact, many nations have one official language. According to the Library of Congress these include, but are not limited to, Austria, Bulgaria, Denmark, France, the German Democratic Republic, the Federal Republic of Germany, Greece, Hungary, Italy, the Netherlands, Norway, Poland, Romania, and Sweden.

Within the United States there is ample tradition and legislation to justify this approach. According to the Library of Congress:

Several Federal statutes and numerous State laws do require the use of English in a variety of areas.

Thus, the Nationality Act of 1940 (8 U.S.C. 423) requires that—

"No person . . . shall be naturalized as a citizen of the United States upon his own petition who cannot demonstrate—

"(1) an understanding of the English language, including an ability to read, write an speak words in ordinary usage in the English language" (with provisos).

Secondly, 28 U.S.C. 865 requires that in determining whether a person is qualified for jury service, the chief judge of a district court "shall deem any person qualified to serve on grand and petit juries in the district court unless he (the prospective juror)—

"(2) is unable to read, write, and understand the English language with a degree of proficiency sufficient to fill out satisfactorily the juror qualification form;

"(3) is unable to speak the English language. . . ."

At the State level, most States have statutes requiring the use of English as the language of instruction in the public schools. Some States also statutorily require English as the language of legal proceedings and legal notices, of business regulation, etc.

More recently, the U.S. Senate has spoken out very strongly in favor of establishing English as the official language. On August 13, 1982, Senator Hayakawa introduced an amendment to the Immigration Reform and Control Act declaring that "the English language is the official language of the United States". On a rollcall vote 78 Senators voted for this amendment and it was included in the bill. When this same bill was again reported out of the Judiciary Committee on April 21, 1983 it again contained this language, and the report of the full committee stated:

If immigration is continued at a high level, yet a substantial portion of these new persons and their descendants do not assimilate into the society, they have the potential to create in America a measure of the same social, political, and economic problems which exist in the countries from which they have chosen to depart. Furthermore, if language and cultural separatism rise above a certain level, the unity and political stability of the nation will—in time—be seriously diminished. Pluralism, within a united American nation, has been the single greatest strength of this country. This unity comes from a common language and a core public culture of certain shared values, beliefs, and customs which make us distinctly "Americans".

The concerns that were expressed by the Senate Judiciary Committee are reflected in the concerns of thousands of citizens throughout this country. In fact, a new national organization has recently been created called U.S. English. The honorary chairman of this organization is former U.S. Senator S. I. Hayakawa, who speaks with a great deal of authority on this issue because he is an immigrant and distinguished scholar of semantics and languages.

U.S. English refers to itself as "a national, non-profit, non-partisan organization . . . founded to defend the public interest in the growing debate on bilingualism and biculturalism".

If we continue along the path we now follow, I believe that we will do irreparable damage to the fragile unity that our common language has helped us preserve for over 200 years. Cultural pluralism is an established value in our national life, and one which we greatly cherish. Paradoxically, cultural pluralism can only continue if we retain our common meeting ground; namely, the English language. If we allow this bond to erode, we will no longer enjoy the benefits of cultural diversity, but rather, we will suffer the bitterness of ethnic confrontations and cultural separatism.

The constitutional language I am proposing is simple and straightforward: It would serve to establish a principle that would strengthen us as a nation. However, I am aware that adding to the Constitution takes us into uncharted waters, and that there will be many misleading allegations about the extent of the problem and the proposed remedy. This is one of the reasons I have chosen to propose a constitutional amendment in order to address this issue. It will focus national attention on the problem, and subject it to the type of thorough national debate which is necessary.

During this constitutional process, all parties, sides and interests will have the opportunity to present their respective points of view. This will guarantee that the final version submitted to the States for ratification will accomplish only what is needed to be accomplished and that basic individual rights are not interfered with.

Even though I believe that the constitutional language I am proposing will work, I am open to all recommendations and I will carefully consider any proposed improvements or modifications. However, regardless of the final language, to a large extent it is the legislative history which determines how the language will be interpreted.

Accordingly, it is my intent that the amendment I am proposing would not do a number of things.

First. It would not prohibit or discourage the use of foreign languages and cultures in private contexts, such as in homes, churches, communities, private organizations, commerce, and private schools. The United States is rich in ethnic cultures and they would continue to survive as they have in the past.

Second. It would not prohibit the teaching of foreign languages in the Nation's public schools or colleges, nor will it prohibit foreign language requirements in academic institutions.

Third. It will not prevent the use of second languages for the purpose of public convenience and safety in limited circumstances.

On the other hand the amendment would accomplish a number of objectives.

First. It would bring national recognition to the proposition that a common language is necessary to preserve the basic internal unity that is required for a stable and growing nation.

Second. It would establish English as the official language of Federal, State, and local governments throughout the United States.

Third. Since voting by citizens is the method of choosing the representatives of these governments and is the first step in the official process of governing, it would prevent the printing of ballots in foreign languages.

Fourth. It would permit bilingual education where it could be clearly demonstrated that the primary objective and practical result is the teaching of English to students as rapidly as possible, and not cultural maintenance. It would not affect the use of total immersion in English which is a proven method of teaching English.

Fifth. It would discourage discrimination and exploitation by making it clear to immigrant parents and children that learning English is indispensible for full participation in the American society and economy and by speeding them into the mainstream of our society and economy as rapidly as possible.

Sixth. It would reaffirm that we are truly "one Nation . . . indivisible . . .".

Mr. President, national unity is not a subject to be taken lightly for without it we would lose much of the strength which sets us apart as a great Nation. I believe that history has taught us that one of the vital ingredients for obtaining national unity is a commonly accepted language. This has been conformed by our own past experience in this country, and it has been proven by other countries that have been divided and weakened by their internal arguments centering around language differences.

National unity does not require that each person think and act like everyone else. However, it does require that there be some common threads that run throughout our society and hold us together. One of these threads is our common belief and support of a democratic form of government, and the right of every person to fully par-

ticipate in it. Unfortunately, this right of full participation means very little if each individual does not possess the means of exercising it. This participation requires the ability to obtain information and to communicate our beliefs and concerns to others. Undoubtedly this process is greatly hindered without the existence of a commonly accepted and used language.

In essence, what a policy of bilingualism/biculturalism does is to segregate minorities from the mainstream of our politics, economy, and society because we are not making it possible for them to freely enter into that mainstream. We are pushing them aside into their own communities, and denying them the tools with which to break out. I have always been against segregation of any kind and by not assuring that every person in this country can speak and understand English we are still practicing segregation. It was wrong when we segregated blacks because of color and it is just as wrong when we create a system which segregates any group of people by language.

As Americans we are a unique people and one of the things that makes us uniquely American is our common language—English. My proposed constitutional amendment would assure that anyone in this country can fully take part in the American dream and that future generations also will have this privilege.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 167

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution if ratified by the legislatures of three-fourths of the several States within seven years after its submission to the States for ratification:

"ARTICLE

"SEC. 1. The English language shall be the official language of the United States.

"SEC. 2. The Congress shall have the power to enforce this article by appropriate legislation.".

● Mr. SYMMS. Mr. President, today, Senator HUDDLESTON and myself are introducing a constitutional amendment declaring English to be the official language of the United States of America. This amendment will redefine that which is already a political and social reality and will clarify the mixed signals this country has provided to immigrants and minority groups.

From the beginning, English has been used as the official language of government, more or less as a matter or course. Requests for the official use of other languages have been consistently rejected. Congress, in the 1790's, 1840's and 1860's specifically declined to publish German versions of public documents.

Without our one language which has molded many different peoples from many different countries into one loyal people from one cohesive country, speaking one language, we would have been even more divided during the two World Wars. I believe Theodore Roosevelt summed up the situation when he drafted and circulated a statement which was signed by many prominent Americans of various ancestries:

"We must have but one flag. We must also have but one language. That must be the language of the Declaration of Independence, of Washington's Farewell Address, of Lincoln's Gettysburg speech and second inaugural."

The British North American Act of 1867 made French and English coequal in Canadian law, although French was predominant in Quebec and English in Ontario. Today, more than a hundred years later, the Canadian people suffer from a tragic split as a result of this legislated language difference.

Other examples come to mind. Belgium also has long been divided in two by the those who speak Flemish versus those who speak French. Sri Lanka is torn by the demands of those who speak the minority language of Tamil rather than the majority language of Sinhalese. Countless hundreds of thousands have lost their lives in the language riots of India. Real potential exists for a similar situation to be replayed in the United States.

Let me state at this point, that none of these statements is intended to discourage citizens from expanding their language base. However, this is a function of local school districts and not Federal agencies. As the United States becomes more dependent on trade with other nations, Americans should study more foreign language, not less. Nevertheless, we need to keep one language—English—as the common ground through which this huge melting pot society can grow and thrive.

Our amendment would not prohibit the use of other languages in private conversation. It would not, as some have said, interfere with or forbid the use of other languages in unofficial contexts. Religious ceremonies, funerals, games, entertainments, and banquets and other events among immigrant communities may be held in Latin, Yiddish, Sanskrit, Spanish, French, Chinese, Japanese, or any other tongue.

Those who master English have the largest advantage toward full participation in our democracy. As Nathan Glazer pointed out in his article entitled "Pluralism and the New Immigrants," "One will never do as well in the United States living in Spanish, or French, or Yiddish, or Chinese, as one will do living, learning and working in English."

Let me for a few minutes explain what our amendment will do, upon its passage by Congress and ratification by three-fourths of the States:

It will establish English as the official language of State, Federal, and local government business;

It will allow transitional instruction in English for non-English-speaking students, but do away with requirements for foreign-language instruction in other academic subjects;

It will end the false promise being made to new immigrants that English is unnecessary for them.

As Senator HAYAKAWA, my former colleague, good friend, and prime leader in this important endeavor has stated, "Perhaps the fundamental purpose of the English-language amendment is to preserve what our Pledge of Allegiance describes as "One nation, under God, indivisible * * *."

I appreciate the opportunity to be a joint sponsor of this constitutional amendment with my colleague, Senator HUDDLESTON and I commend him for his efforts and involvement. I look forward to a large bipartisan response and a growing national interest in this issue.●

By Mr. CRANSTON (for himself, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. CHAFEE, Mr. CHILES, Mr. D'AMATO, Mr. DECONCINI, Mr. DIXON, Mr. DODD, Mr. DOLE, Mr. DOMENICI, Mr. EAGLETON, Mr. FORD, Mr. GLENN, Mr. GORTON, Mrs. HAWKINS, Mr. HEINZ, Mr. HOLLINGS, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. LAUTENBERG, Mr. LEAHY, Mr. MATSUNAGA, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. PERCY, Mr. PROXMIRE, Mr. RANDOLPH, Mr. RIEGLE, Mr. SASSER, Mr. SPECTER, Mr. STAFFORD, Mr. TRIBLE, Mr. TSONGAS, Mr. WARNER, Mr. WEICKER, Mr. WILSON, Mr. QUAYLE, and Mr. NUNN):

S.J. Res. 168. A joint resolution to provide for the designation of a month as "National Sickle-Cell Anemia Awareness Month;" to the Committee on the Judiciary.

NATIONAL SICKLE-CELL ANEMIA AWARENESS MONTH

Mr. CRANSTON. Mr. President, today I am introducing Senate Joint Resolution 168, providing for the designation of September 1983 as "National Sickle-Cell Anemia Awareness Month." I am pleased to be joined in cosponsoring this measure by 37 of my colleagues, Senators BOSCHWITZ, BRADLEY, CHAFEE, CHILES, D'AMATO, DECONCINI, DIXON, DODD, DOLE, DOMENICI,

EAGLETON, FORD, GLENN, GORTON, HAWKINS, HEINZ, HOLLINGS, KASSEBAUM, KENNEDY, LAUTENBERG, LEAHY, MATSUNAGA, METZENBAUM, MITCHELL, MOYNIHAN, PERCY, PROXMIRE, RANDOLPH, RIEGLE, SASSER, SPECTER, STAFFORD, TRIBLE, TSONGAS, WARNER, WEICKER, WILSON, QUAYLE, and NUNN.

Mr. President, on July 27, a similar measure, House Resolution 155, introduced by my good friend and colleague from California, Representative JULIAN DIXON, who serves as the chairman of the Congressional Black Caucus, and cosponsored by 221 Members, was passed unanimously by the House. However, I am advised that legislation must be passed by both Houses of Congress before the President will issue a proclamation for the occasion. The National Association for Sickle Cell Disease and its affiliates, along with many other concerned organizations and individuals across the country are currently observing this month by conducting basic education, screening, and counseling programs, as well as raising funds to support much needed research on sickle cell anemia and to provide medical services to the victims of this disease.

This joint resolution would affirm the Senate's support of these important activities to increase public awareness about a disease which affects a major segment of our Nation's population, and the conquest of which merits priority consideration by our health care system.

Mr. President, sickle cell anemia has left its tragic mark on many American families. The victims of this disease are children both of whose parents carry the sickle cell trait. In the United States, the sickle cell abnormality is found almost exclusively in black Americans. The trait is estimated to be carried by 1 in every 10 black Americans. These individuals have a gene for both normal hemoglobin—the oxygen-bearing protein in red blood cells—and for sickled hemoglobin. The children of two individuals each of whom carry the sickle cell trait, have a 1 out of 4 chance of inheriting the disease. Of the approximately 2.5 million black Americans estimated to have the trait, 50,000 or more may suffer from the disease.

Sickle cell anemia is an inherited blood disease in which red blood cells form a crescent or sickle shape when deprived of oxygen. Infants born with the disease, unless diagnosed early and provided the special care they need, rarely survive to adulthood, and their brief lives are punctuated by painful onslaughts of sickle cell crises. These crises occur as often as 6 to 10 times a year in children under age 6. It is during these crises that severely debilitating effects are likely to occur.

The crises are brought on by the sickling of the red blood cells which impedes their normal flow through the blood stream and causes them to become snagged along the blood vessels' inner lining. When large numbers of the sickled cells collect in one place, the flow of blood is restricted, depriving the surrounding tissue of a normal oxygen supply and causing extreme pain in those areas as well as cutting off the blood supply needed for the functioning of vital organs. The resulting symptoms are stunted growth, pain, swelling of the joints, hemorrhage, and tissue death, with subsequent failure of such organs as the heart, the spleen, and the kidneys. Because the victims of this disease also tend to produce too few blood cells to replace the sickled cells, which are easily destroyed, they also suffer from chronic anemia and increased susceptibility to disease, particularly to pneumonia.

Mr. President, there is no cure for this painful and crippling disease. Yet, treatment can help to relieve the pain and to enable the patient to conduct as nearly normal a life as possible. Survival of infants with the disease can be dramatically improved if they are diagnosed early and adequate medical treatment is provided.

A stronger research effort into the basic hematologic, biochemical, and genetic nature of this disease is clearly needed to help find an effective control and cure. Until we find these answers, however, screening, counseling, and education programs to help reduce the incidence of the disease, as well as the availability of adequate medical services to treat sickle cell victims, must be insured.

Mr. President, many of the individuals affected by the sickle cell trait are outside the reach of the present health care system. Only by full community participation can programs providing screening and counseling services, and disseminating educational materials regarding the nature and inheritance of sickle cell anemia reach those who may be susceptible to the disease.

By designating the month of September as "National Sickle Cell Anemia Awareness Month," and educating ourselves and others about this disease, we can gain a better understanding of the need to find the cure for it and be more supportive of those who are afflicted by it.

Mr. President, I ask unanimous consent that the text of Senate Joint Resolution 168 be printed in the RECORD at this point.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 168

Whereas sickle-cell anemia is a life-threatening disease in which normal, round, red blood cells become distorted and take on the long and pointed shape of a sickle, due to the presence of an abnormal hemoglobin;

Whereas one in every ten black Americans carries the sickle-cell trait, and one in five hundred black Americans is stricken by the disease itself;

Whereas there exists no cure for this painful and crippling disease which denies a full life to many of its victims and creates intense pain and deep depression;

Whereas the disease and trait are both transmitted genetically from one or both parents who carries the trait, and it is vital that Americans, particularly black Americans, be tested for sickle-cell anemia to determine whether they carry or might transmit the trait; and

Whereas it is important to educate the public about sickle-cell anemia to promote awareness and support for research and treatment of this disease: Now, therefore, be it

Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled, That the President is hereby authorized and requested to issue a proclamation which—

(1) designates the month of September 1983 as "National Sickle-Cell Anemia Awareness Month"; and

(2) calls upon the people of the United States to observe that month with appropriate ceremonies and activities.

ADDITIONAL COSPONSORS

S. 35

At the request of Mr. ROTH, the name of the Senator from Colorado (Mr. ARMSTRONG) was added as a cosponsor of S. 35, a bill to establish a Commission on More Effective Government, with the declared objective of improving the quality of Government in the United States and of restoring public confidence in government at all levels.

S. 93

At the request of Mr. HATCH, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 93, a bill to repeal the provisions of the Federal Food, Drug, and Cosmetic Act which prohibit the use in labeling or advertising of representations concerning the approval of drugs and devices under such act.

S. 128

At the request of Mr. ROTH, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 128, a bill entitled "The Equal Opportunity Retirement Act of 1983."

S. 336

At the request of Mr. NUNN, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 336, a bill to increase the penalties for violations of the Taft-Hartley Act, to prohibit persons, upon their convictions of certain crimes, from holding offices in or certain positions related to labor organizations and employee benefit plans, and to clarify certain responsibilities of the Department of Labor.

S. 625

At the request of Mr. PELL, the name of the Senator from Kentucky (Mr. FORD) was added as a cosponsor of S. 625, a bill to authorize the Secretary of Education to provide financial assistance to States for use in expanding educational programs in juvenile and adult correctional institutions to assist in the rehabilitation of criminal offenders, and for other purposes.

S. 654

At the request of Mr. WALLOP, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 654, a bill to amend the Internal Revenue Code of 1954 to treat deductions for research and experimental expenses attributable to activities conducted in the United States as allocable to income from sources within the United States.

S. 657

At the request of Mr. DOLE, the name of the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of S. 657, a bill to amend the Animal Welfare Act to insure the proper treatment of laboratory animals.

S. 719

At the request of Mr. THURMOND, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 719, a bill to amend subchapter II of chapter 73 of title 10, United States Code, to eliminate the social security offset against annuities provided for under such subchapter to the extent that the social security benefits of the annuitant are based on the annuitant's own employment.

S. 842

At the request of Mr. WEICKER, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 842, a bill to amend the Internal Revenue Code of 1954 to provide tax incentives for the issuance of small business participating debentures.

S. 1434

At the request of Mr. D'AMATO, the names of the Senator from Oklahoma (Mr. NICKLES), and the Senator from Alaska (Mr. MURKOWSKI) were added as cosponsors of S. 1434, a bill to amend the Internal Revenue Code of 1954 to provide that a spouse having compensation shall not be disqualified from having a spousal individual retirement account.

S. 1475

At the request of Mr. WALLOP, the name of the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 1475, a bill to amend the Internal Revenue Code of 1954 to repeal the highway-use tax on heavy trucks and to increase the tax on diesel fuel used in the United States.

S. 1537

At the request of Mr. DANFORTH, the name of the Senator from Tennessee (Mr. SASSER) was added as a cosponsor of S. 1537, a bill to provide additional authorization of appropriations for certain programs for fiscal year 1984, and each of the 4 following fiscal years.

S. 1613

At the request of Mr. TRIBLE, the name of the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 1613, a bill to amend title 10, United States Code, with respect to the provision of medical benefits and post and base exchange and commissary store privileges to certain former spouses of certain members or former members of the Armed Forces.

S. 1627

At the request of Mr. DANFORTH, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 1627, a bill to amend section (1)(f)(3) of the Internal Revenue Code and for other purposes.

S. 1644

At the request of Mr. NUNN, the name of the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of S. 1644, a bill to improve Federal criminal sentencing by imprisoning dangerous and violent offenders and by diverting nonviolent offenders from imprisonment to restitution or community service programs.

S. 1734

At the request of Mr. ZORINSKY, the names of the Senator from Arkansas (Mr. BUMPERS), and the Senator from Iowa (Mr. GRASSLEY) were added as cosponsors of S. 1734, a bill to amend title 17 of the United States Code with respect to public performances of nondramatic musical works by means of coin-operated phonorecord players, and for other purposes.

S. 1857

At the request of Mr. MOYNIHAN, the name of the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 1857, a bill to amend the Internal Revenue Code of 1954 to remove certain impediments to the effective philanthropy of private foundations.

SENATE JOINT RESOLUTION 102

At the request of Mr. SPECTER, the name of the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of Senate Joint Resolution 102, a joint resolution to designate the week of October 16, 1983, through October 22, 1983, as "Lupus Awareness Week."

SENATE JOINT RESOLUTION 105

At the request of Mr. RUDMAN, the name of the Senator from Maine (Mr. MITCHELL) was added as a cosponsor of Senate Joint Resolution 105, a joint resolution calling upon the Department of Justice and all other appropriate Federal agencies to enforce Federal antitrust laws including the prohibition against vertical price restraints.

SENATE JOINT RESOLUTION 122

At the request of Mr. HATCH, the names of the Senator from New Mexico (Mr. DOMENICI), the Senator from Idaho (Mr. SYMMS), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Arkansas (Mr. PRYOR), the Senator from California (Mr. WILSON), the Senator from Wisconsin (Mr. KASTEN), the Senator from Kentucky (Mr. FORD), the Senator from North Carolina (Mr. HELMS), the Senator from Maine (Mr. MITCHELL), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Arkansas (Mr. BUMPERS), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Colorado (Mr. ARMSTRONG), the Senator from Hawaii (Mr. INOUYE), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Tennessee (Mr. SASSER), the Senator from Kansas (Mr. DOLE), the Senator from Arizona (Mr. GOLDWATER), the Senator from Georgia (Mr. NUNN), the Senator from New Jersey (Mr. BRADLEY), the Senator from Connecticut (Mr. DODD), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Montana (Mr. MELCHER), and the Senator from Rhode Island (Mr. CHAFEE) were added as cosponsors of Senate Joint Resolution 122, a joint resolution to designate the week of November 27, 1983, through December 3, 1983, as "National Home Care Week."

SENATE JOINT RESOLUTION 145

At the request of Mr. LONG, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of Senate Joint Resolution 145, a joint resolution to designate the week of October 2, 1983, through October 8, 1983, as "National Port Week."

SENATE JOINT RESOLUTION 147

At the request of Mr. WEICKER, the names of the Senator from South Carolina (Mr. THURMOND), the Senator from Texas (Mr. BENTSEN), and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of Senate Joint Resolution 147, a joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "National Rehabilitation Facilities Week."

SENATE JOINT RESOLUTION 153

At the request of Mr. MOYNIHAN, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of Senate Joint Resolution 153, a joint resolution to congratulate the people of the county of New York on the occasion of the tricentennial of the founding of the county of New York.

SENATE CONCURRENT RESOLUTION 62

At the request of Mr. MATTINGLY, the names of the Senator from Maine (Mr. COHEN), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of Senate Concurrent Resolution 62, a concurrent reso-

lution to direct the Commissioner of Social Security and the Secretary of Health and Human Services to develop a plan outlining the steps which might be taken to correct the social security benefit disparity known as the notch problem.

SENATE RESOLUTION 126

At the request of Mr. WALLOP, the name of the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of Senate Resolution 126, a resolution to express the sense of the Senate that the changes in the Federal estate tax laws made by the Economic Recovery Tax Act of 1981 should not be modified.

SENATE RESOLUTION 127

At the request of Mr. MELCHER, the names of the Senator from New York (Mr. MOYNIHAN), the Senator from New Jersey (Mr. BRADLEY), the Senator from Ohio (Mr. METZENBAUM), the Senator from Mississippi (Mr. STENNIS), and the Senator from Missouri (Mr. EAGLETON) were added as cosponsors of Senate Resolution 127, a resolution to make the Select Committee on Indian Affairs a permanent Committee of the Senate.

SENATE RESOLUTION 139

At the request of Mr. ZORINSKY, the names of the Senator from Texas (Mr. BENTSEN), and the Senator from New Jersey (Mr. BRADLEY), were added as cosponsors of Senate Resolution 139, a resolution disapproving the recommendation of the study group on Senate practices and procedures to abolish the Senate Committee on Veterans' Affairs.

SENATE RESOLUTION 167

At the request of Mr. PRESSLER, the name of the Senator from Louisiana (Mr. LONG) was added as a cosponsor of Senate Resolution 167, a resolution expressing the sense of the Senate that the Federal Government take all necessary steps to promote travel to the United States by foreign visitors during the 1984 Summer Olympics and the 1984 Louisiana World Exhibition, to inform such visitors of recreational and commercial opportunities throughout the United States, and to facilitate their entry into and travel within this county.

SENATE RESOLUTION 179

At the request of Mr. PERCY, the names of the Senator from Alaska (Mr. STEVENS), the Senator from Indiana (Mr. LUGAR), the Senator from Arizona (Mr. DECONCINI), the Senator from Texas (Mr. BENSTEN), the Senator from Maryland (Mr. MATHIAS), the Senator from Utah (Mr. GARN), the Senator from North Carolina (Mr. EAST), the Senator from Pennsylvania (Mr. HEINZ), the Senator from California (Mr. WILSON), the Senator from Georgia (Mr. MATTINGLY), the Senator from North Dakota (Mr. ANDREWS), and the Senator from Delaware (Mr. ROTH) were added as cosponsors of Senate Resolution 179, a resolution expressing the sense of the Senate that the President should establish a Productivity and Quality Award to be made to those business, workers, other individuals, and public-sector organizations which make contributions toward sustained improvement in productivity and quality performance.

SENATE RESOLUTION 223

At the request of Mr. MURKOWSKI, the names of the Senator from Illinois (Mr. PERCY), the Senator from South Dakota (Mr. ABDNOR), the Senator from South Dakota (Mr. PRESSLER), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from New Mexico (Mr. DOMENICI), the Senator from Washington (Mr. EVANS), and the Senator from Washington (Mr. GORTON) were added as cosponsors of Senate Resolution 223, a resolution to express the appreciation of the American people for the efforts of the Japanese Government in connection with the Korean Air Lines tragedy.

AMENDMENT NO. 2166

At the request of Mr. BOSCHWITZ, his name was added as a cosponsor of amendment No. 2166 proposed to H.R. 3363, a bill making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

AMENDMENT NO. 2167

At the request of Mr. BOSCHWITZ, his name was withdrawn as a cosponsor of amendment No. 2167 proposed to H.R. 3363, a bill making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

AMENDMENTS SUBMITTED

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

NICKLES (AND OTHERS) AMENDMENT NO. 2178

Mr. NICKLES (for himself, Mr. ZORINSKY, and Mr. RANDOLPH) proposed an amendment to the bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes, as follows:

On page 12, line 25, strike "608,302,000" and insert in lieu thereof "607,652,000"

On page 13, strike the colon on line 15 through the word "Colombia" on line 18.

METZENBAUM AMENDMENT NO. 2179

Mr. METZENBAUM proposed an amendment to the bill, H.R. 3363, supra, as follows:

On page 51, between lines 2 and 3, insert the following:

No funds appropriated to the Forest Service, the Department of Agriculture, the Department of the Interior, or the Bureau of Land Management shall be obligated or expended to extend any contract to purchase National Forest timber on an interest-free basis as authorized by section 14(c) of the National Forest Management Act of 1976 (Public Law 94-588; 16 U.S.C. 472a.(c)) or terminate such contracts as authorized by this paragraph until the Secretary of Agriculture and the Secretary of the Interior, with the concurrence of the Comptroller General, develop and promulgate a financial need test which establishes a standard of eligibility for interest free contract extensions and terminations. The standard of eligibility established pursuant to the preceding sentence shall be based on a finding that—

(1) the firm seeking extension or termination has sustained operating losses for two of the last three years;

(2) the ratio of liabilities to assets of such firm has increased in the last fiscal year to .75 or more; and

(3) the United States would not recover the contract value from such firm if it defaulted on the contract.

No firm may receive extension or termination unless it meets the standards established pursuant to this paragraph. No contract entered into after January 1, 1981 may be extended or terminated. The authority granted by this paragraph to terminate contracts shall be available only for fiscal year 1984.

REVENUE SHARING

MOYNIHAN (AND OTHERS) AMENDMENT NO. 2180

Mr. MOYNIHAN (for himself, Mr. INOUYE, Mr. TSONGAS, Mr. GLENN, and Mr. RANDOLPH) proposed an amendment to the bill (S. 1426) to reauthorize the revenue-sharing program of general-purpose fiscal assistance to local governments for 3 fiscal years, and for other purposes; as follows:

Redesignate sections 3 through 11 of the matter proposed to be inserted as sections 4 through 12, respectively.

On page 10, between lines 2 and 3, insert the following:

AUTHORIZATION FOR ENTITLEMENTS OF LOCAL GOVERNMENTS

SEC. 3. Paragraph (2) of section 6703(b) of title 31, United States Code, is amended by striking out "$4,566,700,000" and inserting in lieu thereof "$5,017,000,000".

On page 26, beginning with line 14, strike out all through page 27, line 5, and insert in lieu thereof the following:

(c) The amendments made by this section shall apply to entitlement periods beginning after September 30, 1983.

BRADLEY (AND OTHERS) AMENDMENT NO. 2181

Mr. BRADLEY (for himself, Mr. LAUTENBERG, Mr. MOYNIHAN, Mr. GLENN, Mr. BIDEN, Mr. D'AMATO, and Mr. TSONGAS) proposed an amendment to the bill S. 1426, supra; as follows:

Redesignate sections 3 through 11 of the matter proposed to be inserted as sections 4 through 12, respectively.

On page 10, between lines 2 and 3, insert the following:

AUTHORIZATION FOR ENTITLEMENTS OF LOCAL GOVERNMENTS

SEC. 3. Paragraph (2) of section 6703(b) of title 31, United States Code, is amended by striking out "$4,566,700,000" and inserting in lieu thereof "$4,791,700,000".

On page 26, beginning with line 14, strike out all through page 27, line 5, and insert in lieu thereof the following:

(c) The amendments made by this section shall apply to entitlement periods beginning after September 30, 1983.

LONG (AND OTHERS) AMENDMENT NO. 2182

Mr. LONG (for himself, Mr. JOHNSTON, Mr. BURDICK, Mr. HATFIELD, Mr. WALLOP, Mr. BINGAMAN, Mr. D'AMATO, Mr. RANDOLPH, Mr. DECONCINI, and Mr. BENTSEN) proposed an amendment to the bill S. 1426, supra; as follows:

On page 13, beginning with line 1, strike out all through page 27, line 5.

On page 27, line 9, strike out "SEC. 11" and insert in lieu thereof "SEC. 10".

HEINZ (AND OTHERS) AMENDMENT NO. 2183

Mr. HEINZ (for himself, Mr. D'AMATO, Mr. METZENBAUM, Mr. RIEGLE, and Mr. LEVIN) proposed an amendment to the bill S. 1426, supra; as follows:

On page 11, line 2, insert "(a)" before "subsection".

On page 11, between lines 5 and 6, insert the following:

(b) Subsection (c) of section 6713 of such title is amended—

(1) by striking out "and" at the end of paragraph (1),

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and", and

(3) by adding at the end thereof the following new paragraph:

"(3) consider any reduction in the amount of adjusted taxes of any unit of general local government if such reduction—

"(A) results from a specific economic dislocation which causes—

"(i) the closing of places of employment,

"(ii) declines in assessed values of, or receipt of taxes from, real property, or

"(iii) declines in sales or income tax collections of such government, and

"(B) would reduce the allocation of the unit of local government for an entitlement period by an amount equal to or greater than 20 percent of such allocation for the preceding entitlement period.

HUMPHREY AMENDMENT NO. 2184

Mr. HUMPHREY proposed an amendment to the bill S. 1426, supra; as follows:

At the end of the matter proposed to be inserted, add the following new section:

REPEAL OF DAVIS-BACON REQUIREMENT FOR CONSTRUCTION PROJECTS

SEC. . Subsection (a) of section 6704 of title 31, United States Code, is amended by striking out paragraph (5) and redesignating paragraphs (6), (7), and (8) as paragraphs (5), (6), and (7).

EXTENSION AND REAUTHORIZATION OF EXPORT-IMPORT ADMINISTRATION ACT

HUMPHREY AMENDMENT NO. 2185

(Ordered to lie on the table.)

Mr. HUMPHREY submitted an amendment intended to be proposed by him to the bill (S. 979) to amend and reauthorize the Export Administration Act of 1979; as follows:

At an appropriate place in the bill, insert the following section:

SEC. . The United States Nuclear Regulatory Commission shall not license for export, or approve the retransfer of any nuclear materials or components that the Commission has found "especially relevant from the standpoint of export control because of their significance for nuclear explosive purposes" under Sec. 109 of the Atomic Energy Act of 1954 as amended by Sec. 309 of the Nuclear Non-Proliferation Act of 1978 to any nonweapons state, as defined by the Nuclear Non-Proliferation Treaty, unless and until that state has concluded a formal agreement with the International Atomic Energy Agency to place all of its nuclear facilities under International Atomic Energy Agency safeguards.

REVENUE SHARING

DURENBERGER AMENDMENT NO. 2186

Mr. DURENBERGER proposed an amendment to the bill S. 1426, supra; as follows:

At the end of the committee amendment, add the following:

STUDIES OF FEDERALISM ISSUES

Sec. . (a)(1) The Secretary of the Treasury, the Secretary of Commerce, the Comptroller General of the United States, and the Chairman of the Advisory Commission on Intergovernmental Relations shall undertake a series of studies on federalism and the future role of the Revenue Sharing Program in the Federal system.

(2) The studies which are required to be made under paragraph (1) shall include an evaluation of the Revenue Sharing Program provided under chapter 67 of title 31, United States Code, and shall, in addition, address the following issues:

(A) The concept of returning revenue sources, such as Federal excise taxes or a percentage of the Federal individual income tax, to State and local governments, along with responsibility for programs and activities for which financial assistance is now provided by the Federal government through grants-in-aid and other forms of Federal domestic assistance.

(B) The long-term outlook for the fiscal condition and fiscal capacity of Federal, State and local governments.

(C) The impacts of the cyclical nature of the economy and other exogenous factors, such as unemployment, on the expenditures, needs and revenue raising capability of Federal, State and local governments, and the responsiveness of the distribution of Federal financial assistance to such factors.

(D) The responsiveness of the distribution of Federal aid to the fiscal capacity of State and local governments.

(E) The responsiveness of the distribution of federal assistance to the need for services of State and local governments and to cost-of-living/cost-of-government differentials.

(F) The mathematical forms, data, and administration of Federal grant formulas, including the alternative allocation formulas provided under this Act.

(G) Alternative measures of fiscal capacity, such as State gross domestic product estimates and the Representative Tax System, for the allocation of funds under chapter 67 of title 31, United States Code, and for other major Federal grant programs, including an analysis of the strengths and weaknesses of the fiscal capacity measures.

(H) The impact on State and local governments of modification of the provisions of the Internal Revenue Code relating to the deductibility of State and local government obligations.

(I) Possible trade-offs between modifications described in clause (H) and general purpose fiscal assistance.

(3)(A) The studies which are required to be made under paragraph (1) shall be designed and conducted in consultation with recognized organizations of elected officials of State governments and of those elected officials of local governments that currently receive payments under this chapter, and representatives designated by such organizations.

(B) The organizations with whom consultation is required under subparagraph (A) and the representatives of such organizations.

(i) shall be representative of all regions of the United States, and

(ii) shall not include the advisory Commission on Intergovernmental Relations.

(C) Not later than the date that is 30 days after the date of enactment of this Act, an advisory Group shall be established by the Secretary of the Treasury, whose designated representative shall serve as chair. The membership of the Advisory Group shall include representatives designated by the other agencies and organizations referenced in paragraphs (1) and (3) of this subsection. The Advisory Group shall serve as the primary vehicle for the consultation provided for by this section, and shall meet not less frequently than once each quarter to review the progress of the studies.

(b) After consulting with the organizations and representatives with whom consultation is required under subsection (a)(3), the Secretary of the Treasury, in concurrence with the Secretary of Commerce, the Comptroller General of the United States, and the Advisory Commission on Intergovernmental Relations, shall submit to the President and the Congress, before the date that is 60 days after the date of enactment of this Act, an initial report which shall provide—

(1) a detailed plan for—

(A) assigning agency responsibility for conducting the studies which are required to be made under subsection (a)(1), and

(B) disseminating the final reports on such studies to all persons directly affected by the findings of such studies and to the general public;

(2) any separate and dissenting views of the organizations with whom consultation is required under paragraph (3)(A) and an ex-

planation, where appropriate, of why such views were not incorporated into the detailed plan required by paragraph (1); and

(3) an estimate of the appropriations which will be required to carry out the provisions of this section.

Such initial report shall take into account the views of the organizations and representatives consulted and shall include a statement that describes those views.

(c)(1) The Secretary of the Treasury, the Secretary of Commerce, the Comptroller General of the United States, and the Chairman of the Advisory Commission on Intergovernmental Relations shall submit to the President and the Congress before June 30, 1985, final reports on the findings of the studies which are required to be made under subsection (a)(1). The final reports shall include recommendations and a separate statement of any minority views.

(2) Before the final reports are submitted to the President and the Congress as required under paragraph (1), the organizations and representatives with whom consultation is required under subsection (a)(3) shall have an opportunity to review the final reports. The final reports submitted to the President and the Congress under paragraph (1) shall include separate statements of the views of such organizations and representatives regarding the final reports.

(d) There are authorized to be appropriated for each of the fiscal years 1984, 1985, and 1986, the lesser of—

(1) such sum as may be necessary to carry out the provisions of this section during such fiscal year, or

(2) a sum equal to 5 percent of the cost of administering chapter 67 of title 31, United States Code, for such fiscal year.

NOTICES OF HEARINGS

SUBCOMMITTEE ON SOIL AND WATER CONSERVATION, FORESTRY, AND ENVIRONMENT

Mr. JEPSEN. Mr. President, I wish to announce that the Senate Agriculture Subcommittee on Soil and Water Conservation, Forestry, and Environment will hold a hearing on three land conveyance bills on Thursday, September 22. The bills to be considered are S. 566, S. 1503, and S. 129, and the accompanying H.R. 24.

The hearing will begin at 9:30 a.m. in room SR 328-A.

Anyone wishing further information should contact the Agriculture Committee staff at 224-0014.

AUTHORITY FOR COMMITTEES TO MEET

SELECT COMMITTEE ON INTELLIGENCE

Mr. STEVENS. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, September 21, at 2 p.m., to receive a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, September 22, at 10 a.m., to consider recent developments concerning the USIA.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet on Thursday, September 22, at 3 p.m., to receive a briefing on the political and military situation in Lebanon.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SOIL AND WATER CONSERVATION, FORESTRY, AND ENVIRONMENT

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Soil and Water Conservation, Forestry and Environment of the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, September 22, to hold a hearing to consider S. 566, S. 1503, and S. 129, conveyance bills, and the accompanying H.R. 24.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, September 22, at 10 a.m., to hold a hearing to consider the Budget Reconciliation Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENVIRONMENTAL POLLUTION

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Environmental Pollution, of the Committee on Environment and Public Works, be authorized to meet during the session of the Senate on Thursday, September 22, to consider S. 1329, relating to the Wetlands Loan Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

STATUS REPORT ON THE BUDGET

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate a status report on the budget for fiscal year 1983 pursuant to section 311 of the Congressional Budget Act.

Since my last report the Congress has completed action on the Department of Defense Authorization Act (S. 675) overturning a provision of Public Law 97-377 which causes budget authority to increase by $117 million.

The report follows:

REPORT (NO. 83-10) TO THE PRESIDENT OF THE U.S. SENATE FROM THE COMMITTEE ON THE BUDGET—STATUS OF THE FISCAL YEAR 1983 CONGRESSIONAL BUDGET ADOPTED IN HOUSE CONCURRENT RESOLUTION 91

REFLECTING COMPLETED ACTION AS OF SEPTEMBER 15, 1983

[In millions of dollars]

	Budget authority	Outlays	Revenues
Revised 2 budget resolution level	877,200	807,400	604,300
Current level	869,297	806,980	604,131
Amount remaining	7,903	420	0

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $7,903 million for fiscal year 1983, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 91 to the exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $420 million for fiscal year 1983, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 91 to be exceeded.

REVENUES

Any measures that would result in revenue loss exceeding $0 million for fiscal year 1983, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 91.●

PROGRESS OF THE U.S. POSTAL SERVICE

● Mr. LUGAR. Mr. President, on August 5, Postmaster General Bolger spoke before the International Platform Association. It was an excellent speech which charts the progress of the U.S. Postal Service in recent years. In this statement, the Postmaster states that the U.S. Postal Service's surplus of last year will be replicated this year and in the years to come. This is welcome news indeed and a tribute to his leadership.

I commend this speech to my colleagues and ask unanimous consent that Postmaster General Bolger's remarks be printed in the RECORD.

The speech follows:

REMARKS BY WILLIAM F. BOLGER, POSTMASTER GENERAL

Good morning, ladies and gentleman. I have a story to report to you this morning. It is a story of major national importance and consequence. But I'll wager that you have not read about it in your morning newspaper or seen it on the evening news.

There is a reason for that. After all, my story does not involve political intrigue, or conflict, or scandal. Instead, it has to do with government—specifically, the United States Postal Service. It is about the nitty-gritty, complex, unglamorous work of turning a massive government bureaucracy around. It is a story about making one gov-

ernment agency work—and work phenomenally well—for the people of this country.

Some may not consider that exciting news. But it is a story of profound importance to the American people. And in my opinion, it is a story that has its own drama and interest. Consider the context of the Postal Service's success in recent years.

At a time when Federal agencies are fighting for a fatter slice of the Treasury's budget pie, the Postal Service has gone on a permanent fiscal diet. We are a $24-billion government agency that does not receive even one dime of taxpayer subsidy.

And at a time when the Federal government is fighting record deficits, the Postal Service is on the verge of achieving its second straight annual surplus.

Last year the Postal Service closed out with a net income of $802 million. And for the current fiscal year we are projecting a surplus of approximately $500 million.

This is welcome news—both for us and for you. After all, there is a direct cause-and-effect relationship between postal surpluses and the postponement of rate increases.

But my central message this afternoon is that we must not overlook the deeper significance of all this black ink. To my mind, the most notable fact about the recent postal surpluses is that they are not aberrations.

People are so used to associating the Postal Service with red ink and deficits, that there is a tendency to speak of last year's surplus as a one-shot success—a passing of good fortune.

You hear people speak of 1982 as though it just happened to be "a good year." And they say that we might be "lucky enough" to have a second "good year" in 1983.

Well, what people don't seem to appreciate is that "luck"—as Branch Rickey used to say—"is the residue of hard work." They seem to overlook the fact that the Postal Service's so-called "luck" is becoming an unmistakable trend.

If, in fact, we finish 1983 with another surplus, that would make the third year out of the last six that we have recorded a net income. And even more significant, across that six-year period (from 1978 through 1983), our surpluses and deficits will have balanced each other out. We will have succeeded in living within our income.

Now, I am not here to boast about this accomplishment. After all, breaking-even is what the law *tells* us we should be doing in the Postal Service.

But given the long and not-always-happy record of post office finances, I believe that our ability to live within our income over the last six years is a very notable achievement . . . an historic achievement. And quite frankly, it has nothing to do with luck or happenstance.

The simple fact we must recognize is this: In the 13 years since it was reorganized into an independent federal agency, the Postal Service has developed into a mature, efficient, and self-sustaining business enterprise. Indeed, we have established ourselves as precisely the kind of streamlined governmental corporation that was envisioned in the Postal Reorganization Act of 1970.

Consider the magnitude of what has been accomplished:

Only 13 years ago, the Post Office was mired in a debilitating system of political patronage. Our productivity was falling. We were hopelessly addicted to larger and larger transfusions of money from the Federal Treasury. (How soon people forget that the old Post Office was dependent on taxpayer dollars for a huge portion of its budget. In 1970, the last year of its existence, the Post Office Department managed to run up a $166 million deficit—despite the fact that nearly one quarter of its budget was paid by the American taxpayer.)

Let's look briefly at two critical measures of the Postal Service's performance since Reorganization: productivity and the cost of mailing. Take productivity first. After all, that is the ultimate measure of any organization's ability to manage itself effectively.

Now, I realize it is hard to measure the productivity of most government agencies. It's difficult to quantify an increase in output by employees in, for instance, the Department of State or the Department of Transportation.

But the Postal Service deals in a concrete, measurable service, so you can cite hard productivity figures. The simple fact is that in the years immediately preceding Reorganization, the post office's productivity was falling.

In contrast, over the decade-plus since Reorganization, we have achieved an extraordinary productivity increase of 44 percent. It has been a textbook case of doing more with less:

We have handled a huge 34 percent expansion in mail volume. But instead of increasing our workforce by a comparable amount, we have actually cut our workforce 10 percent.

How?: Through a relentless emphasis on efficiency, productivity and "working smarter."

Of course, with a productivity surge like that, it's no secret how we have been able to hold down postage rates in recent years. Since May 1978, the price of a First-Class stamp has risen a nickel—roughly 33 percent. In contrast, over the same period the Consumer Price Index has tracked an inflation rate of 52 percent—a full 19 points higher.

You know, I always find it ironic when people of my generation get nostalgic about the 3-cent stamp of their childhood. They like to point to today's 20-cent stamp as a measure of the post office's wrack and ruin.

Well, if you take the time to discount today's 20-cent stamp for 50 years of inflation, you find that a First-Class stamp costs not one bit more today than it did in 1932. The big difference is that back in 1932, that 3-cent stamp was massively subsidized by taxpayer dollars. Three cents did not reflect the actual cost of the service.

But today, the Postal Service operates on a strictly pay-as-you-go basis. We don't need and we are not asking for a subsidy from Uncle Sam.

Now, I hasten to add that the Postal Service has no intention of resting on its laurels. Our competitors in the communications marketplace would never allow us that luxury.

Indeed, earlier this year we embarked on one of our most ambitious initiatives yet: the implementation of automation and ZIP + 4.

The Postal Service's new automated equipment—which uses an electric eye to read ZIP Codes and sort the mail—is many times faster than our current machinery, and considerably more accurate. And the ZIP + 4 program will allow that new automated equipment to sort mail right down to a given street on a carrier's route.

Incidentally, I would emphasize that ZIP + 4 will be completely voluntary for all mailers. And it will be targeted primarily for large-volume business mailers, who will receive a price incentive if they choose to use it.

Together, automation and ZIP + 4 will allow us to make continued strides in productivity. And as a result, they will save us billions of dollars in labor costs over the coming years.

Of course all of the factors I have mentioned so far are tied together and mutually reinforcing: the surpluses, the productivity increases, the stable rates and expanding mail volume, the commitment to automation. They add up to a performance record that would be the envy of any private corporation, and one that is unprecedented for a major government agency.

So it is with some understatement that John Tierney, a professor of government at Georgetown University, wrote in his recent study of the Postal Service that (and I quote): "The United States Postal Service, created in 1971 out of the ribs of the old Post Office Department, is a monument to the capacity of the American government to change." (close quote)

Now, all this is not to say that the Postal Service's critics have been silenced. On the contrary. We remain a highly visible government agency—certainly the most visible government agency in the everyday lives of the American people. And as such, we will remain fair game for criticism both from ordinary citizens and from private research groups. Indeed, since 1971, public and private studies of the Postal Service have been issued at an average rate of one every 12 days.

I happen to consider that a healthy thing—it is one aspect of the Postal Service's accountability to the American public. But I must confess to a certain bewilderment over all the contradictory advice and criticism.

For instance, last January, two critiques of the Postal Service were issued back-to-back by reputable Washington think-tanks. One of those study groups, Ralph Nader's Center for Study of Responsive Law, is generally considered liberal in its politics. Its report said that the Postal Service faces too much competition. It attacked the Postal Service for (and I quote) our "single-minded drive for efficiency." (close quote) And it said that this obsession with efficiency has put too much pressure on postal employees.

The second study, issued by the conservative Heritage Foundation, said precisely the opposite. It asserted that the Postal Service faces too little competition. As a result, it said (and I quote) "management has no incentive to control costs." (close quote) In other words, the second study claims that our lack of concern for efficiency is destroying us.

Well, I'll leave it to you to figure out the whys and wherefores of these two reports. Though it seems to me that if we are being criticized from both ends of the political spectrum, then we must be doing something right.

But there is one statement in the Heritage study that I cannot let stand without rebuttal. The author states that when the Post Office was reorganized in 1971 (quote) "Congress created a monster. . . . It deceived the American people." (close quote)

Now, I don't know exactly what the author intends by that "monster" analogy. Evidently he sees the Postal Service as a dragon that inhales taxpayer dollars and exhales deficits. If that is what he has in mind, then I have to question both the extent and the quality of the author's research.

Were I to borrow from the world of make-believe for an analogy to the Postal Service, I wouldn't choose a dragon. I think a more appropriate parrallel would be the goose that laid the golden eggs.

You know, we live in a time when not just many, but most government agencies—both at the national and state level—are undergoing financial convulsions. They are suffering record deficits and cutting back on some of the most basic services.

But the Postal Service stands out as a prominent exception. Instead of cutting services, we have offered a variety of new services. We have a well-paid and secure workforce. Our financial health is robust. And for all that, we still manage to charge only 20 cents for a first-class letter—lower than the postage of any other nation in the industrialized free world, with the exception of Switzerland.

But incredibly, there are those—fortunately only a vocal minority—who would kill the golden goose. There are those who think the Private Express Statutes (the legislation that gives us the exclusive right to deliver First-Class Mail) should be repealed, and that the Postal Service should compete in an unregulated arena with private letter carriers.

I must admit that, on a theoretical level, I would relish the opportunity to compete in the free market—but only if the Postal Service did not have one hand tied behind its back by regulations . . . and only if we and our competitors were allowed to operate according to the same ground rules. I know that the Postal Service has what it takes to suceed in such a competition.

Indeed, in one limited area—the market for overnight mail delivery—the Postal Service has already been tested against private-sector competition. We have gone head to head with Federal Express and other top-flight corporations since the mid 1970s. And we have proved lean enough and reliable enough to double our Express Mail volume every two years since 1976.

So our support for the Private Express Statutes does not arise from any fear of competition. Those statutes exist not to protect the Postal Service, but to protect the American people. For it is only under the umbrella of that legislation that the citizens of this nation can be assured of a universal delivery system and a uniform structure of rates.

Now, I won't deny that private carriers would be able to carry some of the mail more cheaply and turn a profit. But they could do it only by skimming the cream off the mail business. As smart business people, they would serve only the high-volume, low-cost areas such as downtown business and residential districts.

But who would deliver the mail to high-cost areas such as rural America? Who would deliver to sparsely populated suburbs? And to inner-city neighborhoods?

And equally important, who would perform the functions of what I call the "hidden Postal Service"—those costly and not-so-visible functions that people have come to take for granted? For example: the forwarding of mail; protection of the public against mail fraud and false advertising; and handling of the huge volume of foreign mail.

Private carriers wouldn't touch those functions with a ten-foot pole because there's not a dime of profit in them. But the Postal Service does them for a simple reason: Because—despite the fact that we are no longer underwritten by taxpayer dollars—we remain totally committed to our role as a public, government service. And under the mandate of the Private Express Statutes, we will continue to provide fair and efficient service to all the people—not just the privileged few.

Now, my intent this afternoon is not to tell you that the Postal Service is without faults. The fact is, we need to do a better job of providing consistent delivery service. And I readily acknowledge that the level of courtesy in many of our post offices is not what it ought to be.

These and other shortcomings persist. But let me point out that the Postal Service has a solid record of facing up to problems and tackling them head-on. And in that regard, our ability in recent years to cut the Gordian knot of postal deficits is ample evidence of our seriousness.

A brief 13 years ago, the old Post Office Department was a massive, deficit-ridden bureaucracy that everyone thought to be immovable and beyond redemption. Today, the new Postal Service is an excellent example of how a government agency can be run like a business: efficiently . . . with a commitment to service . . . and within its income.

The American people should expect no less from me. And they should expect no less from the other 670,000 public servants of the Postal Service.

Now, with that said, I will be pleased to respond to any questions you might have.●

A REPORT BY MR. NORMAN TURE CONCERNING THE USE OF IDB'S IN NEW YORK STATE

● Mr. D'AMATO. Mr. President, I rise today to discuss an interesting and in-depth report on the use of industrial development bonds (IDB's) in New York State. This study was prepared by Mr. Norman B. Ture, former Under Secretary of the Treasury.

The report by Mr. Ture states that in the 13-year history of New York's IDB program, over 123,000 jobs were added or saved in companies operating facilities financed by industrial development bonds. Mr. Ture points out that only 14 percent of these companies were members of the Fortune 500. The point made here, of course, is that large, creditworthy companies are not the firms that predominantly utilize IDB's. In fact, and of equal importance, only 15 of the companies using IDB's employed over 500 people. The bottom line is that IDB's are used primarily by small firms that have difficulty raising capital.

Today, IDB's are under attack in the Congress. H.R. 1635 would destroy the economic usefulness of the program. The proponents of this legislation would be well served to read Mr. Ture's study. What is true about the use of IDB's in New York State, is true around the country.

Mr. President, I ask that Mr. Ture's report be printed in the RECORD.

The report follows:

INDUSTRIAL REVENUE BONDS: ESTIMATES OF EMPLOYMENT EFFECTS AND SIZE OF BENEFITTING COMPANIES

(By Norman B. Ture, Economic Consultant)

SUMMARY

The use of tax-exempt financing for private capital projects has been confined primarily to small companies and has added significantly to total employment. These conclusions are strongly indicated by data compiled for New York State. Over the thirteen years of the State's industrial revenue bond program, 123.541 jobs were added or saved in companies operating facilities financed by industrial revenue bonds (IRSs).

Support for this finding is provided by data from a survey by the New York Job Development Authority (JDA) of companies undertaking capital projects with tax-exempt second mortgage loans made by JDA. This survey shows that in the 855 responding companies, the actual number of employees at the end of 1982 totaled 75.845, a gain of 21,023 or 38 percent over the 54.822 employees in these companies at the time of their application for JDA loans.

Particularly impressive were the employment gains in companies with JDA loans during the years 1979 through 1982. These four years were marked by poor economic performance nationwide; real GNP seesawed within a very narrow range from the fourth quarter of 1978 through the last quarter of 1982. But the aggregate employment of companies obtaining JDA loans during these four years increased by 2.154 or 21 percent over the number on the job as the time the JDA loan applications were made.

All but a handful of companies receiving JDA funding for capital projects were quite small, as measured by number of employees. Only 15 of the 855 reporting firms had more than 500 employees. Four-fifths of the companies had 100 or fewer workers. Similar results are indicated with respect to IRB financing; less than 14 percent of the cases of IRB financing in New York involved Fortune 500 companies over the programs life.

INTRODUCTION: THE POLICY ISSUES

The increasing volume of IRBs issued during the late 1970s and so far in this decade has generated renewed concern about the tax treatment of these debt instruments. The criticism of IRBs focuses on a number of issues, some of which are of long standing, associated with the tax exemption of interest on general obligation state and local debt issues in general. Prominent among these issues are the alleged inefficiency of tax exemption, the upward pressure on state and local government general obligation debt interest rates, hence on the cost to states and localities for financing government in their respective jurisdictions, the consequent effects in raising interest rates for virtually all debt issues, the loss of tax revenues suffered by the Federal Government, and the violation of the standards of tax fairness, by virtue of the fact that tax-exempts are presumed to be held primarily by upper-bracket individuals and financial institutions. In the case of small-issue IRBs, this list of complaints is elaborated to include the allegation that those instruments fail to serve the objectives sought by the statutes which authorize their tax exemption. Specifically, it is alleged that the incentives for capital formation afforded by exempting the interest on these issues from tax are not confined to appropriate industrial enterprises, that the IRB issues are

not limited to financing investments by small businesses, and that the use of these instruments does not result in any increase in total capital formation and employment.

This discussion focuses only on the last two of the issues suggested by the preceding listing of criticisms, i.e., is small-issue IRB financing confined primarily to small companies, and does the use of IRBs contribute to increasing employment?

IRB'S AND EMPLOYMENT

The use of IRBs reduces the cost of capital to firms on whose behalf the IRBs are issued by reducing an important element in their financing costs. Because bondholders—the suppliers of the capital obtained through this financing—are exempt from Federal taxes on the interest on the bonds, they are willing to accept a lower yield on any given amount of saving committed to these bonds than if the bond interest were taxable. By the same token, unless one assumes that people are entirely unresponsive to the net-of-tax return they obtain for the use of their saving, the response is both an increase in the proportion of their saving channeled into these investments and an increase in total saving. Because the tax exemption serves to reduce the coupon rate on the obligations, the amount which the companies using the facilities financed by IRBs must pay to provide the revenues to the issuing authorities for the service of the bonds is, obviously, less than if the bonds were taxable. This reduction in financing cost increases the number of investment projects which can meet the companies' minimum rate of return requirements.

For some companies, the availability of IRB financing makes the difference between undertaking a project or foregoing it altogether. In other cases, IRB financing results in a somewhat larger capital project or a greater number of projects than would otherwise be undertaken. In any event, the lower cost of capital afforded by IRB financing results in an increase in the optimum amount of capital firms want to use, leading to an increase in the business demand for capital facilities.

In this context, the assertion often advanced by opponents of IRB tax exemption that the use of IRBs contributes little if anything to increasing aggregate capital formation is without foundation. To assert that business generally would undertake the same volume of capital additions in any given period of time with or without the benefits of such financing is equivalent to asserting that businesses' investment plans are completely insensitive to the cost of capital. Similarly, to assert that IRB's tax exemption has no effect on the total volume of private saving is equivalent to asserting that people will save the same amount irrespective of how much consumption they must give up for any given return or irrespective of how well rewarded they are for saving.

The increase in capital inputs (resulting from business response to IRB financing) raises the capital: labor ratio, which increases the productivity of labor compared to levels that would otherwise prevail. This increase in productivity increases the demand for labor services and raises real wage rates; higher real wage rates induce increases in the amount of labor services supplied. The increases in the supply of and demand for the services of labor result in gains in the employment level. This higher level of employment brings about an increase in total labor compensation. And the increases in labor and capital inputs in production results in expansion of total output compared to the levels that would otherwise be realized. The higher levels of real output, hence total real income, in turn generate higher levels of both consumption and saving and capital formation.

Critics of IRB tax exemption assert that the use of these instruments contributes little, if anything, to total employment, analogous to their claim that IRBs afford no effective incentive for additional saving and investment. The argument is that the use of IRBs may well result in a shift in jobs from one location or employer to another, but no increase in overall employment results. Hence, it is argued, the policy objective sought by tax exemption of IRBs—to provide net gains in employment—is not served.

No evidence is provided by IRB critics to support their claims that IRBs result in no net increases in capital formation and employment. In view of the fact that without question the use of IRBs reduce the cost of saving and the cost of capital, one would think the burden of proof would rest on IRB critics to show that saving and capital formation are unresponsive to these incentives. Similarly, one would think that the IRB critics would bear the onus for showing that no increases in employment are associated with the additional industrial, commercial, and service facilities which result because IRBs reduce the cost of saving and capital.

Any empirical demonstration of the effectiveness or ineffectiveness of any tax provision in contributing to additional saving, capital formation, and/or employment of course requires showing what these would amount to in the absence of the tax provision. Because there is seldom if ever the opportunity to undertake the kind of controlled social experiment which would be needed for this purpose, providing evidence as to these "what if" conditions is generally not possible. One must rely on other types of information on the basis of which one may draw reasonable inferences.

In this connection, some extremely useful and indicative data are available pertaining to experience in the State of New York with tax-exempt second mortgage loans made by the New York Job Development Authority to companies locating or expanding in New York. Applicants for this financing submit a variety of information to the JDA, including the number of additional jobs which they believe will result from the proposed capital projects to be undertaken with the tax-exempt financing. To be sure, one might well regard the applicant's estimates with some skepticism, in view of their obvious self-serving aspect. But the JDA also compiles information showing the number of employees the applicant firm had at the location for which the tax-exempt financing is sought at the time of the application and the number of employees actually on the job at that location at subsequent reporting dates. Comparison of these employment data provide substantial indication as to the effectiveness of the tax-exempt financing in adding to employment. Although these bond issues are not identical to IRBs, the results they produce must be quite similar to those afforded by IRB financing.

As of December 1982, these employment data were available from 855 companies for whom tax-exempt financing through JDA had been undertaken since the early 1960's. Based on reports received as of September 30, 1982, reporting companies were 80.9 percent of all companies actually obtaining such financing. On this basis, then, about 1,057 companies had actually undertaken projects with the tax-exempt financing.

The 855 responding companies had reported employment of 54,822 as of the time of their loan applications. They projected employment of 82,479 when the projects for which the loan application were filed were to be in operation. As of December 1982, the actual number of employees totaled 75,845. Although this number is 6,634 short of the projected employment level, it represents a gain of 21,023, or 38 percent, over the original 54,822 employees of the applying companies.

In a dynamic business environment, the results of capital formation projects often differ from those anticipated when the project plans are formulated and the financing is undertaken. Changes in the demand for the product(s) in the production of which the new capital is to contribute may result in better performance than expected, reflected in greater gains in employment than originally anticipated. Demand changes, on the other hand, may also lead to disappointing results. The very substantial gains in employment of the companies using the JDA loans, therefore, cannot be ascribed in full to the response to the tax-exempt financing itself. By the same token, neither can the modest shortfall of actual employment from that anticipated when the loans were applied for be construed as measures of the ineffectiveness of the tax-exempt financing. A conservative assessment would be that over the years company growth assisted by the tax-exempt financing had contributed importantly to expansion of employment.

Economic circumstances over the 20 years for which participating companies reported varied widely from recession to rapid growth, with a significant expansion of capacity and output overall. One might, accordingly, interpret the employment gains reported by the companies receiving JDA losses as reflecting the overall economic expansion rather than response to the incentives conveyed by tax-exempt financing.

To sharpen the focus on the likely effects of the tax-exempt financing, consider the results only for JDA loans extended in the years 1979 through 1982. These were years of poor economic performance nationwide. On a fourth quarter to fourth quarter basis, real GNP increased by only 1.4 percent in 1979, fell by 0.8 percent in 1980, rose by 2.0 percent in 1981, and fell by 1.7 percent in 1982. The fourth quarter 1982 real GNP was only 0.8 percent greater than that of the fourth quarter of 1978. In this period, the aggregate employment of companies obtaining JDA loans, as of the time of their application for the loans, was 10,249. Projected employment was 16,555. Actual employment by these firms as of the end of 1982 was 12,403. While the actual employment results fell short of expectations, they nevertheless represented a gain of 2,154 employees, or 21 percent.

The industrial development bond program has been in existence in New York for 13 years. Over this period local industrial development agencies have floated bonds totaling almost $2.7 billion. During the period, 97 agencies issued bonds for 1,271 projects. Industrial facility bonds, valued at $1.3 billion, account for 49 percent of the dollar total. Pollution-control and commercial facility bonds amount to $536 million and $835 million, respectively. Although employment data of the sort provided the JDA are not available from the district industrial de-

velopment agencies, estimates of new or saved jobs are provided by the companies operating facilities for which IRB financing was provided. The reported new or saved jobs attributable to IRB financing aggregate 123,541 over the 13-year period ending December 31, 1982.

The industrial development agency data combined with the JDA survey information strongly urge that the use of tax-exempt financing for industrial, commercial, and service businesses has contributed significantly to expansion of total employment. The view that the employment gains of companies whose capital projects are so financed are merely at the expense of other firms rests on an implicit assumption that there is, at any time, some fixed number of jobs which cannot be expanded irrespective of the incentives for doing so. It is, in fact, absurd to assume that each time a company with IRB or JDA financing increased its employment some other companies lost an equal number of workers. Any such assumption has no more credibility than the assumption that when companies obtaining IRB or JDA financing reduced the number of their employees, other companies necessarily increased their employment in equal numbers. To repeat, the reasonable assumption is that significant net employment gains are reflected in the data provided by the New York industrial development agencies and the JDA.

SIZE OF COMPANIES OBTAINING IRB FINANCING

The information reported by companies obtaining IRB or JDA second mortgage financing does not include detailed data about the companies' size. An examination of the list of companies for whose facilities IRB financing was provided shows that less than 14 percent of the cases involved Fortune 500 companies. To be sure, this does not necessarily demonstrate that all of the remaining cases involved very small companies, but it does strongly indicate that the benefits of IRB financing do not go primarily to large companies.

Substantial confirmation for this conclusion is provided by the survey of companies obtaining JDA financing. According to Mr. Michael F. Woods, Director, Industrial Economic Development. Department of Planning and Marketing of the New York Power Authority, the overwhelming proportion of the 1,035 companies obtaining JDA financing through September 1982 are small companies. This is confirmed by the employment data cited above. The 855 companies responding to the JDA questionnaire employed 75,845 persons as of December 1982, an average of 89 employees per firm. The following table presents a distribution of companies receiving JDA financing by numbers of persons employed at the end of 1982.

DISTRIBUTION OF COMPANIES RECEIVING JDA FUNDING BY NUMBER OF EMPLOYEES

	Companies	
	Number	Percent of total
10 or fewer	116	13.6
11 to 50	361	42.2
51 to 100	197	23.0
101 to 250	122	14.3
251 to 500	44	5.1
More than 500	15	1.8
Total	885	100.0

Source: New York Job Development Authority.

As the table shows, 42.2 percent of the 855 responding companies had from 11 to 50 employees in the reporting month, December 1982. Less than 7 percent of the companies had more than 250 employees at that time. And almost four-fifths of the reporting companies had 100 or fewer employees.

Unless other data sources can be provided to show a contrary result, it is fair to assume that the size distribution of companies obtaining IRB financing is much the same as that of companies with JDA funding. On this assumption, it seems clear that the benefits of tax-exempt financing of businesses are largely confined to small businesses.●

ANNOUNCEMENT OF WHEAT AND FEED GRAIN PROGRAMS

Mr. BAKER. Mr. President, I am prepared now to proceed to the consideration of H.R. 3914, if the minority leader is so inclined.

Mr. BYRD. Mr. President, there is no objection.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Chair lay before the Senate H.R. 3914.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3914) to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to a third reading, read the third time, and passed.

Mr BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR H.R. 3871 TO BE HELD AT THE DESK

Mr. BAKER. Mr. President, I put this unanimous-consent request for the consideration of the minority leader and other Members.

I ask unanimous consent that once the Senate receives from the House H.R. 3871, a bill to amend the Omnibus Budget Reconciliation Act of 1982, to provide that the figure used in determining hourly rates of pay for Federal employees not be changed before the comparability adjustment in the rates of pay for such employees has been made for fiscal year 1984, be held at the desk until the close of business Thursday, September 22.

Mr. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I will say parenthetically, Mr. President, that that is perhaps the longest sentence I have recited recently.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I propose, if the minority leader concurs, to call up Senate Resolution 161, which is a budget waiver; and if that is agreed to, to call up S. 771, which is the underlying measure.

Mr. BYRD. Mr. President, I have no objection to this request.

Mr. BAKER. I thank the minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET WAIVER

The resolution (S. Res. 161) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 771 was considered and agreed to, as follows:

S. RES. 161

Resolved, That, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 771, a bill to revise and extend provisions of the Public Health Service Act relating to health promotion and disease prevention, to provide for the establishment of centers for research and demonstrations concerning health promotion and disease prevention, and for other purposes. Such waiver is necessary to specify in the Public Health Service Act the amounts appropriated for fiscal year 1983 for activities of the Department of Health and Human Services relating to health promotion and disease prevention, and to permit the authorization of appropriation of funds for such activities for fiscal year 1984.

HEALTH PROMOTION AND DISEASE PREVENTION AMENDMENTS OF 1983

The Senate proceeded to consider the bill (S. 771) to revise and extend provisions of the Public Health Service Act relating to health promotion and disease prevention, to provide for the establishment of centers for research and demonstrations concerning health promotion and disease prevention, and for other purposes; which had been reported from the Committee on Labor and Human Resources with amendments, as follows:

On page 2, line 15, after "an Office of" insert "Disease Prevention and"

On page 2, line 18, strike "health infomation and" and insert "disease prevention,"

On page 2, line 20, after "health services, and" insert "health information and"

On page 2, line 21, strike "in" and insert "with respest to"

On page 3, line 19, strike "and businesses" and insert "businesses, and State and local health agencies"

On page 8, line 2, after "such" insert "activities during such fiscal year and an estimate of the total amount expended during such fiscal year to carry out such"

On page 9, after line 4, insert the following:

SEC. 5. Subsection (a) of section 338G of the Public Health Service Act is amended by inserting "clinical psychologists," after "pharmacists,".

SEC. 6. Section 2(b) of the Alcohol and Drug Abuse Amendments of 1983 is amended—

(1) by striking out "210" in paragraph (2) and inserting in lieu thereof "201"; and

(2) by striking out "201, 301" in paragraph (13) and inserting in lieu thereof "301, 201".

So as to make the bill read:

S. 771

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Health Promotion and Disease Prevention Amendments of 1983".

SEC. 2. (a)(1) Section 1701(a) of the Public Health Service Act is amended—

(A) by striking out "and" after the semicolon in paragraph (8);

(B) by striking out the period at the end of paragraph (9) and inserting in lieu thereof a semicolon and "and";

(C) by inserting after paragraph (9) the following new paragraph:

"(10) established in the Office of the Assistant Secretary for Health an Office of Disease Prevention and Health Promotion which shall—

"(A) coordinate all activities within the Department which relate to disease prevention, health promotion, preventive health service, and health information and education with respect to the appropriate use of health care;

"(B) coordinate such activities with similar activities in private sector;

"(C) establish a national information clearinghouse to facilitate the exchange of information concerning matters relating to health information and health promotion, preventive health services, and education in the appropriate use of health care, to facilitate access to such information, and to assist in the analysis of issues and problems relating to such matters; and

"(D) support projects, conduct research, and disseminate information relating to preventive medicine, health promotion, and physical fitness and sports medicine."; and

(D) by striking out the last sentence and inserting in lieu thereof the following: "The Secretary shall appoint a Director for the Office of Disease Prevention and Health Promotion established pursuant to paragraph (10) of this subsection. The Secretary shall administer this title in cooperation with health care providers, educators, voluntary organizations, businesses, and State and local health agencies in order to encourage the dissemination of health information and health promotion activities.".

(2) Section 1701(b) of such Act is amended—

(A) by striking out "(other than grants and contracts under sections 1707, 1708, and 1709)" and inserting in lieu thereof "(other than centers under section 1706)";

(B) by striking out "and" after "1981,"; and

(C) by inserting before the period a comma and "$8,000,000 for the fiscal year ending September 30, 1983, $9,000,000 for the fiscal year ending September 30, 1984, $9,500,000 for the fiscal year ending September 30, 1985, and $10,000,000 for the fiscal year ending September 30, 1986".

(b) The last sentence of section 1703(b) of such Act is repealed.

(c) Paragraphs (5) and (6) of section 1704 of such Act are repealed.

(d) Sections 1706, 1707, 1708, 1709, and 1710 of such Act are repealed.

(e) Title XVII of such Act is amended by adding at the end thereof the following new sections:

"CENTERS FOR RESEARCH AND DEMONSTRATION OF HEALTH PROMOTION AND DISEASE PREVENTION

"SEC. 1706. (a) The Secretary shall make grants and enter into contracts with academic health centers for the establishment, maintenance, and operation of centers for research and demonstration with respect to health promotion and disease prevention. Centers established, maintained, or operated under this section shall undertake research and demonstration projects in health promotion, disease prevention, and improved methods of appraising health hazards and risk factors, and shall serve as demonstration sites for the use of new and innovative research in public health techniques to prevent chronic diseases.

"(b) Each center established, maintained, or operated under this section shall—

"(1) be located in an academic health center with—

"(A) a multidisciplinary public health faculty which has demonstrated working relationships with relevant groups in such fields as medicine, psychology, nursing, social work, education and business;

"(B) graduate training programs relevant to disease prevention;

"(C) a core faculty in epidemiology, biostatistics, social sciences, behavioral and environmental health sciences, and health administration;

"(D) a demonstrated curriculum in disease prevention;

"(E) a capability for residency training in public health and preventive medicine; and

"(F) such other qualifications as the Secretary may prescribe;

"(2) conduct—

"(A) health promotion and disease prevention research, including retrospective studies and longitudinal prospective studies in population groups and communities;

"(B) demonstration projects for the delivery of services relating to health promotion and disease prevention to defined population groups using, as appropriate, community outreach and organization techniques and other methods of educating and motivating communities; and

"(C) evaluation studies on the efficacy of demonstration projects conducted under subparagraph (B) of this paragraph.

"(c)(1) During fiscal year 1984, the Secretary shall make grants and enter into contracts for the establishment of three centers under this section. During fiscal year 1985, the Secretary shall make grants and enter into contracts for the establishment of five centers under this section and the maintenance and operation of the three centers established under this section in fiscal year 1984. During fiscal year 1986, the Secretary shall make grants and enter into contracts for the establishment of five centers under this section and the operation and maintenance of the eight centers established under this section in fiscal years 1984 and 1985.

"(2) In making grants and entering into contracts under this section, the Secretary shall provide for an equitable geographical distribution of centers established, maintained, and operated under this section and for the distribution of such centers among areas containing a wide range of population groups which exhibit incidences of diseases which are most amenable to preventive intervention.

"(d) For purposes of this section, the term 'academic health center' means a school of medicine, a school of osteopathy, or a school of public health, as such terms are defined in section 701(4).

"(e) To carry out this section, there are authorized to be appropriated $3,000,000 for the fiscal year ending September 30, 1984, $8,000,000 for the fiscal year ending September 30, 1985, and $13,000,000 for the fiscal year ending September 30, 1986.

"REPORT ON PREVENTIVE MEDICINE AND HEALTH PROMOTION

"SEC. 1707. By January 1, 1984, and annually thereafter, the Secretary shall prepare and transmit to the Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives a report concerning all activities of the Department of Health and Human Services during the preceding fiscal year relating to preventive medicine and health promotion, including the number and type of personnel involved in such activities during such fiscal year and an estimate of the total amount expended during such fiscal year to carry out such activities.".

SEC. 3. (a) Section 471 of the Public Health Service Act is amended by inserting "(a)" before "The" and by adding at the end thereof the following new subsection:

"(b) There shall be in the National Institutes of Health an Assistant Director for Prevention. The Director of the National Institutes of Health shall delegate to the Assistant Director for Prevention the functions of the Director relating to the promotion of the disease prevention research programs of the national research institutes and the coordination of such programs among the national research institutes and between the national research institutes and other public and private entities.".

(b) The section heading for section 471 of such Act is amended by adding at the end thereof a semicolon and "ASSISTANT DIRECTOR FOR PREVENTION".

SEC. 4. Notwithstanding subsections (a)(1) and (e) of section 771 of the Public Health Service Act, to be eligible for a grant under section 770 of such Act for the fiscal year ending September 30, 1983, or for the fiscal year ending September 30, 1984, a school of public health shall maintain a total number of students for the school year beginning in the fiscal year for which such a grant is applied for, which at least equals the total number of full-time students enrolled in such school in the school year beginning in the fiscal year ending September 30, 1976.

SEC. 5. Subsection (a) of section 338G of the Public Health Service Act is amended by inserting "clinical psychologists," after "pharmacists,".

SEC. 6. Section 2(b) of the Alcohol and Drug Abuse Amendments of 1983 is amended—

(1) by striking out "210" in paragraph (2) and inserting in lieu thereof "201"; and

(2) by striking out "201, 301" in paragraph (13) and inserting in lieu thereof "301, 201".

Mr. HATCH. Mr. President, I am pleased that S. 771, the Preventive Medicine Research and Health Promotion Act of 1983 has been approved by my colleagues for passage from the Senate on the Consent Calendar. This

legislation represents a milestone in Federal health policy—for the first time there will be an opportunity to conduct broad scale research in disease prevention and health promotion by establishing centers for this research at selected schools of public health and academic health centers throughout the Nation. Although the funding for this effort is relatively modest, I believe it is essential we start by funding only research centers at institutions who have a demonstrated commitment to preventive medicine and the basic resources necessary to carry out a successful program. Much work needs to be done to encourage our citizens to assume more responsibility for their own health. A key factor in this task is educating our health professionals—public health officials, physicians, nurses, and the entire spectrum of allied health professionals, to enhance their interest in disease prevention and improve their skills in patient education focusing on health promotion.

This legislation holds the promise of addressing our number one public health problem, that is the rapidly escalating cost of health care. No Federal effort is likely to be more effective in diminishing the staggering economic burden of providing health care than reducing the need for expensive curative and reparative medical services. The first scientists and health policy experts in our Nation have made it abundantly clear to me that most of our big cost items, that is cancer, heart disease, chronic lung disease, and stress-related illnesses, are in large part preventable. Unfortunately, the great majority of our Federal investment in research has heretofore focused almost exclusively on disease oriented research. Without question, this has resulted in remarkable improvements in diagnostic and therapeutic tools for our health professionals, and enhanced the quality of life of many victims of disease. Nonetheless, it is time we began investing more in how we might better prevent illnesses which require costly and highly technical management.

Mr. President, I am convinced that this legislation heralds the beginning of an appropriate balance between preventive medicine and disease specific research in our Federal research effort. We can and must learn more about proper nutrition, motivating healthy lifestyles while respecting our cherished individual freedoms, occupational and environmental health hazards, stress related illness, and accident prevention. The proposed research centers can accomplish these goals by improving research in scientific disciplines such as epidemiology, biostatistics, nutrition, environmental health, and behavioral science. Public health can move from the classroom to the community by collaborative research with primary care physicians and their patients. I am also confident that this research can result in recommendations as to the most cost-effective means of motivating personal health, and will provide enormous benefits to industry and the Federal Government as we cope with the challenge of increasingly costly health benefits.

I am aware that there is high interest in this legislation among schools of public health and throughout the academic community. This is appropriate and indicates a new and much welcome interest in preventive medicine. However, I am convinced that the hoped for results can be achieved only if these centers are established at institutions which are committed to the basic intentions of the legislation. I would hope that institutions intending to focus only on one geographic region or cultural group would not be favored over those capable of conducting a wide spectrum of research which hopefully will translate into improved health care for citizens throughout the world.

Mr. KENNEDY. Mr. President, I rise in support of S. 771, the "Health Promotion and Disease Prevention Amendments of 1983." This measure represents an important step in the effort to enhance the focus on an often undervalued area of our Nation's health—disease prevention. As a member of the Committee on Labor and Human Resources for more than 18 years, I have heard hundreds of hours of testimony, and I have spoken personally with thousands of physicians, scientists, and citizens across the United States. I have seen and heard impressive evidence of the power of medicine to improve the quality of our lives.

However, the most impressive evidence I have heard is our ability to enhance the quality of our lives through preventive health interventions.

In general, this country has had a limited commitment to prevention. This limited commitment is truly shortsighted, since even a small investment in prevention can save substantial, later acute care costs, to say nothing of the human misery that can be avoided.

Federally supported immunization programs are dramatic evidence of the impact of prevention efforts.

The National Childhood Immunization Initiative was begun in 1977 when surveys revealed that over one-third of school-aged children were not protected against the major vaccine preventable diseases—a dangerous threat to the health of our children, to the unborn, and to our Nation as a whole. This alarming situation came about because we relaxed our strong Federal commitment to assuring adequate immunization levels.

The importance of adequate levels of immunization is indisputable. Encephalitis occurs in 1 out of 1,000 measles cases, often producing permanent brain damage; death occurs in 1 of every 10,000 cases. One case of deafness occurs in every 16,000 cases of mumps. Diptheria, whooping cough and tetanus can cause serious respiratory, cardiovascular, and nervous system complications. Whooping cough is fatal to 1 of every 100 children afflicted. No one would want to recall the scourge of paralytic polio.

Yet our children can be protected from every one of these childhood diseases. And the savings in human life, misery, and economic resources are huge. For every $1 we spend to immunize our children against measles, for example, we save $8 in treatment costs. The Massachusetts Commissioner of Public Health has estimated that the net savings of the Massachusetts immunization program over the past 15 years exceeds $16 million.

Lifestyle changes involve many other areas of concern. Poor eating habits cost this Nation over $30 billion a year in doctor and dentist bills. Combating obesity, which affects one-third of adults and over 40 percent of children, has become a multibillion-dollar-a-year industry, with many Americans falling victim to deceptive dieting schemes and unproven programs. Some studies estimate that diet is related to as much as 50 percent of all cancers in women and 35 percent of all cancers in men.

Exercise is another key component of lifestyle. Many studies show that exercise reduces the risk of fatal heart attack as well as promoting a general sense of well-being. In the years since President Kennedy launched the President's Council on Physical Fitness, there has been a growing awareness of the importance of exercise in America. The number of adults who exercise has more than doubled since 1960, and 50 percent of the American population claims to engage in some form of exercise. Our parks and recreation areas are dramatic testimony to this welcomed development—they are filled with more than 11 million joggers, more than 15 million swimmers, more than 15 million bicyclists, and almost 14 million regular tennis players. Despite these increases, however, there are not enough community programs designed to help individuals change their risky behavior and alter their lifestyles.

We have made progress over recent years in promoting prevention. The public awareness of the need for good prevention practices and health lifestyles is growing. Much more needs to be done.

Mr. President, S. 771, will place major importance on research in health promotion and disease preven-

tion. It provides for the establishment of centers for research and demonstration concerning health promotion and disease prevention. This research is critical and must be done. It should help our citizens improve their health status, diminish the prevalence of illness, reduce the incidence of costly diseases which prematurely kill or chronically disable Americans.

Mr. President, the need for S. 771 cannot be seriously questioned. Thus, I ask my colleagues to add their support to this measure.

Mr. INOUYE. It is my understanding that the Senator's committee is in agreement that at least one center proposed by the Health Promotion and Disease Prevention Amendments of 1983 (S. 771) should be an International Center for Health Promotion and Disease Prevention.

Mr. KENNEDY. I am most pleased to agree with my colleage from the State of Hawaii that this was indeed our understanding and, further, that the State of Hawaii would be an excellent place for such an entity to be located, given its unique geographical and cultural resources.

Mr. INOUYE. The University of Hawaii has informed me that if the Department of Health and Human Services were to establish such a center for the Pacific Basin, that it would be possible for them to continue to work closely with the World Health Organization, as well as the Centers for Disease Control in furtherance of other ongoing initiatives that are already in the Pacific Basin and Southeast Asia.

Mr. KENNEDY. I might add that such an initiative would very much be in the national interest and should serve as a catalyst for working with health education institutions throughout that entire section of the world in preventive medicine, epidemiological research, and a true range of health promotion initiatives. In fact, you might even find that a number of our leading clinicians and scientists from my own State might soon want to take a sabbatical with your deans in order to help develop such initiatives.

Mr. INOUYE. I very much appreciate the ranking minority member's enthusiasm for both the State of Hawaii and our interest in the entire Pacific Basin region.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REMOVAL OF INJUNCTIONS OF SECRECY

Mr. BAKER. Mr. President, I make this unanimous-consent request for the consideration of the minority leader and other Senators.

As in executive session, I ask unanimous consent that the injunction of secrecy be removed from three treaties received by the Senate from the President of the United States today: a Tax Protocol with Canada (Treaty Document 98-7); a treaty with Thailand on the Execution of Penal Sentences (Treaty Document 98-8); and a United Nations Convention on Contracts for the International Sale of Goods (Treaty Document 98-9).

I also ask that the treaties be considered as having been read the first time; that they be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's messages be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The President's messages are as follows:

To The Senate of the United States:

I transmit herewith, for Senate advice and consent to ratification, a Protocol signed at Ottawa on June 14, 1983, amending the Convention between the United States and Canada with respect to taxes on income and on capital, signed at Washington on September 26, 1980. I also transmit a related exchange of notes and the report of the Department of State with respect to the Protocol.

Senate consideration of the Convention, which was transmitted for advice and consent to ratification by letter dated November 12, 1980, has been delayed pending the correction of certain technical problems in its text. The Protocol resolves these technical problems by clarifying the language of the Convention to assure that its original intent is fulfilled.

In addition, the Protocol makes a necessary change regarding pensions, annuities and alimony and amends the Convention to permit the United States to exercise its full taxing right, under the Foreign Investment in Real Property Act, section 897 of the Internal Revenue Code. The Protocol also includes a new rule which affects an athlete resident in one State who is a recipient of a bonus from an employer resident in another State. The new rule protects such a recipient by limiting the rate of tax in the State of the employer.

It is most desirable that this Protocol, together with the Convention, be considered by the Senate as soon as possible and that the Senate give advice and consent to ratification of both instruments.

RONALD REAGAN.

THE WHITE HOUSE, *September 21, 1983.*

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Treaty Between the United States of America and the Kingdom of Thailand on Cooperation in the Execution of Penal Sentences, which was signed at Bangkok on October 29, 1982.

I transmit also, for the information of the Senate, the report of the Department of State with respect to the Treaty.

The Treaty would permit citizens of either nation who had been convicted in the courts of the other country to serve their sentences in their home country; in each case the consent of the offender as well as the approval of the authorities of the two Governments would be required.

This Treaty is significant because it represents an attempt to resolve a situation which has inflicted substantial hardships on a number of citizens of each country and has caused concern to both Governments. The Treaty is similar to those currently in force with Bolivia, Canada, Mexico, Panama, Peru and Turkey. I recommend that the Senate give favorable consideration to this Treaty at an early date.

RONALD REAGAN.

THE WHITE HOUSE, *September 21, 1983.*

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the United Nations Convention on Contracts for the International Sale of Goods. This Convention was adopted on April 11, 1980, by the United Nations Conference on Contracts for the International Sale of Goods and was signed on behalf of the United States at United Nations Headquarters on August 31, 1981.

The Convention would unify the law for international sales, as our Uniform Commercial Code in Article 2 unifies the law for domestic sales.

The Convention was prepared, with the active participation of representatives of the United States, by the United Nations Commission on International Trade Law (UNCITRAL) and received the unanimous approval of this worldwide body; the Convention was then adopted, without dissent, by the United Nations Conference of sixty-two States. This unanimity attests to the broadly perceived need for the Convention and the value of its provisions.

The House of Delegates of the American Bar Association recommended in 1981 that the United States ratify the Convention, subject to a declaration permitted under Article 95 as to the grounds for applicability. I concur fully in this recommendation for the reasons set forth in the enclosed report of the Department of State.

The report of the Department of State provides a summary of the Convention and describes its approach. Worthy of emphasis is the international deference that the Convention accords to the contract made by the parties to an international sale. The parties may agree that domestic law rather than the Convention will apply, and their contract may modify or supplant the Convention's rules. The uniform international rules play their significant role when, as often occurs, a problem arises that the parties did not anticipate and solve by contract.

International trade now is subject to serious legal uncertainties. Questions often arise as to whether our law or foreign law governs the transaction, and our traders and their counsel find it difficult to evaluate and answer claims based on one or another of the many unfamiliar foreign legal systems. The Convention's uniform rules offer effective answers to these problems.

Enhancing legal certainty for international sales contracts will serve the interests of all parties engaged in commerce by facilitating international trade. I recommend that the Senate of the United States promptly give its advice and consent to the ratification of this Convention.

RONALD REAGAN.
THE WHITE HOUSE,
September 21, 1983.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I say to the minority leader that I am cleared on this side to consider nominations on today's Executive Calendar under New Reports on page 1 and Civil Aeronautics Board on page 1, all the nominations on pages 2, 3, 4, 5, 6, 7, 8, and page 9 under Nominations Placed on the Secretary's Desk in the Air Force, Army, Coast Guard, Marine Corps, and Navy, and on page 10 a continuation under that heading.

Mr. BYRD. Mr. President, it is with pleasure that I state to the majority leader that the first nominee in this grouping, who is from Tennessee, has been cleared on this side of the aisle as have all the others enumerated by the majority leader.

Mr. BAKER. I am grateful to the minority leader, and I am impressed that he recognizes the distinguished citizen of my State was first on this list today.

Mr. BYRD. I was looking to see if there was anyone on there from West Virginia.

Mr. BAKER. I understand the instinct.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations just identified.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF TRANSPORTATION

Matthew V. Scocozza, of Tennessee, to be an Assistant Secretary of Transportation, vice Judith T. Connor, resigned.

CIVIL AERONAUTICS BOARD

Barbara E. McConnell, of the District of Columbia, to be a member of the Civil Aeronautics Board for the remainder of the term expiring December 31, 1983, vice Elizabeth E. Bailey, resigned.

Barbara E. McConnell, of the District of Columbia, to be a member of the Civil Aeronautics Board for the term of 6 years expiring December 31, 1989 (reappointment).

IN THE AIR FORCE

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

Lt. Gen. John S. Pustay [redacted] FR, U.S. Air Force.

IN THE ARMY

The following-named Army Medical Department officers for appointment in the U.S. Army to the grades indicated under the provisions of title 10, United States Code, sections 611(a) and 613:

To be permanent brigadier general

Col. Thomas M. Geer [redacted], Medical Corps, U.S. Army.
Col. Philip K. Russell [redacted], Medical Corps, U.S. Army.
Col. Darryl H. Powell [redacted], Medical Corps, U.S. Army.
Col. Connie L. Slewitzke [redacted], Nurse Corps, U.S. Army.
Col. Girard Seotter III [redacted], Medical Corps, U.S. Army.

The following-named officers for appointment in the Regular Army of the United States to the grade indicated under the provisions of title 10, United States Code, sections 611(a) and 624:

To be permanent major general

Brig. Gen. John L. Ballantyne III [redacted] U.S. Army.
Brig. Gen. Leonard J. Riley [redacted], U.S. Army.
Brig. Gen. Leroy N. Suddath, Jr. [redacted] U.S. Army.
Brig. Gen. Andrew L. Cooley [redacted], U.S. Army.
Brig. Gen. Scott B. Smith [redacted], U.S. Army.
Brig. Gen. Eugene L. Stillions, Jr. [redacted] U.S. Army.
Brig. Gen. Michael J. Conrad [redacted] U.S. Army.
Brig. Gen. Joseph C. Lutz [redacted], U.S. Army.
Brig. Gen. Edward Honor [redacted], U.S. Army.
Brig. Gen. Richard D. Kenyon [redacted] U.S. Army.
Brig. Gen. William G. T. Tuttle, Jr. [redacted] U.S. Army.
Brig. Gen. John M. Brown [redacted], U.S. Army.
Brig. Gen. Frederick F. Woerner, Jr. [redacted] U.S. Army.
Brig. Gen. Charles F. Briggs [redacted], U.S. Army.
Brig. Gen. Richard S. Kem [redacted], U.S. Army.
Brig. Gen. James L. Dozier [redacted], U.S. Army.
Brig. Gen. Norman E. Archibald [redacted] U.S. Army.
Brig. Gen. Jack B. Farris, Jr. [redacted], U.S. Army.
Brig. Gen. Hardin L. Olson, Jr. [redacted] U.S. Army.
Brig. Gen. Howard C. Whittaker [redacted] U.S. Army.
Brig. Gen. John W. Foss [redacted], U.S. Army.
Brig. Gen. Allen K. Ono [redacted], U.S. Army.
Brig. Gen. John H. Moellering [redacted] U.S. Army.
Brig. Gen. Robert F. Molinelli [redacted] U.S. Army.
Brig. Gen. William E. Potts [redacted], U.S. Army.
Brig. Gen. Orren R. Whiddon [redacted] U.S. Army.
Brig. Gen. John J. Yeosock [redacted], U.S. Army.
Brig. Gen. Donald S. Pihl [redacted], U.S. Army.
Brig. Gen. William E. Sweet [redacted], U.S. Army.
Brig. Gen. Burton D. Patrick [redacted], U.S. Army.
Brig. Gen. Henry G. Skeen [redacted], U.S. Army.
Brig. Gen. Fred Hissong, Jr. [redacted], U.S. Army.
Brig. Gen. Thurman D. Rodgers [redacted] U.S. Army.
Brig. Gen. Sidney T. Weinstein [redacted] U.S. Army.
Brig. Gen. Rocco Negris [redacted], U.S. Army.
Brig. Gen. Stephen R. Woods, Jr. [redacted] U.S. Army.
Brig. Gen. Eugene R. Cromartie [redacted] U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Richard D. Lawrence [redacted] U.S. Army.

The following-named officer under provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. LaVern E. Weber [redacted], U.S. Army.

Navy nominations beginning Carl D. Fago, and ending Raymond L. Lilly, Jr., which nominations were received by the Senate on August 31, 1983, and appeared in the CONGRESSIONAL RECORD of September 12, 1983.

Navy nominations beginning Charles David Arnold, and ending John Zembuch, which nominations were received by the Senate on August 31, 1983, and appeared in the CONGRESSIONAL RECORD of September 12, 1983.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR THURSDAY

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 11 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATORS BAUCUS AND PROXMIRE TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that after the two leaders are recognized under the standing order, special orders be given to Senators BAUCUS and PROXMIRE of not to exceed 15 minutes each in that order.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that the time remaining, measured after the execution of the special orders until 12 noon, be devoted to the transaction of routine morning business in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Mr. President, at 12 noon, at the expiration of the time for the transaction of routine morning business, it is the intention of the leadership on this side to ask the Senate to turn to the consideration of Calendar Order No. 220, S. 1342, which is the State Department authorization bill.

After the disposition of that bill, which I hope will not require a very long time, it is the hope of the leadership on this side that the Senate will turn to the consideration of Calendar Order No. 303, S. 869, the Export-Import Bank Act of 1945.

It is not anticipated, Mr. President, that other measures will be brought before the Senate on Thursday. However, it is the intention of the leadership on this side to ask the Senate to turn the consideration of the Martin Luther King holiday bill on Friday of this week.

RECESS UNTIL TOMORROW AT 11 A.M.

Mr. BAKER. Mr. President, I see no other Senator seeking recognition. The time for the transaction of routine morning business has expired. I, therefore, move in accordance with the order previously entered that the Senate now stand in recess until the hour of 11 a.m. tomorrow.

The motion was agreed to, and the Senate at 7:49 p.m., recessed until Thursday, September 22, 1983, at 11 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate, September 21, 1983:

DEPARTMENT OF TRANSPORTATION

Matthew V. Scocozza, of Tennessee, to be an Assistant Secretary of Transportation.

CIVIL AERONAUTICS BOARD

HOUSE OF REPRESENTATIVES—*Wednesday, September 21, 1983*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We ask, O God, that Your power and presence be with all who labor in the assembly, and with all people who see in what they do the opportunity to be of service to others. May our various vocations allow us to use the talents You have given to ease the hurt of people, to feed the hungry, to ease the suffering, and to promote peace and justice about our world. Help us to realize that every small act of righteousness is blessed by Your spirit and every evidence of kindness is surrounded by Your love. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment joint resolutions of the House of the following titles:

H.J. Res. 132. Joint resolution to designate the week beginning September 25, 1983, as "National Adult Day Care Center Week";

H.J. Res. 218. Joint resolution to designate the month of September of 1983, as "National Sewing Month";

H.J. Res. 229. Joint resolution to authorize and request the President to issue a proclamation designating April 22 through April 28, 1984, as "National Organ Donation Awareness Week";

The message also announced that the Senate had passed bills, joint and concurrent resolutions of the following titles, in which the concurrence of the House is requested:

S. 1448. An act to designate the square dance as the national folk dance of the United States;

S. 1850. An act to amend title 38, United States Code, to extend for one year the authority of the Veterans' Administration to provide certain contract medical services in Puerto Rico and the Virgin Islands;

S.J. Res. 121. Joint resolution to designate November 1983 as National Diabetes Month;

S.J. Res. 128. Joint resolution to designate the day of October 22, 1983, as "Metropolitan Opera Day";

S.J. Res. 134. Joint resolution to provide for the designation of the week of November 27 through December 3, 1983, as "National Entomology Week";

S.J. Res. 140. Joint resolution to provide for the designation of the week of October 2 through October 8, 1983, as "Myasthenia Gravis Awareness Week";

S.J. Res. 142. Joint resolution designating the week of October 3 through October 9, 1983, as "National Productivity Improvement Week";

S.J. Res. 146. Joint resolution to designate March 23, 1984, as "National Energy Education Day";

S.J. Res. 150. Joint resolution to designate August 4, 1984, as "Coast Guard Day";

S.J. Res. 157. Joint resolution designating November 13, 1983, as "National Retired Teachers' Day"; and

S. Con. Res. 68. Concurrent resolution to correct the enrollment of S. 602.

APPROVAL FOR 18-MONTHS STAY IN LEBANON TERMED A MISTAKE

(Mr. OBEY asked and was given permission to address the House for 1 minute.)

Mr. OBEY. Mr. Speaker, the House appears ready to give its approval for American troops to remain in Lebanon for an additional 18 months, and I believe that is a mistake.

I have always believed that in the context of an overall settlement in the Middle East, we would have to be prepared to send American troops as part of an international peacekeeping force if we were requested to do so by all parties to the settlement. But it seems to me that in this situation it is simply wrong to provide authority for our troops to remain there for 18 months. I think 18 months is too long. We should not be in a position where we appear to be fighting on one side of an age-old conflict.

Mr. Speaker, I would support, for instance, giving the administration 60 days to report under the War Powers Act, but after that I believe that the war powers clock ought to tick and the Congress ought to make a judgment at that time about what further steps are necessary.

KEEPING A COMMITMENT TO STUDENTS

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, as we begin debate on education appropriations this week, I hope we all will keep in mind the importance of financial aid for low- and middle-income students and families.

Since the administration took office, about 1 million students have been cut off from Federal student aid. That number would be even higher had we not restored many of the deep cuts proposed by the administration.

For the coming fiscal year, the Appropriations Committee has developed a good bill with a responsible student aid package. Pell grants and student loans are kept intact. Work study is increased from the current year, and the other campus-based programs are saved from the administration's plan to terminate them.

This bill will be good for students and families in Connecticut, certainly better than the program we received in February. I urge my colleagues to support this vital appropriations bill.

COMMITTEE APPROVES BILL TO REFORM U.S. MILITARY

(Mr. SKELTON asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, yesterday the House Armed Services Committee approved legislation based in part on a proposal that I introduced to reform the Joint Chiefs of Staff, the U.S. military's top command level. The committee bill, H.R. 3718, which was approved unanimously, is based in part on the bill, H.R. 2560, that I introduced.

While the committee bill is not as comprehensive as the one I introduced, it is certainly a major step forward. Certain provisions were adopted from my legislation. First, the chain of command from the President on down through the Chairman of the Joint Chiefs of Staff is established; strengthening the position of the Chairman of the Joint Chiefs of Staff; designating the Chairman as an adviser to the President and the Secretary of Defense in his own right; providing for military representation on the National Security Council, which has not happended before; and insuring that the Joint Chiefs of Staff attract the most qualified officers in all the branches of the service; and it provides for proper promotion within that spectrum.

I am pleased to say that these changes are a step forward. This should help do away with some of the

waste, help do away with some of the duplication, and help eliminate some of the interservice rivalry which we see and which causes extra defense dollars to be spent.

If this does not do the job, Mr. Speaker, after seeing it work for a period of time, I will further introduce legislation to help pursue the goal of doing away with waste in defense.

REPEAL OF THE WAR POWERS ACT

(Mr. BATES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BATES. Mr. Speaker, we are now faced with a growing involvement in Lebanon that closely parallels our spiral into the morass of Vietnam.

We are embarked on a policy of a double standard. No American troops are permitted in Central America, yet the same principle allows American marines to fight and die in Lebanon.

Therefore, I call for the repeal of the War Powers Act, an act that has allowed the President to circumvent the Constitution and to avoid the essential debate on whether this Nation should be at war.

Americans are dying, but who are we at war with? The Druze? The Palestinians? The Lebanese? The Syrians?

Congress alone has the power to declare war under article I, section 8 of the Constitution, and the War Powers Act has permitted this essential constitutional guarantee to be ignored. The issue is not whether the act itself has been violated, but whether the act should be repealed since it has not worked.

I cannot in good conscience support this most recent compromise that allows American troops to wage war for another 18 months without the debate on national policy that has placed them there in the first place.

A CALL FOR THE RESIGNATION OF U.N. DELEGATE LICHENSTEIN

(Mr. EDGAR asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and include extraneous matter.)

Mr. EDGAR. Mr. Speaker, I join with 23 Members of the House today in sharing our strong reaction to Charles M. Lichenstein's comments on removal of the United Nations. He is a delegate to the United Nations, and he suggested that the United Nations could move out of the United States if it wished.

We are shocked with that statement, and we believe that this statement reflects Mr. Lichenstein's outright hostility to the goals and operations of the United Nations and proves that he is unfit to represent our country in that body. We, therefore, call for his immediate resignation.

We also ask that the Secretary of State officially retract the comments of Mr. Lichenstein and fully clarify U.S. policy toward the United Nations. It is important to clarify this, particularly as the opening session of this year's U.N. session begins. I believe, regardless of the international incidents that have occurred and that have shocked us all, that the United Nations still stands as an organization that we ought to fully support. Mr. Lichenstein's comments detract from that support, and we call for his resignation.

Mr. Speaker, the statement of the views of these 23 Members is as follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C.

As supporters of a strong U.S. commitment to the United Nations, we were shocked by the recent statement of a U.S. delegate to the U.N., Charles M. Lichenstein, suggesting that member states move their representation and the organization itself elsewhere.

We believe that this statement reflects Mr. Lichenstein's outright hostility to the goals and operations of the United Nations, and proves that he is unfit to represent our country in that body. We therefore call for his immediate resignation.

We also ask that the Secretary of State officially retract the comments of Mr. Lichenstein, and fully clarify U.S. policy toward the United Nations. In light of the opening session of the General Assembly in New York today, as well as the increasing tensions in the world today, we should be reaffirming and not backing away from our commitment to the ideals of the United Nations, including its universality of membership and its unique role as the mediator in disputes among nations.

John Seiberling, Anthony C. Beilenson, Sala Burton, Doug Walgren, Bob Kastenmeier, James H. Scheuer, Peter H. Kostmayer, Julian C. Dixon, Howard Wolpe, Gerry E. Studds, Pete Stark, Bob Edgar, George Miller, Barbara Boxer, Don Edwards, Berkley Bedell, Ed Markey, David E. Bonior, Pat Schroeder, James L. Oberstar, Paul Simon, Donald J. Pease, Norman Y. Mineta.

SEND SOVIET STUDENTS HOME

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute.)

Mr. ANNUNZIO. Mr. Speaker, I am continuing in my effort to alert my colleagues to the vast amount of possible sanctions that we can impose on the Soviet Union in response to the Korean Air Line atrocity. It is becoming apparent as the days pass, that we are not doing what we could do. It is also frightening to think that we would not do what we should do.

The Soviets are thugs. Who can dispute that claim? Why should we slip back to a business as usual stance with this nation. We could start here at home, without the cooperation or commitment of other nations.

For example, I see no reason why Soviet students should be allowed to study in this country. No student who is allowed to leave Mother Russia to study in the United States is doing so solely for his or her academic betterment. These students are carefully screened and totally loyal to their homeland. I cannot help but believe that they are here to gather information as much as they are to study in our classes.

I suggest that Soviet student visas be terminated and that we allow a special one-way flight to Moscow. I am confident they would do the same for us.

□ 1010

IN SUPPORT OF THE COMMUNITY RENEWAL EMPLOYMENT ACT

(Mr. MOAKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOAKLEY. Mr. Speaker, I rise in support of H.R. 1036, the Community Renewal Employment Act. In spite of recent talk of improvement in our economy, unemployment still remains a high 9.5 percent, and millions of Americans are still in desperate need of jobs. Enactment of this legislation would provide employment opportunities to nearly half a million long-term unemployed persons.

The bill also provides specific portions of its funding to jobs for women, minorities, and youth, those segments of the population often underserved in the previous jobs legislation.

Eighty percent of the funds in this bill would be used for much-needed community improvement projects from infrastructure repair to services for the elderly. The other 20 percent of the employment funds would go for long overdue repair and renovation of educational facilities. These two targeted areas of improvement are critically needed and will probably not take place unless this legislation is passed.

I urge my colleagues to vote for this vital legislation which will not only provide jobs, but will serve our communities' needs as well.

JEWISH WAR VETERANS OF AMERICA, INC.

(Mr. ANDREWS of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANDREWS of Texas. Mr. Speaker, last week I added my name as a cosponsor to H.R. 3775, a bill granting a Federal charter to the Jewish War Veterans of America. This action would give long overdue congressional

recognition to this Nation's fourth largest, and oldest active veterans organization.

To record of the Jewish community's military service to the Nation is outstanding. Thousands of Jewish citizens have died in combat for their country and thousands more have been awarded combat medals. Jewish military service to this Nation dates back to the pe-Revolutionary War era, and the JWV was founded back in 1896 by a group of Jewish Civil War veterans in response to slander and insinuations that Jews had not participated militarily in the War Between the States.

Today, the Jewish War Veterans of America are involved in many aspects of our Nation's life. Their veterans affairs program is second to none. The JWV testifies in support of veterans programs, maintains 11 veterans services offices nationwide to aid veterans from all walks of life, provides volunteer services to the VA hospitals, and is the first veterans organization to provide volunteers to help in the Vietnam veterans outreach program.

In addition to their outstanding work in the field of veterans affairs, the JWV is also an active member of the Leadership Conference on Civil Rights, works for the elimination of all types of anti-Semitism, bigotry, and discrimination in America, are one of the earliest and most active participants in the struggle for freedom for Soviet Jews, and are strong promoters of closer ties and greater understanding between the United States and Israel.

Mr. Speaker, this is just a small sampling of the work of the Jewish War Veterans of America. I urge my colleagues to support H.R. 3775, and give congressional recognition to this outstanding and patriotic veterans organization.

WHAT HAPPENED TO THE COAL SLURRY BILL?

(Mr. WILLIAMS of Montana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS of Montana. Mr. Speaker, what happened to the coal slurry bill? It has been suddenly pulled from the calendar. There were many of us in the House who believed from the onset that the bill was ill advised, that it was unnecessary.

Most States, particularly our Western States, believe that the bill further deepens the current jurisdictional crisis with regard to States rights over water. Nonetheless, the bill came through the Rules Committee and was on the floor of the House last week and this week. The latter part of last week I personally received assurances from the leadership that the bill would be given full consideration last week, this week, and would remain on the calendar through the amendment process until a final vote. Now suddenly the bill has been pulled from the calendar without notice.

Coal slurry, Mr. Speaker, has had, well, a curious legislative history and this sudden jerking of the bill without notice should make the Members take another look at this deeply flawed bill.

IN SUPPORT OF THE COMMUNITY RENEWAL EMPLOYMENT ACT

(Mr. TORRES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TORRES. Mr. Speaker, this country needs a jobs bill for the eighties and the nineties. The community Renewal Employment Act is just such a bill. Its benefits are targeted to the people who need assistance the most—those who have exhausted their unemployment benefits.

Under the able chairmanship of the gentleman from New York (Mr. LAFALCE), the Banking Subcommittee on Economic Stabilization has heard many hours of testimony about the plight of the unemployed, the prospects for the displaced worker and the promise for the high-technology employee.

At least one uncontested fact has emerged from these hearings. Thousands of jobs lost during this recession will never be refilled. Workers have not been temporarily laid off: Although some have, many will never be rehired in their old jobs. The jobs they held just do not exist anymore. We may call this phenomena industrial displacement but what it really means is that unless the Congress takes some action, the number of those counted as long-term unemployed will grow rather than diminish.

We in the Congress have a duty and an opportunity to help these displaced workers. The passage of the Community Renewal Employment Act is our opportunity. Now we must perform our duty and pass the bill.

CONCERN ABOUT STATUS OF OUR FORCES IN LEBANON

(Mr. LEVITAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVITAS. Mr. Speaker, according to press reports today, a compromise has been reached between the President and the leadership in the Congress on a resolution concerning the deployment of our forces in Lebanon.

While I am happy to see the President embrace and subject himself to the War Powers Act by his agreeing to sign the resolution, I, for one, was not party to that so-called compromise and I have great reservations about the continued deployment of our forces in Lebanon under present circumstances without any explanation from the President as to what their mission is and what our role is in Lebanon.

The Marines are a fighting force. Today what is their role there, other than to receive punishment from the various warring factions? Are they to support and fight for the central Government of Lebanon? Are they to keep the fighting factions apart? Are they to keep the Syrians or Israelis or PLO out? If they move out of their enclave, in which direction do they move and against whom?

I want to hear specifically and in detail from the President himself, as to what is America's role and the mission of our forces in Lebanon. If there is a good explanation and a real role, of course, I will support the President; but if not, I think we ought to remove our forces from Lebanon.

This week or next week we may have an opportunity to have another vote on a type of Gulf of Tonkin resolution. I hope it is given more careful consideration this time.

DEFICIT SPENDING

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, Members from both sides of the aisle all agree on the need to act on the massive Federal deficits, but the majority fails to understand the cause of these record deficits.

We are told that taxes are too low and need to be raised. I think our tax paying constituents would disagree. We are told that defense spending is too high. I think those who serve in our country's defense, using equipment older than they are, would disagree.

Deficits thrive because social spending is uncontrolled and taxes cannot keep pace. We can raise revenues all we want but we will not lower the deficit 1 cent unless we control social spending.

From 1976 to 1981, revenues increased by $300 billion or 100 percent, but the Federal debt actually grew $361 billion. It is easy to see how this can happen, when we recall the vote on the 1984 concurrent budget resolution. Democrats overwhelmingly supported this bill which raised taxes $10 billion, cut defense $12 billion, but increased the deficit by $13 billion. How could this happen? Simple, we added another $29 billion to social spending.

You cannot have a solution if you are blind to the problem and until my colleagues from the other side of the

aisle open their eyes, all Americans, especially the unemployed, will suffer the consequences.

DEMOCRATS AND DEFICITS: SHADOW-BOXING

(Mr. DENNY SMITH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DENNY SMITH. Mr. Speaker, I am glad to see that our Democrat colleagues have, at long last, recognized the dangers posed by huge budget deficits. Their fears that these deficits could damage the recovery are shared by Republicans, but I am afraid that their concern is not matched by any willingness to get at the root of the deficit—excessive spending.

The events of last 2 years offer convincing proof that the Democrats are only interested in shadow boxing with Federal red ink. Now, the Democrats are calling for a balanced approach to the deficit problem. They say they want to reduce the deficit by, cutting defense spending, and increasing taxes. Like any snake oil salesman's pitch, it sounds good, but we have heard it before.

When the Congress passed TEFRA in 1982, Democrats hailed it as a balanced approach. We were told that spending would be cut by $3 for every $1 in new taxes. It was too good to be true. Instead of getting a 3-for-1 ratio of spending cuts to tax increases, it now appears that we are going to wind up spending $1.14 more for every dollar of increased taxes. This is the sort of balanced approach that results in massive deficits.

We know that raising taxes will not reduce the deficit—at least not with the current leadership. If this Congress really wants to cut deficits, it must deal with the real source of the problem—uncontrolled social spending.

□ 1020

LEBANESE WAR POWERS RESOLUTION

(Mr. PAUL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAUL. Mr. Speaker, it has been heralded as a compromise on the war powers issue. In my estimation it is nothing of the kind. It is complete capitulation to a continued active presence in the Mideast with a great possibility that the fighting will be escalated and more men and weapons will be required—just to maintain a status quo—of a continued no win purposeless fight.

It is said to be bipartisan, yet it is just a continuation of our monolithic policy of decades of continued foreign intervention. This intervention is not required for our security and therefore fraught with great danger—danger of never achieving victory and never being able to gracefully withdraw.

We as a Congress are reneging on our responsibility to be the sole decisionmaker in committing our people to war as directed by the Constitution.

How can we fix for 18 months the number of troops in an area of active hostility? It is totally untenable. More troops must be used to protect our men. If they are not, it would be rather simple to pick off and demoralize a fixed continuing of 1,200 marines—limited in their role to fight.

Security in this area is vital to Israel. Israel had nearly achieved this and had the PLO on the ropes and yet our policymakers decided to rescue the PLO who are now back in Lebanon—shooting at our marines. It is an unworkable policy, doomed to fail. It is with great risk that we remain in Lebanon with the chance that significant escalation of the conflict will come on the heels of some unforeseen incident—such as the sinking of a U.S. warship.

In the politics of war, compromise with precise goals ushers in tomorrow's unsolvable dilemmas. Let us have no part of this compromise of our responsibilities.

BUDGET FRAUD AGAINST THE AMERICAN PEOPLE

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, the Democratic majority in the House of Representatives is trying to perpetrate a fraud on the American people. They are not even living up to their own budget resolution, as we have seen in the case of the Trade Adjustment Assistance Act. The Democratic leadership in the House says it is going to deal with the deficit by, as usual, raising taxes and cutting defense. But in fact neither of these are being applied against the deficit. They are only being applied to more and more Federal spending.

Let us look at last week's and this week's schedule. Last week we had the Vocational Rehabilitation Act, which added an additional $1.6 billion. Also last week, the Trade Adjustment Assistance Act carried with it an open-ended authorization estimated to cost $150 million to $200 million more than requested in fiscal year 1984. This week the FCC authorization, which was scheduled to be taken up but was pulled: $300 million additional. State, Justice, and Commerce, as reported: $1.3 billion increase. Hawkins jobs bill, as reported: $5 billion added, and although we may adopt an amendment that would lower it to $3.5 billion, it is $3.5 billion we should not be spending at this time. Labor-HHS: an additional $3.5 billion.

It is all politics, Mr. Speaker. And the American people are paying the price.

LARRY FLYNT'S TASTELESS MAGAZINE

(Mr. LEWIS of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of Florida. Mr. Speaker, amidst a rather large stack of daily mail, mostly from constituents concerned about the threat of war, unemployment, and other pressing problems, my quiet and unassuming secretary was mortified to find an issue of Hustler magazine—complete with its lewd and utterly tasteless cover photograph.

Enclosed with the magazine was a letter from the publisher, Mr. Larry Flynt, informing me that I would receive a copy of his degrading and sleazy magazine every month, free of charge.

Disgusted and angry, I had my secretary call Mr. Flynt's office in Los Angeles to inform him that I am outraged by his audacity and his egocentric attempt to use the U.S. Congress to attract national attention to his seedy publication.

Not only was Mr. Flynt's assistant unmoved by my anger, but she informed my secretary that the magazine would be sent to me, to every Member of the House and Senate, to every Supreme Court Justice, and to the President of the United States—whether we want it or not.

Hustler magazine is pure, baseless trash. It debases our religious and spiritual values, degrades men and women, and belittles our fundamental institutions.

Mr. Flynt had the unmitigated gall to tell us that hard-core pornography and toilet graffiti and humor will keep us informed on all social issues and trends, and that Hustler is our constituents' favorite magazine.

The Bible says, "Where your treasure is, there is your heart."

God help him. Larry Flynt's treasure must be in the sewer.

BUDGET DEFICITS CONSUME GREATER SHARE OF GNP

(Mr. DAUB asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAUB. Mr. Speaker, it takes a special kind of thinking that justifies looking the American people in the eye and tell them a lie but that is precisely what some Members of this body are doing when they suggest that the current deficits can be laid at the

feet of President Reagan and the economic policies of the last 3 years.

The charge is made that defense spending and huge tax cuts are responsible for the deficit. At the same time we are told that social spending has been reduced and that the administration is not exercising its responsibilities to the poor and disadvantaged.

Let us make clear a couple of things.

The 1981 Tax Act reduced taxes over a period of 8 years by $1.138 trillion, but since that time, we have increased social security taxes by $270 billion, passed a tax bill in 1982 that took back $281 billion of the 1981 act, increased the gasoline tax to bring in $21 billion, while the spender's friend, bracket creep, will bring in another $439 billion. That means that the total tax cut over the next 8 years will total $77 billion.

As for defense, let us keep in mind that President Reagan will get in 1984 somewhere within about $3 billion of what Jimmy Carter proposed as necessary in his final budget.

When you tell the American people they are getting away with something by not paying enough in taxes, you are ignoring the fact that taxes will in the period 1983-86 consume a greater share of GNP than at anytime since 1944.

FLOODGATES ARE WIDE OPEN FOR MORE DEFICIT SPENDING

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, the passage of H.R. 3520, the Rehabilitation Act Amendments, makes it clear that the floodgates are wide open for more deficit spending.

President Reagan supported reauthorization of the Rehabilitation Act of 1973 but strongly opposed H.R. 3520 because of the extremely excessive budget authorizations included in title IV of the program for 10 new programs of the Department of Education and other agencies that are wholly unrelated to the Rehabilitation Act. The authorization for these 10 programs is $1.6 billion.

Superseding the 1984 authorization levels set by Public Law 97-35, the new, big deficit approach establishes 1984 levels way beyond the Nation's best interests. For example, its $2.3 billion for low-income energy assistance. That is $375 million more than the President wanted. Its $237.9 million for the National Foundation on Arts and Humanities is up almost $41 million more than the President wanted. Its $10.8 million for museum services, over $1 million more than the President asked for.

The new authorizations total $3.4 billion, or 44 percent more than the President's 1983 budget request and $1.5 billion, or 16 percent more than the comparable 1983 amounts.

H.R. 3520, includes unrelated nongermane authorizations and it shows callous disregard for the real needs of disabled persons.

IRRESPONSIBLE REFUSAL OF DEMOCRATIC LEADERSHIP TO CONTROL FEDERAL SPENDING

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, unfortunately the House Democratic leadership has given the American people a number of examples of how its talk about deficits is hollow rhetoric to hide its irresponsible refusal to control Federal spending.

The most graphic example is the failure of the seven Democratic-controlled committees to comply with the deficit reduction reconciliation instructions of the budget resolution. Mr. Speaker, this is gross tomfoolery. Those responsible are making a mockery of the congressional budget process.

Another example occurred last June, when the Democrats' Rules Committee emasculated an amendment drafted by my Democratic colleague, Mr. McCURDY, which would have required spending reductions equal to the amount of the tax increase contained in the Speaker's bill to cap the tax cut. The Rules Committee tore out from the amendment the baseline figure of $849.5 billion. With this starting point removed, the spending cuts became meaningless numbers dreamed up by the Democratic leadership. The amendment was gutted—yet the Democrats had the audacity to push it through and tell the American people it demonstrated their commitment to spending reduction.

In truth, it did just the opposite, demonstrating their cynical manipulation of the deficit issue to cover their intentions to keep spending growing ever higher.

If anyone wonders whether we were in fact going to have spending going ever higher, they need wonder no further. They just need to look at this floor and look at the number of bills that we have coming before us that violate the budget figures.

□ 1040

CONGRESS MUST ACT ON BANKRUPTCY REFORM

(Mr. McKERNAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McKERNAN. Mr. Speaker, last week, in my home State of Maine, U.S. District Judge Gene Carter declared unconstitutional the interim rule under which bankruptcy courts are now operating. Judge Carter's ruling highlights the need for congressional action to correct the problems in the Bankruptcy Reform Act of 1978, which the Supreme Court declared unconstitutional back in June 1982.

The current interim rule, which was issued by the U.S. Judicial Conference when Congress failed to act on the Supreme Court ruling, has caused total disarray within the bankruptcy court system.

Congressman Peter Rodino has introduced the Bankruptcy Court Act of 1983 (H.R. 3), which would give bankruptcy judges the independence the Supreme Court found lacking. Unfortunately, this legislation is currently stalled in the Rules Committee due to opposition by some committee members. Back in July I again urged my colleagues on the Rules Committee to break their stalemate on this legislation so that Congress can deal with the bankruptcy court crisis.

RUNAWAY FEDERAL SPENDING

(Mr. MACK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MACK. Mr. Speaker, I rise to state a fact: runaway Federal spending, not tax reduction, is the cause of the deficit. And runaway Federal spending is synonymous with the House Democratic leadership.

Even with the modest cutbacks enacted mainly in 1981, Federal outlays have reached an alltime peacetime high, climbing from 21.4 percent of GNP in 1978 to 24 percent in 1982 and to an estimated 25 percent in 1983.

On the revenue side, the 1981 tax reduction legislation has served mainly to prevent a tax increase. Bracket creep, payroll tax increases, and indirect taxes have eaten away at much of the income tax reduction intended to benefit working Americans.

Clearly, those who complain about the so-called excessive tax cut really mean that they want unlimited tax increases to supply the Federal spending spigot. Next year, a public informed with the facts will look at the House Democrats in fixing blame for the budget deficit.

THE DEMOCRATS' LEGISLATIVE RECORD

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, in the coming months, we are going to be subjected to a smokescreen of rhetoric from our Democratic colleagues as they scramble to dodge responsibility for the fiscal actions of their majority.

It is not enough that these Members are ignoring the Congressional Budget Act of 1974 which mandates by this week a reconciliation of the first budget resolution.

It is enough when they revert to a policy of open-ended spending outside of the budget process such as we witnessed in the passage last week of the trade adjustment assistance legislation.

This bill expands on questionable grounds even the already padded first budget resolution by increasing its programs' cost $124.5 million.

Because the bill is also insulated from the normal appropriations process, the Congress in future years will be unable to exercise control over the amount of funding committed to these programs.

Coupled with the passage in the same week of the ill-named Rehabilitation Act Amendments of 1983, it is clear that the Democrats have opened wide the floodgates for more deficit spending.

Long after the smokescreen clears, and the rhetoric has quieted, the Democrats' legislative record of fiscal irresponsibility unfortunately will still be with us.

BRING THE MARINES HOME FROM LEBANON NOW

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROEMER. Mr. Speaker, I stand for 1 minute today to talk about the situation in Lebanon with our marines. I feel deeply on the subject. I do not apologize for that. But I warn my colleagues that I do feel deeply about this.

The deal has been cut. The marines will stay for 18 months and that is a mistake.

Somebody said early today the marines were fighting in Lebanon. Our marines are not fighting; they are being fought. There is a difference. They are like fish in a barrel and now we are going to legitimize a mistake made over a year ago by putting our OK on a proposal to keep the fish in a barrel for 18 months. It is wrong and it is a mistake.

We ought to invoke the War Powers Act and get the clock running. We ought to bring the marines home for them and for us.

I might stand alone on that. I have not taken a vote count. But I just want the Members, my colleagues and friends, to understand that if I stand alone, so be it. But I stand by saying bring the marines home today.

HOSTILITIES IN LEBANON

(Mr. DOWNEY of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY of New York. I rise as well to discuss the situation in Lebanon. It is difficult to really know what the right path is.

It is quite clear that there is a civil war in Lebanon and it is also clear that the Syrians, the Soviets, and their proxies, the Druze, are making life impossible for the Gemayal government. They are a dangerous and provocative force that needs to be dealt with.

While it is difficult to know what is right for Lebanon, the course for this Congress on the War Powers Act should not be. We have a War Powers Act that came as a result of 8 years of bitter fighting in Vietnam.

The War Powers Act lays out a carefully defined procedure for the involvement of American forces. That procedure is that when there are hostilities the President is required to report why the troops need to be there or why they should be introduced.

That starts a 60-to-90-day clock period running in which the Congress debates whether or not we want to keep these forces there.

I have a resolution that lays out the requirements of the War Powers Act and asks the President to comply with it. I think that preserves our options of whether or not we want to leave the marines or take them out. But, most importantly, it fulfills the obligations of the laws, it remembers the lessons of Vietnam, and it requires joint action by the Congress and the President in the truest and most constitutional sense.

MEETINGS OF THE WORLD BANK AND INTERNATIONAL MONETARY FUND

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. CONTE. Mr. Speaker, next week, the World Bank and the International Monetary Fund host their annual meetings here in Washington.

It is obvious to all observers of these institutions that this will not be a happy occasion for the 144 member countries. While there are many reasons for this, I want to mention only two. First, the United States has yet to deliver on a proposed capital increase to the International Monetary Fund that it promised. The IMF member countries should be informed that this legislation is working its way through the political process and its delay is not longer due to the actions of the administration.

Mr. Speaker, the second reason is much harder to explain. For many months the World Bank has been negotiating with other donor countries for a seventh replenishment to the International Development Association. The world, except for the United States, is in favor of a replenishment that is somewhere between the present amount and an increase over the sixth replenishment of up to 25 percent. The United States has proposed a 30-percent cut in funds in a program where more than 85 percent of the money goes to countries that have a gross national product of less than $1 per day and where around 40 percent of all funds go to sub-Saharan Africa.

Despite his own personal suffering, His Eminence, Terence Cardinal Cooke, made his feelings on this issue known to the President of the United States. The administration should immediately respond to the cardinal's pleading. It should announce at the annual meetings its desire to see an IDA that is no smaller than its present funding. Because the U.S. share of this replenishment will be lower than in previous years, this revised proposal will still represent a considerable cut from President Carter's request.

Mr. Speaker, I urge the President to act now. It would be a fitting tribute to Cardinal Cooke's life of interest in and service to the poor and less fortunate among us.

NEW YORK, N.Y.,
September 15, 1983.

Hon. RONALD W. REAGAN,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am very grateful to you and your dear wife Nancy for your thoughtful telephone call following the announcement of my illness. Your prayers, your good wishes and your loving concern are a source of great comfort to me.

I want you to know that I am offering my prayers and my sufferings for the gift of God's peace among all the members of His human family. In doing so, I am united with millions of our fellow citizens in beseeching the Lord to assist you and your collaborators as you seek every possible road to true justice and lasting peace at home and in every part of the world.

As a Nation known for its compassion, the United States has accomplished so much through the years in advancing the cause of international justice and peace through its programs of economic assistance to the less fortunate peoples of the world. The full supplemental appropriation which you approved this past summer for the International Development Association has proved of immense help for those countries which, like so many in sub-Saharan Africa, have a gross national produce of less that $1 per day. I respectfully suggest that consideration be given this year to maintaining and even increasing our Nation's support of IDA's effective work.

Finally, I offer a personal word of heartfelt gratitude to your dear wife Nancy for her sincere interest in the welfare of our young people, especially those whose lives are so gravely threatened by the scourge of substance abuse which faces our Nation. Her efforts on their behalf, in bringing attention to the problem and in advocacy for drug prevention, education and rehabilita-

tion have been very effective, and I encourage you both to continue this effort, so necessary for the future of society.

With repeated assurances of prayers, and gratitude and lasting love and affection for you and Nancy, I remain.

Very sincerely yours,

TERENCE CARDINAL COOKE,
Archbishop of New York.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF S. 602, RADIO BROADCASTING TO CUBA ACT

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 98-368) on the resolution (H. Res. 312) providing for the consideration of the Senate bill (S. 602) to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2144, CHALLENGE GRANT AMENDMENTS OF 1983

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 98-369) on the resolution (H. Res. 313) providing for the consideration of the bill (H.R. 2144) to amend part C of title III of the Higher Education Act of 1965 to establish an endowment program for developing institutions, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2782, DEFENSE INDUSTRIAL BASE REVITALIZATION ACT

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 98-370) on the resolution (H. Res. 314) providing for the consideration of the bill (H.R. 2782) to amend the Defense Production Act of 1950 to revitalize the defense industrial base of the United States, which was referred to the House Calendar and ordered to be printed.

□ 1040

APPOINTMENT OF ADDITIONAL CONFEREES ON S. 1340, REHABILITATION ACT AMENDMENTS OF 1983

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that the Speaker be authorized to appoint 12 additional conferees on the Senate bill (S. 1340) to revise and extend the Rehabilitation Act of 1973 and to extend the Developmental Disability Assistance and Bill of Rights Act, and for other purposes, and that the conferees named from the Committee on Energy and Commerce on title II of the Senate bill be the exclusive House conferees thereon.

The SPEAKER pro tempore (Mr. BATES). Is there objection to the request of the gentleman from Kentucky?

Mr. JEFFORDS. Mr. Speaker, reserving the right to object, I would like to ask the distinguished chairman whether this has been cleared with the ranking minority members of the committees involved, including State and Foreign Commerce.

Mr. PERKINS. Mr. Speaker, if the gentleman will yield, I cleared all the conferees that the House appointed with the gentleman from Illinois (Mr. ERLENBORN). I understand the gentleman from Michigan (Mr. DINGELL) has likewise cleared the conferees on that side of the aisle.

Mr. JEFFORDS. Does the gentleman know as to whether or not this has been brought to the attention of the gentleman from North Carolina (Mr. BROYHILL) and whether or not he has agreed to it?

Mr. PERKINS. If the gentleman will yield further, I have no idea about that. I am informed by my chief clerk that the gentleman from Michigan (Mr. DINGELL) has discussed it with the gentleman from North Carolina (Mr. BROYHILL).

Mr. JEFFORDS. Further reserving the right to object, Mr. Speaker, to the best of the gentleman's knowledge the gentleman from North Carolina (Mr. BROYHILL) has no objection?

Mr. PERKINS. If the gentleman will yield further, my clerk tells me that is what he understands.

Mr. JEFFORDS. With that assurance, Mr. Speaker, I withdraw my objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

The Chair hears none and, without objection, appoints the following additional conferees: Education and Labor Committee members to be conferees on title I of the Senate bill and modifications committed to conference: Mr. KILDEE and Mr. NIELSON of Utah; Energy and Commerce Committee members to serve jointly with Education and Labor Committee members on section 402(c)(8) of title IV of the House amendment and modifications committed to conference: Messrs. DINGELL, SCHEUER, OTTINGER, SHARP, MARKEY, LUKEN, BROYHILL, CORCORAN, and MOORHEAD; and as exclusive conferees on title II of the Senate bill and modifications committed to conference: Messrs. DINGELL, WAXMAN, and BROYHILL.

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 3415, DISTRICT OF COLUMBIA APPROPRIATION, 1984

Mr. DIXON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3415) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1984, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California? The Chair hears none and, without objection, appoints the following conferees: Messrs. DIXON, NATCHER, STOKES, WILSON, LEHMAN of Florida, SABO, WHITTEN, COUGHLIN, GREEN, ROGERS, and CONTE.

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 3415, DISTRICT OF COLUMBIA APPROPRIATION, 1984

Mr. DIXON. Mr. Speaker, I ask unanimous consent that the managers may have until midnight Wednesday, September 21, 1983, to file a conference report on the bill (H.R. 3415) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1984, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 3263, MILITARY CONSTRUCTION APPROPRIATION, 1984

Mr. DIXON. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 3263), an act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1984, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

COMMUNITY RENEWAL EMPLOYMENT ACT

The SPEAKER pro tempore. Pursuant to House Resolution 302 and rule XXIII, the Chair declares the House in the Committee of the Whole House

on the State of the Union for the further consideration of the bill, H.R. 1036.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 1036), to provide employment opportunities to long-term unemployed individuals in high unemployment areas in projects to repair and renovate vitally needed community facilities, and for other purposes, with Mr. AuCoin in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole House rose on Tuesday, September 20, all time for general debate on the bill had expired. Pending was an amendment offered by the gentleman from California (Mr. Hawkins).

The Chair recognizes the gentleman from California (Mr. Hawkins) for 5 minutes in support of the amendment.

Mr. HAWKINS. Mr. Chairman, my amendment which was pending at the time that the committee rose on yesterday would delete the $5 billion authorization in the bill for fiscal year 1983 and authorize $3.5 billion for fiscal year 1984.

Although the first budget resolution includes $4.5 billion for fiscal year 1983, I am deleting that authorization for fiscal year 1983 since the fiscal year is ending within a matter of days.

However, my amendment does conform the authorization for fiscal year 1984 to the ceiling in the first budget resolution.

I urge my colleagues to support this amendment.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I will be glad to yield to the minority.

Mr. JEFFORDS. I thank the gentleman.

Mr. Chairman, I am pleased to say that to my knowledge there is no objection on this side of the aisle to your amendment which conforms the fiscal year 1984 authorization to the budget resolution and also strikes the 1983 authorization.

Mr. HAWKINS. I thank the gentleman.

Mr. WALKER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in favor of the amendment because at least it does move us back to the budget levels and I think that that makes a great deal of sense in the bill that we are discussing.

However, it seems to me that we might want to raise the question in the course of adopting this amendment whether we ought to be spending $3.5 billion on the program.

Yesterday in the course of the debate, in general debate we had some talk about some of the programs that were antecedents to this particular program, the kinds of programs that this type of effort is based upon. And in the course of that discussion yesterday I had made mention of the fact that I would try to find the backup to some of the statistics that I mentioned in the course of the debate yesterday. So I did want to take this time in order to provide some of that statistical evidence, that the past programs have not worked, that indeed 98 percent of the money in past programs has gone to non-unemployed people; in other words, people who already had jobs got the money.

That seems to me to be a travesty of the kind of judgment that we are supposedly rendering in this particular legislation.

We were also told yesterday that the best example of the kind of thing that we are doing here is the CETA program of the past, that it was one of the most cost-effective programs that we created in terms of establishing jobs.

We were told that is an example, that is CETA is an example of why this bill that we have before us is desirable.

Well, let me say that the documentation for the figures that I used yesterday was done by the Office of Management and Budget. And right away someone will say, "Aha, it is the Office of Management and Budget, they are at it again, they are coming up with phony figures to justify their points of view on some of these bills."

Hardly. The Office of Management and Budget to which I refer was the Office of Management and Budget under President Carter, Mr. McIntyre's Office of Management and Budget, who established the figures indicating that in the total program only 2 percent of the total program cost went to the unemployed. That means 98 percent of the program costs went to someone other than the unemployed.

That is the basis for the charges I made yesterday. The charges stand. They are on record. They are on record from the Office of Management and Budget, President Carter's Office of Management and Budget.

Now, as for CETA being a cost effective program. In the spring of this year, 1983, the distinguished journal called Policy Review gave us a look at the CETA program, this so-called cost effective program. It told us some of the things that have gone on in that program in the past and why recreating it may not be in the best interests of the American taxpayer.

□ 1050

For example, Policy Review, in an article done by James Bovard, indicates that CETA spent, in the past now, $30,000 to build an artificial rock for rock climbers to practice on; $640,000 to provide education about gay life styles. CETA gave $500 a month to a Communist agitator in Atlanta, who gave as a reason for his desiring the money, that, "We need to organize for demonstration and confrontation."

CETA also was a place where political patronage abounded. In Philadelphia, 33 Democratic committeemen and their relatives were put on the payroll, most of them in Mayor Rizzo's principal wards. In other words, in wards that supported Mayor Rizzo, you had twice as good a chance of getting put on CETA as in non-Rizzo wards.

In Chicago, the Daley machinery required CETA job applicants to have referral letters from their ward committeemen and they left the applications without such referrals piled under tables in unopened mail sacks.

In other cases, the municipalities involved simply laid off and rehired their old employees, not creating any work for the unemployed.

San Diego and Miami had 47 percent of their work force on CETA payrolls. Sixteen percent of the average municipalities' work force were on CETA rolls in 1978.

In Arizona, CETA paid college students to train for a track meet. In Bath County, Va., CETA paid county employees to attend dance classes. In Chicago, a CETA worker was reported as being paid for playing checkers with other employees.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. Walker) has expired.

(By unanimous consent, Mr. Walker was allowed to proceed for 3 additional minutes.)

Mr. WALKER. In Brooklyn, CETA workers were put in a printing apprentice program in which they opened a $5 and $10 bill business, but, of course, the quality of their work was so poor that instead of ending up printing bills, they ended up printing license plates.

In Montgomery County, Md., the richest county in the country, CETA paid nine women $145 a week to attend ballet school.

In Poughkeepsie, N.Y., CETA workers busied themselves at attaching fake doors to old buildings to beautify the city.

And in Seattle, CETA paid 14 homosexuals and lesbians to produce a play entitled "Lavender Horizons."

Now, it seems to me that if this is an example of the cost-effective approach of creating jobs in this country, the American taxpayers would have reason to think that perhaps there were some problems with this kind of program. And that is specifically why some of us raised some questions about the level of spending and the add-on deficit that will be included in

the program that we have before us today.

Mr. FAUNTROY. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am pleased to yield to the gentleman from the District of Columbia.

Mr. FAUNTROY. I thank the gentleman for yielding.

The arguments of the gentleman from Pennsylvania would be persuasive were we considering the reauthorization of the CETA legislation. But, as the gentleman knows, and as I am sure his constituents know, and as the American people know, we are not voting here on the reauthorization of CETA. We are considering here, the Hawkins Community Renewal and Employment Act, which, in many instances, corrects the problems to which the gentleman has made reference in the now defunct CETA program. Indeed, H.R. 1036 assures that 100 percent of the people to be put to work under this program, are, in fact, unemployed.

I would hope that the gentleman would visit Johnstown, in his own State of Pennsylvania where we have the highest unemployment in the Nation and explain to the people there why one of their Representatives would not wish to have a modest $3.5 billion appropriation to put people to work who have been out of work at least 15 weeks, and many of whom have been out of work for more than a year.

Mr. WALKER. The gentleman makes a good point. And I am sure the gentleman is going to support my 100-percent employment for the unemployed amendment that has a 6-week criteria rather than a 15-week criteria. I know the gentleman will want to support that. I know the gentleman is concerned about the past performances of the CETA program because in Washington, D.C., we find out that half the City Council staff was on CETA funds under the old program according to the Policy Review article.

I think that it is important to recognize the reason why I am making this argument today is because in the course of my debate here yesterday, it was mentioned to me that the CETA program was a cost-effective program and this demonstrates why we need the kind of program that we now have before us.

I am simply pointing out that the cost-effective nature of CETA leaves a lot to be desired when you take a look at the performance of that program.

I agree with the gentleman. Some corrections have been made in the bill that is before us. I think that that is an admirable step in the right direction. I think we need to go further and I would ask that the gentleman support my amendment that seeks to get us further down the road, that seeks to assure that all of the jobs go to the unemployed and that we do not have the kind of rip-offs that were demonstrated by the CETA program in the past.

Mr. FAUNTROY. As the gentleman knows, I will not be able to support or oppose his measure when it comes up for a vote today. For as the gentleman knows and as the people of his State know, and as the people of the country know, while I represent more people who pay taxes in this country than any single Member of this House, I am denied the opportunity to vote on the floor in the interest of my taxpaying constituents. And I would hope that the gentleman would work in the State of Pennsylvania, and that others will work their State legislatures to give me that opportunity.

The CHAIRMAN pro tempore (Mr. RICHARDSON). The question is on the amendment offered by the gentleman from California (Mr. HAWKINS).

The question was taken; and the Chairman pro tempore announced that the ayes appeared to have it.

Mr. HAWKINS. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN pro tempore. Evidently a quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. DURBIN

Mr. DURBIN. Mr. Chairman, I offer an amendment to title I.

The Clerk read as follows:

Amendment offered by Mr. DURBIN: Page 7, strike out line 15 and all that follows through line 9 on page 8 and insert in lieu thereof the following:

LIMITATION ON USE OF FUNDS

SEC. 104. (a) Not less than 75 percent of the funds made available to any recipient under titles II and III of this Act from funds appropriated for any fiscal year shall be used to provide for wages and related employment benefits to eligible participants for work which the recipient certifies has been performed in one or more of the activities authorized under this Act.

(b) Not more than 15 percent of the funds provided to any recipient under title II or III of this Act from funds appropriated for any fiscal year may be used for the cost of administration.

(c) The remainder of the funds provided to any recipient under title II or III of this Act from funds appropriated for any fiscal year (after compliance with subsection (a) and deduction of cost of administration permitted by subsection (b)) may be used for the acquisition of supplies, tools, equipment, and other materials.

(d)(1) Nothing in this Act shall be construed to preclude or limit the payment of the costs of administration or the costs of supplies, tools, equipment, or other materials either in whole or in part, from non-Federal sources or from Federal sources other than this Act, such as section 106 of the Housing and Community Development Act of 1974 (42 U.S.C. 5306) (popularly known as the community development block grant program) and chapter 67 of title 31, United States Code (popularly known as the general revenue sharing program).

Page 8, line 18, redesignate subsection (c) as subsection (e).

Mr. DURBIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

□ 1130

Mr. DURBIN. Mr. Chairman, at the outset, I would like to make it clear that the amendments which I offer today are friendly amendments. I live in an area which has been hit particularly hard by the recession. Our unemployment rates in Illinois in the 20th District are far in excess of the national average and I support H.R. 1036 and the excellent job which Chairman HAWKINS and Chairman PERKINS have done in putting together this legislation.

I voted in favor of the first jobs bill and it has been very good to my district.

What I would like to see us address in this jobs bill is an attempt to put together the tightest piece of legislation that we can bring back to our home

districts and relieve the problems of unemployment.

I do not believe that it comes as any surprise after listening to the debate on the floor that we hear constant references to the CETA programs and any analogies or parallels between the two.

One of the frequent criticisms of the CETA program was the fact that the administrative costs which were involved in the program were excessive. I believe that the facts which have been well documented have borne out that particular observation.

In a city in Illinois of East St. Louis, the administrative costs per job under the CETA program were found to be $17,872 for every single CETA job, far in excess of any level which we would find acceptable in the kind of administration we would seek for this particular piece of legislation.

Under the existing terms of H.R. 1036, there is an apportionment of the money which we have appropriated and a specific formula for its allocation and expenditure. Under the terms of the existing legislation, not less than 75 percent of the funds which we have appropriated must be paid directly to participants in the program. I think that is certainly a positive development; but the aspect of the bill which I have problems with and the reason I offer my amendment is the fact that the bill as presently written provides that the remaining 25 percent of the funds which we appropriate shall be spent in a category which shall include not only administrative costs, but supplies and equipment.

I think that this opens up the possibililty that administrative costs for this jobs bill could go far beyond what we consider reasonable.

The purpose of this amendment is to divide that 25 percent into specific categories and to say that, first, not less than 75 percent of the funds shall be given to participants; second, not more than 15 percent shall be paid for administrative costs, and finally, not more that 10 percent shall be paid for supplies and equipment. I think that will guarantee that the administration under this act will be lean and effective. It will also mean that in the days of the future when we are held accountable for the administration of this, we can say that we made certain from the outset that the funds were to be expended to put people to work and not to make sure that administrators were given a particularly large portion of the pie or large salaries.

At this point I am open to any questions.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. DURBIN. I am happy to yield.

Mr. HAWKINS. The managers on this side are willing to accept the amendment. We think it is good. We agree with the intent of it.

We may before proceeding ask for some clarification.

Mr. DURBIN. Yes.

Mr. HAWKINS. Do I understand that this amendment does not include a second amendment that the gentleman has discussed with us that provides for a cap on the administrators?

Mr. DURBIN. Yes, Mr. Chairman. I did divide the two amendments. I realized the second might be somewhat controversial.

Mr. HAWKINS. This amendment does not include the second one?

Mr. DURBIN. This does not include the second one.

Mr. HAWKINS. Then I will continue with my statement that we do accept it. We think it is in the right direction. We think that it tightens up the program much better than what is in the proposal itself. It was the intent to make the program labor intensive and avoid abuse. We think it is very fair and reasonable and we are willing to accept it.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. DURBIN. I will yield.

Mr. JEFFORDS. Mr. Chairman, I would also add that from our perspective on this side of the aisle, that anything that tightens the bill up and reduces the amount of possible potential waste or abuse is certainly acceptable.

The CHAIRMAN. Are there other Members who wish to be recognized to speak on the amendment?

The question is on the amendment offered by the gentleman from Illinois (Mr. DURBIN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DURBIN

Mr. DURBIN. Mr. Chairman, I offer a second amendment.

The Clerk read as follows:

Amendment offered by Mr. DURBIN: Page 8, after line 17, insert the following new paragraph:

(3) Rates of pay for administrators funded in whole or in part by this Act shall be at a wage no greater than the compensation in effect for grade GS-10.

Mr. DURBIN. Mr. Chairman, I concede that the second amendment is more controversial than the first. I appreciate the opportunity to raise this morning before Congress what I think is an important element as we consider this particular piece of legislation. Yesterday during the general debate on this bill it was repeated often that in addition to millions of blue-collar workers who are presently unemployed in this country, there are millions of white-collar unemployed workers. I live in a State capital in Springfield, Ill. Many administrators and white-collar workers who had jobs for years have found themselves unemployed for the first time.

I happen to believe that one of the things we should set out to do specifically with this piece of legislation is to take unemployed people and put them back to work. To do that, I think we have to open the opportunity and create the environment that the administrative responsibilities under this act will be borne by white-collar employees presently unemployed.

Now, this is not a matter without controversy and I do accept that as a reality. What I am suggesting today in putting a cap or a ceiling on administrative salaries under this jobs bill of $29,000 is not without precedent before this Congress. Earlier this year the gentleman from Ohio (Mr. SEIBERLING) offered, and I supported, the American Conservation Corps of 1983 legislation. Within that legislation we established that the rates of pay for supervisors, that is, crew leaders under that particular concept, would be limited to grades GS-3 to GS-7, about $10,000 to $20,000.

What I have attempted to do with this legislation and the amendment I am offering is to provide more flexibility, to provide that any administrator paid in whole or in part under this bill would have a limitation on his or her salary of $29,000. I think that is needed. I think it is needed for several reasons.

One of the real problems that many mayors and local officials tell me about under CETA was the lack of adequate onsite supervision. The mayor of my hometown with whom I spoke yesterday, of a different political faith, but supportive of the legislation, suggested to me that if we pass it, he would put more people on the job site administering the employees.

I asked him, "What kind of salary range would you be paying these supervisors?"

He said, "About $18,000 to $20,000, and they would be new employees."

With my amendment, I have expanded that range of salary to $29,000 to provide for some localities that may have higher cost standards when it comes to administrative costs.

I think it is important. I think it is important because I think the figure of $29,000 not only gives leeway to the communities to hire unemployed people as administrators, but it also sets a realistic salary level. Keep in mind that the employees under this particular program, we provide under this act will be paid no more than $230 a week, or about $11,500 a year.

What I am suggesting is that it is fair to pay their administrators and supervisors a maximum of 2½ to 3 times that amount.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. DURBIN. I am happy to yield to the gentleman from Kentucky.

Mr. PERKINS. Mr. Chairman, let us assume that in the case of the city of Baltimore, Md., which has been involved in employment and training programs for many years, their top ad-

ministrator over there may be paid $35,000. I have no idea what the salaries would be in that city.

Will the gentleman's amendment interfere and bring down that salary to the limit the gentleman suggested?

Mr. DURBIN. Could I ask the gentleman for further clarification? Is the gentleman suggesting an existing employee would take over this responsibility?

Mr. PERKINS. Yes; I am.

Mr. DURBIN. Yes; it would. I would like to respond to the gentleman that that is the specific intent of my amendment. I do not believe that we should be appropriating $3½ billion and setting up an elaborate procedure to provide income supplements to administrators who presently have jobs. There are too many people who have no jobs and to suggest that a deputy mayor or an existing State, county, or municipal employee should be given some supplement, some subsidy, goes far beyond the intent of this legislation and I do not believe it is what we should be about this morning.

If I might conclude, I think the gentleman from Kentucky has made his point.

Mr. PERKINS. Mr. Chairman, if the gentleman will yield further, there are some excellent administrators in many employment and training programs. The only thing that worries me is that, with this amendment, we are not going to get the kind of administrator with the necessary qualifications, at that salary figure that the gentleman has suggested.

I think we may do more harm to the program than we would do good. I recognize the good intention of the gentleman. In many areas it would be helpful, but in some instances it would be detrimental.

□ 1140

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. DURBIN was allowed to proceed for 2 additional minutes.)

Mr. DURBIN. If I might respond to the gentleman from Kentucky, there is no question but that some of the administrators who might work under this program would be receiving $29,000, less than what they are really worth if they were in today's job market and paid regular salary. But equally so we can argue that the particpants in the program whose salary is held at $11,000 a year, they are being forced to live under an artificial ceiling as well. This is not going to provide the kind of employment which a healthy economy might provide. It is an emergency measure to provide people enough to survive. And I think $29,000 for an administrator——

Mr. PERKINS. I would be the first to concede that some money was wasted in public service employment programs in the past. But in certain areas, we would hurt the program if we make it impossible to get the best people to run the programs. I do not think any of us would want that to happen. I think there should be an exception to avoid that result.

Mr. DURBIN. I thank the gentleman.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. DURBIN. I yield to the gentleman from Maryland.

Mr. MITCHELL. I thank the gentleman for yielding.

Mr. Chairman, I, too, agree with what the gentleman is trying to do. But it seems to me there are some enormous problems involved here.

In any number of cities, mayors have established one person to coordinate a whole series of jobs programs, to make sure there is no diffusion of authority and to make sure that there is good coordination.

The gentleman from Kentucky mentioned my city of Baltimore, where we have a mayor's Office of Manpower Resources, and I assume the person holding that position there would administer this program locally. But under your amendment, that person would be forced to take a salary reduction even though she, in this case, is coordinating a whole number of private jobs efforts and other jobs efforts. I think that is going to hurt those cities where there has been an attempt to coordinate.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. DURBIN was allowed to proceed for 2 additional minutes.)

Mr. DURBIN. What we are providing in this amendment is if that employee, an existing employee, is paid in whole or in part by Federal funds that we have appropriated then the salary limitation would apply. But if the mayor of Baltimore should designate a deputy mayor to administer the program and not pay that person with any Federal funds, there is no limitation on this private salary. They could administer without any cap on the salary.

Mr. MITCHELL. That is precisely the problem I would have in my city of Baltimore. The present administrator for the Office of the Mayor's Manpower Resources is paid in part at least with Federal funds. And this would force——

Mr. DURBIN. If the gentleman would yield, clearly because this act has not been signed into law that person is not being paid by Federal funds from this act.

Mr. MITCHELL. But from other sources.

Mr. DURBIN. My amendment would not apply to that person. Only if they are to be paid from funds appropriated under this legislation.

Could I make two other points? I thought the gentleman from Maryland was very eloquent yesterday in the suggestion that too many people are looking for a job, they want to get out and work. The fact that we are suggesting today our real intention is to supplement existing salaries of people presently working really raises I think the crux of the amendment. Keep in mind for Baltimore and cities across the country as well we are talking about a windfall, for cities and school districts, a windfall of Federal funds to help them do their business and to ask them to bear some of the costs within their own city administration I think is fair.

Mr. MITCHELL. First of all, I thank you for your kind words about yesterday. But I really cannot agree with your amendment. I hope your amendment will be voted down because it just seems to me to be basically unfair to take the person who is at $32,000 a year, and that person is given the responsibility for coordinating this program, in addition to others, maybe a private initiative such as we have in our city, and then you tell that person "no," we are going to have to cut you back down to $29,000. It is just unfair.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. DURBIN was allowed to proceed for 1 additional minute.)

Mr. DURBIN. In closing, in response, I think we do get down to a basic philosophical difference. The person making $32,000 today in Baltimore has a job. The millions of people, white-collar administrators, blue-collar workers, presently sitting home unemployed will forego and lose that opportunity to go to work under our bill because we are more intent on supplementing the salaries of existing employees. And that is where I have some difficulty.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. DURBIN. I yield to the gentleman form Maryland.

Mr. MITCHELL. One last point. If you do it your way, you are going to create another unemployed person really. If you are going to say this person is already in the job and refuses to take a substantial salary cut, that person is out and you bring in one of your unemployed white collar workers. You have just substituted one unemployed person for another.

Mr. DURBIN. I do not think so. The person presently working has responsibilities and a pay check. I do not see how that would change under this bill.

I thank the gentleman for his colloquy.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I can sympathize with what the gentleman thinks he is doing here. But I want to put the House on notice that members of the Education and Labor Committee in particular and all Members who have been around here a few years should remember that this is clearly an unconstitutional amendment that the gentleman is offering here.

A few years ago, in the utmost good faith, the Congress passed the renewal of the Fair Labor Standards Act, which other people know as the minimum wage law, and we attempted at that time to extend its provisions to State and local employees. The National League of Cities went to court and the U.S. Supreme Court held in a clear and unequivocal opinion that we have respected ever since that the Federal Government does not have the right to interfere between a sovereign State or a subdivision of a State and its employees in its sustaining a floor or a ceiling on wages. They have in effect said it is none of your business at the Federal level what the relationship between a State or a subdivision of a State and its employees may be.

The gentleman's amendment is in that part of the bill which places limitations on the use of funds by local officials to administer this program. The gentleman has already offered an amendment which the committee has accepted to reduce the overall expenditure for administrative costs from 25 percent to 15 percent. That kind of a limitation on spending is perfectly proper and we do that frequently.

When the gentleman gets to the point of his amendment which says, "No administrator paid in whole or in part by these funds shall receive more than," at that point he has crossed the line and the amendment is clearly unconstitutional.

It would be at the best a vain and useless act for us to burden this legislation with a clearly unconstitutional provision. It would be at worst a further irritation to local government of what they would clearly perceive as a back-door way of Congress trying to get into their business of dealing with their employees. And while I cannot quarrel with the gentleman's desire to restrict excessive salaries being paid out of these funds, that is a matter of local determination. They have a limitation on how much they have available to them out of these funds for administrative purposes. If they are so unwise as to transfer a lot of that money into extraordinary salaries for individual city or county or local employees of other kinds, then they are going to have to pay the piper for it because they will have an audit problem.

□ 1150

Mr. DURBIN. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman.

Mr. DURBIN. In all due respect, this point was raised yesterday in a discussion I had on my amendment. The Usery decision the gentleman made reference to did in fact, as I understand it, limit the power of the Federal Government to impose any kind of salary limitations on State employees, but clearly then, within the bill, as it presently exists, we have created a hybrid.

I call the gentleman's attention to the section of the bill, title V, which sets out the salary limitations for participants under this act, we will find in there that there is a salary limitation of $230 a week. But in the next paragraph we provide that the participants can have their salary of $230 a week supplemented from any other source in an amount equal to it.

So what I am suggesting is that if a State government, for example, would bring a participant under the act and pay him $230 from Federal funds we have appropriated that they can legally pay them up to $230 from State funds.

In putting that limitation in the next paragraph we are putting a limitation on how much the State government can pay participants under this act.

What I am doing with my amendment is entirely consistent within and does to the administrative side what we have already done to the participant side.

Mr. FORD of Michigan. The gentleman sounds fine except that his logic is faulty. It does not logically follow that if you say that I can supplement a Federal payment to a position created in employment with this act that that somehow provides a precedent for you to do this. Read your amendment.

Your amendment says no administrator paid in whole or in part. You catch the person who would be supplemented.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. FORD) has expired.

(By unanimous consent Mr. FORD of Michigan was allowed to proceed for 2 additional minutes.)

Mr. FORD of Michigan. A full-time employee of the city who might spend 25 percent of their time on this program and have 25 percent of their salary allocated to it is caught by this. You do not say that that 25 percent of the salary has to be below the level of GS-10. You say that person shall not be compensated more than a GS-10.

The amendment does not say what you have just described as a logical conclusion to be reached by following the precedents elsewhere in the bill.

I will be pleased to try to work with the gentleman to try to clean it up for him. But in its present form it is clearly unconstitutional and it is now apparent that it goes much further than the gentleman intended it to.

AMENDMENT OFFERED BY MR. HAWKINS AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. DURBIN

Mr. HAWKINS. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. HAWKINS as a substitute for the amendment offered by Mr. DURBIN: Page 9, after line 14, insert the following new subsection:

"(d) Funds available for the cost of administration pursuant to subsection (b) may not be used to pay salaries or wages to administrative or supervisory employees (1) at a rate which is greater than the rate of the salaries or wages paid employees performing comparable functions for the same employer, or (2) if there is no such comparable rate, at a rate which is in excess of the rate of pay prescribed for GS-10 of the General Schedule with respect to employees of the Government".

Mr. HAWKINS. Mr. Chairman, the gentleman's amendment which has been discussed would constrain wages paid administrators and supervisors within the administrative cost limitation now under the bill. These salaries are not subsidized wages paid to participants but normal salaries that are paid to those State and local officials responsible for administering these programs.

Putting too tight a limit on such administrators' salaries would in effect be charged against administrative expenses which have already been limited by the previous amendment which we accepted, but would have the effect of undermining the strict accountability provisions which are included in the bill.

Under the gentleman's amendment the person would not necessarily be unemployed or would not have to be unemployed. They could be unemployed.

We certainly want adequate monitoring, it would seem to me, of those moneys. Much has been said today about all of the abuses in the past under the CETA program and so forth. Under this program we have very strict accountability provisions and we want the individuals administering, not line supervisors and not crew leaders, to be of the very highest quality.

For that reason it seems to me we have to pay for it.

We want to assure that these labor-intensive activities have adequate supervision. That is the intent of the bill.

I think that it is the desire of the Congress that the program sponsors be held strictly accountable for the expenditures of these moneys.

My amendment would require that the administrators and supervisors be paid no more than the salary which is paid to officials with comparable responsibilities. In the gentleman's State of Illinois, for example, the current State administrator of the Federal job training program makes between $38,000 and $44,000 per year. The gentleman would want to reduce this and say that that comparable salary which is now being paid commensurate with the duties as recognized in his State should be reduced.

How are you going to reduce the salary and at the same time expect to get the same quality? It just does not make any sense.

My amendment would further prohibit paying administrators above the comparable salary for that position. But we also recognize that in other States, if there is no such comparable existing position, then the salaries could not be paid in excess of the rate in the gentleman's amendment, the rate of pay prescribed for GS-10 which would bring it into line, therefore, with his amendment. In those States where there are no comparable positions the wage rate of GS-10 would then prevail, which is somewhere in the neighborhood between $24,000 and $29,000 depending upon the steps.

We think this is flexible. We think that it provides for accountability. We think that it carries out the intent of the gentleman's amendment, but at the same time makes it more flexible as to areas of the country and brings the position into line with the duties that we think should be assumed by whoever administers this program.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Kentucky.

Mr. PERKINS. Mr. Chairman, I rise in support of the substitute.

The gentleman from Illinois (Mr. DURBIN) has good intentions. But if his amendment is adopted, we will throw a monkey wrench into the operation of this program.

The purpose of this bill is to put people to work, unemployed people to work immediately. Instead of doing that, this amendment would hamstring, delay, and disrupt the entire program throughout the country.

I am sure the gentleman from Illinois does not want that to happen.

I would suggest to all Members that we have had much experience in recent years with enacting requirements that proved not to be practical, although they were based on good intentions. We should support the substitute amendment offered by the gentleman from California (Mr. HAWKINS).

Mr. DURBIN. Mr. Chairman, I rise in opposition to the substitute.

With all due respect to the gentleman from California, and I know he has spent a substantial amount of time in working on this legislation, and, as I said at the outset, I support the legislation, I will be voting for it and I hope that what I am about today is viewed as constructive, but I must rise in opposition to the substitute amendment for the following reasons:

In the first instance, here we are talking about paying administrators comparable salaries for what they presently do if they are administrators under this act, and yet what we are creating under this act is a new approach, a new program.

So, trying to define what a comparable function and comparable salary is, I think is going to be somewhat difficult because we are dealing with a unique creation here in the legislation.

Second, I find some difficulty with the words "comparable functions." In all due respect, I have to say that with the words "comparable functions," "comparable levels of pay," we are completely surrendering to the State, local, municipal, and county governments the authority to set whatever pay they want to set for administrators.

That, in my mind, goes far beyond, of course, the intent of my original amendment and in fact it violates the very reason it was offered.

When we leave it up to the locals, I think we look beyond one very important fact. For the men and women presently unemployed we are going to bring under this program and ask to participate, we are going to provide them only $230 a week in most instances.

Ladies and gentlemen of the House, that amount of money is not some princely sum that a person would want to find as a full-time salary and look forward to retirement. It is an emergency measure. We are bringing people in to give them something to do worthwhile in the community and pay them a decent wage, not a generous wage, but a decent wage.

We are asking sacrifice from the participants, yet I cannot understand the reluctance today from those who are sponsoring and pushing forward this legislation to ask this same degree of sacrifice from administrators.

□ 1200

Twenty-nine thousand dollars does not, to me, appear to be the kind of sum that we have to apologize for. In fact, I think it is a fair amount of money to pay to a person who is supervising employees who make $11,000.

With this amendment, we remove the cap entirely. If the local unit of government should certify that they pay their administrators in like functions $60,000 per year, that is what they will be paid, I guess, because under the substitute amendment, that authority is given to them.

I do not understand the reluctance to ask for sacrifice when it comes to administrative salaries when we have so many administrative people, white-collar workers, who are out of work today.

Let me clarify one final point which has been brought out several times: What I am about with my original amendment would not reduce anyone's existing salary. If an employee for Government has a job today and is paid an amount of money to work that job and is asked by his administrator to keep an eye on this program, there is nothing, absolutely nothing, that would reduce their salary until such time as that administrator seeks Federal funds for reimbursement.

If the person, the administrator with the present job, the deputy mayor or whatever, takes on that responsibility and is not paid with Federal funds, that person can be paid whatever the unit of local government, city, or whatever, cares to.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. DURBIN. I would be happy to yield to the chairman.

Mr. PERKINS. I would state to the gentleman from Illinois that his argument at first flush sounds reasonable. What the gentleman is overlooking, from the viewpoint of the operation of the program, is that when you put new people in charge of a program, you are going to delay and disrupt the program. You are not going to accomplish the purpose you are seeking to accomplish.

That is what is wrong with the gentleman's amendment.

We want to get people to work immediately, not delay getting it started and disrupt the whole program. Local governments have organizations in place which are capable of putting people to work quickly in accordance with the law. If you disrupt their administrative systems, they may not get settled for 6 months. You would be doing great harm to the program.

That is the reason I think we ought to support the substitute and vote down the gentleman's (Mr. DURBIN) amendment.

Mr. DURBIN. Mr. Chairman, I appreciate the gentleman's comment, but I do not happen to believe that if we turn to a city or a school district and tell them that they are going to have 50 or 100 employees to do important functions, that they will sit back for 6 months and wait until they can recruit supervisors. I am certain mayors and superintendents of school districts will find within their existing operation the wherewithal to share the benefits we are sending back to the local level.

To think that they would sit back for 6 months and not use them, I do not believe so. I think there are too many important things to be done in these communities, school districts, and I think they will rise to the challenge.

Mr. PERKINS. If the gentleman will look to the laws that we have enacted here in the past, it may take more than 6 months. I can assure the gentleman that his amendment will disrupt the program and will certainly have effects that the gentleman does not anticipate and does not want. I think we have had that experience with restrictions we have imposed on programs in the past that then are shown to be unworkable.

The CHAIRMAN. The time of the gentleman has again expired.

(By unanimous consent, Mr. DURBIN was allowed to proceed for 1 additional minute.)

Mr. PERKINS. Mr. Chairman, will the gentleman yield further?

Mr. DURBIN. I yield to the chairman.

Mr. PERKINS. We should not do the same thing again.

Mr. DURBIN. Mr. Chairman, I would just say in conclusion that I hope what I am offering is constructive; I do not believe it would delay the program. In fact, what I am adding is a safeguard for this program. CETA roams the halls of Congress like Banquo's ghost and every time we talk about a jobs bill, we have to sit down and justify what happened to CETA.

Let us not create a situation where administrative costs could be so high, administrative salaries be so high, that some 6 months or a year from now, those of us who support the legislation will be embarrassed when we look at the excesses.

With my amendment, what I hope to do is positive in that direction.

I respectfully rise in opposition to the substitute offered by the gentleman from California.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. DURBIN. I would be glad to yield.

Mr. HAWKINS. I thank the gentleman for yielding.

Mr. Chairman, we have already accepted the limitation on administrative costs. We thought that was a good amendment. Now, inasmuch as this comes out of the same pool, it is, I think, unreasonable to believe that any local district is going to pay excessive salaries because they are already limited by the 15-percent limitation.

The CHAIRMAN. The time of the gentleman (Mr. DURBIN) has again expired.

(By unanimous consent, Mr. DURBIN was allowed to proceed for 1 additional minute.)

Mr. DURBIN. Mr. Chairman, if I might respond, my first amendment has shrunk the size of the administrative pie. This amendment shrinks the size of the slices. But I do not believe it is an unreasonable request that the administrative salaries paid under our bill, which pays the participants $11,000, that the administrative salaries be held at $29,000.

I think we have an honest difference of opinion on that point.

Mr. ERLENBORN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to thank the gentleman from Illinois for offering this amendment. I believe I will vote for it.

I have listened to his arguments. I think they are cogent; I think they make good sense.

In particular, I want to note almost all of the debate, possibly every bit until now, has been on that side of the aisle. I have found the debate to be quite revealing. I think we should remember that over the course of the years, the social programs emanating from Washington that were called such things as the war on poverty wound up creating jobs not for the poor but for administrators.

During the Johnson years, when we had the war on poverty actively underway here in this country, less than 10 cents on the appropriated dollar went to the poor.

When we had CETA, that much discredited program, in full effect, most of the money was going to administrators.

Now I submit that should not be too surprising. I submit, however, that it was not right. I think we should see that the funds appropriated, that we proclaim so loudly are to help the poor, are to go to the poor.

But when you note that all of the debate has been on that side of the aisle, you begin to wonder what are the elements involved in whether the money goes to the poor or to the administrators, to the payrollers.

One thing I remember that may be quite revealing is that the one largest single group at the Democratic National Convention in 1980 were those who were on public payrolls.

Now that is the constituency, you see, that is being served by these programs that are vaunted loudly as being help for the poor, a war on poverty.

It is creating jobs for the constituency of the Democratic Party—payrollers.

I think the gentleman from Illinois has offered a very useful amendment. It will not be very popular on his side of the aisle because it strikes right at the constituency of the Democratic Party. I hope he will not withdraw it now.

I thank the Chairman. I yield back the balance of my time.

Mr. HARRISON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, first with respect to the, I suppose, negative comments we have just had on the War on Poverty, I think it would be useful to point out that the Bureau of the Census, just before this House went into recess, told us that the percentage of people in this country living under the poverty level is higher than it has been at any time since we declared the War on Poverty in 1963.

So I would say to the gentleman that the war on poverty must have done some good.

With respect to the specific amendment under consideration, I understand and sympathize with the motives behind the amendment as offered by my friend and colleague from Illinois; I nonetheless rise to oppose it and to support the substitute offered by our chairman, the gentleman from California, for a very practical reason.

In my experience as a member of nonprofit organizations which, in my part of Pennsylvania, end up administering these and other programs, what happens is this: This program and several other Government-funded programs are administered by a common source and the cost of administration is then spread across the board so that perhaps 1 percent or one-half of 1 percent of the salary of the executive director is paid out of funds received under this program and 1 percent of the salary of the director of finance is paid out of funds received under this program.

Well, what is going to happen, if we take the words of the gentleman from Illinois' amendment literally, "wholly or in part" means that as soon as any administrative person in an already existing agency has even a miniscule percentage of his salary charged off against the grant received under this program, then his whole salary, regardless of the number of people he supervises, regardless of the extent of his responsibilities, the number of years of his employment, his whole salary has to come down to $29,000.

I would respectfully suggest, Mr. Chairman, that for that very practical reason, the amendment of the gentleman from Illinois should not be accepted.

Mr. DURBIN. Mr. Chairman, will the gentleman yield?

Mr. HARRISON. I will be glad to yield to the gentleman.

Mr. DURBIN. Mr. Chairman, I would like to make this point quite clear, that that is what I am setting out to do with my original amendment. The person you are talking about is a person who presently today has a job. I want this bill to be directed to people who do not have jobs,

white collar workers as well as blue collar workers.

□ 1210

Mr. HARRISON. May I just say to the gentleman that really the dilemma that he then presents is that agencies already in place, with executives making more than $29,000 a year, would be prohibited, really, from allocating a portion of the funds received under this grant to the administration of the agency.

Now, I think that would cause the kind of havoc that the distinguished chairman of the full committee talked about.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. HARRISON. I yield to the gentleman from California.

Mr. HAWKINS. I thank the gentleman for yielding.

The statement has just been made by the proponent of the original amendment and I respect his support of the bill and his intent and certainly make allowance for that in terms of dealing with his amendment. The statement that he has just made is that the administrator is going to be some unemployed person.

Well, his amendment just does not say that. It says:

> The rate of pay for administrators funded in whole or in part by this act shall be at a wage no greater than the compensation in effect for grade GS-10.

It does not make the stipulation that the individual has to be unemployed.

So I think that part of the gentleman's amendment needs to be clarified. The supervisory individual does not have to be unemployed.

Mr. DURBIN. Mr. Chairman, will the gentleman yield?

Mr. HARRISON. I yield to the gentleman from Illinois.

Mr. DURBIN. I thank the gentleman for yielding.

In response, the gentleman is right. My amendment does not specifically say that we have to deal with new employees, but yet I had hoped that the gentleman would concede that by putting this income limitation we are lessening the likelihood that we will be embellishing and subsidizing the wage of an existing employee.

Mr. HAWKINS. Well, I would respond by saying that not only are we making that possible, but we are making it possible to employ incompetent, inefficient persons to run programs that I think are just as importance in this instance as running the UDAG or any other federally assisted program.

Why does the gentleman not make it across the board? Why do we not say the administrators of all programs operated at Federal expense are now going to paid at this lesser wage.

You just cannot argue that this program has less quality to it, or that it should be demeaned by hiring an unemployed person, who would be delighted to operate this program at $29,000, but who may be incompetent to do so.

Mr. DURBIN. If the gentleman will yield further, I believe there are millions of competent, unemployed administrators who would grasp that opportunity to make $29,000 a year in a minute and I think we must look at this as an unusual program, not a regular program in Government, because we are saying to the participants, "You shall make no more than $250 a week."

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. HARRISON) has expired.

(By unanimous consent, Mr. HARRISON was allowed to proceed for 2 additional minutes.)

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield?

Mr. HARRISON. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. I thank the gentleman for yielding.

The gentleman pursues his original amendment which is on its face not at all ambiguous, but its explanation gets more and more ambiguous. The gentleman has now suggested a dimension of his amendment, not apparent by its reading, would be that he would encourage the Governors and the mayors and others responsible for administering this program to hire someone not now employed by them to administer the program.

I suggest that that is asking for absolute chaos. It not only shows a tremendous contempt for trusting the local governments of the States and the localities, but it also puts them in an impossible bind.

I look at my own State and say how would the Governor administer the State funds? On the one hand, he has to administer 5 percent of the total that goes into the State, and then, in addition to that, he administers all of the programs throughout the State that are not in large cities or counties. And we know from experience with CETA, we know from experience with other programs that that becomes a very difficult thing at the State capital level.

Now we have recently put in place, this is the first year of JTPA. In my State the State labor department, with a director of the labor department, who is provided for by constitution and is a regular official of the State, has a statutory or constitutional level of pay, has assigned to him as part of his duties administering the State's responsibility under JTPA. I would not be at all surprised if he also had thrust upon his department the administration of the State's function in administering this program.

Is it fair? He will have to add some additional employees, of course, to administer this, but the top man, the administrator, is not administering it because he was an unemployed guy who would like to be an employed administrator, it is because he is already the equivalent of the Secretary of Labor and he administers all the manpower and training programs in the State. The gentleman's amendment would prevent him from doing that.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. HARRISON) has expired.

(By unanimous consent, Mr. HARRISON was allowed to proceed for 2 additional minutes.)

Mr. HARRISON. Mr. Chairman, I would just like to conclude by saying that the remarks of the gentleman from Michigan have really, I think, amplified on the point that I was trying to make.

We are going to have school districts, I assume we may have hospitals, we are going to have nonprofit corporations and municipalities administering this program.

Now if they are denied the opportunity to spread their costs and to have a tiny percentage of the share of the salaries of their chief administrator paid from this program, that is going to cause administrative chaos.

If, on the other hand, you say that the superintendent of schools cannot be paid any more than $29,000 a year, because a tiny percentage of his salary comes out of funds authorized under this bill, then I think you have done something unjust with salary scheduling.

If the original amendment had said that people paid wholly from the funds authorized by this bill, shall be limited to the started salary, I would support it. But I think that the administrative problems which are caused by preventing, really, the spread of administrative costs into this program, are such that I would urge the support of the substitute as offered by the distinguished chairman of the subcommittee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. HAWKINS) as a substitute for the amendment offered by the gentleman from Illinois (Mr. DURBIN).

The question was taken, and the Chairman announced that the ayes appeared to have it.

Mr. DURBIN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1230

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Illinois (Mr. DURBIN) for a recorded vote.

A recorded vote was refused.

So the amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. DURBIN), as amended.

The amendment, as amended, was agreed to.

The CHAIRMAN. Are there further amendments to title I?

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS: Page 4, lines 12 and 16, redesignate subsections (b) and (c) as subsections (c) and (d), respectively, and insert before line 12 the following new subsection:

(b) If, in the first three months of the calendar year in which begins the fiscal year for which an appropriation is to be made under subsection (a)(2), the national average rate of unemployment in the civilian labor force of the United States is less than 10 percent, then subsection (a)(2) shall be applied by substituting for "20 percent" a percent which is equal to 20 percent minus 5 percentage points for each full percentage point by which such national average rate of unemployment is less than 10 percent.

Mr. JEFFORDS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

There was no objection.

Mr. JEFFORDS. Mr. Chairman, this is my so-called Faith in America amendment. What this amendment does is reduce the authorization in this bill so that when unemployment reaches the 6-percent level generally accepted as the noncyclical unemployment level, this program would not be authorized any longer. In other words, it makes it very clear that the purpose of this program is for those times when we have high unemployment.

Of course, as my colleagues know, we are dealing with an authorization bill and I personally feel that it is a good idea to have a bill of this nature on the shelf to be available to us to consider with other options when we determine how we ought to assist the unemployed during periods of high unemployment.

That is especially true when I compare it, as has already been done very well by other Members here, with the utility of this kind of legislation versus the public works type legislation. As we have seen already this year in an examination of the emergency jobs bill, few if any people have been put to work yet by that piece of legislation which we so overwhelmingly passed earlier this year.

Also, an analysis of past utilization of public works programs indicates that they have not generally been directed in recent years toward unemployed people. They have provided jobs, yes, but most of those jobs go to people who are already employed. In fact, history has demonstrated that in one public works bill it could be demonstrated that under certain provisions of the program, it cost us approximately $400,000 for each unemployed individual that was employed by that bill.

This bill obviously provides employment in public service type jobs, which have to result in benefit to the community. I point that out because what we are asking for here is something to be available when we have large numbers of unemployed people, but which should not be a permanent program. If not for any other reason, this amendment will make the bill more acceptable. It is a bill which I think ought to go forward, and this amendment would help make that possible.

Now, why do I pick 6 percent? Before I discuss that issue, let me explain what happens under the present bill. Under the present bill, the authorization of funds is determined by multiplying 20 percent of the number of long-term unemployed by $10,000. This product results in rather substantial amounts of money.

My amendment says that as unemployment comes down, the percentage of the long-term unemployed used as a facter in the formula would decrease from 20 to 15 to 10 to 5 percent. At the 6-percent unemployment level we would have no authorization to appropriate funding for the bill.

The present bill would keep this factor at 20 percent. Even at the 6-percent level of unemployment, the bill would fund the program at $3 billion. If we get down to 4 percent unemployment, we would have a $2 billion program; 3 percent, $1.6 billion, and so on down. Therefore, we have a permanent program and an expectation of a permanent program.

The 6-percent unemployment level is chosen because it is a generally accepted one. It is used by the CBO as the noncyclical unemployment level, and includes people who are in transition from one job to another, plus the structurally unemployed. This is an irreducible component of unemployment that will exist even with full economic recovery.

The next question: Will we get to 6 percent, and is this a reasonable expectation?

I think it is important to point out that the economic indicators right now show that we are in the process of a very significant and substantial increase in our employment level. We now have the highest level of employment ever in our history. The Government's index of leading indicators increased again last month, as it has for the past 11 months. Capacity utilization in the Nation's manufacturing, mining, and utility industries increased 1.2 percentage points in July to 75.8 percent, the highest rate since late 1981. Similarly, industrial production increased 1.8 percent in July with especially sharp rises in automobiles and steel. The Industry Production Index stood at 10.2 percent above its most recent November 1982 low.

As a result of this growth, more Americans were working in August than at any other month in our Nation's history. These are signals that the economy is improving well and if allowed to continue, we should get to the 6-percent level sometime, but not until after 1985 or into 1986.

I think we should take a look objectively as to whether or not we ought to have this bill, but we ought to make sure that we do not misrepresent to people that we intend this bill to be a permanent bill. I do not think we really want that.

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS) has expired.

(By unanimous consent, Mr. JEFFORDS was allowed to proceed for 2 additional minutes.)

Mr. JEFFORDS. What about the structurally unemployed when we reach that 6-percent level?

Members will remember that last year we passed a bill, the Job Training Partnership Act, that changed CETA legislation on employment training programs, which should be adequately funded, and will meet the training needs of the structurally unemployed.

□ 1240

In my mind that approach is the one which is more appropriate at the noncyclical unemployment rate level. At 6 percent we should have jobs available for people wanting jobs if they are trained to fill the jobs. We have a program in effect that trains people to obtain and retain jobs.

In the final analysis, I do not think that in this bill we ought to hold expectations out or create a permanent program that is going to go on forever, even though there is not a need for this kind of program as we move toward full employment.

So, Mr. Chairman, I would urge the Members to demonstrate their faith in America that we will have the unemployment problem taken care of, perhaps not tomorrow but in the future. I ask them to vote for this amendment which I think would make this bill better and put it in a much more reasonable form.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I am happy to yield to the gentleman from Maryland.

Mr. MITCHELL. Mr. Chairman, I thank the gentleman for yielding.

Before I put my question, I want to compliment the gentleman on the role he has played in this legislation. It has been just magnificent.

I have the honor of serving on the Joint Economic Committee, and for some several years we have discussed what constitutes full employment. There was discussion of a figure around 6 percent, there was discussion at another level, and then there was discussion at another percentage level. But to the best of my knowledge, the Joint Economic Committee, which really sets some broad economic policies, has not determined that 6 percent unemployment represents full employment.

What the gentleman is proposing in his amendment establishes 6 percent unemployment as full employment, and I really have major concerns with that.

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS) has expired.

(By unanimous consent, Mr. JEFFORDS was allowed to proceed for 2 additional minutes.)

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Maryland.

Mr. MITCHELL. Mr. Chairman, I thank the gentleman for continuing to yield.

I really have major concerns with that because there is no consensus among the leading economists in this Nation as to what constitutes full employment, and if the gentleman's amendment should prevail, although I hope it will not, this Congress will have legislatively established 6 percent as full employment. I know the gentleman so well that I do not think he wants to do that.

Mr. JEFFORDS. Mr. Chairman, I differ with the gentleman in one sense. First of all, I think, from the leading experts, the lowest figure that I have seen as the point where we have noncyclical unemployment is 5 percent. The CBO has recognized that there is a division of opinion on this, but they say that it is somewhere between 5.5 and 7.5 percent. But CBO has accepted—and this is even a more liberal-conservative issue, as I look at it—6 percent as being the noncyclical lure of unemployment in that it takes into consideration the structually unemployed, those who need to be trained to be employed, and transitional employment. That is why I use the figure of 6 percent.

Second, I recognize that at 6 percent there are people who need to be trained to become employable, and my amendment would allow for that to occur because we do have the Job Partnership Training Act. But I think it is important to have this bill only for utilization at times when we need extra funds available for high unemployment situations.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield again to the gentleman from Maryland.

Mr. MITCHELL. Mr. Chairman, I appreciate the gentleman's thinking on this. But if the gentleman's amendment should prevail, for the first time in the history of this Congress legislatively we will have established what constitutes full employment in this Nation.

Mr. JEFFORDS. Mr. Chairman, I would just answer the gentleman and say that I do not agree with him. I understood that we would pick a figure wherein we would indicate it is essential and important to have programs available for the unemployed, in addition to present programs for the unemployed and in addition to the unemployment compensation programs.

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS) has again expired.

(On request of Mr. MITCHELL, and by unanimous consent, Mr. JEFFORDS was allowed to proceed for 1 additional minute.)

Mr. MITCHELL. Mr. Chairman, will the gentleman continue to yield?

Mr. JEFFORDS. I yield to the gentleman from Maryland.

Mr. MITCHELL. Mr. Chairman, I honestly understand what the gentleman is trying to do, and I just want to lay it out again. My concern is that without any consensus being arrived at as to what constitutes full employment, despite a theoretical position by the Congressional Budget Office and despite a theoretical position by somebody else, I do not think we want to put into legislation a 6-percent figure. I would hope that the Members would be very, very aware of the danger of legislatively establishing what constitutes full employment in this Nation.

I love the gentleman, I respect the gentleman, but I hope his amendment is overwhelmingly defeated because of the enormous implications in it.

Mr. JEFFORDS. Mr. Chairman, I appreciate the gentleman's laudatory comments, but, unfortunately, I disagree with his conclusions.

Mr. HAWKINS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I, too, would like to commend the gentleman from Vermont (Mr. JEFFORDS) because I think that he has contributed as much as any Member in this body to the subject that we are now discussing. His integrity and his intent have always been unquestioned, and I do not question them in this instance. It is with a great deal of reluctance that I must oppose his amendment.

I agree that a 6-percent unemployment rate is highly fictional, to begin with. The unemployment rate was never intended to be the basis upon which policy would be established. It is merely for the purpose of establishing a trend. If the trend goes up, the unemployment goes up because of a trend. We know that, and we can adjust to that.

But to say that this gives an accurate picture of the unemployment problem is in itself purely fictional. The rate excludes perhaps as many persons as it includes, and by this amendment, those individuals who are not included in the rate would just simply be overlooked and harmed.

Now, as to a 6-percent rate, it is almost ridiculous, it seems to me now to be discussing 6 percent as being acceptable, as being bearable, or even being conscionable. In 1980, President Reagan campaigned against President Carter on the basis of 6 percent unemployment, and he was referring to those who support a 6-percent rate of unemployment, including President Carter and his administration, as being "the 6 percenters." I do not think we want to be "6 percenters" because this would mean that we would completely overlook those who are not included in the rate.

We would be in effect legislating away assistance to those who are discouraged workers who are not counted. We would also be excluding those who work only part time and who would not be counted in the 6-percent rate. We would also be overlooking the many individuals who are counted as housewives, women who are not in the labor market, and those who are 55 years of age and over who are assumed to be retired employees or retired individuals and, therefore, not in need of employment. These are the people we would be excluding.

Furthermore, I think that it overlooks the fact that there are some groups that suffer disporportionately. Women, for example, today constitute as much as 40 percent of the unemployed, and yet their rate is disproportionately higher than the 6 percent which would be the national rate under this amendment. So we are automatically not offering the program to them.

Youth constitutes almost 20 percent of the unemployed, and yet at a 6-percent rate they could still be perhaps

not below 10 percent, and so they would not be offered the benefits of the program.

I just think that while the intent is good, we need to at least diminish or eliminate the program at some rate. The bill already in effect does that because it has an automatic triggering device, but it is triggered according to the long-term unemployed. Now, if that triggering device operates as we anticipate it will, the program will automatically go down as recovery takes place.

Personally, I am not that optimistic that even the 6-percent rate which is now included in this amendment will be applicable because I do not think we are going to get back to any 6-percent figure soon. Our recessions are becoming worse. We are now in a so-called recovery period, and the unemployment rate is still 9.5 percent. This is higher than the unemployment rate in the last recession.

□ 1250

As a result of this, we have got to adjust programs to perhaps a much higher rate of unemployment during so-called recoveries; so I think for these many reasons, that while the intent is good, I think the bill already provides for an automatic triggering device that will not cut off at this somewhat fictional rate. That is why I oppose the amendment.

Mr. GEKAS. Mr. Chairman, I move to strike the requisite number of words.

I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I appreciate the gentleman yielding.

I just want to make sure that we get back to what this amendment really does and not to get off on some philosophical issues which I do not think are relevant here.

First of all, 6 percent does not appear in the amendment; so if the gentleman is concerned about a full employment figure being established in law, it is not there.

What it does is reduce the authorization levels, depending upon the unemployment rate, by a 5-percent factor for each drop in unemployment below 10 percent. The 6-percent figure is not in the amendment.

Second, what the amendment establishes is quite different. What it establishes is that when unemployment drops to what is generally considered to be the level where most unemployment is structural then emphasis is shifted from the type of work that is in the present bill and directed entirely toward training the structurally unemployed. This would make sure they are available for the jobs that are available in the economy. That is the thrust of this amendment, to say, "Hey, at that point we should direct the scarce resources of this country, not divide them between the two programs, but direct them toward training," as this body overwhelmingly adopted in the Job Training Partnership Act last year.

I want to keep this discussion to the point of what the amendment is trying to accomplish and what the philosophical base of this amendment is. It is in no way anticipating, or trying to answer, the question of where that mythical full employment figure is, but rather it is a realistic appraisal of where the direction of our resources ought to be at certain levels of unemployment.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. GEKAS. I yield to the gentleman from California.

Mr. HAWKINS. Well, in view of the statements, I quite agree. The difference that I see between the position the gentleman is suggesting and what I have agreed to accept would be the use of the program moneys for those groups that would still be disadvantaged at 6 percent.

Now, under the amendment that the gentleman from Vermont is sponsoring, the cutoff would mean that no program moneys would be available at 6 percent. This would deny the groups that I am speaking of the benefit of a program. I do not think we want to say that at 6 percent these other groups are going to be wiped out.

For that reason, I have an amendment to the amendment of the gentleman from Vermont that I will offer that I think will retain the gist of what the gentleman is trying to do, but at the same time still make moneys available for these groups as this bill would provide.

I do not think the intent of the gentleman is to completely cut off assistance to these other groups at the 6-percent rate.

I think my amendment would continue to do that, but at the same time, also in line with the attempt of the gentleman to phase the program down, continue the downward phase of the program, but continue that phase-down to 4 percent, which I think is far more practical than that of the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. GEKAS. I yield further to the gentleman.

Mr. JEFFORDS. Mr. Chairman, I think it is important to point out that we may soon experience a dramatic reduction in funds that are going to be available in fiscal year 1984 for training programs under the Job Training Partnership Act.

What I am afraid of, is that if we authorize another program with all its built-in constituencies, we are going to have competition between the funds for both programs. There will be attempts to keep this one going and attempts to keep that one going, both underfunded.

My point is that at some level of unemployment we ought to make sure that all our efforts are directed toward those people who do not have an opportunity to get a job because they do not have the training to get the job. That is what the thrust of our activities ought to be.

This amendment is a way of saying that we ought to have training as our primary thrust, during times of noncyclical unemployment, and not on creating jobs, as fortunate as it might be for those people getting them. Then it ought to be the thrust of our society to train people so that they are in a position to compete for the jobs available.

I thank the gentleman for yielding.

AMENDMENT OFFERED BY MR. HAWKINS TO THE AMENDMENT OFFERED BY MR. JEFFORDS

Mr. HAWKINS. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. HAWKINS to the amendment offered by Mr. JEFFORDS: In the matter proposed to be inserted by the amendment of the gentleman from Vermont, insert "(1)" after "(b)" and strike out all after line 4 and insert in lieu thereof the following:

United States is less than 4 percent, then no amount is authorized to be appropriated for such fiscal year under this section.

(2) If, in the first three months of the calendar year in which begins the fiscal year for which an appropriation is to be made under subsection (a)(2), the national average rate of unemployment in the civilian labor force of the United States is less than 6.5 percent, then—

(A) the term "unemployed individuals" shall be deemed to mean only unemployed individuals residing in areas of substantial unemployment for purposes of—

(i) identifying eligible participants under section 103(a)(1) with respect to programs and activities under parts A and B of title II and under title III; and

(ii) allotting funds under sections 203(a) and 302(a); and

(B) determinations of the relative number of unemployed individuals under sections 203(a) and 302(a) shall be made on the basis of the number of such individuals, and the civilian labor force, residing in areas of substantial unemployment.

(3) For purposes of this subsection, the term "area of substantial unemployment" means any area of sufficient size and scope to sustain a program under this Act and which has an average rate of unemployment of at least 6.5 percent for the most recent 12 months preceding the determination for which satisfactory data are available.

Mr. HAWKINS. Mr. Chairman, my amendment to the Jeffords amendment would retain the committee's present provision which provides for a phase-down of the authority as long as the long-term unemployment declines; however, my amendment would terminate authority for the funds below 4 percent unemployment.

This provision, I think, would accomplish the intent of the Jeffords amendment; that is, of restricting the authorization, rather than leaving an open-ended authorization as provided in the committee bill; but does so at the full employment level of 4 percent, which is now in the statute, rather than the still significant level of 6 percent in the Jeffords amendment. Under the Jeffords amendment, there would be no means of targeting funds to pockets of high unemployment. Any area of high unemployment, even 10 percent, which existed when national unemployment declined below 6 percent, would be unable to receive funds for job creation. Moreover, the Jeffords amendment would spread substantially and reduce funds to all areas of the Nation, without cutting off those with very low unemployment.

My amendment would require that between 4 percent and 6.5 percent national unemployment funds under the act would only be allocated to areas of substantial unemployment, those areas with 6.5 percent unemployment or greater.

This concept of areas of substantial unemployment has been in effect in employment and training programs for the past 20 years and it is an accepted method of targeting resources to areas in greatest need, and as I have already indicated, not only are we talking about areas of greatest need, we are also talking about groups of greatest need.

Under this amendment, between the cutoff of the 6 percent and the 4 percent, these groups would still be able if they qualify under the act to receive the benefits of the act.

I think it is a fair and reasonable approach to the problem. I think that it retains the intent of the Jeffords amendment without tying the hands of this body to a concept that has not really been tried as yet in any employment and training program.

I therefore offer the amendment as a reasonable amendment to the Jeffords amendment.

□ 1300

The CHAIRMAN. The time of the gentleman has expired.

Mr. JEFFORDS. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The gentleman from Vermont (Mr. JEFFORDS) is recognized for 5 minutes.

Mr. JEFFORDS. I would point out, without reiterating all of the previous arguments, realism dictates and every economist that I have read recently indicates, that we are not going to get back to 4 percent, except in an incredibly overheated economy with tremendous inflation rates.

I think that is an unrealistic figure. So essentially what this amendment still does is to leave in existence a program to compete for money against where we ought to be putting it, and that is in training.

In other words, at a 5-percent level of unemployment under this amendment, you would still have a $2 billion authoriztion. At a 4-percent unemployment level the funding would be terminated. But that indicates that you still have the authority to fund the program until you get down to the 4-percent unemployment level. So, you still have a substantial amount of money which would be competing for other available programs and would leave in place a permanent program of the public service type employment.

A second problem I have with the amendment is that there is a trigger in here which while well-intentioned, would lead us into a very substantial administrative problem.

At the 6.5-percent unemployment level, as I understand it, the whole program emphasis changes and the direction of the funds change from a program generally available authorized entities under the bill, to areas of substantial unemployment. Laudable as that approach is, it would create a trigger which would cause a dramatic administrative shift in utilization of funds and create very substantial problems in the ability of States and localities to administer such a shift and create serious problems.

So, basically, I would have to say in all candor that the gentleman's amendment is an improvement over the existing bill. But in my mind it still does not get to the real problem toward which I am trying to direct my amendment, and, therefore, I cannot accept it.

I would point out that the authorization levels we are talking about in this bill, even at the present peak level of unemployment, which under the Budget Act is $3.5 billion, even with my amendment, until we get to the 6 percent, we are going to be in excess of any likely appropriations in that area.

So, I think that overall, although this amendment substitute is intended as an improvement, it does not do what I think should be done, to phase this program out so we do not have competition for training funds at low levels of unemployment.

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from New York.

Mr. BOEHLERT. Is it fair to say the basic argument boils down to this, a temporary versus a permanent program. There are a number of us on this side of the aisle supportive of this overall program because we recognize we have crisis proportions in terms of our unemployment rate. We want to address that temporary aberration in the overall economy, but we do not want to establish another permanent program. Is it fair to say that is really what it boils down to?

Mr. JEFFORDS. That is exactly what it boils down to. The question is whether or not you want to have a permanent program. Realistically, this would be a permanent program under the substitute. Under mine, when we get to the level that economists recognize essentially as full employment, the program would not be authorized, and therefore, we could direct our emphasis as this body voted for last year toward training people who need to be trained to be employable. I really appreciate the gentleman pointing that out. That is the bottom line difference here.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from California.

Mr. HAWKINS. It seems to me we are dealing in semantics. Would it not be true that at the 6-percent level, even in the Jeffords amendment, that the authority of the program would still operate, that the program is not eliminated? The allocations would be reduced accordingly and terminated at that rate but you still have the program operating.

So, it is not a matter of a temporary program versus a long-term program. You still have the authority. And I am sure this was thought through by the gentleman from Vermont, assuming that the unemployment rate went back up, then the trigger would operate in the other direction, in other words, it would still be there and funds for the program would trigger on. So, that is one of the things that we are trying to do now, is to have a program available for whatever the economic conditions justified, and not having just something that is going to operate on a temporary basis.

I guess what I am asking you, is it not true that at 6 percent the authority will still be available in case it is needed in the future?

Mr. JEFFORDS. That is correct. And I think that is good to point out. I see this program as one which ought to be on the shelf and available for the Appropriations Committee to appropriate funds when we are in times of high unemployment.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. JEFFORDS was allowed to proceed for 2 additional minutes.)

Mr. JEFFORDS. My amendment would make sure funding is only available during those times of high unemployment, and that in times of full employment or near thereto it would not be available. And I think that this is what the gentleman is pointing out. This ought to be a program which is an option during periods of high unemployment, but we ought not to hold

out a program as being a permanent program when really we ought to be putting our emphasis in other areas, primarily training when we are at the noncyclical level of unemployment.

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from New York.

Mr. BOEHLERT. I think it is very important that we stress that we want to put our emphasis on training those who are unskilled and upgrading the skills of those who are underemployed. And that is where we should be placing our emphasis. We need this bill now because we have crisis proportions in our unemployment rate. But we have going into effect October 1 the Job Training Partnership Act which involves $4.6 billion earmarked for those things absolutely necessary, training programs.

Mr. JEFFORDS. I thank the gentleman. He is absolutely correct.

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS) has expired.

Is there further discussion on the Hawkins amendment to the Jeffords amendment?

If not, the question is on the amendment offered by the gentleman from California (Mr. HAWKINS) to the amendment offered by the gentleman from Vermont (Mr. JEFFORDS).

The question was taken; and on a division (demanded by Mr. JEFFORDS) there were—ayes 7, noes 7.

RECORDED VOTE

Mr. VOLKMER. Mr. Chairman, on that I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate the proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Missouri (Mr. VOLKMER) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 208, noes 210, not voting 15, as follows:

[Roll No. 347]

NOT VOTING—15

Anthony	Ferraro	Pritchard
Barnard	Harkin	Rostenkowski
Carney	Heftel	Schumer
Crane, Philip	Horton	Shelby
Erlenborn	Morrison (CT)	Stark

□ 1340

The Clerk announced the following pairs:

On this vote:

Mr. Morrison of Connecticut for, with Mr. Carney against.

Mr. Schumer for, with Mr. Erlenborn against.

Mr. Anthony for, with Mr. Philip M. Crane against.

Messrs. STENHOLM, HAMMERSCHMIDT, McCURDY, and LEATH of Texas, Mrs. BYRON, and Messrs. ANDREWS of North Carolina, LUJAN, and DAVIS changed their votes from "aye" to "no."

Messrs. LEVIN of Michigan, LUKEN, BRITT, and MOODY changed their votes from "no" to "aye."

Mrs. JOHNSON changed her vote from "present" to "no."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Vermont (Mr. JEFFORDS).

The amendment was agreed to.

The CHAIRMAN. Are there additional amendments to title I?

AMENDMENT OFFERED BY MR. GEKAS

Mr. GEKAS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GEKAS: On page 4, after line 22, insert the following new subsection:

"(d) Notwithstanding any other provision of this section, no funds are authorized to be appropriated under this Act for any fiscal year unless the Secretary of the Treasury certifies to the Congress that expenditures incurred under such an appropriation will not result in an increase in the deficit in the Budget of the United States.".

PARLIAMENTARY INQUIRY

Mr. JEFFORDS (during the reading). Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. JEFFORDS. Mr. Chairman, is my understanding correct that the Jeffords amendment was passed by a voice vote, and we are now on any additional amendments to title I?

The CHAIRMAN. That is correct.

Mr. JEFFORDS. I thank the Chair.

The CHAIRMAN. The Clerk will conclude the reading of the amendment.

The Clerk concluded the reading of the amendment.

PARLIAMENTARY INQUIRY

Mr. WRIGHT. Mr. Chairman, I have a parliamentary inquiry.

Did the committee vote on the Jeffords amendment, as not amended by the Hawkins amendment?

The CHAIRMAN. The Chair will state to the gentleman that the Chair put the question on the Jeffords amendment and the amendment carried by a voice vote.

Mr. WRIGHT. Mr. Chairman, there was so much disorder in the House that this Member did not hear it. I dare say, a great many others did not hear it.

All right, Mr. Chairman, I would ask that the Clerk read one more time, in order that we might hear what amendment now is offered and pending.

The CHAIRMAN. The Chair will ask the Clerk to reread the pending amendment.

The Clerk reread the amendment.

Mr. GEKAS. Mr. Chairman, this amendment, in its simplest form, is a pay-as-you-go amendment. It would simply state that those who propose this and support the pending bill, with the proposed expenditure or cost to the Federal Treasury of $3.5 billion, would simply have to urge this Congress to provide the wherewithal to pay for that $3.5 billion in any one of a number of ways available to the Congress of the United States.

Every family in the United States tries to live within its budget and is in serious trouble when it spends more than it takes in. That simple proposition ought to be applied to every day's deliberation in the Congress of the United States.

□ 1350

We are saying that the deficit works against the best interests of the people of the United States of America. Why? Because it robs the private sector and the citizens of the United States from the credit availability with which to invest and for small business to take hold and to create jobs, the very purpose for which we are striving here in the Congress of the United States.

Adoption of my amendment would simply say that at some point we will make sure, as a Congress, that the $3½ billion to be expended for this program will not be made unless it be certified that those expenditures will not be adding to the deficit.

I am willing to work with everyone in this Chamber to provide the $3½ billion for this purpose. It is a pay-as-you-go plan, the best form of economics.

Mr. HARRISON. Mr. Chairman, will the gentleman yield?

Mr. GEKAS. I certainly will yield to the gentleman from Pennsylvania.

Mr. HARRISON. I thank the gentleman for yielding.

Mr. Chairman, I just want to inquire of the gentleman if it is his intention to offer a similar amendment when the defense authorization bill comes to the floor?

Mr. GEKAS. I will offer any kind of amendment on which we can gain a consensus to make sure that there are enough revenues or cuts in other spending to make up the $3½ billion. I will begin by sitting down with the gentleman to find out what he is willing to cut from other kinds of programs along the way.

Mr. HARRISON. I will join with the gentleman in doing that with the MX missile, if he is willing.

Mr. GEKAS. I will be working with the gentleman on some other social programs that he is interested in.

I ask for a unanimous vote in favor of my amendment.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to the amendment.

This amendment would apply an entirely different standard to this one program than Congress has applied to any other program that we have authorized. It would single out the jobless as the least worthy of our attention.

We have passed legislation to help the farmer; we have passed legislation to build roads; we have passed legislation to help schools. We passed legislation to build the MX, to build the B-1, to build the Trident submarine. We passed legislation of all kinds. Never before has anybody singled out a particular authorizing bill and said, "This bill cannot go into effect in any year unless the Secretary of the Treasury asserts that its expenditures will not add to the deficit."

That of course is a sure way to kill any program. Obviously, any time we have a deficit, any expenditures for military weapons, for environmental programs, for school books, for anything that the Government does will add that much to the deficit.

Why single this out? Are the 11 million unemployed Americans that much less worthy of our consideration than any of the other problems we face? Are they less worthy of our consideration than the latest gadget of military weaponry that the Pentagon desires?

I do not think Congress would want to say that. I do not think we would want to establish that policy. If we pass this amendment, that is exactly what we will be saying.

Why do we have a deficit? Let us just face it squarely. We have the biggest deficit in the history of the United States. What irony. It must be a terrible disappointment to President Reagan, who promised when he came to his office that he would have a balanced budget by 1984, to see the deficit for 1984 looming larger than it ever has been in the history of the Nation. The current Reagan deficit is three times larger than the biggest deficit ever suffered under any previous administration.

But why is that deficit so high? It is not because we are trying to do something to give people jobs. It is because we do not have people at work. It is high because people are unemployed. It is higher because $135 billion is being bled from the Treasury as a result of the ill-conceived and highly excessive 1981 tax cut.

Mr. DAUB. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. No, not at this point. I may yield when I have finished. I will be glad to if I have time, but I want to stress some facts, I think some things need to be understood.

Why do we have a deficit? We have a deficit primarily because this House, in its lack of wisdom, cowered before the demands of the administration in 1981 and passed an excessive tax cut almost all of which inures to the coffers of the few wealthiest people in our country. Very little, if any of it, goes to the average and lower income Americans.

By the reckoning of the Secretary of the Treasury, Mr. Regan, who would be called upon by this amendment to certify that there would be no impact upon the deficit, by his own reckoning, in testimony before the House Committee on the Budget, that tax cut is adding $135 billion to the deficit this year.

Did I see the gentleman arise when that third layer of that tax cut was

going into effect and propose that it should not go into effect until the Secretary of the Treasury should certify that it would not add to the deficit? No. The gentleman was remarkably silent on that account.

Did I see the gentleman rise when we added something like $100 billion annually to military expenditures and say that these things can go into effect only when the Secretary of the Treasury certifies that they will not add to the deficit? No. The gentleman was totally silent on those occasions.

Only now, when we want to do something to give the unemployed an opportunity to do constructive work—not to give them a handout but only an opportunity to build things in those communities throughout our country that have suffered a deterioration in their public services—only now, when we want to employ people doing things that need doing in all the communities across the country—only now, when we want to take them off the unemployment roles and the welfare rolls and put them onto productive payrolls—only now do we have the demand that first, before this particular thing might be enacted, we must have a certification by the Secretary of the Treasury that not 1 penny of it would add to the deficit.

Well, of course, it is ridiculous on its face. If that rule were applied to all legislation, there might be some equity to it. Obviously this amendment is not offered to all legislation. Obviously it is not equitable. Obviously, it should not be adopted, and I ask for a "no" vote.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(On request of Mr. DAUB and by unanimous consent, Mr. WRIGHT was allowed to proceed for 2 additional minutes.)

Mr. DAUB. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I would be happy to yield to the gentleman from Nebraska.

Mr. DAUB. I thank the gentleman for yielding.

Mr. Chairman, indeed I do appreciate and have the same concern as the majority leader does for the condition of a person and the aggregate number of those unemployed in this country, and indeed, I understand the difficulty of dealing with a $170 to $200 billion deficit which contemplates the figure of a baseline of $1.4 trillion for the commencement of a very serious set of budget problems for our Congress.

Does the majority leader or the majority party contemplate keeping its word under the first budget resolution and bring a tax bill to the floor of this House to raise some of the revenue that might pay for this bill?

(By unanimous consent, Mr. WRIGHT was allowed to proceed for 1 additional minute.)

Mr. WRIGHT. Absolutely. If the gentleman will recall, not more than 2 months ago, we did bring to this floor a bill which would have recovered some $8½ billion for the Treasury and reduced the deficit by that figure in this coming fiscal year simply by putting a reasonable ceiling on the amount that any one individual might receive from the third layer of the tax cut for the wealthy. It would have allowed those who are the wealthiest to receive $800, but no more than $800, and not to receive the $5,000, $6,000, and $7,000 windfalls that some of them did receive.

□ 1400

That would have reduced the deficit. We did present the bill. If the gentleman will recall, it passed the House by a fairly substantial majority.

Mr. DAUB. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. Does the gentleman not call that a tax bill? It was not approved by the Senate. I cannot speak for the Senate. I cannot speak for all of my colleagues in the House, but I do think we have the responsibility to do those things that are necessary to balance the budget.

Let us be fair about it. Why is the budget out of balance? It cannot be blamed primarily upon domestic spending. We have reduced domestic spending since 1980 by approximately $47 billion annually. We are spending about $47 billion less this year on social and domestic programs than we would have spent on a regular current services basis from 1980, but we are spending about $100 billion more this year on military expenditures than we were in 1980.

So I think it ill behooves any of us to avoid the solemn fact that the reasons for the deficit were the excessive tax cut for the wealthy and the enormous increase in military expenditures, not to mention the effect that unemployment itself unavoidably exerts upon the deficit.

To repeat that which has been said before, the reasons for the Reagan deficit are threefold: First, too big a tax cut for the rich; second, the enormous increase in military spending; and third, too much unemployment among the poor. Each time unemployment is allowed to go up by 1 percentage point, we automatically add $27 billion or more to the deficit. Now we are trying in this bill to do something about that.

Mr. DAUB. Mr Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to my friend, the gentleman from Nebraska.

Mr. DAUB. Then, Mr. Chairman, let me ask, How does the majority leader propose to pay for this piece of legislation?

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(By unanimous consent, Mr. WRIGHT was allowed to proceed for 1 additional minute.)

Mr. WRIGHT. Mr. Chairman, I shall not ask for anymore time after this.

I think the question easily answers itself. Most clearly, if we are to pull ourselves out of this downward spiral, we have to put people back to work. We have to get people off the unemployment rolls, get them off the welfare rolls, and put them on productive payrolls where they will also be on the taxpaying rolls.

Do we do that by make-work? No; this bill would not do it by make-work. This bill would put them to work on constructive projects that need to be done. The backlog in every community is large and growing. That is how we would put them to work.

Once we get this economy rolling, once we get Americans working again, then those Americans will be buying goods. When Americans are buying more goods, then business has an incentive to expand to increase its output of goods. And when business expands, it employs more people, and more people end up paying more taxes.

I do not think, short of that, we are ever going to balance the budget. We will balance the budget when we bring interest rates down so that business can invest in job-creating enterprises. We will bring that budget deficit down when we realize the solemn fact that we cannot just continue to give big tax cuts to the rich and make bigger and ever-bigger military expenditures and then try to blame the deficit upon the poor. That is not a fair blame. And everybody who is honest with himself knows that it is not.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

Mr. DAUB. Mr. Chairman, I move to strike the requisite number of words.

I appreciate, Mr. Chairman, the answers that I received in our colloquy, and I more than appreciate the majority leader's willingness to engage in that colloquy.

I guess my logic strikes me in a reverse way. I feel a little differently about the way in which the majority proposes to assist those who are clearly concerned in their communities about how to help the unemployed. I thought in fact if we would spend more in the Congress of what we did not have, that might increase the deficit, and that in turn would cause upward pressure on the money markets, the interest rates would go up, that would cause the inflation rate to rise, and in fact we would add more people to the rolls of the unemployed.

I guess it is clearly a difference of philosophy. Do we spend our way out of the problem that was created by 30 or 40 years of an attitude that the central system and the productivity of the worker was excuse enough or collateral enough in order to be able to fund any program for any reason without regard to the deficit?

Is the only wisdom left in this country that which resides here because of political differences over how to help the unemployed? I think this amendment illustrates the clear difference politically, and this is another piece of legislation in a series of six that proves the point that deficits indeed do matter and the consequence of them is exacerbated by this legislation.

Mr. Chairman, I ask the Members to vote for the gentleman's amendment. It proves the point.

Mr. GEKAS. Mr. Chairman, will the gentleman yield?

Mr. DAUB. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. Mr. Chairman, the majority leader has made an extraordinary admission here that we ought to go ahead and increase deficit spending and not put curbs on it like the one I am trying to put in place with this amendment because we have never done it before.

I say to the majority leader, "Let's start now with my small step." This is a small step that is a giant step in the future.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. GEKAS. We want to take that small step, and I ask the majority leader to put aside the history of deficit spending for once in his career and say to the American people, "I am willing to start with this little bill to show the American public that I want to pay as you go." The majority leader can say,

> I want to establish a precedent where every spending bill that we contemplate on this floor will be accompanied by a reasonable method of discharging the obligation of that bill.

That is what ought to be done. The fact that we have never done it before does not impress me. If the gentleman is willing to be married to the past, he may do so, but as far as I am concerned, it is now that we can start.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. DAUB. Mr. Chairman, it is my time, and I reclaim my time.

Mr. WRIGHT. Mr. Chairman, since my name was mentioned, I would appreciate the opportunity of answering the gentleman.

Mr. DAUB. Mr. Chairman, let me reclaim my time. If I may reclaim my time, I will try to manage things a little better, and if I have any time left, I will yield to the distinguished majority leader.

I guess the point I want to make is that regardless of whose fault it may be—Reagan deficit, Carter deficit, I do not care whose deficit it is—if the majority leader is serious, then any legislation in this body that adds to the deficit ought to be rejected.

Mr. Chairman, I yield back the balance of my time.

Mr. WRIGHT. Wait, Mr. Chairman. Will the gentleman yield?

Mr. DELLUMS. Mr. Chairman, I ask unanimous consent that the gentleman from Nebraska (Mr. DAUB) be allowed to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. Mr. Chairman, will the gentleman yield to me?

Mr. DAUB. I yield to my friend, the gentleman from South Carolina, and then I will yield to my friend, the gentleman from California.

Mr. HARTNETT. Mr. Chairman, I thank the gentleman from Nebraska for yielding.

I have been amazed, utterly amazed, at the logic which has been demonstrated here on the floor of this hallowed Hall this afternoon by those far more eloquent and experienced than I.

We have been led to believe that the reason for the large deficits which this Government presently incurs is—and I think it was put this way—because of the tax cuts for the rich and the massive buildup in defense. I would assume—and I must be very careful lest some Member takes down my words—that the answer to that is more taxes on the rich and the working people and less defense.

□ 1410

Nothing was added to the deficit when for the Lone Star State of Texas last week we added several millions of dollars to supplement the education of illegal aliens in this country, that had nothing to do with the deficit, though several hundreds of millions of dollars were spent. Money we do not have. Nothing adds to the deficit when appropriation bill after appropriation bill is forced down our throats, hundreds of millions of dollars over the budget. Why, that has nothing to do with the massive deficit. It is the tax cuts for the rich and the massive defense buildup. I find that impossible to believe.

The question again, rhetorically placed, does that mean then that less defense for the American people and more trust in the sacred nation that shoots down passenger planes? Or more taxes on the working class and on the rich, from whom are the only people that we get our taxes.

Now, I would submit to you that we have massive deficits.

The CHAIRMAN. The time of the gentleman from Nebraska (Mr. DAUB) has expired.

(At the request of Mr. HARTNETT and by unanimous consent, Mr. DAUB was allowed to proceed for 3 additional minutes.)

Mr. HARTNETT. Mr. Chairman, will the gentleman yield to me further?

Mr. DAUB. I yield briefly, because I promised the gentleman from California I would also yield to him.

Mr. HARTNETT. Let me finish, Mr. Chairman, by saying this and I appreciate the gentleman yielding to me; that there just might be some other reason why unemployment is high in this country. Because this Government pays an awful lot of people more not to work than the overtaxed employer can pay him to work. If you want to start looking at unemployment and I would say to my very, very eloquent majority leader, let us look into how much the overtaxed rich fellow can afford to hire new people to work, when some of you in Congress pay them more not to work than he can afford to pay them to work.

I thank the gentleman from Nebraska for yielding.

Mr. DAUB. Mr. Chairman, I thank the gentleman for his eloquent contribution.

Now I am happy to yield to my good friend, the gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Chairman, I thank my colleague for yielding.

I would like to engage briefly in a little further discussion. I tried to listen very carefully to the remarks my colleague made.

My question is this. First of all, do we as members of the Federal Government have a responsibility to address the human misery that we call unemployment in the country? If the response to the first question is yes, then I would ask the follow-on question. On the totem pole of responsibility that we have as members of the Federal Government, where do we place addressing the problems of unemployment? Is it third to supporting military juntas? Is it fourth to creating an arms race? Is it fourth to this or is it fifth to that? Where on the totem pole of responsibility do we place unemployment, if the answer to my first question is do we have a responsibility to address the human misery known as unemployment in this country?

I would appreciate a serious response to that, quite apart from the polemics that have just taken place on the floor of this Congress.

Mr. DAUB. Mr. Chairman, I appreciate the questions of my colleague and I take them seriously.

The first answer to the question is yes, and that is followed by the answer that in the spectrum of priority I place unemployment at the top of the list.

The CHAIRMAN. The time of the gentleman from Nebraska has again expired.

(At the request of Mr. DELLUMS, and by unanimous consent, Mr. DAUB was allowed to proceed for 3 additional minutes.)

Mr. DAUB. Mr. Chairman, continuing, and I thank my colleague for that time, the way in which I see us discharging our responsibility, at least to what I consider that first priority, unemployment, is to ask how we pay for it? If the gentleman will recall, in a disclaimer I said that regardless of which administration one would want to blame, or all of them, for the accumulated deficit which puts pressure on interest rates and adds more people into those unemployment rolls, in my view, the question was on this bill, how do we pay for it? That was my only question that started all of this.

A man named Booth founded the Salvation Army a couple hundred years ago in England, and we can recall, as we have read history, that those were days of pestilence, and famine, and very difficult times. He had an interesting theory. He said: "Come on in and I will give you some soup, but you can't come back for the second bowl of soup if you are able-bodied and if you can do a little work, and help out others in the same condition."

His theory was in the great book that he wrote: "Let's give a hand up to those who need help, not a handout." That is what we have got to be careful of in this bill, that we are not creating a system where it will be much more inexpensive to stay on unemployment than in fact to seek employment. That is my concern. How do we pay for it, not only as a Congress, but how are those people who are employed going to be able ultimately to pay the price?

Mr. DELLUMS. Mr. Chairman, will the gentleman yield briefly to me?

Mr. DAUB. I indeed will yield once more.

Mr. DELLUMS. Mr. Chairman, I thank the gentleman.

The gentleman raised the question, how do we pay for it? I will attempt to give the gentleman an answer to that.

In the military authorization bill there was a provision that called for a $6.1 billion expenditure for the B-1 bomber. Now, this program certainly costs much less than $6.1 billion.

I will give the gentleman a concrete answer. Cut the expenditure for the B-1 bomber by the amount of money for this program and we meet our No. 1 responsibility to create employment, and we certainly have bombers coming out of our ears and this country is not going to collapse if we do not spend $6.1 billion for the B-1 bomber.

The CHAIRMAN. The time of the gentleman from Nebraska has again expired.

(At the request of Mr. DELLUMS, and by unanimous consent, Mr. DAUB was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield further?

Mr. DAUB. I am happy to yield to the gentleman.

Mr. DELLUMS. Building a B-1 bomber, but I have a feeling that our country may collapse from within if we do not address the human misery that is taking place in this country. Millions of human beings are not only feeling the handicap, but people emotionally are being harmed by not being able to find a job.

I thank my colleague for yielding. I could stay here all day to talk about this issue, this great human misery in this country.

Mr. DAUB. Mr. Chairman, if I may reclaim my time, I would like to conclude by suggesting that I am not one of those who likes to say: "Oh, gosh, there are more people employed building the B-1 bomber, so if we cut out that, then we are going to have a whole bunch of unemployment over here." I do not like to engage in that kind of cut to save here, to reemploy there, and cut employment here; so I think the answer should be, on its merits, since we cannot pay for this particular piece of legislation defeat the bill.

Mr. CAMPBELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I had not intended to engage in this, but as I sat and listened to the debate, some things struck me as rather funny. We have gotten off into defense. I heard the majority leader on the floor saying that we had cut domestic spending $47 billion a year each year. I look forward to seeing the majority leader's remarks printed in the RECORD so that we can verify those figures.

I further heard the majority leader say that we have had the massive defense buildups and the tax cuts for the working people and the rich. He does not mention the working people often, but they received the tax cuts.

The thing that I should like to remind this House of, and I think it is very important to know, is that if someone does take the well and discusses the defense buildup or defense as one of the reasons for the deficits, then I find it rather ironic that that same person voted for the Department of Defense authorization conference report.

Now, I have to ask: Why do we not speak in a straightforward manner and with commonsense? After all, we have to have national defense.

Someone asked the question: "What is the top priority? Is it unemployment? Is it this?"

No. Unemployment is a great domestic priority that we must be concerned with. Before that, I would say we have to be concerned with the freedom and defense of the Nation so that we might in fact be worried about unemployment. I would put it in that perspective.

I think that as we argue this, we must recognize that, yes, we have a deficit problem and, yes, we can take it on here and we can engage in partisan rhetoric or whatever we want to call it; but the fact is that we do have a problem and finding blame is very easy, if someone wants to point the finger. I could point the finger and say that in 1980 we had a 21½-percent prime rate of interest and that caused a lot of our problems because those high rates cost us not only as individuals, but as a government trying to finance our programs and our deficits. We have been successful in bringing those rates down from 21½ percent to 11 percent. Does the Congress really believe we should not have addressed the problem of high interest?

I could point out the inflation rate of 13½ percent that we now have down to less than one-fourth of that, but I do not think that serves any purpose. Now, if it serves a purpose over there with those who would engage in it, fine, then engage in it.

The fact is that we have fundamental problems in this country. Those fundamental problems literally manifested themselves in the high interest rates and high inflation that almost wrecked this country. We have now begun to get these problems under some control. We have had the largest economic recovery in one quarter in the last quarter than we had in over 15 years. The country is beginning to move.

Now, do we undo what success we have had or do we not? I am not arguing specifically on this particular piece of legislation. I am just saying we had better focus on it. No, we do not create deficits by reducing taxes. We create deficits by spending, period.

□ 1420

Taxes can be a certain amount and you can spend a certain amount, or you can spend a lesser amount. If you lower taxes and do not lower spending, obviously you are going to have some problems because you reduce your income and do not reduce your outlay.

That is what we did. We did not reduce our outlays. It is just as simple as that. Stop and look at it.

We can go a little further. We can talk about unemployment in the context of the recession. We had a recession. It caused problems. We needed to deal with it. But I do believe this: I be-

lieve that the best way that we can help the most people in the country is to keep the inflation rate down, to work to reduce the deficits by controlling some of our automatic outlays that exist in our budget, and that is 76 percent of this total budget that we have no control over, that we do not allocate, that we do not vote on, because they are automatic expenditures. And did you know that over the last decade that many of these automatic expenditures exceeded inflation by some 24 percent in outlays? Until we are willing to address that problem, we should not even be sitting here engaging in this type of debate. We should, in fact, look at the structural problems in the budget in order to deal with these problems.

The truth is that we have put this country on automatic pilot and we have indexed programs that are increasing payments faster than the rate of growth of our income. We are spending faster on automatic outlays than the wages of the working people of this country are going up, and they well know it.

Finally, I will leave you with this: I hope that I did not hear and I do not think I did, but I want to make sure that I did not hear the majority leader, in discussing the tax side of it, say that he was leading a fight to do away with tax indexing. I would love to hear him address that since tax indexing does not help the people at the top, but rather those on the way up.

I yield back the balance of my time.

Mr. DELLUMS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take the well because I think it is important to try to assume our own time to respond.

First of all, I do not understand one aspect of this debate. Clearly, the budget is a statement of our priorities. The budget is a statement of what we perceive to be important. If my colleagues on both sides of the aisle are stating clearly and unequivocally to ourselves and to the American people that addressing the human misery of unemployment is indeed a high priority, if not the No. 1 priority, then it is a rational and intelligent question to ask, how do we finance it? That question has to be asked right across the board, because what our business here is about is balancing priorities. You have to ask that question on any piece of legislation, how do we finance it? And you arrive at an ultimate budget based upon the balancing of priorities.

Now, several of my colleagues on this side of the aisle have raised a question, how do you finance it. That is an appropriate question. But I do not think that it is appropriate to dismiss an honest answer to that question.

This bill is $3.5 billion. Now, how do you finance that? We just passed the authorization bill for the military budget and in that authorization there was $6.1 billion for the B-1 bomber program. Now, some people may think that is extraordinarily important to the national security. There are some of us on both sides of the aisle who voted in opposition to that position. We have an opportunity in the appropriation process if we honestly believe that this piece of legislation that addresses the problem of unemployment ought to be dealt with, but the only problem is how we finance it.

But the way we finance it, there is a specific thing we can do. You can go back and you can take that $6.1 billion, that is just one example, and say we are not going to spend $3.5 billion of that, because we do have the FB-111 bombers, and we do have the B-52 bombers. And I would suggest to my colleagues we are engaging in hyperbole if we think the country is going to collapse because we do not spend that $6.1 billion. Take the $3.5 billion out of the appropriation process and pass this legislation and say to the people this is the way to finance it. That is what our job is about, balancing priorities. I am suggesting cutting the B-1 bombers as opposed to the program designed to address the human misery of incredible numbers of people who are unemployed in this country, who are not only feeling that economically, but people are feeling that emotionally. Do you know what happens to people when you strip them of their dignity and their capacity to engage in meaningful employment? We ought to be doing something about that. And you can take that $3.5 billion out of this massive and huge and unnecessary and bloated military budget.

Mr. GEKAS. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. The gentleman is exactly on the point. The point of my amendment is that we must start to address, simplistic as that may sound to many on your side of the aisle and some on this side of the aisle, we must start at some point when we pass a spending program for whatever purpose that we ought to be attaching to it the responsibility of how we are going to pay for it.

Now, given what you have said, the proper thing to do is to pass my amendment and then as a Congress sit down to determine where we are going to get the $3.5 billion to pay for this bill, which you acknowledge should be done. It might be with the Committee of the Whole, or the consensus in the House, that we are going to take a little bit from the B-1 bomber, if a new priority is determined there, or something from a wasteful social program that is doing no good, and bring out a package of $3.5 billion to pay for this bill which has a higher priority in the minds of many than does other kinds of legislation.

But we will never get to the point of discussing that kind of thing if we rashly move ahead and spend money we do not have, add $3.5 billion to the deficit, and never get to the point where we can look over the rest of the budget to see what we can draw away from needless or wasteful programs to pay for what you feel is a priority. That is the whole point.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. DELLUMS was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. Mr. Chairman, I think it is important to answer my colleague's question. That is why I did not interrupt the gentleman's statement.

Let us be very honest here. I do not question the gentleman's integrity. Let us be very honest with each other. The reason why people have problems with the gentleman's amendment is not based on the rationality of the amendment, but on the interesting motivation that gives rise to the amendment at this particular moment. A number of people are questioning the efficacy of testing this idea on this particular fragile piece of legislation which is a social program, and we all know that we are operating in a very conservative atmosphere in this Congress where social programs—if we are going to be honest, we all know that the programs we have been hitting in this Congress are the social programs. We have done nothing about the military budgets. We all know that. And against the backdrop of the Korean plane 007 incident there is even greater reluctance to move against the military budget. So, what do we hit? We hit the one or two programs designed to deal with the problems of the least among us. And it would seem to me that one of the tests of Government is what do we do for those who are powerless in our society, not for those who are the powerful.

We are talking about the unemployed human beings. The question that I have in why do we now bring this reasoned approach on this particular legislation when you and I both know that a number of Members may vote with you on the reason of it, but then when we come to addressing the military budget and other legislation where we can appropriately take this $3.5 billion, those votes are going to evaporate. And I am willing to bet whatever necessary that I am more correct than this gentleman on whether or not my colleagues with integrity and courage follow up on that. And you know that I am telling the truth.

Mr. GEKAS. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. I am willing to take the blame if any there be for not attaching this type of amendment to others in the past. But that is no reason not to start somewhere. It did not occur to me that this kind of an amendment could be salutary and helpful to the process until very recently and this is the bill on which coincidentally it came. I believe very wholeheartedly that we ought to start now.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. GRAY and by unanimous consent, Mr. DELLUMS was allowed to proceed for 3 additional minutes.)

Mr. DELLUMS. Thank you.

I am simply saying to my colleague the problem is simply this. It is a question of timing. If we really believed in this, we have been debating the military budget and other more controversial matters for the last several months and suddenly the amendment occurs on a very fragile piece of legislation known as an employment bill. And you know we are going to have trouble trying to pass this legislation. The Jeffords amendment already passed which puts this bill in some jeopardy. And I think that that portends a very difficult vote on final passage with respect to this legislation. And that is the problem that I see.

If this gentleman could guarantee that we take $3.5 billion out of the B–1 bomber program, then maybe the gentleman's amendment would make some sense. But if you cannot guarantee that at this moment, where are we going to get the finances, all we end up doing is wrecking a piece of legislation designed to address the human misery. That is what I am opposed to; not the reason of the gentleman's amendment but the timing of the gentleman's amendment and whether or not we ought to have begun this at the early part of the year so this gentleman would not feel such great suspicion as to why this particular bill is the one that we start down this road on.

□ 1430

Mr. GRAY. Will the gentleman yield?

Mr. DELLUMS. I yield to my colleague from Pennsylvania.

Mr. GRAY. I want to thank the gentleman from California for his eloquent arguments, particularly with regard to my colleague from Pennsylvania's amendment, whom I have great respect for as a member of our delegation. But also to just make several points.

First, we have gone through a budget process in this House. We fought the issue of the budget and the Federal priorities; and many of us raised the question during that budget process. But where was the alternative budget of many of our colleagues who now are so concerned about deficits, who are now so concerned about this one program?

There was no alternative budget to demonstrate all of those priorities that we have heard for the last 2 days on this floor.

We also asked where is the budget that the President of the United States talked about in February, and not one Member of this House, including the President's own party, would bring that budget to the floor as a statement of those priorities.

Now, suddenly, as we talk about trying to lower the unemployment for those who are long-term unemployed, we are into a debate on the budget process, when those who had an opportunity to participate in a budget debate refused to do it, did not offer an alternative, did not even offer the alternative of their President.

Second, I would point out to those who argue that this raises the deficit, that I do not know what the Secretary of the Treasury would say since all of us know right now in the administration there is a lot of confusion. We have the Secretary of the Treasury saying deficits do not matter, whereas before the Budget Committee for the last 2 years he said deficits do matter. Now suddenly when this administration has a deficit, suddenly in 1983 when we are staring at a $200 billion-plus deficit, the same Secretary of the Treasury who sat before the Budget Committee in 1981 and 1982 and said deficits do not matter, now says they do.

The CHAIRMAN. The time of the gentleman from California (Mr. DELLUMS) has again expired.

(On request of Mr. GRAY and by unanimous consent Mr. DELLUMS was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. I yield to the gentleman for Pennsylvaina.

Mr. GRAY. The Chairman of the Economic Advisers of the President, the same administration, says deficits do matter.

So I am wondering that even if the gentleman's amendment was passed, and I agree with my colleague from California this is an inappropriate time to do it. But even if it was passed, I am wondering what the administration and the Secretary of the Treasury would say about it.

The other thing I would point out is the fundamental question of what are we doing to the deficit. I say, and I think many of us say in this House that it is better to have people on the payroll doing constructive public works in our communities rather than on the Federal rolls, on welfare, on food stamps, and unemployment compensation.

The Congressional Budget Office estimates that if this bill is passed we reduce by $400 million the outlays of taxpayers' money for food stamps. We reduce by nearly $900 million the taxpayers' money for welfare. And it is estimated that when you take the net cost it will not be $3.5 billion but by putting people to work in public works jobs to rebuild our communities in real jobs that we are going to save $1.8 billion in taxpayers' money for subsidies for the very same programs that many of my colleagues who are arguing against this bill always vote against and want to reduce.

So, therefore, the real issue before this body is a very simple one, and that is do you want to wait 3 years, that is the best estimate of the administration, 1986, before we get down to unemployment of 7.2 percent. Do you want to wait 3 years and say to those who are long-term employed: "Just wait, the economy is recovering. Our best estimate from the administration is that it is going to take 3 years. Certainly you can wait 3 years and have the deferral of your hopes, the deferral of your dreams."

The CHAIRMAN. The time of the gentleman from California (Mr. DELLUMS) has again expired.

(On request of Mr. GRAY and by unanimous consent Mr. DELLUMS was allowed to proceed for 1 additional minute.)

Mr. DELLUMS. I yield to my colleague.

Mr. GRAY. The very same people who say this is not an adequate way to treat the problem are the same people who say let us cut food stamps, let us cut welfare.

You cannot have it both ways. If you want to reduce welfare, if you want to reduce unemployment compensation, if you want to reduce food stamps, then put people to work.

If you do not want to reduce spending on food stamps and welfare, if you want to keep unemployment high, then vote against this bill and go back and tell Americans to wait 3 years for an economic recovery that many economists, including Presidential advisers, are not sure is going to take place.

Then, at the same time you tell them you voted against those support systems from the Federal Government to provide any help for the unemployed.

I say that is wrong.

I said we had a debate on this in the budget process and many of those who are now standing here for the last 2 days arguing against this bill by saying that it increases the deficit, where were your voices when you could have proposed an alternative?

We passed a budget and it was passed with bipartisan support.

The CHAIRMAN. The time of the gentleman from California (Mr. DELLUMS) has again expired.

(On request of Mr. GRAY and by unanimous consent Mr. DELLUMS was allowed to proceed for 1 additional minute.)

Mr. GRAY. We also reached agreement with the other body, controlled by the administration's party, a Republican Senate, and in that budget proposal was the money for this bill. So thus we are not going outside the budget if we pass it.

It is a simple question and each Member has to answer it in their own hearts and facing their own constituents. That is do you want people to wait 3 years or do you want to throw out some lifeline for the hard-core unemployed.

I do not know about anyone else, but this Member thinks that we ought to throw out a lifeline now and not ask people to wait 3 years.

(By unanimous consent Mr. DELLUMS was allowed to proceed for 30 additional seconds.)

Mr. DELLUMS. Very briefly, Mr. Chairman, I would like to thank my colleague for a magnificent contribution to this debate. I think clearly he has raised a very significant set of issues.

Finally, $3.5 billion is a minuscule amount of money to address the parameters of unemployment in this country. This is a minimal effort. We can find the $3.5 billion to finance this. It is clearly a red herring to suggest that we cannot.

This gentleman would like to see us on the floor debating a $20 billion or $30 billion jobs bill to really make some significant effort at addressing the total parameters of unemployment. The $3.5 billion is a minimal effort here that we ought to be involved in, and to some way suggest that this is going to harm the budget, this is going to catapult the budget deficit to such magnificent levels that it brings the economy crumbling is to engage in gross hyperbole.

We have a responsibility to the unemployed.

Mr. HAWKINS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am really surprised. I thought we were handling an employment and training bill. I never dreamed that there would be those in this House, in view of the human suffering that prevails in our country today, who would use this rather modest bill as a means of venting their ideology.

I think that it is somewhat disgraceful that there are those who would lead their own party, and they are on the other side of the aisle, down that road that I thought we had put behind us a long time ago.

This is not a partisan issue. I think the amendment directly puts it into politics by designating to a political appointee that prerogative of trying to tell us whether or not we should pass an appropriation bill.

I am surprised that heretofore no voice has been raised against any public outlay bill that we considered. This is the first time, and I doubt seriously if such an amendment will be raised after this bill is passed.

Then what are we venting that displeasure on? It is on a jobs bill. Is it jobs that they are objecting to?

The implication is that jobs add to the deficit. There has been no proof of that.

To the contrary, all of the evidence suggests that employment, putting Americans to work, will lower the deficit.

□ 1440

Why is the outcry against this? Is it that they desire, those who raise their voices, desire to keep a pool of unemployed people to depress wages, in order to break the unions and other organizations of wage earners? Is it because they want to split people politically so as to exploit them in order that individuals will be competing with fewer and fewer jobs in the economy?

Their opposition seems to suggest such a strategy.

I think that all of the hearings which the Education and Labor Committee conducted on this issue have documented that employment pays for itself. If it were otherwise, then why is it since 1981, with unemployment mounting, with more than 3 million persons put out of jobs, why did not that lower deficits? It is a question that the deficits are partly due, obviously, to unemployment, and that employment would certainly reduce the deficit.

I think that is obvious. And I have seen nothing that would suggest that those who are supporting this amendment would be able to offer any evidence otherwise.

It is just, it seems to me, that there has been during this debate only a discussion of dollars and cents. There has been no suggestion of human values that are lost in the question of high unemployment. It has been documented that unemployment adds to suicides, it adds to crime, it adds to mental stress, it adds to other health deficiencies, it adds to all of the problems that make us not a great society that we would like to be in the eyes of the world. We stand 13th in health, we are losing certainly in the field of housing, we are losing in technology, and we are losing in the employment and training programs that we once were building. We are now falling behind.

Can such a nation possibly produce the money to pay for the defense? I am one who voted for most of the defense outlays. I did not ask and no one else asked who was going to pay for those? I believe the way to pay for those needed defense outlays is to have people producing. Recently the Catholic bishops issued a statement in which they decried unemployment among us. They pointed to the problems of deliberately causing unemployment in our country and they divided us into three groups, those who are its victims, those who permit unemployment to prevail because we do not raise our voices against such amendments as this, and those who inflict, deliberately inflict, unemployment. And we have those today who are raising their strong voices, not against unemployment, but to inflict unemployment which the Catholic bishops in their statement, typical of other religious faiths as well, called the moral tragedy of our day.

Are we then to continue this tragic moral degradation simply because we want to blame it on deficits, which is absolutely not the cause?

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. HAWKINS was allowed to proceed for 2 additional minutes.)

Mr. HAWKINS. Last year we paid out in excessive interest rates $60 billion, wasted; it went to lenders, those who were affluent, who had the money to lend. And all of us paid for that, not only in terms of the deficit, in taxes, but as consumers. Did we see these same voices raised against that? That is three times more than we paid out on education, and housing, and economic development.

It is 15 times more than we paid out on these simple little job programs.

And now we are going to do the same thing again; we are going to wash this excessive interest rate aside and dismiss that as a cause of deficits, we are going to dismiss monopolistic practices as a cause of deficits and all of the other things. And I would not use national defense, because to a large extent I agree that we should have adequate defense. We may not need all of the weapons that we have voted the money for, but certainly we are not going to pay for it by keeping almost 20 million persons in this country unproductive.

This is a step in the right direction.

It is not the total solution. We need to change a lot of things around here. But I submit that employment pays for itself; it does not add to the deficit and those who would support this amendment are merely opposing a jobs program; they are opposing a jobs program in the light of the human suffering that unemployment causes, and they are the ones who might be

referred to as the ones who would inflict unemployment on the people of this Nation. It would destroy our society, it would bring us to the brink of disaster, and I would hope that they would consider really the results of their action.

Mr. MILLER of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as I am sure many of you are familiar with, I introduced the original pay-as-you-go budget proposal to the House of Representatives 2 years ago.

And I think it is proper to question why this amendment comes at this time because 2 years ago when we had an opportunity to place the entire Government on a pay-as-you-go basis, only two members of the Republican Party supported that vote and that vote later lost by a handful of votes, at which point the entire Government, conservative programs, liberal programs, social programs, defense programs, would have been on a pay-as-you-go basis. And according to the Congressional Budget Office we would have had a dramatically reduced deficit this second year of that proposal.

But that did not pass. And what we see now is a suggestion that this program must play by an entirely different set of rules.

I do not think that that is proper. But I do think that the concept of pay as you go is quite proper. And I want to say to my colleagues on the Republican side of the aisle, that there is a resolution that I have put out that many, many people have cosponsored, to do exactly this: To insist that the budget process follow the pay-as-you-go system. I have yet to receive a Republican coauthor. But you can call my office, the number is 52095.

I think it is very important that we move in the direction of pay as you go and it is my intention to see that we do not enter another budget cycle without giving the Members of this House an opportunity to vote on that basis, because I think, then, the debate that my colleague, Mr. DELLUMS, thirsts for and that I thirst for will only then take place. Then within the confines of a closed system will we be able to match the priorities of this administration, and the priorities of this Congress, and the priorities of the people of this country.

And we will find out whether or not we are prepared to sacrifice the unemployed to the defense budget, or the Clinch River, or to the deficit.

We will find out whether or not we are serious about educating our children or whether we are serious about a quality Defense Establishment, whether we are prepared to pay excessive prices for spare parts or weapon systems that do not work; because that is what we are going to engage in in the next budget process because we are about to declare in the next few days that this budget process did not work, because we have not reconciled the figures that are necessary

And I say to the gentleman who suggests that it is not defense, the defense budget was increased some $30 billion. But there is no revenue to pay for that $30 billion increase.

It is all coming out of the deficit, all of it. There is no money to pay for this bill. This is a charade. You see, I think in many ways we ought to accept this amendment and let us find out if this administration believes that unemployment is a priority.

Unfortunately, unfortunately, they only have to make that determination on this program, because they have already signed a $187 billion defense bill so they need not certify whether that one comes out of the deficit. We know that it does link everything else we spend.

And what we have found out, certainly I have found out in my 9 years in Congress, is the deficit is a political shock absorber, you use it for those purposes which you want to look like you are doing something but you do not have the courage to tell the American people that that is really what you want to do. We do not set priorities in the Congress of the United States. We vote for guns, and butter, we vote for margarine, we vote for everything, and we simply charge it off to the future generations.

□ 1450

We keep it up and we are going to look a lot like the Third-World countries that are having trouble with the IMF. We simply will not be able to service the debt.

So I would suggest to those Members who want to raise this issue on this bill, that they ought to do more than that, they ought to join the effort for a pay-as-you-go budget process, where if we do not pay for it, we do not spend it. It is that simple.

And I think it is very important that we understand by the same token that we should not single out this program of opportunity, this program that comes along and nobody, myself included, has not raised this issue with respect to other priorities. And then we will find out, if we adopt the pay-as-you-go system, we will find out, as I think the sponsors of this resolution in the Democratic Caucus, from the far right to the far left, we will find out what in fact are the priorities of this country.

The CHAIRMAN. The time of the gentleman from California (Mr. MILLER) has expired.

(By unanimous consent, Mr. MILLER of California was allowed to proceed for 2 additional minutes.)

Mr. MILLER of California. So I would hope that this debate will put the Members on notice that in fact this is the direction that we are going to move in, that this is the direction by which Members will be given an opportunity to determine what are the priorities of this country.

And I think what we will find out, we will find out that in fact the priorities of this country are to carry out the compassionate programs, to help the unemployed, the hungry, the elderly, but not to do it at deficit financing. Not to do it at the expense of future generations.

And I think what the Members will find out as they examine the pay-as-you-go proposition, it is neither liberal nor conservative, it is neither Republican nor Democrat, it is simply a matter of setting priorities that every politician has said to their constituencies the reason they came here, either to set new priorities or different priorities, but that debate can never take place as long as the deficit continues to exist because it is the political escape hatch by which we are able to promise more than we are able to deliver. The political escape hatch by which we tell the people of this country we are compassionate, we are concerned, but then we fail to act on those compassions and those concerns.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, having raised this issue of deficit spending and balanced budgets on several programs prior to this, I am always amazed by the arguments that I hear. We usually get down to an argument that essentially says, more spending is a cure for too much spending. And that is often the argument that we hear coming from the liberal side of this Congress.

And then it gets wrapped up into the kind of logic that the majority leader used out here this afternoon to the cheers of the members of his party. Essentially that logic comes down to the fact that it is defense spending and tax breaks for the rich that are the problem here.

Well, I think maybe it is time to start talking a little bit of sense on that issue. We have in this country a deficit that is about 90 days of Federal spending. In other words, it takes 90 days of Federal spending to spend out what we have as a deficit, about $200 billion.

If you taxed away every penny of income of every individual beyond $75,000, in other words, the people who are in the upper income ranges in this country, took every dime away from them, had confiscatory taxation, took every penny that they made away from them, you could run the Government for 14 days.

So that means then that the taxing of the rich gives you 14 days. If you have absolutely confiscatory taxation, that gives you 14 days of that 90 days.

And then the majority leader suggests that the other 76 days can come out of the defense budget.

Well, that other 76 days amounts to $167 billion in cuts in the defense budget. A 72-percent cut in the defense budget.

Now, I would suggest that even the people who are antidefense here in the Congress do not suggest that we could get along on a $63 billion defense budget. I would suggest that no one here can really say that we can provide an adequate defense for the country.

So what I am saying is you have got to go beyond the simplicity of the argument that taxing the rich and taking it out of defense is going to eliminate the deficit. And that gets to the amendment of the gentleman from Pennsylvania.

It seems to me that one of the things that we have got to begin doing is start saying that when you are adding new programs to the budget that they have got to be looked at in light of the deficit. And if we can justify this program—and Members on that side of the aisle have provided a number of excellent justifications of why work is better than welfare and why this program might be justified, at least from their perspective—then we have got to figure out some place where we are really going to cut that goes beyond the simple solutions of tax it from the rich and take it out of defense. We have got to find some other areas of domestic spending to begin to bring down, because you cannot do it out of those two areas. Those two areas alone are a simple appeal to emotionalism in the country that have no basis in reality.

I think it is important to recognize that when the majority leader gets up here and gets cheered by his party for making those kinds of statements that they are simplistic nonsense in many ways, because no one is going to cut defense budget by 72 percent and no one is going to confiscate every penny of income in this country beyond $75,000.

Mr. SAVAGE. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Illinois.

Mr. SAVAGE. I thank the gentleman for yielding.

Well how does the gentleman answer the question that was raised on the floor by our colleague from California that if what the gentleman says is so—you cannot eliminate the deficit if you take all of this from defense—why then does the gentleman object to the $3.5 billion in this bill if you were trying to keep anything from being added to the budget? The gentleman did not object when they increased the defense budget this year.

Mr. WALKER. I would say to the gentleman that I happen to believe that we need a strong defense. I did vote against some aspects of the defense budget. I did think that there was some overspending in there and I voted against some of those programs. So it is not an inviolate kind of thing.

Mr. SAVAGE. The question is not whether the gentleman believes in a strong defense, as do most of us, I am sure. The question is does the gentleman believe in $3.5 billion more in a $200 billion defense bill than the gentleman does for $3.5 billion for jobs. Not whether the gentleman wants jobs instead of defense. The question is whether would the gentleman believe in $3.5 billion more in defense as opposed to $3.5 billion for jobs. That was the question of priorities that he raised.

Mr. WALKER. Well, to some extent I suppose that that would depend upon what we are spending the $3.5 billion for. There are some programs in defense that I would not spend that for.

I would ask the gentleman, does he think $63 billion would be enough to run an adequate defense for this country?

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has again expired.

(At the request of Mr. SAVAGE and by unanimous consent, Mr. WALKER was allowed to proceed for 2 additional minutes.)

Mr. SAVAGE. The question is not whether the $63 billion is sufficient. We are talking about the $3.5 billion, not the $167 billion difference. What priority does the gentleman give to jobs?

Mr. WALKER. The question I posed to the gentleman is: If the logic of the majority leader holds up, that we can eliminate deficits simply by taxing the rich and taking it out of defense, the two places that he said that we could do it, then that involves confiscatory taxation of every dime of income beyond $75,000, plus a $167 billion cut in defense. That leaves us with a defense budget of $63 billion. Can the gentleman tell me that $63 billion is enough money to run the defense establishment of this country?

Mr. SAVAGE. The question that I am trying to put to my colleague in the well is simple. That is, with regard to the $3.5 billion which is involved in the discussion here, if the gentleman is so concerned about the effect on the deficit of that $3.5 billion, what was raised here is: Why did the gentleman vote more than that in addition to the defense budget this year?

□ 1500

Mr. WALKER. The gentleman may remember that I have come to the floor on numerous occasions—and I do not believe the gentleman has ever supported me—to insist upon us obeying the balanced budget law that we passed some years ago in this Congress, and I do not believe I ever remember the gentleman agreeing with me on the fact that we ought to obey the law of the land which requires balanced budgets.

Mr. SAVAGE. Is not the gentleman missing the question?

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has again expired.

(On request of Mr. MAVROULES and by unanimous consent, Mr. WALKER was allowed to proceed for 2 additional minutes.)

Mr. MAVROULES. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Massachusetts.

Mr. MAVROULES. I thank the gentleman for yielding.

Mr. Chairman, let us see if we can bring this back to perspective here.

In Jimmy Carter's last year in office, I believe, when he left and they calculated all of the spending and the revenues, I think the deficit at that time was about $57 billion dollars. In the course of 3 years we are up to somewhere around $200 billion, give or take a few billion dollars.

I am on the Armed Services Committee, and I have voted for an awful lot of these authorizations. But I think when we talk about priorities it is very important that we take into consideration some of the arguments for defense, some of the arguments against overruns and some of the arguments for the defense bill. I think deep down, and hopefully, we want a jobs program which is effective. Yet when we came forth with a defense authorization bill on the floor of the House, I did not hear any Member get up on that side, or on this side, for that matter—let us be entirely fair—who talked about the cost overruns when we talked about a little screw or a piece of metal that cost about 40 cents and where they begin charging about $110 for. There and there alone we could probably pick up $2 billion or $3 billion or $4 billion.

So what we are saying is, there is some waste in some of those defense programs.

Mr. WALKER. Let me regain my time. I do not doubt that for 1 minute, and I think it is extremely important that we deal with the waste. I think one reason why some Members on our side of the aisle would not mention that is because it was the audits done by the Reagan administration that turned up a lot of that waste that we have heard about recently, and that is one of the reasons why we now are proceeding to do something about those wasteful expenditures. And we should do it. But I do not think the gentleman is suggesting that there is $167 billion worth of waste in the defense budget.

Mr. MAVROULES. No. I am not suggesting that. As a matter of fact, I stated before that I voted for a lot of these programs, so, therefore, I am supportive. But the point is you are talking about $3.5 billion here, we can put some people to work. People are really down and out, as our colleague, the gentleman from Maryland, stated just the other day. Yet I do not see anyone getting up here asking that we cut from the defense budget at least $5 billion; $5 billion as a figure, without itemizing that figure, would take care of some of the waste. Not once has that been suggested.

Mr. WALKER. If the gentleman will allow me to reclaim my time, if I recall correctly, some of the committees of this Congress did make some rather dramatic cuts in some of the recommendations of the administration in terms of defense spending. In the committees we acted very responsibly in that regard. I think some of our votes were an endorsement of some of those cuts made by the committees of jurisdiction. I think that that is a responsible course of action in this particular body.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has again expired.

(On request of Ms. FIEDLER and by unanimous consent, Mr. WALKER was allowed to proceed for 2 additional minutes.)

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentlewoman from California.

Ms. FIEDLER. Mr. Chairman, I think that one of the points that has been missed here is that we are talking about taking money out of the defense budget in order to put it into an employment program.

The defense budget provides a tremendous amount of employment in this country. The question is not so much whether you can take it out of the defense budget in order to provide employment through this program as opposed to the defense budget. The question that we have to answer in this Congress is: Is this particular proposal one which we feel merits our support based upon the expenditure and based upon the available resources? I think that is something that each Member is going to answer in a very different way.

One of the things that consistently irritates the devil out of me is the fact that people keep talking about taking money out of the defense budget as though it is sitting in a pot someplace simply brewing diamonds or gold. Instead, in fact, it is providing a whole host of jobs for Americans all across the country, all the way from our armed services to people who are working in Lockheed or Rockwell or Rocketdyne or Litton Industries.

So let us not confuse the fact that when we invest in defense we are actually turning that money from our Federal Government back into the hands of American workers all across this country. We are not simply throwing it out the door into some stream of garbage. It is becoming a part of the basic economic resources of a number of districts, including the majority leader's district, when he consistently comes to this floor and asks for special defense spending for his own district, and then, on the other hand, says, "Well, we should not be spending so much on defense."

It is OK on one side, but it is not OK someplace else.

The real issue is: Is this bill worthy of support? Is it important enough for us the spend additional dollars, adding to the deficit, if in fact that is what we are going to do? And I think that is the question that has to be asked, not whether or not it ought to come out of somebody's pocket who happens to be working on the development of the B-1 bomber.

Mr. WALKER. I thank the gentlewoman for her comments. It seems to me that it is important to get back to the point that I made originally, and that is that if you are to implement the programs suggested by the majority leader to eliminate deficits in this country, you would have to tax away every dime of income beyond $75,000 and take $167 billion out of the defense budget, neither of which we are going to do.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has again expired.

(On request of Mr. GRAY and by unanimous consent, Mr. WALKER was allowed to proceed for 4 additional minutes.)

Mr. GRAY. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to my colleague, the gentleman from Pennsylvania, who has been so articulate on the subject on the floor.

Mr. GRAY. I want to thank my colleague from Pennsylvania for yielding.

Mr. Chairman, I continue to be disturbed by our debate. I do not think that the gentleman from California who spoke earlier was suggesting that we take money from defense to fund this bill. I do not think the majority leader was making that suggestion.

What I hear us doing again is discussing defense policy, budgetary policy. We have had an opportunity to do that. And to a bipartisan vote, after much debate, we passed a budget. And many of us voted for that budget and helped to form that budget. I was one of them. That budget called for a 5-percent real growth in defense.

Now, to many Members on my side of the aisle, that seemed a little too much. On the other hand, there were Members in this body who said it was too little. But after debate here and in the conference, we came up with that.

But the point I think that we ought to be discussing is not whether or not we should take money from defense. That is not the issue. Because if you want to talk about the budget, this bill that we are discussing was a part of that budget. It was there in an area called the reserve fund, the exact amount of money. And the author of the bill has already offered an amendment, which we have approved 417 to zero, reducing the original amount down to the budget level.

The real issue that we have got to discuss is not defense policy, not budgetary policy. The question is whether or not the Members of this House feel that this is an adequate vehicle to address a significant problem that even by the White House experts is predicted to last for at least until 1986 under the most optimistic economic recovery terms. And on top of that, the gentleman from California, the author of this bill, has put a trigger into the bill so that if, let us say, in the next 6 months the economy picks up, what would happen is that the money would not be spent.

So I would simply ask my colleague from Pennsylvania: First, does he believe that there is a need to address the long-term unemployment? Or are we to ask them to wait 3 years until the projected full recovery takes place? And, second, does the gentleman believe that we ought to reduce social spending in areas like food stamps, welfare—and this vehicle will reduce those expenditures by $1.8 billion—so the real cost to the American taxpayer for this bill is not $3.5 billion but it is $1.7 billion with the net savings.

And that is my question. Not the budgetary policy, not defense. I am for a strong defense.

Mr. WALKER. I thank the gentleman for his comments, and he presents some very sincere arguments on the floor. I would say to the gentleman that I also think we should address the problem of long-term joblessness. I think we ought to get about the job immediately. I might not agree that the way to do it is by increasing deficits. I think increasing deficits in order to bring about more jobs tends to raise interest rates and tends to eliminate productive jobs.

There was a study done of the CETA program of a couple of years ago, which indicated that while the CETA program in a particular month had resulted in 425,000 jobs, indeed the private sector of the economy during that same month had created 440,000 jobs and would been able to create even more had we not had the interest rate policy, and so on, which that kind of spending had generated.

So while I certainly agree that people working do move off some of those welfare-related rolls, the fact is that the net macroeconomic impact on the economy of that Government spending is the same.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER), has again expired.

(By unanimous consent, Mr. WALKER was allowed to proceed for 1 additional minute.)

Mr. WALKER. What we need to do is to begin to move toward policies to address joblessness that speak to some of the real problems that we have created as a government.

I have raised on a number of occasions on the House floor instances where I believe that Government is contributing to unemployment through the laws and regulations that we have developed here. I think the appropriate way to address this issue is to put the 2 million people to work that Government is preventing from working today as a result of the laws and regulations of this Government.

□ 1510

That would be a far better way. It would involve no expenditure of Government money. As a matter of fact, it would involve Government backing out of some of the things that we do to distort the labor markets at the present time. I think that would be a far better way to address the joblessness that affects particularly the people at the low end of the income categories in this country than the kinds of programs that are being addressed here.

But I do hope to try to improve this program. As I have mentioned before on the floor, I intend to offer some amendments that would provide that this program at least go 100 percent to people who are unemployed and move in that particular direction.

Mr. HARRISON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think my distinguished colleague from Pennsylvania, the author of this amendment, and I started something here about an hour and a half ago. I asked the gentleman, after he presented an articulate and vehement defense of his amendment, if he proposed to attach it to the defense authorization bill as well. We still have not heard an answer to that question, and I do not think any of us should hold our breath until we do.

I want to assure the gentleman that if he does attempt to attach such an amendment to the defense authorization bill, I will not vote for it, because we need a national defense and we need a defense authorization bill, and the net results of putting this amendment on that bill would be the same result as putting this amendment on this bill. It would kill it.

I must say that I was a little surprised to hear the defense authorization bill described by some of my colleagues as a jobs program. I think if we are going to spend Federal money to employ people, I would rather see them repair bridges and dams than build missiles.

But in any event, the fact is that we need jobs, and we need defense, and we should not attach crippling amendments to either one. So let us talk for a minute about the merits of this bill.

If I understand what we have heard here today, it is that there are three arguments against this bill. The first is that the jobs that would be created by it are not meaningful, and the citation has been to the CETA program. Well, let me share with my colleagues some of the things that CETA workers have done in the 11th Congressional District of Pennsylvania.

They have found asbestos in the ceilings of schools so it can be removed and health hazards can be eliminated. They have weatherized the homes of the elderly so that heating bills can be reduced and older people can afford to stay longer in the homes in which they were raised. They have manned a police communications center so that the police in 75 divergent municipalities can communicate with each other better. They have cleaned cemeteries. They have rebuilt schools.

That is the kind of meaningful work that can be done. But then the second argument against this bill is, "Well, sometimes it has been inefficiently administered." We can all find horror stories of places where patronage has seeped in, where substitution has taken place, where only a small percentage of the money has actually gotten down to the jobless.

If that is an argument, that we should not have a jobs program because sometimes it has been inefficiently administered in the past, what, then, do we say about the 4-cent diode that cost $112 to the Pentagon? Do we say we should not have a defense program because the Pentagon has sometimes been inefficiently administered in the past? Of course, we do not.

I do not understand why some past inefficiency in a program should be a cause for not having the program when it means jobs, but should be overlooked when it means guns.

We have talked a little bit about the MX, and I might point out that the U.S. Air Force says the survivability rate of the MX after a first strike would be 1 percent. That strikes me as pretty inefficient.

Then there is a third argument against the bill. We are told we cannot have this program because it costs too much. I cannot do any more than reiterate the comments of my distinguished colleague, the gentleman from Pennsylvania (Mr. GRAY). The fact is, the amount authorized is within the budget resolution.

So that brings me to the conclusion of these remarks, Mr. Chairman. I think it all comes down to this:

There is meaningful work that needs to be done in this country. It has been documented repeatedly. There are unemployed people in this country who want to work. They are sitting home now drawing welfare. They are sitting home now drawing unemployment compensation. They are sitting home now drawing food stamps. They are sitting home drawing Government benefits for doing nothing.

All we are saying is: For the love of God, if they are going to draw Government benefits, and they are going to have to, we are not going to let them starve, is it not better to put them to work doing something than to leave them at home doing nothing?

If that is what this debate is all about, and I think it is, that doing something is better than doing nothing, let us get on with it. Defeat this amendment and pass the bill.

Mr. RITTER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to address, although it seems like ancient history at this time, the comments of the distinguished majority leader when he talked about deficits being caused by three factors: unemployment, defense, and tax cuts for the rich.

No real attention was paid by the majority leader to overall Federal spending as a cause of deficits. No, it is unemployment, it is defense, and tax cuts for the rich. It is interesting that during the surge in Federal spending of the 1970's, we saw the sawtooth of the business cycle characterized by an upward spike in the sawtooth of inflation, and then a downward spike in unemployment, and each time we went through the cycle we had a higher rate of inflation and a deeper rate of unemployment, and all the while we were increasing by hundreds of percent those programs like this one today, advocated largely by Members on the Democratic side of the aisle.

Let us face some simple facts. During that same time, the defense budget grew by 70 percent while the Consumer Price Index grew by 100. In other words, while we saw Federal spending on programs like this surge, defense was, in real dollar terms, on the decline, and inflation and unemployment got higher and deeper.

That is where deficits are coming from. Talk about inflicting unemployment, somebody used the term "inflicting" unemployment on the people. I think it was the distinguished chairman of the subcommittee and the author of the bill. Given the history of the 1970's, one could make an excel-

lent argument that the poor economic performance of this Nation, the resulting high inflation, high unemployment and large deficits were inflicted by the Federal Government, but that was not at all alluded to when discussing inflicting unemployment.

I would just like to go back to the majority leader's statement that "tax cuts for the rich" are responsible for the deficit. It sounds like November 1984 is it us today in this Chamber. I am wondering if my colleagues know that the top 3 percent of the income taxpayers in the United States of American pay 31 percent of the taxes; that the bottom 50 percent of the taxpayers, those earning $12,000 or less, are paying 6 percent of the income taxes, and that as the results filter in from this tax-gathering year, we are watching evidence to show that that top 3 percent, those earning $50,000 and above, may well pay more than 31 percent. That means that under the tax cuts the rich may actually be paying more, not less, and thus maybe contributing to the narrowing not the widening of the deficit.

□ 1520

So it may just be that a few of these individuals have taken their funds out of tax shelters and put them into some kind of more productive investment. I think everybody here is familiar with the growth industry of tax shelters as we adopt a soak-the-rich philosophy.

Mr. SAVAGE. Mr. Chairman, will the gentleman yield?

Mr. RITTER. I will yield to the gentleman in a moment.

So what caused the deficit? According to the majority leader, unemployment, the defense budget, and tax cuts for the rich.

Well, we are seeing the results of the Economic Recovery Tax Act which may actually increase the proportion of taxes paid by upper income Americans. Second, we have seen that the defense budget lagged well behind domestic spending during the decade prior to the last several years, and, therefore, the defense budget is certainly not the cause. Defense expenditure as a percentage of the Federal budget were far higher in 1970 than they are today about 40-plus percent as compared with about 25 percent.

That leaves unemployment. Certainly for every percent of unemployment, between $25 billion and $30 billion is spent due to triggered programs paying out benefits, and programs which we extend here in the Congress.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(By unanimous consent, Mr. RITTER was allowed to proceed for 1 additional minute.)

Mr. RITTER. Mr. Chairman, I would ask my colleagues whether they understand, too, that since the first of the year, the private sector has created 2.5 million new jobs, that economic recovery is a far better vehicle to create jobs that have some kind of future, and that the more this body, not just with this program, engages in welfare state policies, the more unemployed we have, the more poor we have, and the more on welfare we have. That is the legacy of the 1970's.

Mr. SAVAGE. Mr. Chairman, will the gentleman yield?

Mr. RITTER. I yield to the gentleman from Illinois.

Mr. SAVAGE. Mr. Chairman, I could not quite follow the gentleman. He was talking about what causes the deficits, and, of course, here we are supposed to be discussing a jobs bill. Unless the gentleman is suggesting——

Mr. RITTER. Mr. Chairman, if I may reclaim my time for just a moment, I was responding to the three causes of the deficit outlined by the majority leader.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. RITTER) has again expired.

(On request of Mr. SAVAGE, and by unanimous consent, Mr. RITTER was allowed to proceed for 2 additional minutes.)

Mr. SAVAGE. Mr. Chairman, will the gentleman yield?

Mr. RITTER. I yield to the gentleman from Illinois.

Mr. SAVAGE. Mr. Chairman, what I was trying to put across is that the gentleman is not arguing—and I did not assume that he is—that the jobs bill causes the deficit, I am sure, and, if not, I do not understand the germaneness of the point he is making with regard to what causes the deficit.

Would the gentleman not have to agree—getting away from the word, "cause," and substituting the word, "contribute"—that if we have a deficit, any dollar spent would contribute to that deficit because those dollars are all the same?

But the problem that is being raised here with the argument is not that we are concerned about the defense issue today, but that when we voted in this House to increase the defense budget this year by a greater amount than this $3.5 billion, many of those who are arguing against this $3.5 billion for jobs did not argue against that increase in the defense budget which was over twice as much.

We point out also that they did not argue when taxes were cut, which has the same effect as an expenditure.

Mr. RITTER. Mr. Chairman, if I might reclaim my time, what I have tried to point out is that the specious argument that "tax cuts for the rich" have created the deficit is proving, as returns come in, to be wrong. What I also tried to point out is that we cannot look at the U.S. defense budget without looking at the history of the last 12 or 13 years, we cannot look at the overall Federal domestic budget without looking at the history of the last 12 or 13 years, and the momentum pushing Federal expenditures higher over that time, including these automatic triggering programs and entitlements. The bulk of momentum in Federal spending has not come from defense.

Mr. SAVAGE. Mr. Chairman, let me propound the question I am trying to ask, if the gentleman will yield.

Mr. RITTER. I yield to the gentleman from Illinois.

Mr. SAVAGE. Mr. Chairman, does the gentleman argue that the $3.5 billion to give the unemployed some jobs increases the deficit more than the almost three times that amount that we voted to increase the defense budget this year?

Mr. RITTER. In strict dollar values, obviously not.

Mr. SAVAGE. Then in that case, why did the gentleman vote for that increase, and why does he now oppose this one?

Mr. RITTER. If I might reclaim my time——

Mr. SAVAGE. Why did the gentleman vote for that when he opposes a mere $3.5 billion for jobs?

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania (Mr. RITTER) who controls the time.

Mr. RITTER. Mr. Chairman, what we do here today is incremental to what we have been doing in this House going back 15 years or so.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. RITTER) has once again expired.

(By unanimous consent, Mr. RITTER was allowed to proceed for an additional 30 seconds.)

Mr. RITTER. Mr. Chairman, what we do here today has something to do with the past, and the fact is that over that period of time, defense was not growing at nearly the rate as a whole host of new domestic programs such as this one. There is where the deficit is coming from.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. RITTER) has expired.

For what purpose does the gentleman from California (Mr. HAWKINS) rise?

Mr. HAWKINS. I rise, Mr. Chairman, to seek some limitation of time if we may have some indication of how many Members seek to be recognized.

Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and all amendments thereto cease at 3:35.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. LUNGREN. Mr. Chairman, reserving the right to object, some of us have been waiting 2 days to comment

on this bill. It is not our fault that those who have commented on it during general debate and on every amendment offered have taken a great deal of time on this amendment. So I will object if we are going to have a limitation of debate when some of us have just come over to engage in the proceedings at this time.

Mr. HAWKINS. Mr. Chairman, I see only about five Members standing, and I assumed that that would be sufficient. I will extend the time, then.

Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and all amendments thereto cease at 3:45.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. PARRIS. Mr. Chairman, reserving the right to object, do I understand that there are apparently four Members or perhaps five Members who desire to utilize the time, whatever the agreement may in fact be?

The CHAIRMAN. The Chair observes five Members or possibly six Members seeking recognition at this time.

Mr. PARRIS. Further reserving the right to object, Mr. Chairman, would the gentleman consider the possibility of extending the time to 4 o'clock or perhaps 5 minutes of 4?

Mr. HAWKINS. Mr. Chairman, that would include those who are not even present. We have debated this for at least 2 hours. At this rate, we will not end it today. I am sure there will be other opportunities.

Would 3:50 be acceptable?

Mr. Chairman, I make that as a unanimous-consent request.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. PARRIS. I do not object, Mr. Chairman.

The CHAIRMAN. Hearing no objection, it is so ordered.

Members standing at the time the unanimous-consent request was agreed to will be recognized for 3½ minutes each.

(By unanimous consent, Mr. CHENEY yielded his time to Mr. LUNGREN.)

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Chairman, let me just make a brief comment on the question of defense that has been raised by the majority leader and others.

I would not argue for a moment that we ought to vote for defense programs merely because they create jobs. There are those analyses that show that we can do it in a more direct fashion, if we buy the argument that through public service jobs we can create real jobs, than we can through defense expenditures. Nonetheless, we ought not forget that there is a jobs component involved in defense spending.

That, I think, was the point made by my colleague, the gentlewoman from California (Ms. FIEDLER), a few moments ago. Too often we say, when we are dealing with one subject or another, that all we have to do is take money from the defense pocket, put it in another pocket, and thereby create jobs.

□ 1530

In my district and around my district, I have at least two rather large shipbuilding concerns, one public, one private. I do not believe there is any employer in my area that has a better record for minority employment than those two institutions. In fact, they have lost work over the last couple years and those people have lost jobs, primarily minority individuals being laid off because of lack of work in shipbuilding and ship repair. This has occurred because this Congress has, in its wisdom, cut back on the ambitious shipbuilding and ship repair program upon which the administration embarked. We, as an institution, made that decision. Nonetheless, that has caused a diminution of jobs in my district, most directly affecting those who are minorities.

So we can look at it from all different perspectives with respect to job creation in the defense side. We ought to make decisions on defense based on what is the adequate measure of defense necessary to achieve the aims and goals of this country. Our question should be: How do we assure our national security?

I, for one, will stand on this floor and say that I am willing to vote for deficit spending if that is necessary for an adequate defense of this country. I think most Members would as well.

Then we get back to the major question I thought we were dealing with here, which is the question of jobs and the question of this particular amendment and how increasing the deficit will affect jobs.

I am not going to stand here and say that the picture economically in this country is exactly rosy. But I will bring forth some facts that suggest things have improved and improved rather dramatically over the last 6 to 8 months.

In fact, we now have approximately 6 million, actually 5.9 million, Americans working today who were not working in January of this year. That is the fastest increase in jobs that we have seen over such a period of time at any time juncture since World War II.

We have had the fastest drop in unemployment of any recovery in the postwar period. Does that mean that we still do not have unemployment? No; but it suggests that we are moving in the right direction in many areas.

My question would be this. If we are moving in the right direction, if we have had this tremendous increase in jobs, ought we not to look at the circumstances which created that increase in jobs and try not to interfere with that same trend?

In other words, what are the things that have been done in the Congress? What are the things that have been done by Government which affect the job scene, which affect the economic conditions in this country? How have they affected these conditions over the last 6 months or over the last year and ought we to change such actions at this time?

I would suggest those jobs have been created in the private sector because there has been renewed economic activity in the private sector, largely brought about by taxing policies. Finally many people in the business community have been given some security about what the taxing policies are going to be over some period of time so that they can make some long-term decisions and those decisions then have an impact directly on jobs that are created and the maintenance of people on certain jobs that otherwise would be lost.

Second, we have had some regulatory reform. We have also had in this administration a turning back of the exorbitant type of spending increases we had in the past. Yes, we have higher deficits, but it is not because this administration has attempted not to cut spending growth. It is because this administration has been limited by this Congress in the manner in which it can cut and the extent to which it can cut.

If there is any cloud on the horizon of recovery that most economists are talking about today, it is the continuation of deficits. Those deficits, real or imagined, are creating some fear among many people in our economy such that it is impacting on interest rates. These interest rate increases can cause a stoppage or a slowing of our economic recovery and therefore stop the creation of jobs that are necessary.

So it seems to me that it is vitally important that we do something about the deficits.

If the deficit is as large as it already is, does it make sense to continue to have new program after new program or add additional amounts of money to already existing programs that add to the deficit?

I would suggest that by passage of this bill you probably cut out more jobs. You probably dampen the hopes of more American citizens to get a job and be able to get a long lasting job by creating programs such as this. Obviously we are proceeding with this bill with all good intentions. I do not mean to disparage anybody's intentions here, but the record has been that

public service job creation does not benefit in the long run the overall unemployment problem. It generally has people transferred from where they would be in the private sector to public sector employment, or it takes public sector employment that already would exist and has it paid out of the Federal pocket instead of the local and the State pockets.

It may make us feel good. We may be able to go home to our constituents and say, "Give us credit for creating jobs," but in point of fact this program, nor any program conceived in this Congress is incapable of giving us 6 million new jobs in an 8-month period. It may be unfortunate that we cannot go home and take direct credit for the creation of those jobs over the last 8 months; but the fact of the matter is those are 5.9 million people working.

I wonder how much it would cost for us to create 6 million public service jobs in 8 months? Nobody, not even the advocates of this bill, would support a public service program of that size because of its cost. Yet it seems to me we are going in the opposite direction with this bill. Therefore, we ought to support the gentleman's amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Chairman, I regret, frankly, that we do not have additional or adequate time to debate what I think is a very important issue here and, frankly, intellectual fairness is not being served by allowing partisan passion to inflate and to obfuscate this or any other issue before the Congress.

We have in this Chamber an obligation to deal with the facts. We heard the majority leader earlier in this debate fire the first shot in what can only realistically be called a political exercise when he characterized the 1981 Tax Reduction Act as an exercise resulting in a tax cut for the rich.

That statement was a purely political exercise but the real issue that ought to be addressed is do the critics of the administration and this side of the aisle recommend that uncontrolled expenditures without cuts and with raging inflation which is surely caused by the lack of those cuts, is that the answer to our deficit dilemma?

There is an old Tammany Hall saying, Mr. Chairman, that goes, "The fellow who said 'patriotism is the last refuge of scoundrels' overlooked the possibilities of compassion." There is not a person in this room who is not compassionate for the unemployed. One involuntarily unemployed American is one too many. We are all attempting to reduce unemployment.

Where we disagree is just how to do it and in what way. This side of the aisle has been accused of cutting benefits to the poor.

What does "cutting" mean? For the Democrats the classic way of cutting benefits has been to give with the one hand with appropriations, while taking away with the other hand through inflation. For us "cutting" means a reduction in the growth of some Federal expenditures and programs is some reasonable way and in some reasonable amounts.

Now, let us talk very briefly in the time that remains about some facts rather then pure political rhetoric. In 1980, unemployment benefit outlays were $18 billion. Estimated 1983 outlays for unemployment benefits is $36.8 billion, an increase of almost exactly double the amount in 1980.

Food stamps programs, we heard that discussed here this afternoon. In 1980, the outlay was $9,117 million. This year it will be $12,045 million, an increase of almost $3 billion.

In constant, uninflated dollars, and adjusted for population increases Government expenditures have increased seven times for direct cash-income assistance transfers from 1950 to 1970. From 1970 to 1980, we spent twice as much money for those kinds of social programs at the end of that period as we did at the beginning of it.

□ 1540

The record of tax payments to the IRS is not well-known. Here are the tables for 1980:

PERSONAL INCOME TAXES PAID, 1980

[Money amounts in billions]

IRS income groups	Number of returns	Gross adjusted income	Total taxes	Percent of all taxes paid
$0 to $5,000	20,055,529	$49.7	$0.7	0.3
$5,000 to $10,000	18,370,997	136.6	7.8	3.1
$10,000 to $15,000	14,303,041	177.1	17.1	6.8
$15,000 to $50,000	38,043,711	992.7	146.2	58.4
$50,000 to $100,000	2,568,427	165.9	39.8	15.9
$100,000 to $200,000	443,514	58.6	19.4	7.6
$200,000 and over	117,250	45.8	19.5	7.8
Total	93,902,469	1,613.7	250.3	100

As the figures suggest, those Americans who earned more than $50,000 in 1980—the top 3 percent—remitted 31 percent of all income taxes paid, or $79 billion of the total $250 billion collected by the IRS from individual income taxes. In 1980, the bottom 50 percent, or those who made $12,000 or less, paid $14 billion in income tax, or only 6 percent of all taxes paid. Thus, the top 3 percent paid five times more in taxes than the bottom 50 percent combined.

For the top 3 percent to carry the bottom 50 percent seems highly admirable. What one cannot say is that those in the top layer "benefit" unduly from a cut in tax rates that is of the exact proportion granted to every other taxpayer. For by saying this one would simply be calling attention to the far greater proportion of taxes such persons are now paying. The Reagan tax cuts of 1981 were, by design, one and the same for all, at every income level. In fact, as the independent Congressional Budget Office has noted, under the Reagan program "the largest tax cut in dollar terms" has gone not to the very rich but to the "$10,000 to $40,000 middle-income group, which as a group also has the most households and the most income." The CBO adds: "The highest category—of income earners—receives a slightly lower cut relative to previous tax liability." This is because for such persons the topmost 50 percent marginal rate on earned income remains in effect.

So that high-income persons have not benefited disproportionately from the cut in tax rates, but the gross amounts they are paying are, if anything, greater than before the cuts went into effect. To suggest otherwise is simply incorrect.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. OWENS).

Mr. OWENS. Let me say from the outset that the bottom 50 percent of the taxpayers whom I represent would be happy to pay more taxes. They are begging for jobs which would enable them to pay more taxes. If only the top 5 percent of the taxpayers were not so greedy, perhaps we could provide jobs for those who are needy and would like to pay more taxes.

I also would like to say that when Marie Antoinette was approached about the plight of the poor she said, "They have no bread, let them eat cake." What I hear with this amendment today is that the poor have no jobs, let us play games with them.

There are honorable ways to kill a bill; honorable ways to vote down this bill. This bill could be defeated in the usual way. But here we are choosing instead to play games and to make a joke of it with an amendment which nobody here in this House is so naive as to believe that if this amendment is adopted in this case on this bill today it would ever be applied to any other bill. It would not set a precedent which would ever be applied to any other bill. It is an idea that has some merit. But it is being offered at a time when it is just making the bill that it is being applied to a joke. It should have been offered at the time we considered the budget. That is the only time such an amendment would have merit. Here it is designed to kill the bill and designed to ridicule it at the same time.

The unemployed I represent in my district would not like to be told that when we finally got a jobs bill on the floor of the Congress there were large numbers of men and women who thought it was funny. They would not

like to be told that it was ridiculed. I see people day in and day out who want jobs. I try to get them jobs in various ways. Out of every 10, if I get one job for a person I consider it a successful day. There are no jobs out there.

The same people who say they will not provide $3.5 billion for a mere 500,000 jobs are also the people who complain about the fact they do not want to provide any more social programs, any more welfare. They do not want to take care of people in any way. What would they propose? What do you propose people do who do not have jobs and you will not take care of them in any other way. Is somebody proposing any secret, unspoken final solution?

I think it is very important for us to realize that $3.5 million would provide 500,000 jobs, if applied in this way. If you applied it to the defense budget, I think the cost of an aircraft carrier would cost about exactly the same amount of money, $3.5 billion. Under construction right now, at the Newport News Shipyard—I was taken there on a tour by some gentlemen from the Navy so I would know—they have three aircraft carriers contracted at the Newport News Shipyard. They took me there to show me a large number of jobs are provided in the building of ships. And certainly aircraft carriers are the very largest ships. Yes, they provide large numbers of jobs. But if you add up all of the jobs supplied in that shipyard plus all of the jobs supplied by all of the suppliers of that shipyard, you would not get 10,000 jobs. Yet with the same $3.5 billion that builds one aircraft carrier we are going to create 500,000 jobs.

I might also add that same shipyard has under contract two or three aircraft carriers. We had a novel procedure instituted. They at one time are being contracted to build more than one aircraft carrier. If we cut back on one of those, we could fund this bill.

We do not need aircraft carriers to defend America. It has nothing to do with defending ourselves against a nuclear holocaust.

This amendment should be defeated. This ridicule of the plight of the unemployed should cease.

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. STENHOLM).

Mr. STENHOLM. Mr. Chairman, the gentleman from Pennsylvania (Mr. GRAY) made an eloquent speech in defense of and made a tremendous amount of sense on behalf of this bill.

Under normal circumstances, I guess my heart right now is telling me to support this bill, but my head is telling me no. And here is why.

Mr. MILLER, talking about his pay-as-you-go amendment that he presented 2 years ago, I supported it. We lost. I support it today because I think sooner or later we are going to have to start paying our bills. And I cannot make an exception which Mr. MILLER can today on this bill.

We talked about the budget today. I did not support the budget because it spent too much. And I have to ask those who did support it in a bipartisan way why do we not have a reconciliation bill and a tax bill to pay for that spending which you are here arguing for today. Where are those votes to raise the taxes to pay for this bill of the majority that passed the budget?

The statement has been made that we had no choice on the budget this year. Some of us presented a choice to the Rules Committee. We said there were different ways to get to where we are today budgetwise. We did not get a rule. We were denied the right to debate it during the budget on this floor.

We talk about jobs. And again, in all sincerity, my heart is saying vote yes, but I am not, because I am concerned about spending.

Where are those votes on my side of the aisle that can provide up to 100,000 jobs by reforming Davis-Bacon? Where is the support for doing that which all of us privately say we can do by reforming a law that is 52 years old that everyone agrees needs to be reformed. Where are those votes on either side of the aisle?

I am told we are not even going to get a hearing. I do not believe that. I believe we are going to get a hearing. We can provide 100,000 more jobs at no cost to the Treasury by reforming Davis-Bacon. And that is why Mr. MILLER, GEORGE MILLER of California, in his pay-as-you-go concept, makes an eminent amount of good sense. And I hope we are going to see conservatives and liberals on my side joining together with more than two Republicans in putting our money where our mouth is and saying it is time to make hard choices on spending.

Now, those that argue now is not the time, it seems that we never get around to having the right time to make those necessary decisions on priorities. But we are going to sooner or later start making those hard decisions in the real world.

This debate has been excellent. I think it is time for all of us to put our money where our mouth is with regard to budget, deficits, and getting this country and employment moving again. We have an opportunity and working together I think we can do it.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Chairman, I will not take but a minute or two. I think that the issue before us is not deficits. All of us desire to reduce the deficit. We differ somewhat on how it should be done. There has been no evidence produced that employment is a cause of the deficit and that unemployment will reduce it. And so, I think it is pretty obvious that those talking about reducing the deficit have not even attacked the real causes of the deficit before us. This issue should not be used as a means of defeating an employment and training bill.

The issue is not defense. Most of us in this House I am sure would vote for adequate defense, and have done so. No one has suggested that the money for this bill should be taken away from defense. I think that is a false issue. It should be seen in a clear light. And there are those who support more than the current defense, but even a stronger one, and would be willing to vote the taxes for it.

I think that issue is not involved in this bill. But I think what is involved in this amendment is whether or not we favor jobs or not. And we have got to provide jobs or welfare. We are not going to allow people to starve in America. We are not going to allow them to engage in the type of activities that unemployed people engage in. And so if we are not willing to vote for jobs, are we then willing to vote for welfare?

I think the issue before us in this amendment is whether or not we favor jobs or welfare, and if we do not favor one and reject the other, then what will happen to America? What are we going to do about those people waiting for recovery, who cannot wait, 1, 2, or 3 years until the economy recovers?

I think we need to think about what they are going to do—not only in terms of mental and physical problems, but what are they going to do in terms of their belief in us, their belief in democratic government, their belief in our private enterprise system? Are they going to become discouraged, alienated, and perhaps form an opinion that may be destructive of the very foundations of this Nation. I think this amendment really goes too far. I think that it should be rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. GEKAS).

The question was taken; and on a division (demanded by Mr. GEKAS) there were—ayes 17, noes 17.

RECORDED VOTE

Mr. GEKAS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 166, noes 258, not voting 9, as follows:

[Roll No. 348]

NOT VOTING—9

Barnard	Ferraro	Morrison (CT)
Crockett	Frenzel	Pashayan
Daschle	Heftel	Pritchard

□ 1600

The Clerk announced the following pairs:

On this vote:

Mr. Frenzel for, with Mr. Morrison of Connecticut against.

Messrs. YOUNG of Missouri, NICHOLS, LONG of Maryland, and MARTIN of New York changed their vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN pro tempore (Mr. BEILENSON). Are there further amendments to title I? If not, the Clerk will designate title II.

The text of title II is as follows:

TITLE II—COMMUNITY RENEWAL EMPLOYMENT PROGRAMS

PART A—COMMUNITY IMPROVEMENT PROJECTS

EMPLOYMENT ACTIVITIES IN COMMUNITY IMPROVEMENT PROJECTS

SEC. 201. (a) Eligible participants shall be employed in community improvement projects under this title in one or more of the following activities:

(1) activities to repair, rehabilitate, or improve public facilities, including (A) road and street repair, (B) bridge painting and repair, (C) repair and rehabilitation of public buildings and other community facilities, including public libraries, (D) repair, modernization, and moderate rehabilitation of public housing units, (E) repair and rehabilitation of water systems and water development projects, (F) repair and rehabilitation of public mass transportation systems, (G) erecting or replacing traffic control signs and removing road sign obstructions, (H) replacing school crossing, intersection, and other road surface markings, (I) park and playground rehabilitation, (J) installation and repair of drainage pipes and catch basins in areas subject to flooding, (K) installation of graded ramps for the handicapped, and (L) weatherization and other energy conservation activities;

(2) activities to conserve, rehabilitate, or improve public lands, including (A) erosion, flood, drought, and storm damage assistance and control, (B) removal of refuse and hazardous materials from drainage ditches, illegal dumping sites, and other public areas, (C) stream, lake, and waterfront harbor and port improvement and pollution control, (D) forestry, nursery, and silvicultural operations, (E) fish culture and habitat maintenance and improvement, (F) rangeland conservation, rehabilitation, and improvement, and (G) reclamation of public lands damaged by strip mining or other mineral extraction activities;

(3) public safety, health, social service, and other activities necessary to the public welfare, including (A) repairing or replacing fire hydrants and assisting in fire hazard inspections, (B) emergency food and shelter activities, (C) child and dependent care activities specially designed to enable parents to work, (D) assisting nutrition programs and other services for elderly and handicapped individuals, including meals on wheels programs, (E) relief activities for victims in areas affected by disasters, (F) upgrading home security for elderly and low-income residents, (G) assisting public health programs, including paraprofessional staff support for community health centers, (H) emergency medical and rescue services, (I) drug and alcohol abuse programs, (J) domestic violence programs, (K) education and training assistance, such as literacy and basic skills education, remedial tutoring, and occupational skills training, (L) programs of English language instruction for unemployed individuals with limited English proficiency, (M) assisting public library programs, including library aides programs, (N) employment counseling and other services to veterans, (O) security guards for public schools and housing projects, (P) police dispatchers, clerical and traffic control personnel to free police officers for full-time street duty, (Q) staff support for adult and juvenile correctional facilities, (R) rodent and insect control activities, (S) hazardous materials surveys, and (T) employment counseling and placement services.

(b) Nothing in this Act shall be construed to preclude such activities from being conducted in conjunction with programs funded from sources other than under this Act.

(c) For the purposes of this section, the term "project" means a definable task or a group of related tasks which (1) will be carried out by a government department, public agency, private nonprofit organization, or private contractor, (2) will be completed within 18 months, (3) is an activity authorized under this section or section 241(b), (4) will result in a specific product or accomplishment, and (5) would not otherwise be conducted with existing funds.

(d) Projects to be carried out under subsection (a)(2) shall be limited to projects on public lands or Indian lands except where a project involving other lands will provide a documented public benefit and reimbursement will be provided to the recipient for that portion of the total costs of the project which does not provide a public benefit.

Notwithstanding any other provision of law, any reimbursement referred to in the preceding sentence shall be retained by the recipient and shall be used by the recipient for purposes of carrying out other projects under this title.

ELIGIBLE ENTITIES

SEC. 202. (a) Except as otherwise provided in this section, an eligible entity under this title shall be—

(1) any State to the extent provided under subsection (b)(1);

(2) any unit of general local government which has a population of 50,000 or more individuals;

(3) any existing concentrated employment program grantee serving a rural area pursuant to section 101(a)(4)(A)(iii) of the Job Training Partnership Act (Public Law 97-300);

(4) for fiscal years beginning after the enactment of this Act—

(A) any consortium of contiguous units of general local government which includes—

(i) two or more municipal governments each of which is an eligible entity under paragraph (2);

(ii) a combination of one or more such municipal governments and one or more county governments (or equivalents); or

(iii) two or more county governments (or equivalents) at least one of which is an eligible entity under paragraph (2); or

(B) any consortium of one or more county governments (or equivalents) and a contiguous eligible entity under paragraph (3); or

(5) any Native American Indian tribe, band, or group on a Federal or State reservation, the Oklahoma Indians, and any Alaska Native village or group as defined in the Alaska Native Claims Settlement Act, having a governing body.

(b)(1) Any State shall qualify as an eligible entity to serve any area of the State (A) which is not under the jurisdiction of any other eligible entity under subsection (a), or (B) with respect to which no eligible entity has, within 30 days of the allotment of funds to such area under section 203, filed a statement in accordance with section 204 with respect to the use of such allotment.

(2) A larger unit of general local government (determined on the basis of population) shall not qualify as an eligible entity to serve the population of any geographic area within the jurisdiction of any smaller unit of general local government (determined on the basis of population) if the latter such unit is or is part of an eligible entity that has filed a statement under section 204 with respect to the use of funds provided under this title for such area.

ALLOTMENT OF FUNDS

SEC. 203. (a)(1) From the amount available for purposes of this title for any fiscal year (exclusive of the amount available for part C), the Secretary shall reserve 2 percent for allotment among Native American eligible entities described in section 202(a)(5) in accordance with subsection (b). The remainder of such amount shall be allotted by the Secretary as follows:

(A) One-third of such amount shall be allotted on the basis of the relative number of unemployed individuals residing in each eligible entity.

(B) One-third of such amount shall be allotted on the basis of the relative number of unemployed individuals in excess of 6.5 percent of the civilian labor force residing in each eligible entity.

(C) One-third of such amount shall be allotted on the basis of the relative number of unemployed individuals residing in each eligible entity in excess of the national average rate of unemployment.

(2)(A) An allotment, on the basis of the relative numbers of certain individuals described in subparagraph (A), (B), or (C) of paragraph (1), shall be made by comparing the number of such individuals residing in an eligible entity qualifying for an allotment under that subparagraph with the total number of such individuals residing in all eligible entities qualifying for an allotment under that subparagraph.

(B) For purposes of paragraph (1)(C), the determination of the number of unemployed individuals in excess of the national average rate of unemployment shall be made by calculating the number of unemployed individuals in the civilian labor force residing in an eligible entity in excess of the product of (i) the national average rate of unemployment (rounded to the nearest tenth of a percent) in the civilian labor force of the United States, multiplied by (ii) the civilian labor force residing in such eligible entity.

(3)(A) For purposes of making any allotment under this section to eligible entities, a State shall not be treated as an eligible entity with respect to the area of any other eligible entity within such State which is also qualified for such allotment.

(B) The amount allotted to each State as an eligible entity in accordance with subparagraph (A) of this paragraph shall be made available by the Governor to areas of excessive unemployment within such State. For purposes of this paragraph, the term "areas of excessive unemployment" means municipalities with populations of 50,000 or more, or counties regardless of population, which, during the most recent three months for which satisfactory data are available, had a rate of unemployment at least equal to the lesser of (i) the average rate of unemployment for the area served by the State as an eligible entity, or (ii) the national average rate of unemployment.

(b) The amounts which are required by subsection (a)(1) to be allotted in accordance with this subsection among Native American eligible entities described in section 202(a)(5) shall be allotted among such entities on an equitable basis, taking into account the extent to which regular employment opportunities have been lacking for long-term periods among individuals within the jurisdiction of such entities.

(c) The Secretary shall, within 15 days after the date of enactment of an appropriation under section 102 for any fiscal year, notify each eligible entity for such fiscal year of the preliminary amount allotted to such eligible entity under this section.

REQUIREMENTS FOR RECEIPT OF ALLOTMENT

SEC. 204. (a)(1) Each eligible entity which desires to receive its allotment under section 203 shall, within 30 days after receiving notice of such allotment, submit to the Secretary a statement—

(A) designating a fiscal agent for the receipt of payments from such allotment;

(B) agreeing to use such funds only in accordance with the provisions of this Act; and

(C) agreeing to provide each of the quarterly reports required by subsection (c).

(2) Within 30 days after the final day for the submission of statements required by paragraph (1), the Secretary shall, on the basis of only those eligible entities submitting such statements, make a final allotment of funds in accordance with section 203, and shall notify each such eligible entity of the amount of its final allotment. In making such final allotment, the allotment of any of the fifty States in which the State is the single eligible entity submitting such a statement shall not be less than one-tenth of one percent of the funds allotted under section 203(a)(1) (A), (B), and (C) for the fiscal year (and the allotments of the remaining such eligible entities shall be ratably reduced).

(b)(1) For fiscal years beginning after the date of enactment of this Act, the Secretary shall pay to each eligible entity which has filed a statement in accordance with subsection (a) its allotment for that fiscal year. Such payments shall be made in equal installments not later than 5 days after the beginning of each quarter for which funds are available.

(2) For any fiscal year which began prior to the date of enactment of this Act, the Secretary shall, not later than 30 days after the final allotment of funds for such fiscal year under subsection (a)(2), pay to each eligible entity which has filed such a statement the total amount of such allotment.

(c) Not later than 30 days after the end of each calendar quarter, each eligible entity which has, during such quarter, expended funds made available under this title (in that or a preceding quarter) shall submit to the Secretary a report on the use of such funds. Such report shall—

(1) describe in detail the jobs created with such funds, including (A) the nature of the employment activity, (B) the wage rates paid, and (C) the duration of employment;

(2) contain adequate data to evaluate the characteristics of participants in programs under this title, including the race, sex, age, handicapped status, and veteran status of participants; and

(3) such other information as the Secretary may specifically request in order to ascertain whether such entity has used such funds in accordance with the requirements of this Act.

(d) The Secretary may not withhold, suspend, or terminate the payment of any installment of an allotment except in accordance with section 503.

PROJECT DESIGN

SEC. 205. (a) In designing projects under this title, the eligible entity shall give priority to projects on the basis of (1) the severity and duration of unemployment within localities in the area of the eligible entity, (2) the degree to which project activities will lead to the expansion of unsubsidized employment opportunities in the private sector, and (3) the level of need which exists for the activities and services to be provided.

(b) To the extent feasible, employment opportunities established with funds made available under this title shall be coordinated with other Federal, State, and local activities, including vocational and adult education, job training provided with funds available under the Job Training Partnership Act (Public Law 97-300), economic development activities, and activities receiving funds available under section 106 of the Housing and Community Development Act of 1974 (42 U.S.C. 5306) (popularly known as the community development block grant program) and chapter 67 of title 31, United States Code (popularly known as the general revenue sharing program).

PART B—COMMUNITY IMPROVEMENT ACTIVITIES FOR YOUTH TRAINEES

YOUTH TRAINEE ACTIVITIES

SEC. 221. (a) Not less than 20 percent of the funds available to each eligible entity from its allotment under section 203 for each fiscal year shall be used for eligible youth who are paid wages and benefits from such funds for part-time employment not in excess of 32 hours per week. Such employment may be in any activity described in section 201 or may be at a worksite operated by a public or private nonprofit agency or organization or by an employer organized for profit, but shall be provided in a manner which requires, and is consistent with, the youth's enrollment in high school, a program which leads to a certificate of high school equivalency, or a program of skill training or basic skill or employability development, including a program operated pursuant to section 105. Such enrollment shall be for at least 8 hours per week.

(b) In meeting the requirements of subsection (a), funds required to be used for such purpose may be used in activities which also receive funds under the Job Training Partnership Act (including the Job Corps), the Vocational Education Act of 1963, or other State or local, public or private education or training programs.

ELIGIBLE YOUTH

SEC. 222. (a) Notwithstanding section 103(a)(2) regarding the duration of unemployment, any youth aged 16 through 19 who is certified to be currently unemployed by the State employment service agency shall be eligible to be a participant in activities conducted under this part.

(b) In selecting such participants, an eligible entity shall, notwithstanding section 103(c), give priority to individuals who are economically disadvantaged. Among such individuals, eligible school dropouts shall be served on an equitable basis. For purposes of this subsection, a school dropout is an individual who is not attending any school and has not received a secondary school diploma or certificate of high school equivalency.

PART C—STATE JOB PROGRAMS

FINANCIAL ASSISTANCE FOR STATE JOB PROGRAMS

SEC. 241. (a)(1) Five percent of the sums available for this title for each fiscal year shall be available for purposes of this part.

(2) The sums available for purposes of this part for each fiscal year shall be allotted among the States, which have submitted statements in accordance with subsection (d), on the basis of the relative number of individuals residing in each such State who have been unemployed for 15 or more weeks as compared to the total number of such individuals in all such States.

(b) The amounts allotted to each State under subsection (a) shall be used for employment of eligible participants under this Act—

(1) through State-administered programs and activities authorized under section 201, such as those in (A) State parks, forests, and conservation programs (including rangeland rehabilitation and improvement), (B) State hospitals and other institutions and facilities providing health care, (C) State correctional institutions and programs, and (D) State-administered social service programs;

(2) through special assistance (in conjunction, as appropriate, with eligible entities under title II) for areas which have experienced sudden or severe economic dislocations, including large-scale losses of jobs caused by the closing of facilities or mass layoffs;

(3) through State-directed emergency aid programs to cope with natural disasters, including erosion, flood, drought, and storm damage assistance and control activities; and

(4) through special assistance to seasonal farmworkers and small farmers in rural, agricultural areas which have experienced substantial losses of jobs due to the rising numbers of farm mortgage foreclosures and other severe economic disruption (in conjunction, as appropriate, with eligible entities under title II or with related programs under the Job Training Partnership Act (Public Law 97-300), or both).

(c) In determining the programs and activities to receive funds allotted under subsection (a), the State shall give special consideration to the establishment of those programs and activities which will provide job sites (1) within areas in the State in which the rate of unemployment equals or exceeds the national average rate of unemployment, or (2) if there are no such areas within the State, within areas in the State in which the rate of unemployment equals or exceeds the average rate of unemployment in the State. In designing projects under this section, the State shall evaluate projects on the basis of the severity and duration of unemployment within localities in the State and the level of need which exists for the activities and services to be provided.

(d)(1) Each State which desires to receive its allotment under subsection (a)(2) shall, within 30 days after receiving notice of such allotment, submit to the Secretary a statement—

(A) agreeing to use such funds only in accordance with the provisions of this Act; and

(B) agreeing to provide each of the quarterly reports required by subsection (f).

(2) Within 30 days after the final day for the submission of statements required by paragraph (1), the Secretary shall on the basis of only those States submitting such statements make a final allotment of funds in accordance with subsection (a)(2), and shall notify each such State of the amount of its final allotment.

(e)(1) For fiscal years beginning after the date of enactment of this Act, the Secretary shall pay to each State which has filed a statement in accordance with subsection (d) its allotment for that fiscal year. Such payments shall be made in equal installments not later than 5 days after the beginning of each quarter for which funds are available.

(2) For any fiscal year which began prior to the date of enactment of this Act, the Secretary shall, not later than 30 days after the final allotment of funds for such fiscal year under subsection (a)(2), pay to each State which has filed such a statement the total amount of such allotment.

(f) Not later than 30 days after the end of each calendar quarter, each State which has, during such quarter, expended funds made available under this part (in that or a preceding quarter) shall submit to the Secretary a report on the use of such funds. Such report shall—

(1) describe in detail the jobs created with such funds including (A) the nature of the employment activity, (B) the wage rates paid, and (C) the duration of employment;

(2) contain adequate data to evaluate the characteristics of participants in programs under this part, including the race, sex, age, handicapped status, and veteran status of participants; and

(3) such other information as the Secretary may specifically request in order to ascertain whether such entity has used such funds in accordance with the requirements of this Act.

(g) The Secretary may not withhold, suspend, or terminate the payment of any installment of an allotment except in accordance with section 503.

AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VOLKMER: Page 16, strike out line 17 and all that follows line 19 on page 18 and insert in lieu thereof the following:

SEC. 203. (a)(1) From the amount available for purposes of this title for any fiscal year (exclusive of the amount available for part C), the Secretary shall reserve 2 percent for allotment among Native American eligible entities described in section 202(a)(5) in accordance with subsection (b). The remainder of such amount shall be allotted by the Secretary as follows:

(A) One-third of such amount shall be allotted on the basis of the relative number of unemployed individuals residing in each jurisdiction served by each eligible entity.

(B) One-third of such amount shall be allotted on the basis of the relative number of unemployed individuals in excess of 6.5 percent of the civilian labor force residing in each jurisdiction served by each eligible entity.

(C) One-third of such amount shall be allotted on the basis of the relative number of unemployed individuals residing in each jurisdiction served by each eligible entity in excess of the national average rate of unemployment.

(2)(A) An allotment, on the basis of the relative numbers of certain individuals described in subparagraph (A), (B), or (C) of paragraph (1), shall be made by comparing the number of such individuals residing in each jurisdiction served by each eligible entity qualifying for an allotment under that subparagraph with the total number of such individuals residing in all eligible entities qualifying for an allotment under that subparagraph.

(B) For purposes of paragraph (1)(C), the determination of the number of unemployed individuals in excess of the national average rate of unemployment shall be made by calculating the number of unemployed individuals in the civilian labor force residing in each jurisdiction served by each eligible entity in excess of the product of (i) the national average rate of unemployment (rounded to the nearest tenth of a percent) in the civilian labor force of the United States, multiplied by (ii) the civilian labor force residing in such eligible entity.

(3)(A) For purposes of making any allotment under this section to eligible entities, a State shall not be treated as an eligible entity with respect to the area of any other eligible entity within such State which is also qualified for such allotment.

(B) The amount allotted to each State as an eligible entity shall be made available by the Governor for use in each jurisdiction within the area for which the State is the eligible entity on the basis of the formula prescribed in subparagraphs (A), (B), and (C) of paragraph (1), except that no amount shall be made available for use in any jurisdiction if the amount would be less than $25,000. Any amounts which remain unallocated by reason of the preceding sentence

shall be reallocated among other jurisdictions which are not subject to such sentence by ratably increasing the amounts otherwise made available for use in such jurisdictions.

(4) For purposes of this subsection, the term "jurisdiction" means—

(A) the area of any municipality which has a population of 50,000 or more individuals, and

(B) the area of any county, regardless of population, exclusive of the area of such a municipality, if any.

Mr. VOLKMER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

□ 1610

Mr. VOLKMER. Mr. Chairman, due to the fact that during the general debate on the bill this amendment was thoroughly explained, I will not take the full 5 minutes on the amendment since I do not believe that it is controversial and fully understood by both the majority and minority members of the committee.

The amendment basically does not impact on the cities, counties, et cetera, above 50,000, but only impacts on the balance of State funds that go to the State, and under the amendment will still go to the State, but it makes a determination as to allocation of the funds, rather than going to the State and letting the State disperse them as it sees fit.

It provides that the funds should be distributed in the formula used in the bill for the eligible entities, the larger cities. In other words, it would mean that the funds going to the State will actually go to the higher unemployed rural counties, rather than be distributed willy-nilly by the Governor of the State.

And I believe that it means that the funds that are going to the balance of the State for the rural counties will go to those rural counties who have high unemployment just as if the other funds would go to the major cities and metropolitan areas with high unemployment.

Mr. EVANS of Illinois. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Illinois.

Mr. EVANS of Illinois. I thank the gentleman for yielding.

Mr. Chairman, I rise in strong support of the gentleman's amendment and the act as a whole.

I would like to compliment the chairman of the committee for bringing this act to our attention because the community improvement projects authorized would be meaningful jobs, productive jobs, needed to repair public facilities and schools, to improve public services to children, women, and elderly who have been forgotten by this administration and because this bill represents our last opportunity to put people back to work.

But it is also imperative that all unemployed people, rural and urban, share in its benefits. And representing a district, which, like the district of the gentleman from Missouri, it is clear that rural folks in the past have not gotten fair shares from other kinds of jobs bills and other programs that we have passed in this institution.

I think the gentleman's amendment is worthy because it addresses those kinds of inequities.

I salute the gentleman for offering it.

Mr. VOLKMER. I thank the gentleman from Illinois for his remarks.

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. I thank the gentleman for yielding.

Mr. Chairman, I compliment the gentleman from Missouri. I rise in support of the gentleman's amendment and of this bill.

And while it is the attempt of this body and of the Congress at large to bring fairness and equity to all persons who are eligible for benefits under any bill that is enacted here, unemployment in rural areas has been very difficult to address. Unemployment is just as tragic in the rural areas as it is in the center cities of our Nation.

The gentleman's amendment improves upon the equity and fairness of this bill. I compliment the gentleman from Missouri.

Mr. Chairman, I rise in support of H.R. 1036, the Community Renewal Employment Act. No amount of abstruse rhetroic or pollyannalike predictions about economic recovery can disguise the fact that too many of our people are unemployed or underemployed.

Almost 20 million Americans are in that fix. That is one out of every six American workers. What kind of recovery is possible when that many human resources are going wasted? Do not the proponents of the do-nothing economics that we have suffered for the last 3 years realize that there can be no economic recovery when the work force is crippled to that extent?

Unemployment in America remains at the highest levels since the Great Depression. Do not the advocates of do-nothing economics understand that recovery for the few cannot, in the long run, be purchased at the cost of misery for the many?

However, the Community Renewal Employment Act does more than just address the problem of lingering economic recession. In its provision for improvement of our Nation's educational facilities, it will take practical measures to address the crisis in education which the President, which the Congress, which the country at large have expressed so much concern about.

Mr. Chairman, do-nothing economics, in the final analysis, means indifferent Government, and it is futile for the administration to shed crocodile tears over the state of education in America while it deprives the educational system of the very means for progress and improvement.

And the Community Renewal Employment Act is farsighted in another respect. It does more than provide a means for our people to get productively back to work. It does more than commit itself to the beginning of a solution for our educational problems.

The Community Renewal Employment Act addresses itself to the problem of social transformation which is at the heart of our current economic dilemmas. No group of Americans has been so ravaged by the last 3 years of recession as have the men and women of our rural communities. While the rest of us in America have undergone recession and on-again, off-again partial recoveries threatened by long-term deficits, rural America has been in the throes of depression itself.

Under this act, roughly 40 percent of all job funding would be allotted to rural areas suffering high levels of unemployment. A significant portion of this amount would be designated for consortia or urban and rural communities, which would allow an increased number of rural communities to run their own job programs than has been the case under past Federal job creation efforts.

And the balance of funds for rural unemployment would go by formula to the States for use in those rural localities where unemployment exceeds the lower of the State or national average unemployment rate.

I endorse wholeheartedly the amendment by the gentleman from Missouri (Mr. VOLKMER) which would apply the bill's basic allotment formula to those rural communities which have no independent job-development entities. The States would still operate programs for these communities, but there would be guaranteed allocation of funds according to the following formula: One-third on the relative number of unemployed; one-third on the relative number of unemployment individuals in excess of 6.5 percent of the civilian labor force; and one-third of the number of unemployed in excess of the national average rate of unemployment.

Mr. Chairman, this allocation formula is not only good politics, it is good national policy. Let me share with this body some of the facts of life of unemployment in my own district,

the First Congressional District of Arkansas, a predominantly agricultural area.

From May to June of this year, while the proponents of do-nothing economics were trumpeting an economic recovery, the number of counties in the First District of Arkansas with double-digit unemployment actually rose from 15 to 17. Eleven of the State's 20 counties with the highest unemployment rate were in the First District, a district in every sense a typical agricultural area.

Unemployment in the First District of Arkansas continues to be higher than the seasonally adjusted monthly average for both the State and the Nation. And I would expect that facts and figures like these are characteristic of rural unemployment throughout this Nation.

Mr. Chairman, this Congress cannot by itself solve the problems of social transformation and economic crisis which plague this Nation. But it can do something about the misery of our people, and it can point the Nation's agenda toward practical acts which deal with a persistent and very real economic emergency.

The Community Renewal Employment Act is a positive step toward the solution of America's problems. And, perhaps most importantly, it allows the people at the grassroots level to devise their own short- and long-term solutions to the problem that will not go away—joblessness in America.

Mr. VOLKMER. I thank the gentleman for his remarks.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Louisiana.

Mr. HUCKABY. I thank the gentleman for yielding.

Mr. Chairman, I , also, would like to commend the gentleman from Missouri for this excellent amendment. Representing an area of Louisiana that is predominantly rural, we are concerned about, as the gentleman from Arkansas just pointed out, we have very high unemployment in rural areas also. It will see that these funds are properly and equitably distributed throughout the Nation.

I commend the gentleman for his amendment.

Mr. VOLKMER. I thank the gentleman for his comments.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Texas.

Mr. DE LA GARZA. I thank the gentleman for yielding.

Mr. Chairman, I want to join in the commendation of the gentleman. I was a little concerned on the overall legislation, not that I would vote against it, because I know the need that there is, but I was concerned that under the formula we may not have complete equity or fairness in the rural areas. Not even the gentleman's amendment would bring us to full equity, but it will be helpful. I will support it as I will also the legislation should the amendment be adopted.

Mr. VOLKMER. I thank the gentleman.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Vermont.

Mr. JEFFORDS. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the amendment. Coming from the most rural State in the Nation, I thank the gentleman.

Mr. VOLKMER. I appreciate the remarks of the gentleman.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from California.

Mr. HAWKINS. I thank the gentleman for yielding.

Mr. Chairman, the managers on this side accept the amendment and commend the gentleman in the well for having drafted this amendment. We think it improves the bill and certainly the gentleman ought to be commended for having worked on it.

Mr. VOLKMER. Mr. Chairman, I wish to thank the gentleman from California and the staff of the committee for working with us on this amendment and we were able to work it out satisfactorily to everyone.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Missouri (Mr. VOLKMER).

The amendment was agreed to.

Mr. HAWKINS. Mr. Chairman, I ask unanimous consent that the remainder of the bill be considered as read, printed on the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The text of the remainder of the bill is as follows:

TITLE III—EDUCATIONAL FACILITY REPAIR AND RENOVATION EMPLOYMENT ACTIVITIES

PART A—ELEMENTARY AND SECONDARY SCHOOL FACILITY IMPROVEMENT JOBS

SCHOOL FACILITY REPAIR AND RENOVATION PROJECTS

SEC. 301. (a) The funds made available to any local educational agency under this part for any fiscal year shall be used to carry out projects and activities (in accordance with the limitation on use of funds set forth in section 104) providing employment to eligible participants (qualifying under section 103) in work on the repair, renovation, or rehabilitation of the public school facilities of such agency.

(b) To the maximum extent feasible, funds made available under this part shall be used for projects or activities on which on-site labor can begin within 90 days of receipt of funds under this part.

(c) Funds available under this part shall be used in accordance with State and local procedures—

(1) for assisting State and local educational agencies in bringing their public school facilities into conformity with the requirements of—

(A) the Act of August 12, 1968, commonly known as the Architectural Barriers Act of 1968,

(B) section 504 of the Rehabilitation Act of 1973,

(C) environmental protection or health and safety programs mandated by Federal, State, or local law, especially for those facilities which were constructed before such requirements were in effect;

(2) for the repair, renovation, or rehabilitation of public school facilities;

(3) for conversion of presently unused structures into adult training centers;

(4) for remodeling or renovating structures to make them more energy efficient; or

(5) for detecting, removing, or otherwise containing asbestos in academic or other facilities used by students.

(d)(1) Funds made available to the Secretary of the Interior shall be made available, upon application, to Indian tribal schools for purposes consistent with subsection (c), and consistent with Federal and tribal procedures. Such applications shall contain a description of the activities to be performed, with estimates of the costs associated with such activities, and shall give priority to the activities described in subsection (c)(1).

(2) The Secretary of the Interior shall, not later than 120 days after the date of enactment of this Act, promulgate regulations necessary for the establishment of the program authorized under this subsection. In addition, the Secretary of the Interior shall, during such 120-day period and annually thereafter, establish by regulation priorities for making grants under this subsection which are consistent with subsection (c).

(3) For the purposes of section 303, the Department of the Interior shall be considered a State educational agency.

(4) Nothing contained in this subsection shall be construed to relieve the Secretary of the Interior of the responsibility to provide adequate and equitable funding under the Snyder Act (25 U.S.C. 13) for the operations and maintenance of Indian tribal school facilities.

ALLOTMENT OF FUNDS

SEC. 302. (a)(1) From 75 percent the funds available for this title for each fiscal year, the Secretary shall (A) allot one-half of 1 percent thereof among Guam, American Samoa, the Northern Mariana Islands, the Virgin Islands, and the Trust Territory of the Pacific Islands in accordance with their respective needs, and (B) make one-half of 1 percent thereof available to the Secretary of the Interior for use in accordance with section 301(d).

(2) The remainder of 75 percent of such funds shall be allotted by the Secretary as follows:

(A) One-fourth of such amount shall be allotted among the States on the basis of the relative number of unemployed individuals.

(B) One-fourth of such amount shall be allotted among the States on the basis of the relative number of unemployed individuals in each county of each State in excess of 6.5 percent of the civilian labor force.

(C) One-fourth of such amount shall be allotted among the States on the basis of

the relative number of unemployed individuals residing in each county of each State in excess of the national average rate of unemployment.

(D) One-fourth of such amount shall be allotted among the States on the basis used in distributing funds under section 554(a)(1)(A) of chapter 1 of the Education Consolidation and Improvement Act of 1981 (Public Law 97-35).

(3)(A) An allotment, on the basis of the relative numbers of certain individuals described in subparagraph (A), (B), or (C) of paragraph (2), shall be made by comparing the number of such individuals in a State qualifying for an allotment under that subparagraph with the total number of such individuals in all the States qualifying for an allotment under that subparagraph.

(B) For purposes of paragraph (2)(C), the determination of the number of unemployed individuals in excess of the national average rate of unemployment shall be made by calculating the number of unemployed individuals in the civilian labor force residing in a county in excess of the product of (i) the national average rate of unemployment (rounded to the nearest tenth of a percent) in the civilian labor force of the United States, multiplied by (ii) the civilian labor force residing in such county.

(b)(1) From the amount allotted to any State under subsection (a), the State educational agency shall reserve not more than one percent thereof to pay necessary costs of State administration of this part, and not more than four percent thereof to meet special needs as determined by the State educational agency.

(2) The remainder of such amount shall be allocated by the State educational agency (A) among the counties in such State on the basis of the same factors (equally weighted) as used in allotting funds to such State under subsection (a), and (B) within each county on the basis used by that State in distributing funds under section 554(a)(1)(A) of chapter 1 of the Education Consolidation and Improvement Act of 1981 (Public Law 97-35).

(c) For purposes of this section, the term "State" does not include Guam, American Samoa, the Northern Mariana Islands, the Virgin Islands, or the Trust Territory of the Pacific Islands.

REQUIREMENTS FOR RECEIPT OF ALLOTMENT

SEC. 303. (a)(1) Each State educational agency which desires to receive its allotment under section 302 shall, within 30 days after receiving notice of such allotment, submit to the Secretary a statement—

(A) agreeing to use such funds only in accordance with the provisions of this Act; and

(B) agreeing to provide each of the quarterly reports required by subsection (c).

(2) Within 30 days after the final day for the submission of statements required by paragraph (1), the Secretary shall, on the basis of only those State educational agencies submitting such statements, make a final allotment of funds in accordance with section 302, and shall notify each such agency of the amount of its final allotment.

(b)(1) For fiscal years beginning after the date of enactment of this Act, the Secretary shall pay to each State educational agency which has filed a statement in accordance with subsection (a) its allotment for that fiscal year. Such payments shall be made in equal installments not later than 5 days after the beginning of each quarter for which funds are available.

(2) For any fiscal year which began prior to the date of enactment of this Act, the Secretary shall, not later than 30 days after the final allotment of funds for such fiscal year under subsection (a)(2), pay to each State educational agency which has filed such a statement the total amount of such allotment.

(c) Not later than 30 days after the end of each calendar quarter, each State educational agency which has, during such quarter, expended (or made available to a local educational agency for expenditure) funds made available under this part (in that or a preceding quarter) shall submit to the Secretary a report on the use of such funds. Such report shall—

(1) describe in detail the jobs created with such funds including (A) the nature of the employment activity, (B) the wage rates paid, and (C) the duration of employment;

(2) contain adequate data to evaluate the characteristics of participants in programs under this part, including the race, sex, age, handicapped status, and veteran status of participants; and

(3) such other information as the Secretary may specifically request in order to ascertain whether such agency has used such funds in accordance with the requirements of this Act.

(d) The Secretary may not withhold, suspend, or terminate the payment of any installment of an allotment except in accordance with section 503.

PART B—HIGHER EDUCATION FACILITY IMPROVEMENT JOBS

ACADEMIC FACILITY REPAIR AND RENOVATION PROJECTS

SEC. 321. (a) The funds made available to any institution of higher education under this part for any fiscal year shall be used to carry out projects and activities (in accordance with the limitation on use of funds set forth in section 104) providing employment to eligible participants (qualifying under section 103) in work on the repair, renovation, or rehabilitation of the academic facilities of such institution.

(b) To the maximum extent feasible, funds made available under this part shall be used for projects or activities on which on-site labor can begin within 120 days of receipt of funds under this part.

(c) Funds allotted to each State under section 322 shall be made available, in accordance with those parts of its State plan pertaining to sections 711(a) (2)(A) and (3) and 712(a) (1) and (2) of the Higher Education Act of 1965, through the higher education building agency to assist institutions of higher education in the repair, renovation, and rehabilitation of academic facilities and libraries if the primary purpose of such assistance is—

(1) to enable such institutions to economize on the use of energy resources, with a priority for the use of coal, solar, and renewable resources;

(2) to enable such institutions to bring their academic facilities and libraries into conformity with the requirements of—

(A) the Act of August 12, 1968, commonly known as the Architectural Barriers Act of 1968,

(B) section 504 of the Rehabilitation Act of 1973, or

(C) environmental protection or health and safety programs mandated by Federal, State, or local law, especially for those facilities which were constructed before such requirements were in effect;

(3) to enable such institutions to renovate research facilities and postsecondary technician training facilities; or

(4) to enable such institutions to detect, remove, or otherwise contain asbestos hazards in academic or other facilities used by students.

ALLOTMENT OF FUNDS

SEC. 322. (a)(1) From 25 percent of the funds available for this title for each fiscal year, the Secretary shall allot one-half of one percent thereof among Guam, American Samoa, the Northern Mariana Islands, the Virgin Islands, and the Trust Territory of the Pacific Islands in accordance with their respective needs.

(2) The remainder of 25 percent of such funds shall be allotted by the Secretary among the remaining States on the basis of the relative number of individuals residing in each State who have been unemployed for 15 or more weeks as compared to the total number of such individuals in all States.

(b) From the amount allotted to any State under subsection (a), the higher education building agency shall reserve not more than 1 percent thereof for its necessary administrative costs in carrying out the purposes of this part.

REQUIREMENTS FOR RECEIPT OF ALLOTMENT

SEC. 323. (a)(1) Each State which desires to receive its allotment under section 322 shall, within 30 days after receiving notice of such allotment, submit to the Secretary a statement—

(A) designating a fiscal agent for the receipt of payments from such allotment;

(B) agreeing to use such funds only in accordance with the provisions of this Act; and

(C) agreeing to provide each of the quarterly reports required by subsection (c).

(2) Within 30 days after the final day for the submission of statements required by paragraph (1), the Secretary shall, on the basis of only those States submitting such statements, make a final allotment of funds in accordance with section 322, and shall notify each State of the amount of its final allotment.

(b)(1) For fiscal years beginning after the date of enactment of this Act, the Secretary shall pay to each State which has filed a statement in accordance with subsection (a) its allotment for that fiscal year. Such payments shall be made in equal installments not later than 5 days after the beginning of each quarter for which funds are available.

(2) For any fiscal year which began prior to the date of enactment of this Act, the Secretary shall, not later than 30 days after the final allotment of funds for such fiscal year under subsection (a)(2), pay to each State which has filed such a statement the total amount of such allotment.

(c) Not later than 30 days after the end of each calendar quarter, each State which has, during such quarter, expended (or made available for expenditure) funds made available under this part (in that or a preceding quarter) shall submit to the Secretary a report on the use of such funds. Such report shall—

(1) describe in detail the jobs created with such funds including (A) the nature of the employment activity, (B) the wage rates paid, and (C) the duration of employment;

(2) contain adequate data to evaluate the characteristics of participants in programs under this part, including the race, sex, age, handicapped status, and veteran status of participants; and

(3) such other information as the Secretary may specifically request in order to ascertain whether such State has used such funds in accordance with the requirements of this Act.

(d) The Secretary may not withhold, suspend, or terminate the payment of any installment of an allotment except in accordance with section 503.

PART C—SPECIAL DEFINITIONS FOR TITLE III

DEFINITIONS

SEC. 341. Notwithstanding section 505, for purposes of this title—

(1) the term "State educational agency" has the meaning provided under section 1001(k) of the Elementary and Secondary Education Act of 1965;

(2) the term "local educational agency" has the meaning provided under section 1001(f) of the Elementary and Secondary Education Act of 1965;

(3) the term "higher education building agency" has the meaning provided under 742(5) of the Higher Education Act of 1965;

(4) the term "Indian tribal school" means any school operated by an Indian tribe under the Indian Self-Determination and Education Assistance Act (Public Law 93-638); and

(5) the term "institution of higher education" has the meaning provided under section 1201(a) of the Higher Education Act of 1965.

TITLE IV—STATE EMPLOYMENT SERVICE RESPONSIBILITIES

CERTIFICATION AND REFERRAL

SEC. 401. (a) There are authorized to be appropriated such sums as may be necessary for fiscal year 1983 and for each succeeding fiscal year to enable the United States Employment Service to provide funds to State employment service agencies to carry out the provisions of this section.

(b) In order to receive funds appropriated under subsection (a), the employment service agency of each State shall provide the following services, in accordance with agreements with recipients under titles II and III of this Act:

(1) certification of eligible participants in accordance with section 103, and their referral to available job openings; and

(2) labor market information and job search services, including counseling, to assist participants in finding regular unsubsidized employment as soon as possible, with special emphasis on services for those approaching the maximum duration for participants under this Act.

STATE JOB BANK SYSTEMS

SEC. 402. (a) For purposes of carrying out this section, there are authorized to be appropriated $50,000,000 for fiscal year 1984 and for each of the three succeeding fiscal years.

(b) The sums appropriated for each fiscal year to carry out this section shall be made available by the United States Employment Service for the development and implementation of job bank systems in each State, designed to use computerized electronic data processing and telecommunications systems for such purposes as—

(1) identifying job openings and referring jobseekers to job openings, with continual updating of such information;

(2) providing information on occupational supply and demand; and

(3) utilization of such systems by career information delivery systems (including career counseling programs in schools).

(c) Wherever possible, computerized data systems developed with assistance under this section shall be capable of utilizing software compatible with other systems (including management information systems and unemployment insurance and other income maintenance programs) used in the administration of employment and training programs. In developing such systems, special consideration shall be given to the advice and recommendations of the State occupational information coordinating committees (established under section 161(b) of the Vocational Education Act of 1963), and other users of such systems for the various purposes described in subsection (b).

TITLE V—GENERAL PROVISIONS

GENERAL REQUIREMENTS

SEC. 501. (a)(1) No person shall be excluded from participation in, denied the benefits of, subjected to discrimination under, or denied employment in the administration of or in connection with any program under this Act because of race, color, religion, sex, national origin, age, handicap, or political affiliation or belief.

(2) Participants under this Act shall not be employed on the construction, operation, or maintenance of so much of any facility as is used or to be used for sectarian instruction or as a place for religious worship.

(3) With respect to terms and conditions affecting, or rights provided to, individuals who are participants in activities supported by funds provided under this Act, such individuals shall not be discriminated against solely because of their status as participants under this Act.

(b) Funds provided under this Act shall only be used for activities which are in addition to those which would otherwise be available in the area in the absence of such funds.

(c) No funds made available under this Act for subsidized employment may be provided to a private organization, institution, or contractor to conduct any activities customarily performed by employees of a State, a political subdivision, or a local educational agency in the area served by the program.

(d) Only individuals residing in the area of a recipient under title II or III of this Act may participate in activities funded under this Act by that recipient.

(e) No individual shall be eligible to be employed in a position subsidized under this Act if the State employment service agency determines that such individual has, within the preceding six months, voluntarily terminated, without good cause, his or her last previous full-time employment at a wage rate equal to or exceeding the Federal minimum wage as prescribed under section 6(a)(1) of the Fair Labor Standards Act of 1938.

(f) Financial assistance under this Act shall not be provided for any program which involves political activities.

(g)(1) An individual in employment subsidized under this Act shall be paid wages which shall not be less than the highest of (A) the minimum wage under section 6(a)(1) of the Fair Labor Standards Act of 1938, (B) the minimum wage under the applicable State or local minimum wage law, or (C) the prevailing rates of pay for individuals employed in similar occupations by the same employer.

(2) The portion of the wages which may be paid to any participant from funds made available under this Act shall not exceed $230 for any week, but such maximum shall be adjusted annually by a percentage (rounded to the nearest tenth of a percent) equal to any increase in aggregate wages and salaries per capita in the United States, as determined by the Secretary.

(3) Participants employed under this Act may have their wages supplemented by the payment of additional wages for such employment from sources other than this Act, not to exceed an amount equal to 50 percent of the maximum wage applicable under paragraph (2).

(4) Participants employed under this Act shall be allowed sufficient time off from work activities to participate effectively in the job search activities authorized under section 401 of this Act.

(5) Funds under this Act may be used to employ individuals in part-time, flexible-time, and work-sharing employment customarily offered by the employer, if such individuals receive benefits customarily provided with respect to such employment by the same employer.

(6) Programs under this Act shall maintain an individual work record for each participant, to be provided to each participant at the end of his or her participation, which shall contain—

(A) a documentary history of the experience and skills acquired by each participant; and

(B) a list of the major work tasks completed by each participant.

(h) Any funds appropriated to carry out this Act which are allotted for any fiscal year shall be available for expenditure by the recipient during a period of one year from the date of payment to the recipient. No part of any allotment shall be revoked or canceled as long as the funds so allotted are expended by the recipient within such one-year period. If any such funds are not so expended, the Secretary shall reallot an amount equal to such unexpended funds among other eligible recipients in accordance with this Act.

LABOR STANDARDS

SEC. 502. (a)(1) Conditions of employment and training shall be appropriate and reasonable in light of such factors as the type of work, geographical region, and proficiency of the participant.

(2) The regulations (relating to health and safety and worker's compensation) implementing paragraphs (2) and (3) of section 143(a) of the Job Training Partnership Act (Public Law 97-300) issued on March 15, 1983, shall apply to participants under this Act.

(3) All individuals while employed in subsidized jobs under this Act shall be provided benefits and working conditions at the same level and to the same extent as other employees working a similar length of time and doing the same type of work.

(4) No funds available under this Act may be used for contributions on behalf of any participant to retirement systems or plans.

(b)(1) No currently employed worker shall be displaced by any participant (including partial displacement such as a reduction in the hours of nonovertime work, wages, or employment benefits).

(2) No program shall impair existing contracts for services or collective-bargaining agreements, except that no program under this Act which would be inconsistent with the terms of a collective-bargaining agreement shall be undertaken without the written concurrence of the labor organization and employer concerned.

(3)(A) No participant whose wages are subsidized under this Act shall be employed or job opening filled when any other indi-

vidual is on layoff from the same or any substantially equivalent job.

(B) No participant whose wages are subsidized under this Act shall be employed or job opening filled when, after the enactment of this Act, the employer terminates the employment of any regular unsubsidized employee in the same or any substantially equivalent job or otherwise reduces the number of regular unsubsidized employees in such jobs.

(C) No participant whose wages are subsidized under this Act shall be employed or job opening filled in any government department having 25 or more regular unsubsidized employees, unless the number of such employees who are currently employed in such department is at least equal to the lower of—

(i) the number of regular unsubsidized employees who were employed in the work force of such department in the calendar quarter preceding the enactment of this Act, or

(ii) the number which is equivalent to the same proportion of the number described in clause (i) as that proportion which the total number of regular unsubsidized employees currently employed in the work force of all departments of such government bears to the total number of regular unsubsidized employees who were employed in the work force of all departments of such government in the calendar quarter preceding the enactment of this Act.

(4) No jobs shall be created in a promotional line that will infringe in any way upon the promotional opportunities of currently employed individuals.

(c)(1) Each quarterly report submitted pursuant to section 204(c), 241(f), or 303(c) shall be transmitted by the recipient to any labor organization representing government employees who are engaged in similar work to that performed by employees whose wages are subsidized under this Act.

(2) Each quarterly report submitted pursuant to section 204(c), 241(f), or 303(c) which is subject to the requirements of paragraph (3) shall, with respect to each government department in which subsidized employment is provided under this Act, set forth—

(A) the number of all regular unsubsidized employees of such department (i) during the quarter to which such report applies, and (ii) during the quarter preceding the enactment of this Act; and

(B) the number of employees subsidized under this Act in such department during each such quarter.

(3) If, for two succeeding calendar quarters, there has been an average decline of 5 percent or more in the number of such unsubsidized employees in any such department as compared to such number for the quarter described in paragraph (2)(A)(ii), such report shall include a statement identifying the jobs which have been reduced and setting forth any reasons that such reduction does not result from a failure to comply with section 501(b) or subsection (b) of this section.

(4) Any such report which is required to contain such a statement shall be subject to review in accordance with subsection (d).

(d)(1) Whenever any employee, or labor organization representing employees, of a government employing subsidized employees under this Act submits to the Secretary a complaint alleging that section 501(b) or subsection (b) of this section has been violated, a copy of such complaint shall be transmitted at the same time to such government. An opportunity shall be afforded to such government to review such complaint and to submit a reply to the Secretary within 15 days after receiving a copy of such complaint.

(2) An official who shall be designated by the Secretary shall review any report required to include a statement specified in subsection (c)(3), or any complaint submitted in accordance with paragraph (1), to ascertain the accuracy of the information set forth or alleged and to determine whether there is substantial evidence that the affected activities fail to comply with section 501(b) or subsection (b) of this section.

(3) The official so designated shall, within 45 days of the submission of such report or complaint, submit recommendations to the Inspector General of such Department as to whether the report or complaint warrants investigation by the Office of the Inspector General. After reviewing such recommendations, the Inspector General shall undertake any investigations (including an audit, if appropriate) deemed to be warranted.

(4) A determination of whether a violation of section 501(b) has occurred shall be made after considering legitimate bases for layoffs or terminations of employees not subsidized under this Act within the same department or budget function, such as a shortfall of revenues compared with expenditures despite maintenance of local tax effort, or the requirements of governmental reorganizations or productivity improvements affecting work not performed by such subsidized employees.

(5) Not later than 90 days after the report or complaint described in paragraph (2) is submitted, the Inspector General's findings as to whether a failure to comply with section 501(b) and subsection (b) of this section has occurred shall be transmitted to the Secretary. The Secretary shall, within 30 days after receiving the Inspector General's findings, issue a determination as to whether a violation of section 501(b) or subsection (b) of this section has occurred, which shall constitute the final determination of the Secretary for purposes of chapters 5 and 7 of title 5, United States Code.

(6) The Secretary shall institute proceedings under section 503(b) for the repayment of funds determined to have been expended in violation of section 501(b) or subsection (b) of this section.

(e)(1) Each recipient of funds under this Act shall provide to the Secretary assurances that none of such funds will be used to assist, promote, or deter union organizing.

(2) Where a labor organization represents a substantial number of employees who are engaged in similar work or training in the same area as that proposed to be funded under this Act, an opportunity shall be provided for such organization to submit comments with respect to such proposal.

(f)(1) All laborers and mechanics employed by contractors or subcontractors in any construction, alteration, or repair, including painting and decorating, of projects, buildings, and works which are federally assisted under this Act, shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary in accordance with the Act of March 3, 1931 (commonly known as the Davis-Bacon Act), as amended (40 U.S.C. 276a-276a-5). The Secretary shall have, with respect to such labor standards, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 FR 3176; 64 Stat. 1267) and section 2 of the Act of June 1, 1934, as amended (48 Stat. 948, as amended; 40 U.S.C. 276(c)).

(2) Such rates are not required to be paid to participants under this Act unless they are employed in connection with projects funded by this Act in whole or in part, exclusive of wages and benefits, or projects covered by any other statute requiring the payment of such Davis-Bacon Act wage rates.

(g) For purposes of this section—

(1) information concerning numbers of employees shall be reported in a manner consistent with the reporting of information (including the definitions of terms) requested from governments by the Bureau of the Census in the Survey of Government Employment for the 1982 Census of Governments, as authorized in accordance with section 161 of title 13, United States Code;

(2) the term "government" means a State, a local unit of general purpose government, a public agency, or a local educational agency; and

(3) the term "regular unsubsidized employee" means any employee whose wages are paid in whole or in part from non-Federal funds, but does not include any employee whose wages are paid in whole or in part with funds made available under this Act.

FISCAL CONTROLS; SANCTIONS

SEC. 503. (a)(1) The Comptroller General of the United States shall, on a selective basis, evaluate the expenditures by the recipients under this Act in order to assure that expenditures are consistent with the provisions of this Act and to determine the effectiveness of each recipient in accomplishing the purposes of this Act. The Comptroller General shall conduct the evaluations whenever necessary and shall periodically (at least annually) report to the Congress on the findings of such evaluations.

(2) Nothing in this Act shall be deemed to relieve the Inspector General of the Department of Labor or the Inspector General of the Department of Education of responsibilities under the Inspector General Act.

(3) For the purpose of evaluating and reviewing programs established or provided for by this Act, the Comptroller General shall have access to and the right to copy any books, accounts, records, correspondence, or other documents pertinent to such programs that are in the possession, custody, or control of any recipient of funds under this Act, or any contractor or subcontractor of such recipients.

(b) Every recipient shall repay to the United States amounts found not to have been expended in accordance with this Act. The Secretary may offset such amounts against any other amount to which the recipient is or may be entitled under this Act unless he determines that such recipient should be held liable pursuant to subsection (c). No such action shall be taken except after notice and opportunity for a hearing have been given to the recipient.

(c)(1) Each recipient shall be liable to repay such amounts, from funds other than funds received under this Act, upon a determination that the misexpenditure of funds was due to willful disregard of the requirements of this Act, gross negligence, or failure to observe accepted standards of administration. No such finding shall be made except after notice and opportunity for a fair hearing.

(2) In determining whether to impose any sanction authorized by this section against a recipient for violations by a subcontractor

of such recipient under this Act, the Secretary shall first determine whether such recipient has adequately demonstrated that it has—

(A) established and adhered to an appropriate system for the award and monitoring of contracts with subcontractors which contains acceptable standards for ensuring accountability;

(B) entered into a written contract with such subcontractor which established clear goals and obligations in unambiguous terms;

(C) acted with due diligence to monitor the implementation of the contract, including the carrying out of the appropriate monitoring activities (including audits) at reasonable intervals; and

(D) taken prompt and appropriate corrective action upon becoming aware of any evidence of a violation of this Act by such subcontractor.

(3) If the Secretary determines that the recipient has demonstrated substantial compliance with the requirements of paragraph (2), the Secretary may waive the imposition of sanctions authorized by this section upon such recipient. The Secretary is authorized to impose any sanction consistent with the provisions of this Act and of any applicable Federal or State law directly against any subcontractor for violation of this Act.

(d) In emergency situations, if the Secretary determines it is necessary to protect the integrity of the funds or ensure the proper operation of the program, the Secretary may immediately terminate or suspend financial assistance, in whole or in part, if the recipient is given prompt notice and the opportunity for a subsequent hearing within 30 days after such termination or suspension. The Secretary shall not delegate any of the functions or authority specified in this subsection, other than to an officer whose appointment was required to be made by and with the advice and consent of the Senate.

(e) If the Secretary determines that any recipient under this Act has discharged or in any other manner discriminated against a participant or against any individual in connection with the administration of the program involved, or against any individual because such individual has filed any complaint or instituted or caused to be instituted any proceeding under or related to this Act, or has testified or is about to testify in any such proceeding or investigation under or related to this Act, or otherwise unlawfully denied to any individual a benefit to which that individual is entitled under the provisions of this Act, the Secretary shall, within thirty days, take such action or order such corrective measures, as necessary, with respect to the recipient or the aggrieved individual, or both.

(f) The remedies under this section shall not be construed to be exclusive remedies.

(g) Recipients shall keep records that are sufficient to permit the preparation of reports required by this Act and to permit the tracing of funds to a level of expenditure adequate to insure that the funds have not been spent unlawfully.

(h)(1) In order to insure compliance with the provisions of this Act, the Comptroller General of the United States may conduct investigations of the use of funds received under this Act by any recipient.

(2) In conducting any investigation under this Act, the Secretary or the Comptroller General of the United States may not request the compilation of any new information not readily available to such recipient.

JUDICIAL REVIEW

SEC. 504. (a)(1) With respect to any corrective action or sanction imposed under section 503 by the Secretary, any party to a proceeding which resulted in such action or sanction may obtain review of such action or sanction in the United States Court of Appeals having jurisdiction over the applicant or recipient of funds, by filing a review petition within 30 days of such final order.

(2) The clerk of the court shall transmit a copy of the review petition to the Secretary who shall file the record upon which the action or sanction was entered as provided in section 2112 of title 28, United States Code. Review petitions, unless ordered by the court, shall not stay the Secretary's action or sanction. Petitions under this Act shall be heard expeditiously, if possible within ten days of the filing of a reply brief.

(b) The court shall have jurisdiction to make and enter a decree affirming, modifying, or setting aside the action or sanction of the Secretary in whole or in part. The court's judgment shall be final, subject to certiorari review by the Supreme Court of the United States as provided in section 1254(1) of title 28, United States Code.

DEFINITIONS

SEC. 505. (a) For the purposes of this Act—

(1) the term "economically disadvantaged" means an individual who (A) receives, or is a member of a family which receives, cash welfare payments under a Federal, State, or local welfare program; (B) has, or is a member of a family which has, received a total family income during the 6-month period prior to certification (exclusive of unemployment compensation, child support payments, and welfare payments) which, in relation to family size, was not in excess of the higher of (i) the poverty level determined in accordance with criteria established by the Director of the Office of Management and Budget, or (ii) 70 percent of the lower living standard income level; (C) receives, or is a member of a family which receives, food stamps pursuant to the Food Stamp Act of 1977; (D) is a foster child on behalf of whom State or local government payments are made; or (E) is a handicapped individual whose own income meets the requirements of clause (A) or (B), but who is a member of a family whose income does not meet such requirements;

(2) the term "institution of higher education" has the meaning provided under section 1201(a) of the Higher Education Act of 1965;

(3) the term "local educational agency" has the meaning provided in section 195(10) of the Vocational Education Act of 1963;

(4) the term "public library" has the meaning provided under section 3 of the Library Services and Construction Act;

(5) the term "recipient" means any eligible entity receiving funds under an allotment for parts A and B of title II, any State receiving funds under an allotment for part C of such title, any State or local educational agency receiving funds under an allotment for part A of title III, any State higher education building agency or institution of higher education receiving funds under an allotment for part B of such title, and any State employment service agency receiving funds under title IV;

(6) the term "Secretary" means the Secretary of Labor, except that—

(A) for purposes of title III, such term means the Secretary of Education; and

(B) with respect to sections 501(h), 503, and 504, such term means either the Secretary of Labor or the Secretary of Education, whichever is appropriate;

(7) the term "State" means any of the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, American Samoa, and the Trust Territory of the Pacific Islands;

(8) the term "unemployed individuals" means individuals aged sixteen or older who are without jobs and who want and are available for work, as determined in accordance with criteria used by the Bureau of Labor Statistics of the Department of Labor in defining individuals as unemployed, but such criteria shall not be applied differently on account of an individual's previous employment; and

(9) the term "unit of general local government" means any city, town, township, parish, or (except in Connecticut, Massachusetts, Rhode Island, and Vermont) county which is a general purpose political subdivision of a State that has the power to levy taxes and spend funds, as well as general corporate and police powers.

(b) In making determinations for purposes of this Act with respect to population, civilian labor force, and unemployment, the Secretary shall use the most satisfactory current data available on a seasonally adjusted basis.

(c) For the purposes of computations of the number of unemployed individuals in a State, county, or eligible entity, the Secretary shall determine the average number of individuals who were unemployed during the most recent 12 months preceding the determination for which satisfactory data is available.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 61, after line 12, add the following new section:

SEC. 506. In administering the programs for which funds are provided by this Act to promote productive employment, 100 percent of the employment created by this Act shall go to individuals who are classified as having been unemployed for at least six weeks immediately prior to the date of enactment of this Act.

Mr. WALKER. Mr. Chairman, this is the amendment that I talked about a good deal during the course of our deliberations here, both in general debate and in the course of the amendment process.

This is the 100-percent amendment. What this amendment, drafted with the help of Mr. KEMP, of New York, says very simply is that all of the money that we are going to put into employment, that the money has to go to people who are unemployed. And instead of the 15 weeks in the bill, it says that they have to have been unemployed for only 6 weeks immediately prior to the date of enactment of this bill.

What we are doing is targeting virtually all of the employment money to people who are unemployed.

Now, earlier today, my colleague from Illinois came to the floor, and I thought made very, very strong argu-

ments in favor of targeting more of the money toward the unemployed.

We went through a process where by voice vote we watered down the approach that he wanted to take.

Well, I think that this is a key amendment then. We should not accept a watered-down version of targeting money toward the unemployed. We ought to make certain that all of the money gets to the unemployed. That is what this amendment would do. It would say flatly that all of the money has to go to people who have been unemployed for 6 weeks or more.

Now, why is that important? It is important because our experience with these programs in the past has been that the money does not get to the unemployed. I have cited examples in the course of our deliberations earlier, one of which was developed by the Carter administration in their OMB report dealing with the public works bill that we passed here in 1976 and went into effect, which found that 98 percent of the money got spent on people who already had a job.

□ 1620

Only 2 percent of the money got to the unemployed. Eighty-eight percent of the jobs created went to people who already had a job. Only 12 percent of the jobs created went to the unemployed. That is an atrocious record on programs that are supposedly helping people who are unemployed.

We have had the same kind of experience with CETA. CETA very often resulted in communities taking some people off regular rolls and transferring them over to CETA rolls and not really creating any new employment.

What we want to do, it seems to me, in a bill of this type is to assure ourselves that when we spend $3.5 billion of deficit add on, at least the money gets to the people whom it was intended to go to. That is the point behind this amendment. It is a fairly simple amendment from that regard. It says that all of the money has got to go to the people who are unemployed at the time that this bill is enacted.

Mr. HAWKINS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I cannot believe that this amendment is being offered to this body in the form in which it is offered.

First of all, the amendment really reduces the restrictive requirement that is already in the act, which says that an individual must be unemployed at least 15 weeks. This amendment would reduce it to 6.

Now, in addition to that, the amendment says that the individual must have been unemployed at least 6 weeks immediately prior to the date of enactment of this act. That is the most static provision I have ever seen in any statutory proposal. It simply means that upon the enactment of this act, if this provision is in it, that no one could be employed who had not been unemployed during this period of time. It would just completely terminate from any consideration those who subsequently become unemployed and who therefore qualify by being unemployed for 15 weeks under the act.

This, I am sure, does not really conform to the intent of the sponsor, and I cannot for my life understand what it is that is being proposed. It does not certainly correspond to what he said in the well. It is a provision that I think reduces, actually, the restriction that he speaks of which is in the bill, that a person must have been unemployed 15 weeks.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I think, first of all, it needs to be understood by our colleague that I am including more unemployment people, not less; that with the 6-week requirement, you are now going to have people who are unemployed for only a 6-week period eligible for the program rather than as the gentleman's amendment proposes, having to be out of work for 15 weeks.

I submit that a person who has been unemployed for 6 weeks is just as much unemployed as the person who has been unemployed for 15 weeks and that we ought not to treat them differently. The 6-week requirement is in there because that is the transitory time that takes place in a lot of job categories.

So it seems to me that the 6-week requirement includes a broader base of unemployed.

Second, with regard to the gentleman's concern about the date of enactment of the bill, I was under the impression, based upon much of the discussion that we have had on the floor, that what we were attempting to do is speak to the unemployment problem that now faces us—that we have got 9.5 percent unemployment, we have got 10.5 million Americans unemployed. What my amendment would do would assure us that those 10.5 million Americans are who we target this bill toward.

If we allow the program to go on and increase the number of people that it covers, you will, first of all, water down the effort and, second, what you will do is end up with a program that does encourage people to move off employment rolls on to the rolls of this particular bill.

So the idea is that my amendment targets it 100 percent toward people who are unemployed. That is who I thought we wanted to try to help.

Mr. HAWKINS. Well, I quite agree with most of the reasoning of the gentleman. That is the unfortunate part of it. I think an individual who sometimes is unemployed for a week is certainly entitled to consideration. But we have already decided that the moneys would be restricted. We have already voted for $3.5 billion. Now, how far are we going to go with $3.5 billion?

We know that there are 12 million unemployed people, and I would like to take care of all of them. But you probably would not take me seriously if I attempted to authorize the amount of money that would take care of 12 million unemployed. So because we understand the situation and because we are trying to meet the problem of being reasonable with respect to the deficit and the other considerations, we say we are now going to take care of the very neediest, we are going to take care of those who have been unemployed the longest.

Now, once we have done some of that, perhaps we could reduce it to 6 weeks. But I do not think the body is ready to take care of all of those individuals at this time, so we want to place some priority on those who have been unemployed the longest.

Now, with respect to the other part of what the gentleman has discussed, the gentleman would reduce the application of this program to those who were unemployed at least 6 weeks prior to the enactment of this act, with a cutoff date. It simply means that if you were not unemployed during that period of time, then you would not qualify for the program, even though you built up the 15 weeks after the enactment of the program. So you are cutting off those who in the future may qualify for the act. You are saying, "There is no chance for you." And that certainly is just as objectionable.

Mr. DURBIN. Mr. Chairman, I move to strike the requisite number of words.

Would the gentleman from Pennsylvania (Mr. WALKER) answer a question for me?

Mr. WALKER. I will be glad to.

Mr. DURBIN. I thank the gentleman for his nice comments about my efforts this morning, ill-fated though they were.

I would like to ask the gentleman from Pennsylvania this question: When I rose to speak this morning, and when I offered the amendment, it was with the clear understanding that I supported this legislation; and I felt that the amendment I offered would improve it. Unfortunately, it failed, but I think we did accomplish something with my other amendment.

If the gentleman's amendment is adopted, is the gentleman prepared to vote in support of this legislation?

Mr. WALKER. Well, I think that if this amendment were adopted and some of the other amendments that I

plan to offer, which I think improve the bill, were adopted, I would consider supporting the legislation. But I have got a couple of other amendments that I think are also very important on it, so I will have to examine it at that point.

I made it quite clear, I think, on the floor, that I think there are a number of parts of this program which cause me personal difficulty. One of those features is certainly the fact that similar programs in the past have not gone to people who are unemployed. I think that is what the gentleman articulated very well this morning and what I continue to compliment him for.

Mr. DURBIN. Well, I am sure the gentleman's support will be appreciated, and I thank the gentleman.

Mr. SAM B. HALL, JR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to ask the gentleman from Pennsylvania a question or two. As I read the amendment, it states that 100 percent of the funds created by this act will go to people who are unemployed.

Mr. WALKER. Of the funds provided by this act to promote productive employment, that is right.

Mr. SAM B. HALL, JR. Now, does that mean that no money could be used to administer this act?

Mr. WALKER. No. Obviously, what we are saying here is that 100 percent of the employment created by this act, in other words, people who are newly employed as a part of this bill, would be covered 100 percent from the unemployment ranks at the present time. That is all it covers.

If the administration of a program by a local government was a part of it and is within the limits that the bill has previously set of 15 percent, we would have no problem with it here. All we are saying is that of all the new jobs created, all of them would have to go to people who are now unemployed.

Mr. SAM B. HALL, JR. If the gentleman will answer a further question, as I understand it, this money would go to those people who are classified as having been unemployed for at least 6 weeks immediately prior to the date of enactment of this act. Do I understand that if this amendment is passed, anyone who may become unemployed for a period of 6 weeks, beginning the week after this act is enacted, that person would not be subject to unemployment benefits?

Mr. WALKER. That would be correct under this amendment. And I would say to the gentleman that the reason for that is very clear. As the gentleman from California has so articulately put it, there are a limited number of resources in this bill. You have a finite amount of money available. The purpose behind this bill and the reason for bringing it to the floor is because we have 10.5 million Americans who are unemployed right now. What this amendment seeks to do is to make certain that that $3.5 billion is used to help those Americans who are now unemployed.

If we are going to help the people who become unemployed for whatever reason later on, then we would find additional funding to move in that direction, if that is what we so wished to do. But the purpose behind the bill, as I understand it and as I have heard it talked about on the floor, listening to the entire debate, was to help those people who are now unemployed. That is what my amendment would assure, that people who are now in the unemployment ranks, some of whom have been there for a long time, would get the money.

Mr. SAM B. HALL, JR. I thank the gentleman.

Mr. LEVIN of Michigan. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Just briefly, I am mystified how anyone can arise on this floor and say that an amendment is aimed at those who have been hardest hit and propose that the benefits of this bill should go to those who have been unemployed for 6 weeks rather than those who are unemployed for a minimum of 15 weeks.

□ 1630

I just do not understand the logic. It seems to me that we should combine here on both sides of the aisle and reject this amendment and pass this bill that has been so skillfully and carefully crafted to get at one of the most overwhelming and overriding issues in our society, and that is a job opportunity for those who are used to working who want to work and who are out of work through no fault of their own.

Mr. Chairman, I would hope we would reject this amendment and move quickly to the passage of this bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The question was taken; and on a division (demanded by Mr. WALKER) there were—ayes 7, noes 31.

Mr. WALKER. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Sixty-nine Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1640

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Pennsylvania (Mr. WALKER) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 142, noes 279, not voting 12, as follows:

□ 1650

Mr. DURBIN and Mrs. LLOYD changed their votes from "aye" to "no."

Mr. HUNTER changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1700

AMENDMENT OFFERED BY MR. SOLOMON

Mr. SOLOMON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SOLOMON: Page 45, after line 24, insert the following new subsection.

(i) The Secretary shall insure that each individual participating in any program established under this Act, or receiving any assistance or benefit under this Act, has not violated section 3 of the Military Selective Service Act (50 U.S.C. App. 453) by not presenting and submitting to registration as required pursuant to such section. The Director of the Selective Service System shall cooperate with the Secretary in carrying out this section.

Mr. SOLOMON. Mr. Chairman, I will not take up a great deal of time on this amendment. The House is very familiar with it. It is an identical amendment that has been accepted by this House overwhelmingly on several other occasions. It simply says to qualify for this job training program that you must be registered for the draft.

Ladies and gentlemen, in the past when we have offered this amendment the legislative intent has been threefold. One, to educate the public that the draft registration law exists. Two, to encourage these young men to obey the law and live up to the obligations of their country. And three, to let them know that the Federal Government will enforce this law.

I might just call to the attention of the Members that since the enactment of the two previous Solomon amendments, one of the college loans and grants and the other on the Job Training Partnership Act, that compliance has risen from 79 percent to over 97.6 percent today.

That means that more than 10 million young Americans have lived up to their obligations and have obeyed the law. There are still 2.4 percent who have not. And many of these young men are still ignorant that the law exists. I think it is only fair that when we do have Federal moneys available, that certainly those that do obey the law, that live up to their obligations, certainly have first preference. I would hope this amendment could be accepted without taking up a great deal of time. It has overwhelmingly passed this House on three previous occasions.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. SOLOMON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 61, after line 12, add the following new section:

SEC. 506. The Secretary of Labor may, upon application by any unit of local government eligible for assistance as defined in section 505(a)(9) of this Act, waive any provision of this Act if such unit of local government demonstrates that such waiver will result in a substantial increase in the level of employment which is available within the jurisdiction of such government.

Mr. WALKER. Mr. Chairman, this amendment speaks to an issue that has arisen on the floor in the course of our debate which says to many of us on my side of the aisle what would you do to help people who are unemployed. This amendment says that one of the things that we can do that goes beyond the efforts in this bill is to assure that local governments, where they find Federal restrictions that result in labor distortions, they can apply for a waiver of such restrictions and such regulations and such laws.

But in order to do so, under this amendment, they would have to show that they could substantially increase the level of employment within that jurisdiction. In other words, they would apply to the Secretary of Labor and they would say that we think that by waiving this particular rule or this particular restriction under Federal law that we can create substantially higher levels of employment in our community and, therefore, we are asking you to waive that restriction in this community.

Now, what is particularly important about this amendment is that it applies to section 505(a)(9) of the act. So that means that it is targeted toward those areas that the bill considers to be high unemployment areas. And so, what we have got is an opportunity for local communities who have severe unemployment in addition to spending money that is allocated under this bill, can also look to those things where the Federal Government is now preventing them from creating employment and can say that they want to waive those restrictions as well so they can employ more people.

It speaks to an issue that I think the gentleman from Maryland (Mr. MITCHELL) raised quite eloquently yesterday, and that is that a lot of people in his district say, "I want a job, I want any kind of a job."

I think that that is something which we ought to respond to. This amendment would say that that community can respond to some of those people by saying where the Federal Government is preventing you from getting a job, we apply for a waiver so that you can in fact get a job.

The amendment from that standpoint is a very simple one. It is one which I would hope the House would adopt, so that we can make this the broadest possible application of employment opportunities for the individuals and the citizens of this country.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MITCHELL. Mr. Chairman, I rise in opposition to the amendment.

There are some employers who argue, very wrongly, that they take up so much time in complying with title VII of the Civil Rights Act that if that time were not used in compliance, they could be marketing and creating more jobs. If those employers convinced a local political subdivision that title VII was an impediment to full employment, you mean a city could come in and ask for a waiver on title VII?

□ 1710

When did we start doing government by waiver?

We have a Constitution that says this body does this, this body judges, and this body executes. Now do you want to start government by waiver?

Let us do another one. We have allowed for certain provisions for senior citizens. We say that our optimal effort should be made to employ senior citizens, not in the law, of course, but we say that.

Then some local government says I am spending all of my time, or a number of local employers would say we are spending all of our time trying to make sure that senior citizens get tired until we cannot market our product. Therefore, that is an impediment. If we cannot market the product we cannot create more jobs; therefore, that is an impediment.

I would say to the gentleman from Pennsylvania: Do you really want to do that?

You and I get along fine. But, honestly, you have not thought through the implications of this amendment.

Would you please vote against a new-found principle that is being promoted by the gentleman from Pennsylvania: Government by waiver.

Mr. MILLER of California. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL. I will be delighted to yield.

Mr. MILLER of California. I think it is also apparent from the wording of the language that not only would you have the right to waive title VII, the antidiscrimination laws, but obviously the amendment is directed at waiving the minimum wage law, and also apparently an employer can come in, or a program can come in and ask that they waive the auditing provisions of that law, because it says any of the fiscal controls that we have heard so much about earlier this afternoon.

This is not a well drawn amendment. It was presented as a simple amendment. Simple minded is more what it is, because it allows an employer, if they can cut a deal with the Secretary of Labor, to simply waive those provisions of law that this Congress is on record time and again for the enforcement of.

Apparently if you think that blacks stand in your way of getting a job you will ask for a waiver. If you think women stand in your way of getting a job you will ask for a waiver. If you think white people stand in your way you ask for a waiver.

That is not how we do business in this country. If you happen to think that paying a decent wage is in the way of you providing employment, get a waiver.

I absolutely agree with the gentleman from Maryland that this is an outrageous assault on the fundamental laws protecting working people in this country. What you would have is the Federal Government sanctioning the doing away, or the ability to do away with those provisions of law.

That is not the policy of the Congress of the United States either on the Republican side of the aisle or the Democratic side of the aisle.

Mr. MITCHELL. I thank the gentleman for his comment.

As I understand it, my colleague from Pennsylvania has some additional amendments. I am going to strive mightily to see if I cannot support some of his additional amendments.

I do not know what they will do, but in my usual objective fashion I am going to examine them and say that if it is a good amendment I want to vote for it. I want to vote for one, but for God's sakes, this is not the one that destroys the whole system of government we have set up.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I appreciate the gentleman yielding, and I hope, too, that knowing him to be a fair and objective man, that he will find that he is able to support an amendment.

Mr. MITCHELL. This is true.

Mr. WALKER. I have one on minority youth that I think the gentleman would want to take a look at.

Mr. MITCHELL. Let us do them one at a time. Let us defeat this one first and then do your youth amendment.

Mr. WALKER. I would have a different version of what I would like the outcome to be but I think it is important to note that local officials would have to make out that application for a waiver, that there could be no deals cut along the line here.

Mr. MITCHELL. May I reclaim my time? I must reclaim my time.

There is something going on right now in terms of a set-aside provision for minority business, and I am going to send the gentleman over a little memorandum on some of the strange things that are taking place under this administration with regard to waivers.

Mr. WALKER. Would the gentleman yield?

Mr. MITCHELL. I really would not. I want to speedily kill this one and then go on.

Mr. WALKER. Would the gentleman yield further?

Mr. MITCHELL. No more, no more. Let me get to the next one.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The amendment was rejected.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 61, after line 12, add the following new section:

SEC. 506. The Secretary of Labor may, upon application by any unit of local government eligible for assistance as defined in section 505(a)(9) of this Act, waive any provision of this Act if such unit of local government demonstrates that such waiver will result in a substantial increase in the level of employment for minority youths.

Mr. WALKER. Mr. Chairman, the language sounds somewhat familiar. I think that the House will understand that the language is basically the same.

But the House has just now rejected the idea that we ought to waive those provisions of Federal law that stand in the way of people getting jobs for the broad base of the population, that we ought not let local communities make decisions about how people get employed in those communities.

The House has just made that decision that the Federal Government ought to stand in the way of people getting jobs, regardless of what the local community might think about that process.

But I would submit to you that there are some people within our employment realm that have particular problems, problems that have not cured by more and more Government spending, have not even been cured as the economy has gone up.

There are minorities in this country that have seen their employment problem in reverse of what was happening in the economy, that every time the economy went up so did their employment.

That is particularly minority youth. Minority youth, even during the present economic recovery, have seen their unemployment rates go up while the economy has gotten a little better.

Is it not time that we begin to address some of the special needs of these people? The point is their needs, their needs are somewhat countercyclical to what the rest of the economy does.

For example, as the total civilian employment rate was dropping to 10.7 percent in December of 1982 to 9.5 percent in July 1983, the unemployment rate for minority youths re-

mained stuck at approximately 50 percent.

Although it edged downward marginally for a little while, it has gone back up.

From another angle, while 1.7 million jobs were being created in a 6-month timeframe, one out of every two minority youths remained unemployed.

Data from high GNP growth during the 1960's lends further credence to the contention that minority youth unemployment rates appear to be impervious to cycles of economic recovery. While the unemployment rate for all groups dropped 5.5 percent to 4.9 percent between 1960 and 1970 and 13 million new jobs were created in the process, the unemployment rate for black male youths increased from 24 percent to 25 percent and the rate for female black youths increased from 24.8 to 34.5 percent.

This is intolerable. Clearly such a dichotomy suggests that there must be a Government administered labor market restriction which is blocking significant improvements in the employment prospects for minority youth.

A recent poll conducted for the U.S. Chamber of Commerce indicated that 43 percent, a plurality of Americans, believe that Government policies and regulations are at least a somewhat serious cause of the unemployment problem.

That is what this seeks to address. It seeks to say that where you have a group which is particularly affected in unemployment, should we not at least there look at the fact that the Federal Government is preventing some of them from working by the kinds of restrictions that we have in the marketplace?

The gentleman from California a few minutes ago mentioned the minimum wage. Yes, minimum wage might be a factor here because it might well be that people under the minimum wage who would earn $150 a week, some of these young people, $3.35 an hour, might be able to find a job at $135 a week. Would they not be better off with that job working for $135 a week than no job, no opportunity, no nothing, at $150 a week that they cannot get?

Yes, that is what we are speaking to here. I happen to think that the work has a benefit in and of itself, and if we can waive some of the restrictions that keep minority young pepole from getting that first job then we ought to be doing something in this Congress to speak to that problem.

That is what this amendment does. This amendment is not the broad-based waiver that the first amendment was. It is targeted.

It says let us apply this idea to minority youth. Let us let communities out there who recognize that they have a minority youth unemployment problem apply for the waiver and allow the Federal Government to respond in some meaningful way to the problem that exists.

These kinds of programs that we are creating here on the floor today have not spoken to that problem well enough in the past to bring down the rate of unemployment. In fact, the rate of unemployment of those people has continued to go up.

□ 1720

I think it is time we speak to it. That is what this amendment does. This amendment speaks to it.

I yield back the balance of my time.

Mr. MILLER of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and members of the committee, this amendment is aimed directly at the minimum wage. Once again we have a long-established policy in this country that you get equal wages for equal work. We do not make that determination based upon your age. And if an employer determines that if you are over 20, a job is worth $3.35 an hour or $5 an hour and he gives that job to you, and you are 18, that is what the job pays.

And what we have seen time and again is efforts to lead an assault on the minimum wage and each and every time they fail to come forward with the studies that indicate that this is a barrier to employment of minority youth.

What in fact we found out time and again is that in fact this is dis-employment for minority adults, for older adults, the people who now work in those industries that pay the minimum wage, many of them elderly would now be replaced by the minority youth or other youth, because this does not restrict it to minority youth, to other youth involved and we see in fact a substitution takes place.

That is how the employer lowers the cost of doing business, not reflecting the real cost of providing that job.

The Chamber of Commerce study just done, interestingly enough, they made a survey that said this is what people think, but when they have come to my subcommittee and testified on the minimum wage, the employers said that is not why they do not hire youth. They do not hire youth because of educational attainment or because they do not do a good job, in their mind, in the work they do, not because of the wage that is paid.

The most recent study apparently done in the last couple of days for the Chamber of Commerce, the economist who came out and said they should not remove the minimum wage, that it is not a barrier, also came out and said he recommended against a subminimum wage.

So, I think what we have is a rather old out-dated idea that this will unlock ten's of thousands if not millions of jobs. Well, it will not. There is substantial evidence that it will create more unemployment among people who are desperately in need of that minimum wage.

I think it also shows a lack of understanding about some of the situations in which minority youth live.

A significant number of minority youth who earn the minimum wage are making a substantial contribution to the household income. This is not pin money, this is not money for gasoline for their third automobile or to go to the show; this is to support the household. And I think that there is a great deal of arrogance to suggest that the answer to this problem is telling the poor unemployed that they get to become part of the working poor. I think it is very important that we reject this amendment. There is no evidence to substantiate it.

It is anecdotal evidence, it is cocktail party talk, but the fact of the matter is this will not unlock jobs for minority youth; this in fact will unemploy many of our elderly, in the restaurant business, in the entertainment business, in the service industry.

If you want to look at why perhaps minority youth did not participate in the massive job creation that took place during the 1970's it is because those jobs were not located where minority youth could get to them, they were not located on major transit lines, they were located in suburban areas where minority youth do not live because more jobs are created in McDonald's—in the fast food industry than any other single industry and most of those were not built where there are concentrations of minority youth because of the discriminatory policy in the placement of those business enterprises.

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentleman.

Mr. PEPPER. I thank the gentleman.

Is it not also a possibility that there are some who support this kind of a measure whose objective is cheaper wages?

Mr. MILLER of California. There is no question that this is not a benevolent policy toward minority youth. This is a policy now put forth by a very select group of people in business in this country, because most of the big employers who employ youth have now determined that this is not the kind of policy they want to follow.

And so, it is a way to keep a downward pressure on workers' wages and conditions by creating this pool of young people that can be used to threaten the ability of older workers

to organize or have decent working conditions.

This is absolutely an antiworker measure.

Mr. FAUNTROY. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentleman.

Mr. FAUNTROY. I thank the gentleman and commend the gentleman for pointing out to the House that the author of the amendment is being consistent.

In the previous offering he suggested we ought to discriminate against those among the 2.5 million people who have been out of work 27 weeks by saying "Your right to a fair wage and your rights to health and other protection is guaranteed to other citizens, should be waived."

I appreciate your pointing out that fact.

Mr. PARRIS. Mr. Chairman, I move to strike the requisite number of words.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. PARRIS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I am sorry that the gentleman from California would not yield to me previously.

I just wanted to make the point that he was right in quoting from the study done by the chamber of commerce with regard to the subminimum wage.

However, he was not correct in his representation about the minimum wage in general. That study and I quote from Professor Fleisher who did the study:

> The minimum wage has no place in a constructive labor policy for the United States and is counterproductive as an element of a humane program of income transfers.

So, in fact they made the point that the minimum wage does have a good degree of inhumanity connected with it and it is one of the things we need to do as a part of this debate, to make certain that we reflect accurately the studies to which we are referring.

That is the accurate presentation.

I thank the gentleman.

Mr. PARRIS. I yield back the balance of my time.

Mr. HAWKINS. Mr. Chairman, I move to strike the requisite number of words.

I do not think it is necessary but let me just simply remind the Members that we have written into the act, I think, in response to much criticism of past jobs bills certain provisions which were intended to make this a tighter and certainly a better crafted bill. Those provisions which such amendments as this would permit a waiver to be granted against their operation, include antidiscrimination, antisubstitution, wage ceilings, prohibitions against political activity, union organization, health and safety.

Now, this is much broader than just the minimum wage. Any of these provisions can be waived.

For instance the antisubstitution provision could be waived because then the local jurisdiction could lay off adults in order to employ youth at a much lower wage.

Certainly by waiving health and safety provisions one could say this would make more money available for the employment of youth or other groups.

So, that I think the gentleman's intent may be good but certainly the result would be disastrous. I would only want to do this to remind the body that under the bill as it is now drafted 20 percent of the money will go to youth. Now, this is not just black youth, it is youth of all kinds.

I would suggest that we use that provision, if the gentleman is interested in youth, including black youth, let us use that well crafted provision which sets aside 20 percent of the money for youth rather than using the method that he is using to reach the same people.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, the Community Renewal Employment Act (H.R. 1036) refocuses our attention—and the Nation's—on the Achilles heel of economic policy, the persistence of staggering unemployment. After 9 months of so-called economic recovery, the national unemployment rate still is higher than at any point since the Depression of the 1930's.

Nearly 18 million workers—one-sixth of the labor force—are now either unemployed, underemployed, or dropouts from the labor force. The black jobless rate of 20 percent is more than double the rate among white workers, and the jobless rate for black teenagers has continued to climb and now stands at more than 50 percent.

Large areas of the Nation remain economically depressed, particularly the older, industrial centers. Michigan's jobless rate exceeds 14 percent; Detroit's unemployment rate stands at 20 percent. Fourteen States still experience double-digit jobless levels. Basic industrial sectors, including construction, mining, metals, machinery, autos, and steel, remain depressed.

The conventional wisdom holds that overall economic growth will spur job creation, promote a fair distribution of jobs among all groups and regions, and lead to jobs that provide an adequate income. Just the opposite has taken place under this so-called recovery. Job creation is more skewed than ever across regions and among groups, and the shift to lower paying "service" jobs at the expense of high-paying industrial jobs has only deepened the dual-labor market that has been developing. A novel feature of this so-called recovery is the extent to which the private sector is achieving better balance sheets precisely by eliminating workers through laborsaving devices, for example, labor-displacing technologies, more overtime for the existing work force, and so forth. As a matter of fact, the current economic situation is revealing a decoupling of job growth and economic growth, rather than a convergence.

The Community Renewal Employment Act is a constructive step in dealing with the unemployment crisis. It reasserts the Federal responsibility in job creation. It links job creation for the hard-core unemployed with meeting essential community needs in the areas of community improvement projects as well as public service delivery.

In point of fact, the unemployment situation today requires a thoroughgoing reexamination of economic policy. At the heart of the problem is the failure of Congress and the President to zero in on the compelling public interest in making the elimination of unemployment the top national priority.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 92, noes 327, not voting 14, as follows:

□ 1740

Messrs. CHANDLER, CRAIG, and HANSEN of Idaho changed their votes from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. MURPHY

Mr. MURPHY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MURPHY: Page 45, after line 24, insert the following new subsection:

(i) Regulations promulgated by the Secretary under section 123(g) of the Comprehensive Employment and Training Act as in effect on April 1, 1981, shall apply to funds provided under this Act for the purpose of assuring against program abuses, including, but not limited to, nepotism, conflicts-of-interest; the charging of fees in connection with participation in the program; excessive or unreasonable legal fees; the improper commingling of funds under this Act with funds received from other sources; the failure to keep and maintain sufficient, auditable, or otherwise adequate records; kickbacks; political patronage; violations of applicable child labor laws; the use of funds for lobbying local, State, or Federal legislators, and the use of funds for activities which are not directly related to the proper operation of the program.

Mr. MURPHY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. MURPHY) is recognized for 5 minutes in support of his amendment.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding.

Mr. Chairman, I rise in strong support of H.R. 1036, the Community Renewal Employment Act. I want to commend the distinguished chairman, the gentleman from California (Mr. HAWKINS) for a very well-crafted bill.

Mr. Chairman, the Community Renewal Employment Act that we are considering is urgently needed by millions of long-term jobless Americans as well as by thousands of communities across the country that have vital work waiting to be done.

The onset of an economic recovery has not alleviated the need for a community jobs program. Unemployment in New York City was 10.6 percent in August, unchanged from July and barely changed from the 10.7 percent rate of the previous year.

The problem is not confined to pockets of high unemployment. Across the country, there were still nearly 11 million unemployed in August, with an additional 1.7 million so discouraged they had abandoned the search for work. Nearly 6 million more have been forced to work part time though they need full-time jobs. A key measure of labor market hardship—total weeks of unemployment—is still rising rapidly. More than one-half of the long-term jobless are not receiving any unemployment insurance benefits.

Among blacks, unemployment is 20 percent; among Hispanics, almost 13 percent. For black teenagers, it is a staggering 53 percent, and for all youths, the jobless rate is 23 percent.

The Community Renewal Employment Act would help alleviate the hardship and suffering associated with the statistics. Second, it would help reduce the Federal deficit through the taxes paid by workers under the program and the savings in Federal outlays for services to the unemployed, such as welfare and food stamps. It is important to remember that each extra percentage point of unemployment adds from $25 to $30 billion to the Federal deficit.

Finally, this program would revitalize communities across America that have foregone needed repairs and renovations and have curtailed human services because of Federal program cutbacks and the recession. The program would allow communities to provide services to the elderly, the handicapped and veterans, to renovate community buildings, repair roads and bridges, carry out emergency food and shelter programs and provide library services. Under title III of the bill, funds would go to colleges and school districts to upgrade their facilities. Possible projects under this education program include making buildings energy-efficient or accessible to the handicapped and converting unused buildings into adult education centers.

Lessons from public jobs programs of the past have been important in developing this program. The bill has the strongest provisions against abuse that have ever been written into a Federal jobs program. It insures against the substitution of federally subsidized jobs for local jobs with an automatic review process and a complaint process for persons who are al-

legedly displaced by the program. The jobs have to be in short-term projects that will supplement and not supplant current services. As a further protection against abuse, participants will be certified as eligible by State employment agencies, rather than by local elected officials.

Eligibility is restricted to individuals who have been unemployed at least 15 of the 20 preceding weeks, with priority given to those who have been unemployed the longest or who belong to households where no one else is working full-time.

Another major departure from past public service jobs programs is that local governments may contract with private firms to carry out the projects and participants can be trained for private sector openings.

The fiscal year 1984 authorization, at $3.5 billion, is expected to create 500,000 jobs. Future authorizations will be set at 20 percent of the total number of long-term unemployed persons multiplied by $10,000, the estimated cost of a job under the program. Eighty percent of the funds will be used for community projects and 20 percent for educational facility projects. In addition, 20 percent of the funds under both categories must be spent on part-time jobs for youth, not to exceed 32 hours per week and supplemented by 8 hours of education or training.

The purpose of this program should not be confused with the purpose of the Jobs Training Partnership Act or of the Emergency Jobs Act that have been enacted recently. JTPA is a training program and the Emergency Jobs Act accelerated already planned spending for public works. The community renewal employment program supplements training programs and is not meant to prepare individuals to enter the labor force. Unlike the legislation enacted earlier, it is targeted to areas with higher than average unemployment and to people who have been unsuccessful in obtaining unsubsidized jobs.

Economic necessity, community needs and human compassion combine to give high priority to passing this bill. I urge my colleagues to oppose any weakening amendments and to vote for the Community Renewal Employment Act.

Mr. MURPHY. Mr. Chairman, in order to insure the integrity of the Community Renewal Act, special efforts are necessary to prevent fraud and other abuses. Strong enforcement provisions were taken under CETA in order to insure that employment and training opportunities are provided on an equitable basis. In its brief history, from 1973 to 1982, CETA was amended 8 times and proliferated 12 separate programmatic titles, parts, and subparts. The constant legislative changes helped strengthen the bill by providing equal employment and training opportunities to all Americans.

However, in any jobs program, there is the danger of political abuses. Under CETA in fiscal year 1980 an amendment was enacted into law to prevent nepotism, and other discriminatory hiring practices. This amendment had the effect of insuring nondiscrimination and helped foster equal opportunity. To help strengthen the Community Renewal Act, I am offering an enforcement provision to assure against program abuses, including, but not limited to nepotism and political patronage.

In my congressional district, there is an average unemployment rate of 16.4 percent which is well above the national average. Many of these individuals are long-term unemployed—many for 15 weeks or more.

This bill is specifically targeted for our long-term unemployed, and we want to make every assurance that these funds reach those Americans who are most devastated by the recession. Therefore, the tough, antinepotism provision is designed to insure that the funds under the Community Renewal Employment Act will be used for the primary purpose of providing temporary jobs to those in greatest need—the long-term unemployed.

□ 1750

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from California.

Mr. HAWKINS. I thank the gentleman for yielding.

Mr. Chairman, the managers on this side are willing to accept the amendment. We think it is a good amendment and we commend the gentleman.

Mr. MURPHY. I thank my chairman.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from Vermont.

Mr. JEFFORDS. I appreciate the gentleman's yielding to me.

Mr. Chairman, I rise in support of this amendment, and I am sure this side will support it.

Mr. MURPHY. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. MURPHY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer one additional amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 61, after line 12, add the following new section:

SEC. 506. In administering the programs for which funds are provided by this Act to promote productive employment, 100 per centum of the employment created by this Act shall go to individuals who are classified as having been unemployed for at least fifteen weeks immediately prior to the date of individual application for employment under this Act.

Mr. WALKER. Mr. Chairman, earlier I offered an amendment similar to this. It is the 100-percent amendment, trying to assure that all of the money in the bill will go to people who are unemployed. The objections raised to that amendment earlier were that I had put 6 weeks in instead of 15 weeks in order to broaden the base of the number of people unemployed who would be covered.

So this new amendment goes to 15 weeks and it has the same number of weeks in it as the bill. In other words, only people who had been unemployed for 15 weeks or more would be eligible for the coverage.

The other objection raised to the amendment at the time that I offered it was that I had made it applicable as of the date of the enactment of the act. Under the new amendment that I am offering, it would be 15 weeks prior to the individual application for employment or for employment under this act. In other words, once the individual walked in, all he would have to demonstrate is that he had been unemployed for 15 weeks prior to that application.

In other words, I am trying to meet the objections that were raised earlier, but still focus on the fact that I want the money that is going to be spent under this act to go to people who are unemployed and not get siphoned off as it has been siphoned off in nearly all the other programs that have been enacted of the same nature in the past.

What this amendment attempts to do is to assure that the money that is spent for employment goes to the unemployed. In this case it will have to be people who were unemployed for 15 weeks or more. I think it is a fairly simple amendment, given the discussion that we had previously. I do not think I have to go into all the justifications that I made previously. The Members want to go home. I would hope that we could get a vote on it. As a matter of fact, I hope that the Committee might accept this one since it meets the objections that they have raised.

Mr. HAWKINS. Mr. Chairman, I rise to oppose the amendment.

Mr. Chairman, fortunately the amendment moves in the right direction; unfortunately, it does not improve very much on the previous amendment which was offered.

The first defect in this amendment, as I can see it as it is now drafted, is that there are some people who cannot document their work record. This is primarily true in the case of women and youth who do not have a really documentable work record in

line with the Employment Service. So it allows no flexibility in those few instances in which the Employment Service would have to make a judgment.

But I think the more serious defect is in the change from the 15 weeks. That is 15 continuous weeks prior to the application as it is now drafted in the bill, which allows 15 out of 20 weeks. That is the usual language in such bills of this nature, to provide not 15 continuous weeks, but 15 out of 20. The reason for that is that there may be some interruption during that 20-week period.

An individual, for example, may be laid off for a day or may leave the job for a day or just a few days, but go back or may be employed, in this instance, for only a day or two, which would break his 20-week cycle but he is still unemployed. So out of that 20 weeks, we do allow some flexibility so that individuals who may in good conscience seek and obtain some employment to get off the unemployment rolls, work for a day or two, and only that, during that cycle.

This would completely eliminate that individual who is genuinely unemployed but who makes the attempt to get off the unemployment rolls. This amendment would obviously eliminate that individual. I think that alone would make this a very defective approach and I would suggest that we turn this amendment down also.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The question was taken; and on a division (demanded by Mr. WALKER) there were—ayes 23, noes 73.

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

● Mr. FORD of Michigan. Mr. Chairman, I rise in strong support of H.R. 1036, the Community Renewal Employment Act. This legislation is of the highest priority. It will enable the long-term unemployed and discouraged job seekers to obtain gainful work on projects and activities that are necessary and worthwhile. States and localities will benefit from these undertakings through improved facilities and better public services. The financial condition of communities will be revitalized by the influx of earned incomes which will flow into the local economies.

My support and enthusiasm for this legislation reflects my confidence that it will provide the economic stimulus that is desperately needed by the Nation and by recession-ravaged areas such as the Great Lakes region. Even before Reaganomics plunged this Nation into a deep recession, the Great Lakes region was suffering from a prolonged depression due to the economic ills of the automobile, steel, and allied industries. Though the recent recession was an unsettling and painful experience for many parts of our Nation, it dealt a near-fatal blow to citizens in industrial States such as Michigan where double-digit unemployment had already had a devastating effect.

When President Reagan took office in January 1981, the Nation was experiencing an unemployment rate of 7 percent, but Michigan's rate was almost twice as high, and my district, the 15th, had a distressing rate of 11.7 percent. By the beginning of 1983, after 2 years of Reaganomics, the Nation's unemployment had climbed to 11.3 percent, but Michigan's had skyrocketed to 16.5 percent. Today, despite the administration's ballyhoo about an economic recovery, the national unemployment rate remains at an intolerable level of 9.5 percent, and Michigan's rate is an appalling 14.3 percent. Alarming as they are, these statistics do not begin to dramatize the human suffering and hopelessness that has dogged the heels of the unemployed. Continued high unemployment has placed an onerous burden on our Nation and has exacted an even heavier toll from its victims.

While administration officials boast about an economic recovery, more than 10 million jobless Americans are asking "where?" Over 7 million discouraged jobseekers have stopped asking "when?" Last week the Bureau of Labor Statistics (BLS) reported that jobless rates had dropped in two-thirds of the States. But those data represent mincing decreases in exorbitant unemployment rates. Despite this reduction in unemployment, only five States have unemployment rates below 6 percent. This is an intolerable situation that must not be allowed to fester while we wait for further improvements in the economy. We must act now to put people back to work. H.R. 1036 is the vehicle that will achieve that objective quickly and effectively.

This legislation will provide worthwhile employment to the long-term unemployed. Eligible participants will be employed in projects and activities which are sorely needed. Their earned incomes will stimulate local economies and help to ease the revenue shortfalls of local governments. It is important to emphasize that this legislation is not designed to create work merely to justify the expenditure of Federal funds. It will not generate unnecessary, unwanted projects and activities. Rather, the legislation will place people in significant work projects and public service activities that have been neglected because local communities have lacked financial resources. Because of declining revenues and Federal budget reductions, local governments have been forced to delay the maintenance and repair of public facilities and to cut back on public safety and fire protection and to reduce public health services. The employment authorized by this bill will be in projects and activities which have been documented as needing immediate attention. Because of the severe economic recession caused by this administration's policies, public facilities have deteriorated and public services have been curtailed drastically. It is in these vital areas that the bill authorizes funding to create jobs in activities that will enhance the quaility of living in communities throughout the Nation. The bill defines and delineates the types of projects and activities that will be funded. These include projects to repair, rehabilitate, or improve public facilities; to conserve, rehabilitate, and improve public lands, and activities relative to public safety, health, and social services.

H.R. 1036 is a significant improvement over previous public service employment programs. It is highly targeted to individuals who have experienced protracted periods of unemployment and to areas with higher than average unemployment rates. Job creation will be concentrated in areas where unsubsidized employment is severely limited due to overall economic conditions. The bill requires that the jobs that are created must be in activities which are coordinated with longer term economic development plans. Priority funding will be given to projects which are tied to expansion of private sector employment. To prevent fraud, abuse, and the substitution of Federal funds, the bill provides for the most stringent and most enforceable accountability of any Federal program. In addition, the bill provides that as the economy improves, the funding level for job creation decreases.

Mr. Chairman, the stranglehold of high unemployment must be broken. The most expeditious and effective means of reducing unemployment and revitalizing our economy is enactment of H.R. 1036. The bill is designed to provide beneficial employment opportunities as quickly as feasible and to assure adequate monitoring and evaluation of the results on a followup basis. The bill establishes deadlines for notification by the Secretary and responses by eligible units of Government so that acceptance of responsibility and funding of projects and activities can be accomplished in a relatively short period of time. The legislation places an emphasis on activities that are as labor intensive as possible so that the maximum number of meaningful jobs will be created expeditiously with the funds authorized. However, fiscal controls and administrative responsibility are not sacrificed to the requirements of prompt implementation.

This legislation is intended to provide a last resort opportunity for jobless individuals who have been unable to secure employment in the regular economy. However, the jobs funded under this legislation are to be considered transitional opportunities to provide useful work until individuals are able to secure unsubsidized employment. In recognition of the transitory nature of these jobs and the need for individuals to be able to seek jobs in the regular economy, the bill requires that individuals be given time off from their jobs to search for regular employment. I am confident that the manner in which this legislation has been developed will make this program the most effective public service program the Congress has ever enacted.

Our committee has designed a bill that responds quickly to the employment needs of the long-term unemployed and discouraged job seekers. It provides for speedy implementation within a framework of fiscal controls and administrative accountability. The legislation concentrates on persons with the longest history of unemployment in areas with the highest rates of unemployment. To assure that the targeted individuals are reached, the bill requires that 90 percent of the positions must be filled by persons who have been certified as having been unemployed 15 weeks or more or who have exhausted their unemployment benefits. The other 10 percent may be persons who have had sporadic work experiences, who do not have a documentable work history, but who have the requisite skills to fill a nonmanagerial position in a particular project. Careful consideration has been given to assuring meaningful employment opportunities through the designation of specific projects and activities that are permitted to be undertaken. In addition, the jobs must be in activities which are coordinated with longer term economic development plans.

Mr. Chairman, it is amazing to me that any of my colleagues can oppose this bill on the basis that the economy has supposedly recovered. I know that the newspapers and the TV news shows have announced a recovery, but I also know that the national unemployment rate is still higher than at any time in the 40 years which preceded Mr. Reagan's Presidency.

When Mr. Reagan ran for office, he claimed that 7 percent unemployment was a depression. How can 9.5 percent unemployment be a recovery? Only 8 of the 50 States have unemployment rates below 7 percent today. More than 10 million Americans cannot find a job. What kind of a recovery leaves 10 million Americans without work, 60 percent of them without unemployment benefits?

Even States with normally strong, diversified economies such as Texas and California are still deep in a recession. More than a million people are seeking work without success in California. More than 600,000 are looking for work in Texas, the heart of the Sun Belt's once-booming economy.

And within the recession those States are suffering, there are major pockets of real depression. Stockton, Calif., has an unemployment rate of 14.8 percent; Modesto, Calif.'s unemployment rate is 17.6 percent. Dozens of Texas counties have double-digit unemployment rates.

No recovery has reached my own State of Michigan, where the unemployment rate still exceeds 13 percent and where one-third of the work force in certain cities and counties has been jobless for months or years.

No sober person can claim that Michigan needs no help, that the 575,000 unemployed Michiganites do not need jobs, or that the hard-pressed local governments in Michigan cannot find work in the community that needs to be done.

For proof of the Nation's continuing economic difficulties, I urge my colleagues to review the following charts, which show the Bureau of Labor Statistics' most recent unemployment figures for Michigan and selected cities and counties from other States:

CURRENT UNEMPLOYMENT RATE FOR MICHIGAN CITIES WITH POPULATION EXCEEDING 50,000

City	Unemployment rate (percent) [1]	Population [2]
Ann Arbor	5.6	107,966
Dearborn	8.1	90,660
Dearborn Heights	8.8	67,706
Detroit	16.6	1,203,339
East Lansing	7.2	51,392
Farmington Hills	11.1	58,056
Flint	21.9	159,611

West Virginia	768	133	17.4
Wisconsin	2,436	228	9.4
Wyoming	268	23	8.7

In six of seven Louisiana cities, unemployment is worse now than it was a year ago:

PERCENT UNEMPLOYMENT

	July	
	1982	1983
Louisiana	10.6	12.4
Alexandria	12.0	12.2
Baton Rouge	9.5	10.5
Lafayette	5.2	8.5
Lake Charles	14.5	15.2
Monroe	12.9	11.4
New Orleans	9.6	10.8
Shreveport	9.7	11.9

Each of Alabama's major cities is still suffering from double-digit unemployment rates:

Alabama	13.0
Birmingham	11.7
Huntsville	10.0
Mobile	14.1
Montgomery	10.6
Tuscaloosa	11.8

Six of Illinois' nine major metropolitan areas are still suffering from double-digit unemployment:

Illinois	11.7
Bloomington-Normal	8.1
Champaign-Urbana-Rantoul	6.9
Chicago	10.7
Davenport-Rock Island-Moline	14.3
Decatur	14.9
Kankakee	16.7
Peoria	16.7
Rockford	14.1
Springfield	8.3

Even in States where the statewide unemployment rate is relatively low, certain cities and counties remain plunged in a depression. In Minnesota, for example, where the 7.5-percent unemployment rate is below the national

average, the Duluth-Superior SMSA has 15.2 percent unemployment. The same is true in Florida, where the Lakeland-Winter Haven unemployment rate is 17 percent.

If, as Mr. Reagan claims, the economy has recovered, one thing is very clear. We need the jobs bills even during a recovery. We need H.R. 1036, and I urge all of my colleagues to vote in favor of it.●

● Mr. ZABLOCKI. Mr. Chairman, it is a pleasure to support H.R. 1036, the Community Renewal Employment Act, of which I am a cosponsor. It has been my position since the beginning of the President's so-called program for economic recovery that we must address unemployment first.

In the Fourth Congressional District of Wisconsin, which includes the Milwaukee-Waukesha area which I am privileged to represent, workers are facing unbelievable difficulties in making ends meet. We still have double-digit unemployment; we still have massive layoffs in our factories and businesses; small businesses are failing, and workers are running out of benefits. It is evident to me that in the Milwaukee area we have not recovered and Federal policies must be implemented so that we can.

Mr. Chairman, the Community Renewal Employment Act proposes to establish a job-creation program that could create 500,000 jobs in fiscal 1984. Importantly, these are not make-work jobs but community repair, recreation, and necessary service jobs that will seriously improve our communities.

The bill has provisions to support private sector employment and assure that the Federal Government gets a maximum return for its spending. Mr. Chairman, this bill is fair, equitable and in the best interests of our communities, our workers, and the Federal Government.

As one who has voted for every single major jobs bill that has been brought up in the House of Representatives in the last several years, every single unemployment compensation bill including the one that was cleared prior to the August recess extending FSC benefits in Wisconsin, and against every single Reagan budget cut that was harmful to workers and the poor and middle-income individuals, I believe the Community Renewal Act is the next logical step to putting our economy back on its feet. It is a pleasure to support it.●

● Mr. STOKES. Mr. Chairman, I rise in support of H.R. 1036, the Community Renewal Employment Act, sponsored by my good friend and distinguished colleague, Representative Augustus Hawkins.

The time has come for this body to act on the issue of unemployment in a constructive, creative, productive and positive fashion. According to the most recent statistics released by the Labor Department, the joblessness rate for the month of August held steady at 9.5 percent. This means that 10.7 million persons are still out of work. Unemployment for black Americans is a shocking 21 percent. Moreover, joblessness among black youths in the 16 to 19 age group soared from 48.1 percent in July to 53 percent in August.

The White House is said to be pleased with the economy's progress in recovering from the recession. But it has become increasingly clear and obvious that we cannot rely on the judgment of the White House on the matter of jobs. We in Congress must not only propose, but pass legislation which will contribute to employment for those who are without jobs.

H.R. 1036 is a modest jobs creation initiative which will provide employment for approximately 1 million persons. How can we sit idly by while over 10 million persons are out of work? We have sat for far too long. The State of Ohio has an unemployment rate of 10.9 percent, which means that Ohio ties with the State of Pennsylvania in terms of having the ninth highest unemployment rate in this Nation. What am I to tell my constituents when I have to face them weekend after weekend? I surely cannot tell them to wait a little longer. They have waited long enough.

H.R. 1036 would serve to provide immediate assistance to unemployed persons by funding essential jobs in such critical areas as emergency food and shelter programs, disaster relief, road, bridge, water and sewer repair, erosion and flood control, rehabilitation of aging school buildings, as well as other vitally needed community projects.

Approximately 93 percent of the community improvement funds would be distributed to local governments serving populations over 50,000 persons on the basis of the relative severity of unemployment. The other 7 percent would be divided with 5 percent set aside for employment in State-administered programs and facilities such as State parks and hospitals and 2 percent for native American tribal governments. H.R. 1036 establishes the following formula for the distribution of funds.

One-third of the funds allocated according to the number of unemployed persons in the eligible area.

One-third to be allocated according to the number of unemployed persons in excess of a 6.5-percent unemployment rate in the eligible area.

One-third to be allotted according to the number of unemployed persons in excess of the national employment rate in the eligible area.

This act would authorize $5 billion for fiscal year 1983. The period of authorization is open ended, and in the preceding fiscal years after 1983, the amount of authorization would vary according to the number of unemployed persons. The projected authorization figure for 1984 is $10 billion.

In this bill, any youngster over 16 years of age who has been certified by his/her respective State employment service agency as having been unemployed for at least 15 of the 20 weeks prior to application would be eligible for employment. A good number of unemployed citizens across this country have exhausted their unemployment insurance. Some are no longer eligible. Many belong to households where no other member is employed on a full-time basis. H.R. 1036 is designed in structure to insure that respective State employment agencies see to it that these needs and circumstances as well as any others by traditionally underrepresented groups, such as women and minorities, are enhanced to the fullest.

The Community Renewal Employment Act would give priority attention to economically disadvantaged unemployed youths. A special and noteworthy incentive of this act is one which would allow high school dropouts to become employed—provided that they agree to reenroll and pursue their education. Approximately 20 percent of the community improvement funds would be directed to employ youths in part-time jobs that would not exceed 38 hours per week. Each and every participating youth would have to be enrolled in high school, a high school equivalency program, or a skill training program for at least 8 hours per week.

No one who is presently employed would risk being replaced by a participant in any jobs program funded by this piece of legislation. The bill contains a direct prohibition against the displacement of any regular, unsubsidized worker and includes a number of provisions designed to insure that this does not occur. One such provision establishes a complaint process to address allegations of the substitution of subsidized workers for regular workers. Another such provision includes the prohibition against contracting out work that would normally be performed by public employees.

Mr. Chairman, H.R. 1036 represents an intelligent, well thought out approach to a complex, urgent problem which is before us. There exists in America real human beings whose not having jobs is causing much hardship and suffering. The national administration does not seem to understand this.

The Community Renewal Employment Act is just one small step toward solving this Nation's unemployment problems. But it is an opportunity that we should not overlook, if we are sincere and committed to this cause. This cause which I speak of is that which will enable each and every

American who is willing and able to work to find employment. We have a moral obligation and responsibility to support H.R. 1036, the Community Renewal Employment Act.●

● Mr. BOUCHER. Mr. Chairman, I rise in support of H.R. 1036, the Community Renewal Employment Act, which will provide more than $9 million to localities in the Ninth District of Virginia for employment of jobless people on needed public facility repair and improvement projects.

More than 29,000 individuals in my congressional district are unemployed and cannot find work. The long-promised economic recovery has yet to provide its benefits to those portions of the country which, like southwest Virginia, are dependent on basic industries which have been devastated by high interest rates, diminished domestic demand and aggressive, subsidized foreign competition. H.R. 1036 is urgently needed in these areas to put people back to work so that they may provide for themselves and for their families.

The House Education and Labor Committee, on which I am proud to serve, carefully crafted this program to assure that the long-term unemployed would receive the bulk of the employment opportunities. To assure that Federal funds are used for appropriate projects, the committee specified the activities that could be funded through the program. To encourage private sector employment, the committee allowed for localities to contract with private firms to carry out authorized projects. And to address the urgent need for educational facility repair and rehabilitation, the committee authorized $700 million for school-related construction projects. I am pleased that Virginia will receive $10.7 million for school construction and repair under title III of H.R. 1036.

I am particularly pleased that the committee constructed a targeting mechanism that will direct funds to those localities with the most severe unemployment problems. Too often the distribution of Federal funds is based on political clout and not on genuine need. Chairman HAWKINS of the Employment Opportunities Subcommittee is to be commended for working closely with Members representing rural areas with high unemployment to assure that our communities will receive a fair share of funds for community employment projects.

A few months ago, I stood in this Chamber during the debate on phase I of the jobs program, the emergency appropriations jobs bill. Despite unprecedented levels of unemployment, some Members opposed the bill and said we should do nothing. Those Members were wrong, and I am pleased that the Congress enacted phase I of the jobs program. The Virginia Highlands Airport Commission in Abingdon, Va., recently received a $537,000 jobs bill grant from the Federal Aviation Administration to fund repair and reconstruction of the airport runway. That project will not only provide jobs immediately to the unemployed in Washington County and Bristol, it will also enhance the area's economic development efforts over the long term. Federal jobs programs do work, and they do provide real benefits to needy people in our communities.

I strongly urge my colleagues to support H.R. 1036, the Community Renewal Employment Act. With more than 10 million Americans still out of work, 29,000 of whom live in my congressional district, we must enact phase II of the jobs program as soon as possible.●

● Mr. PATTERSON. Mr. Chairman, I rise in support of H.R. 1036, the Community Renewal Employment Act, and I commend my colleagues on the Education and Labor Committee for their fine work in drafting this essential legislation.

We are being asked today to make an investment in our Nation's most valuable resource—its people—and this investment will provide a substantial stimulus to the economy as unemployed citizens become productive workers and taxpayers, instead of tax users.

Despite some signs of economic recovery, the current 9.5 percent unemployment rate is still higher than the levels during any previous recession since the 1930's. In my own State of California, the unemployment rate is 9.8 percent, and 10.3 percent of the Nation's long-term unemployed are California residents. Behind these statistics lie millions of stories of individual and family hardships. Children frequently suffer the effects of unemployment as they become the victims of increased child abuse, infant mortality, childhood illnesses and anxiety.

In addition to the tremendous human costs, unemployment also imposes a huge burden on the Federal budget. Every 1 percent increase in the unemployment rate adds approximately $25 to $30 billion to the Federal deficit. The legislation before us today would create roughly 500,000 jobs in fiscal year 1984, taking people off the welfare and unemployment rolls and enabling them to become productive members of society. The Education and Labor Committee has made a convincing case that the cost of this legislation will be completely offset by the increased tax revenues and reduced benefit costs that will result from the jobs created under this bill.

H.R. 1036 has been carefully drafted to insure that it will employ people to meet essential local needs. It is a national disgrace that record numbers of workers remain unemployed while critical work goes undone in every community in this Nation. Serious deficiencies persist in our Nation's transportation and water systems, and many of our public schools are in a desperate state of disrepair. In addition, many communities face an urgent need for improvements in public safety and health programs, as well as for increases in services such as child care and emergency food and shelter. It is a terrible waste to permit the deterioration of public facilities and the curtailment of vital services at a time of massive unemployment.

The legislation before us today takes a modest step toward providing these vital community services, and it will enable hundreds of thousands of citizens to become productive workers again. The need for this measure is clear, and I urge my colleagues to give it their strongest possible support.●

● Mr. LEVINE of California. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from New York (Mr. SOLOMON), which I believe is being gratuitously attached to this vital piece of employment legislation. As we are all aware, over 10 million Americans are presently jobless, and even the most hopeful projections indicate that unemployment will remain above 7.5 percent throughout most of 1986. H.R. 1036 addresses itself to what is perhaps our most serious economic problem, by providing jobs for individuals experiencing long-term unemployment. However, in accepting this amendment, Congress shifts its focus from the immediate necessity of helping to put people back to work and repairing community facilities, to enacting a burdensome, redundant, and discriminatory regulation.

At issue here is not whether you support draft registration or compliance with the law, but rather effective enforcement of the law. As over 96 percent of all young men are in compliance with the law, the record clearly shows that enforcement has been very successful. It is important to note that the compliance rate is so high because the vast majority of young men are law abiding. We should not forget that a severe penalty for any young man already exists—5 years imprisonment and $10,000 in fines—to discourage nonregistrants. Given that a strict law is already on the books punishing nonregistrants, I am not sure that adding a redundant penalty to H.R. 1036 will induce any additional nonregistrants to comply with the law. Rather, such a program will only serve to discourage individuals who have not registered for the draft from incriminating themselves and from applying for assistance under this program.

In light of the probable ineffectiveness of this proposal, I believe that it will unnecessarily delay and increase

the cost of the implementation of this critical jobs creating legislation. I am aware that my colleague from New York has been successful in attaching a similar amendment to financial aid legislation and to a job training act. I would like to know to what extent these nonregistrant penalty provisions have successfully encouraged compliance with the draft legislation law. Universities and colleges which have begun to verify compliance with draft registration have justifiably complained that administrative costs of enforcement are enormously burdensome. The University of Michigan, for example, estimates that its enforcement costs may reach $15,000 this year. At what cost to Government should we adopt legislation which replicates existing statutes without improving compliance with the law? I would suggest that attachment of this provision to the Community Renewal Employment Act will not at all increase compliance and will burden us all, increasing the cost of this jobs program and stalling the selection process of hiring unemployed workers.

I would also like to address myself to the legal legitimacy of this provision. In ruling on the constitutionality of linking draft registration to student aid, a U.S. district court struck down the law earlier this year. This provision which we are now being asked to attach to H.R. 1036 is similarly constitutionally questionable. Under this proposal an individual is presumed to be guilty of not registering for the draft until he certifies that he has done so. To my knowledge, it has never been part of our legal tradition to punish individuals for a crime without due process of law and under the presumption of their guilt.

Equally disturbing is that fact that this provision is clearly discriminatory. It imposes an inequitable burden of proof on young men, not on older men or young women, and narrowly seeks to punish only those young men who are currently unemployed and might qualify for this jobs program.

The Supreme Court is eventually expected to rule on the legality of linking draft registration to student aid. While I am hopeful that the Court will find such a legislative move unconstitutional, I am more concerned with preventing implementation of this similar provision, which has neither legal foundation nor effective application to the bill we are debating today.●

● Mr. ACKERMAN. Mr. Chairman, I rise in strong support of H.R. 1036, the Community Renewal Employment Act. This is one of the most important pieces of legislation to come to the floor of the House this session. With 10.7 million individuals unemployed—9.5 percent of the work force—Congress is morally mandated to take the steps necessary to alleviate this crisis on our domestic front. It is unconscionable that the percentage of unemployment is higher than it was during the peak of the Depression. According to even the most optimistic in the administration, the unemployment rate in 1986 will still be 7.6 percent—significantly above a full-employment level. The President seems to be ignoring the high unemployment in this Nation because of his preoccupation with slashing much-needed funds vital to the survival of people who merely seek to go back to work.

H.R. 1036 is a critical step in the right direction. It would reduce the high unemployment rate by putting approximately 500,000 people back to work. In addition, the act creates the jobs in the sector of the labor force that can improve the infrastructure of our localities and our educational facilities. The bill also includes a number of provisions designed to insure the accountability of the program and prevent misuse of taxpayer dollars. The $3.5 billion authorization will allow us to put Americans back to work. The funds will be distributed on the basis of the severity of unemployment in the States and localities. This approach to our national war against unemployment is the most effective approach for dealing with the human tragedy of the recession.

This administration has chosen to turn a deaf ear at the escalating significance of unemployment. The White House is more concerned with slashing social programs than with committing itself to full employment. This House cannot sit idly by—we must pass H.R. 1036.●

● Mr. GILMAN. Mr. Chairman, I rise in support of H.R. 1036, the Community Renewal Employment Act. This measure is strong medicine for a serious problem that has permeated the entire country, and which refuses to remedy itself. The bill is a comprehensive piece of legislation that authorizes $3.5 billion in fiscal year 1984 for grants to States and local governments to cover labor costs associated with employing unemployed individuals in the repair, maintenance or rehabilitation of community facilities without displacing existing employees.

Were this legislation simply a "make work" bill, I would oppose it, but the areas which the Education and Labor Committee have addressed and which will be repaired and restructured are those truly in need of maintenance. H.R. 1036 seeks to accomplish several things, among them the employment of individuals who have been without work for a long period of time. By combining in this measure both the work that is needed to help restore our economy, and by targeting the object of this work, the committee has fashioned a bill that significantly contributes to the welfare of both the individual and the community.

Those participating in these community renewal employment programs must be at least 16 years of age; they must be unemployed and certified by the State employment service agency as unemployed; and participation is limited to 52 weeks in any 2-year period. Of the total job creation authorization, 80 percent in each fiscal year is to be used to cover labor costs and administrative and equipment costs associated with projects meant to repair, rehabilitate or improve public facilities, conserve, rehabilitate or improve public lands, and for conducting other activities necessary to the public welfare, including those jobs involving public safety, health, and social services.

The remaining 20 percent of the authorization is to be used to repair and renovate existing educational facilities. Of this sum, 75 percent is reserved for elementary and secondary school improvements, part A, and the remaining 25 percent for higher education improvements, part B.

Mr. Chairman, an especially important provision of H.R. 1036 reserves 20 percent of the community improvement employment funds for the part-time employment of youths aged 16 to 19. Recently, I participated in a hearing in New York City which focused on youth unemployment and the job opportunities available for teenagers in the years ahead. We heard many witnesses and heard many worthwhile suggestions. As a cosponsor of this legislation, I am pleased that this section has been highlighted, as well as the provision which allows for the repair of schools. Perhaps these two provisions together will help keep our young people in school and working as well.

Although our economy has experienced growth of recovery in recent months, and unemployment figures have dropped steadily, H.R. 1036 is designed to enhance both the employability of men and women who have been thus far unemployed as well as making the necessary repairs and renovations to publicly owned property. Its implementation will aid our communities and its citizens. Accordingly, I urge my colleagues to support this legislation.●

● Mr. SYNAR. Mr. Chairman, I am certainly aware of the profound problems this legislation is attempting to address. Like my colleagues, I traveled throughout my congressional district during the August recess and continually heard of the pain and suffering that faces the unemployed. News of the economic recovery sounds good to those of us who are working. But for those who remain among the 11 million jobless Americans, it is a cruel reminder that the economy still holds no promises for the future.

This Congress has not been insensitive to the needs of the unemployed. We have provided jobs through Public Law 98-8. This bill is expected to provide employment for up to 600,000 persons. We have provided health insurance for the unemployed whose health benefits have run out. And we have provided emergency mortgage assistance to unemployed homeowners facing foreclosure. I can proudly say that I supported each of these bills.

We have reached the time, however, when we have to stop treating symptoms and begin looking at the source of our Nation's unemployment problems. Like the little Dutch boy, we keep trying to plug the holes in the dam, one finger at a time. We have run out of fingers now—it is time for us to look at why the dam has been leaking.

Most of us are well aware of the sources of our current problems. The administration's unprecedented defense buildup, coupled with massive tax cuts for the wealthy, have brought us deficits unmatched by any previous administration. These deficits began rising at a time when the Federal Reserve was tightening the money supply. These two conflicting policies caused a dramatic reduction in the availability of capital for private investment, and our economy plunged into the worst recession in nearly 40 years.

My opposition to this bill is not only based on the fact that it is a narrow, short-term attempt to solve a massive national problem. It is also because this legislation contains a bad allocation formula that is intended to provide jobs primarily in large, urban areas. In addition, this formula is based on last year's statewide unemployment rates, which ignores the fact that many States, such as Oklahoma, only began to experience the recession in the last 12 months. According to these figures, Oklahoma's Second District contains only one county with an unemployment rate above the national average. In reality, 15 out of 17 counties in my district had jobless rates above the national average of 9.5 percent in July, 1983.

A brief look at the formula share by county reveals how pitifully these counties would fare under this legislation. My own calculations show that title II and title III, part A, which comprise 93 percent of the funding for this bill, would create an average of only 11.54 jobs per county. It is difficult to imagine calling this a jobs bill in my district.

Congress can, and should, be creating jobs. But we can best do that not by enacting more short term, low skill public service jobs programs, but by pursuing a rational fiscal policy that lowers deficits and encourages growth in the private-sector.●

● Mr. KEMP. Mr. Chairman, I applaud the intention of the authors of this bill to deal with the problem of long-term unemployment. But I cannot agree with the method they have chosen, because it cannot, by its very nature, have the intended result. This is basically a public works program of the kind which has failed in the past to result in any net new productive jobs. We must do better for the American people because jobs for all people is too important an issue to be discussed only in the sense of public service employment.

When dealing with the problem of long-term unemployment, we have to distinguish between those who are unemployed because of the depressed state of the economy, and those who would remain unemployed even if the economy were operating near its capacity.

In the first case, it is quite clear that economic recovery is the only answer. Even if we completely ignore the cost of this program, the $5 billion in this bill, at $10,000 per worker, would affect less than 5 percent of the 10.6 million Americans who are still unemployed. If we really want to help the unemployed, our first duty is to encourage the economic recovery which has begun under President Reagan's policies. Indeed, the unemployment rate has already come down from 10.8 to 9.5 percent. But that is not far enough.

Even for the less than 5 percent of the unemployed who could conceivably be affected by this bill, we must consider the offsetting cost. Money spent by the Federal Government does not come out of the sky. It must be raised either by taxation or by borrowing savings. In either case, the Government is merely taking resources which could otherwise be devoted to private investment and private jobs. Even if we assume that the Government is as efficient as the private sector, no new jobs can be created in this way. If the Government is less efficient as an employer, then, on balance, jobs will be lost, not gained.

Let us then consider the case of Americans who would remain unemployed even if the economy were to recover—those who are chronically unemployed. Why are they not being hired to fill productive jobs in private business? There can be only one reason: The cost of hiring them exceeds the market value of their services. An employer cannot hire a worker if he loses money by doing so.

There are basically three ways of solving this problem. First, we can increase the value of the unemployed person's services, through education and training. Second, we can lower or remove barriers, such as unnecessary regulations, which artificially raise the cost of hiring. And third, we can lower the cost of working or hiring by lowering tax rates on working or hiring.

All of these methods are part of President Reagan's economic program, and should be supported if we are seriously committed to reducing the number of long-term unemployed. Unfortunately, none of these measures is the primary object of H.R. 1036.

Even so, I believe we can go further than we have already done. I am about to introduce a bill to reduce the number of chronically unemployed workers by putting them into productive private-sector jobs. The bill would give the unemployed the option of collecting unemployment compensation, or of turning over a re-employment voucher to an employer willing to hire him or her. The unemployment voucher would be worth half the amount of unemployment benefits, for twice the person's remaining period of eligibility. This would reduce the cost of hiring and increase the wages an employer could pay for an unemployed person's services. It is an approach which truly can begin to reduce the number of unemployed persons who would otherwise fail to benefit from the general economic recovery.

We should also pass the enterprise zone bill to reach out to inner cities for employment and entrepreneurial opportunities. Again I applaud the authors of this bill. But I say to my good friends that to do any benefit to the unemployed, we need not only a good intention but also a good program. My friends have the first, but not the second. I would like to offer to work with them to devise an effective program which will really work for all people.

The best thing we could do is to fight for lower taxes, sound money and low interest rates plus stable exchange rates to help boost American exports.

We can put this country back to work but let us do it in the private sector where it expands the wealth of our Nation as opposed to the public sector approach which consumes the wealth of our Nation.●

● Mr. ORTIZ. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

Shortly, we will be voting on a bill that will be of tremendous benefit to the unemployed in our Nation. I believe the intent of this legislation is just, is humane, and demonstrates a real commitment to alleviating the suffering experienced by the jobless of this great country.

Let me relate to you the problems that exist in my district—one of many areas in our country suffering from the disasterous effect of depression-era conditions.

I represent the 27th District of Texas. This extends from Corpus Christi, south along the gulf coast to

Brownsville. It is an area whose economy is dependent upon fishing, petrochemicals, and in the Brownsville area, tourism and merchandising. Corpus Christi has been reeling from the effects of the depressed oil industry. While unemployment nationwide has declined slightly, Corpus Christi's rate continues to climb. Currently the figure stands at 11.7 percent, up from 10 percent earlier this year.

The southern part of my district borders the nation of Mexico. This part of the United States historically has the highest unemployment rate in all of the 50 States. Not only has this area been affected by our economic problems, but every facet of the business and merchandising community has been hit by the peso's devaluation—from real estate to supermarkets. Small, locally owned businesses have been hardest hit. There have been over 112 bankruptcy declarations in the past year. Unemployment in this part of the Texas Valley consistently hovers around 17 percent—and the figures are even more frightening in neighboring counties.

This bill will not solve all of the economic problems in my part of the State. However, one of the most important benefits of H.R. 1036 is that it will restore hope to those who have long since given up hoping. It will provide employment for over 900 of the long-term unemployed in my district, alone.

It is time to extend a helping hand to our impoverished citizens. We must insure that families have the necessary resources to feed and house their children and themselves. We must guarantee that all Americans have an equal opportunity to live a decent and productive life.

I urge my colleagues to join with me in demonstrating to the unemployed of this great Nation of ours that we are concerned about their plight and that we are doing everything within our power to alleviate their suffering. I urge you to support this most important bill.●

● Mrs. HALL of Indiana. Mr. Chairman, I rise in support of H.R. 1036, the Community Renewal Employment Act, also known as the Humphrey-Hawkins jobs bill.

This legislation will provide temporary jobs and other services which local communities are hard-pressed to provide due to budgetary cutbacks and the recent recession. The temporary jobs would be targeted to the long-term unemployed.

Although recent unemployment statistics indicate that the Nation's job-market conditions are improving significantly, the hardships associated with joblessness are not starting to fade. One measure of labor-market distress—total weeks of unemployment—is still rising rapidly. Another measurement of employment dislocation hit a post-war high this summer as the number of persons out of work for 27 weeks or more surged to nearly 3 million.

I urge my colleagues to support this legislation. There are still millions of unemployed individuals in this country that desperately need our help. When Congress enacted the emergency jobs bill earlier this year, the legislation did not go far enough toward providing jobs for the unemployed. Very little has also been done to help women, minorities, and youth.

H.R. 1036 authorizes a counter-cyclical jobs program that provides jobs for persons who are the long-term unemployed. The Education and Labor Committee estimates that the legislation will result in the creation of over 900,000 jobs. Even if the bill is reduced to the spending levels specified in the first budget resolution, or $3.5 billion, approximately 500,000 jobs would be created.

The legislation has built-in safeguards to insure accountability of the program and its funds. These safeguards include limits on wages and length of employment, quarterly reports filed by the local governments that describe the uses of the funds, an automatic review process, a complaint process, and a certification procedure to insure that participants are eligible for employment.

In addition, the bill is targeted to those areas of the country which have high unemployment.

I believe it is our job as legislators to provide jobs for the unemployed individuals of this country, people who in many cases are not unemployed by choice and who are desperately looking for employment. They would rather work and earn even a small amount of money than receive unemployment compensation and welfare payments, and they want a chance to regain their self-esteem.

There are some who will criticize this bill because they feel it could jeopardize the economic recovery which is underway. I ask you, has the economic recovery started in your area, in northwest Indiana, the majority of steel, industrial, and construction workers are still suffering just as much as before.

I believe that H.R. 1036 will help the long-term unemployed. It will help women, minorities, and youth who did not receive much help from the previous jobs bill enacted by this Congress. It will help those areas with high unemployment. And it has safeguards to insure program accountability and spending. More than 22 percent of my constituents do not work.

For these reasons, I urge each of you to support this legislation. Thank you.●

● Mr. RANGEL. Mr. Chairman, I rise in support of the amendment offered by my colleague Mr. HAWKINS.

My colleague proposes to set the fiscal year 1984 authorization level at $3.5 billion in conformity with the level allotted in the first budget resolution for fiscal year 1984. I want to point out, Mr. Chairman, that the Hawkins amendment is precisely what is needed at this time. When we look at the very severe, long-term nature of the current unemployment crisis, we see that the need for a concerted community renewal program is absolutely necessary. This is the purpose of the Community Renewal Employment Act. Its effects will be twofold: Jobs will be provided for citizens suffering from long-term unemployment, and our blighted communities will be renewed. Any person who has been unemployed or is unemployed will support this initiative if asked. In my opinion, Mr. Chairman, it is time for us to seek out the people standing in unemployment lines, and to offer their opinions to the debate on this bill.

It is in this spirit that I offer my remarks in support of my colleague's amendment.●

● Mr. KOLTER. Mr. Chairman, I rise in strong support of H.R. 1036, the Community Renewal Employment Act.

I commend the chairman, Mr. HAWKINS, for bringing this desperately needed legislation to the floor.

I must emphasize "desperately needed" because that is what the constituents in my district tell me—they desperately need jobs.

There is no economic recovery in western Pennsylvania. We have the unwanted and dubious distinction of having among the highest percentage of long-term unemployed in the country. We have many people who have been unemployed for 1 or 2 years and thousands of them no longer receive unemployment compensation.

These people do not want to go on welfare. These people do not want to collect food stamps. These people do not want to be forced to stand in food lines to get free cheese.

These proud hard-working people want a job. They cannot understand why this Government will give them all of the things they do not really want but must have to survive—but will not give them the one thing they desperately want and need—a regular job.

This bill is designed to help those who most need the help—the long-term unemployed. We cannot turn our backs on the 2.5 million Americans who have been out of work for 27 weeks or more. We cannot turn our backs on the 1.4 million Americans who have been out of work for over 1 year.

We cannot turn our backs on the 50 or 60 percent of the unemployed who do not receive any unemployment benefits.

Mr. Chairman, we must remember that these millions of people are unemployed through no fault of their own and they cannot wait 2 or 3 years until an economic recovery trickles down to lift them out of their misery.

We must give them an opportunity to provide for themselves and their families until the economy can generate enough jobs. But that will only happen if we reject Reagan economic policies of big deficits and big tax breaks for the wealthy.

I would like to comment on the opponents of this bill attempt to paint this as a make-work jobs bill.

Since when is rebuilding our crumbling infrastructure a make-work jobs program. This bill gives us a chance to begin this important work. We have so many roads and bridges to repair and so many unemployed people who are ready, willing and able to do the work; so what are they waiting for?

Since when is the renovation of public buildings a make-work job? Since when is home weatherization a make-work job? Since when are emergency food and shelter programs, nutrition programs, child care programs, public library programs, elderly and handicapped programs and public health programs, programs that create make-work jobs?

These are all projects and programs that are needed and projects and programs that will create real and meaningful jobs for those who need them.

The other argument against this bill is that it will contribute to the deficit. Once again, the opponents argument does not hold water.

The facts are that it is unemployment that contributes to the deficit. Each 1-percent increase in unemployment adds an estimate $25 to $30 billion to the deficit. These are not my figures, these are figures provided by the Congressional Budget Office. By putting thousands of people to work we can reduce the deficit by reducing the outlays for unemployment compensation and welfare and by increasing the tax revenue.

In closing, I want to again emphasize that there is an obvious and desperate need for this legislation. I urge my colleagues to join me in giving thousands of Americans some hope for their futures.●

● Mr. SISISKY. Mr. Chairman, back in March, the House passed an emergency jobs bill. The bill provided that additional money would be funneled into a variety of existing public works programs to stimulate jobs in our communities. At that time, I, like many of my colleagues, expressed some reservations not about the undeniable necessity of the bill, but about its inadequacy in improving conditions for the long-term unemployed.

Now we are voting on phase II of March's jobs bill. This second part is specifically designed to ease the plight of the long-term unemployed. This bill is a responsible solution to our continuing problem with high unemployment. With Representative HAWKINS' amendment, it is not a budget buster.

Unemployment is continuing to rob our Nation—each percentage point of unemployment costs the Government anywhere from $22 to $27 billion in lost taxes and unemployment benefits. Is not it better for the Congress to appropriate money for constructive job opportunities than to pay these workers additional welfare payments?

The human costs are not as easy to calculate, but are much more staggering. Almost 10.7 million Americans are looking for work, almost 1.7 million are so discouraged they have quit looking and another 5.8 million work part time because they cannot find full-time jobs.

There are 2.4 million people in this country who have been unemployed over 6 months. For black workers, the unemployment rate is double what it is for white workers. For black teenagers, the unemployment rate is 53 percent.

These people have no hope. The issue is the same as in March, only some administration officials seem to think the beginning of the recovery are so rosy our unemployment problem has been solved. Assuming for a moment that massive Federal deficits would not choke off the recovery, the jobless rate will remain at over 8 percent at the end of 1984. The recovery will not serve as a quick cure for unemployment, especially for those who have been unemployed for so long.

This bill will provide 500,000 people with a chance to work. Their work will be productive since the bill specifies activities such as the repair of public facilities, and the removal of asbestos from our Nation's schools. Jobs providing needed services will also be created. These vital community services will include disaster relief, emergency food and shelter, child care and services to veterans, the handicapped and the elderly. Most important, under this program, young people, as part of their wages, will receive training in trade skills.

This jobs bill remains a worthy goal. Human compassion dictates its passage, and I urge my colleagues to join me in doing just that.●

● Mr. HAYES. Mr. Chairman. I welcome this opportunity to rise and join my colleagues in support of H.R. 1036.

Although the administration tells us that economic recovery is on the way, all indications are that this projected recovery will exclude millions of people who are confronted with the prospect of becoming part of a permanent poverty-stricken underclass of unemployed and unskilled Americans.

In the First District of Illinois alone, there are over 160,000 people now living below the poverty level, 60,000 are out of work and nearly 60 percent of our youth are unemployed. As reported in a recent Chicago Sun-Times article, many of our Nation's college students now face the prospect of graduating into futures of unemployment and uncertainty.

It is our responsibility, as America's elected leaders, to begin to redirect our Government's attention towards correcting the critical imbalance in the distribution of our country's resources.

H.R. 1036 is a vital piece of legislation which proposes to create meaningful public and private sector jobs for those people hurt most by the recession, while repairing our cities and restoring much needed social service programs.

For less than 2 percent of the Defense appropriation passed by the House last week H.R. 1036 would go a long way toward reducing the Federal deficit by cutting unemployment related payments and increasing tax revenues:

Restoring the dignity and self esteem of millions of Americans; improving the delivery of services which affect the quality of life for all Americans.

I am proud to be a cosponsor of H.R. 1036, and I would like to congratulate my colleague, Mr. HAWKINS, for his efforts in bringing this issue to the forefront. I urge the Members of the House to assure its swift passage.●

● Mr. MATSUI. Mr. Chairman, I am honored to join my colleagues today in expressing support for H.R. 1036, the Community Renewal Employment Act. Not only will this legislation provide jobs for upwards of 500,000 unemployed Americans, it will enable our local communities to repair vital public facilities and expand badly-needed social services.

As we are all aware, despite the recent upturn in the economy, unemployment in America remains at 9.5 percent. Among minorities and young people the unemployment rate is even higher, more than double the national average. Although the Jobs Training Partnership Act will soon be providing job training for many individuals and easing the long-term burden of joblessness, hundreds of thousands of Americans need jobs right now.

H.R. 1036 will address this fundamental problem by quickly targeting job funds to high unemployment areas. Any individual who has been out of work for 15 weeks will be eligible for the program, but priority will be given to those who have either exhausted their unemployment benefits or have not been eligible for unemployment insurance.

In answer to criticisms raised about the now-defunct CETA jobs program, H.R. 1036 contains a number of safeguards to assure that it serves the

truly disadvantaged, that it helps workers make the transition from a temporary job to permanent employment, and that it does not displace other unsubsidized workers. Equally important, H.R. 1036 assures the participation of ethnic and racial minorities, youth and women.

Local communities will also benefit greatly from this legislation. Using these funds, cities like Sacramento will be able to improve neighborhood parks and playgrounds, renovate school buildings, repair bridges or fund any of a number of public improvement projects. Additionally, they will be able to expand such services as emergency food and shelter programs, child day care and programs for senior citizens and the handicapped.

Thus, by creating public assistance jobs and fostering renewal of our communities, the positive effects of H.R. 1036 will be felt by millions of men, women, and children around the Nation. I urge my colleagues to join me in voting in favor of this legislation.●

● Mr. RICHARDSON. Mr. Chairman, I rise in strong support of H.R. 1036, the Community Renewal Employment Act. I want to commend my distinguished colleague from California (Mr. HAWKINS) for his outstanding work in bringing this much needed legislation to the floor of the House.

While the President hails the economic recovery, unemployment stands at 9.5 percent—still the highest level since the Great Depression: 10.7 million Americans are out of work, another 1.7 million have become so discouraged they have quit looking for employment and 5.8 million workers have had to accept part-time jobs. Wall Street may be sparkling, but a cloud of hopelessness and despair still hangs over many towns and cities across this great Nation. The unemployment rate in my State of New Mexico is a staggering 10.6 percent. Some rural towns in my congressional district continue to suffer from unemployment rates as high as 40 percent.

Mr. Chairman, I think it is outrageous for anyone to celebrate an economic recovery when so many people are still without work. We must not sit idly by, as some would have us do, while the unemployed reach out for help. All they are asking for is a chance to work. While this administration has slashed programs designed to assist the poor and the unemployed, Congress must provide them with an opportunity to work. H.R. 1036 is a compassionate and responsible attempt to create this opportunity.

This bill grants funds to local governments for community improvement activities such as road and bridge repair, renovation of public facilities, improvement of parks, energy conservation activities and forestry reclamation. These are worthy and much needed projects and are not make-work jobs as some would contend.

Furthermore, this legislation targets funding to areas and individuals who are most in need—approximately 75 percent of the funds will go to areas with unemployment rates above the national average while eligible participants will generally be limited to those who have been unemployed for 15 weeks or more.

Mr. Chairman, recently Congress approved a $4.6 billion emergency jobs bill. H.R. 1036 is an important and necessary second step toward providing meaningful employment to those who have been thrown out of work during this cruel recession. I urge members to vote for this important legislation.●

● Mr. CRAIG. Mr. Chairman, last year in the Halls of Congress, we heard the cry for a jobs bill to help the unemployed and help economic recovery. The so-called jobs bill of last year has not helped to put people back to work, the dropping of interest rates and a reduction of inflation is the impetus for job creation.

The Democrats are decrying the necessity to pass H.R. 1036—Community Renewal Employment Act—as a part of the Democratic leadership's Phase II recession relief plan. My question is—who is the relief really for? In a State where I come from—Idaho, it benefits no one. Just recently, a city in my district applied for money through the so-called jobs bill of last year and was turned down. Unless you are from the States with a large population base there is no benefit of any so-called jobs bill.

Is there a need for this phase II jobs bill? The unemployment rate, which was 9.5 percent in July and August, has declined steadily since the dismal days of winter. And the recovery has been stronger than generally anticipated. The Government now predicts a real gross national product growth in 1983 of 5.5 percent, compared to the 3.1 percent it forcast in January in the President's budget. This information contradicts any logic for a budget-busting jobs bill.

This bill is nothing but pure politics. If the Democrats really want to put people back to work then they should stop passing bills that exceed the budget resolution and stop the Government's printing press.

Where do the Democrats think the money comes from to fund these so-called jobs bill. They come from the people who are working and paying taxes. The 5 billion called for in H.R. 1036 has to be obtained from somewhere and this probably means a tax increase.

To pay for these temporary jobs H.R. 1036 will provide, the Federal Government will have to borrow billions of dollars. That will put more pressure on the Federal Reserve Board to raise the discount rate and retard the economic recovery now underway and contribute to high unemployment. The jobs provided by H.R. 1036 will have no lasting value or impact on those people who are unskilled and unemployed. This bill provides for little or no training. Thus, when these subsidized jobs come to a halt, they will be no better prepared for the job market than they are now.

It seems, if the Democratic leadership really wanted to help facilitate a lasting economic recovery, they would stop offering crumbs and work to provide a climate for a stable and long economic recovery. Instead of continually playing politics with the people who are working and paying taxes, they would fulfill their obligation of reducing Federal spending. Remember last year, in the Tax Equity Fiscal Responsibility Act (TEFRA) when the Democratic leadership agreed to cut $3 of spending for every dollar in tax increases. The people have yet to see anything remotely close to this agreement occur, in fact, for every dollar raised by tax increases, only 30 cents of spending reduction has occurred.

Let us stop playing politics with the economic recovery and work to put more people back to work. H.R. 1036 only pulls billions of dollars out of a recovering economy, puts greater pressure on interest rates, and threatens to take away jobs for those who now have a job. This bill only exacerbates the unemployment situation by removing dollars from where they can be best productive, in the hands of private industry—where 80 percent of all new jobs emanate.●

● Mr. BROWN of California. Mr. Chairman, yesterday I spoke for a moment about the need for us to help alleviate the worst effects of our continuing high unemployment rate. While it is true that the national unemployment figures have begun to decline in the last few months, unemployment is still over 2 percent higher than when the recession began—and its expected to stay high. Even the most optimistic projections show unemployment above 9 percent through the remainder of this year. As I mentioned yesterday, unemployment remains high in my district with the July figures indicating that 11 percent of the work force was unemployed. This occurs in the face of a modest improvement nationally and in an area of southern California which is expected to be one of the fastest growing in the country during the 1980's. This indicates to me that our area is experiencing major structural unemployment problems which will last for some months to come. We need to focus on these problems and help those most severely affected by the longest, hardest recession since the

1930's—the long-term unemployed, minorities, and women.

Today, we have the opportunity to address this problem via the Community Renewal Employment Act which would appropriate $3.5 billion to high unemployment areas for community improvement projects and repair of educational facilities. The bill corrects many of the problems inherent in previous jobs-creating measures by providing job opportunities for women and minorities, stronger protection of unsubsidized jobs, and the strongest accountability and abuse prevention provisions ever incorporated into a Federal jobs program.

Some, of course, will argue that we cannot afford to spend money on the unemployed, that to do so will increase the deficit, resulting in increased interest rates and an aborted recovery. But the money we appropriate today—$3.5 billion—is but a fraction of the cost to the economy of supporting these unemployed people. For every 1 percent of unemployment, approximately $25 billion is added to the Federal deficit in lost tax revenues and increased costs. Surely this money is better spent on improving our deteriorating infrastructure and educational facilities.

The Congressional Budget Office has estimated that an additional $17 billion a year between now and 1990 is needed to repair the Nation's public infrastructure. A recent study by three education associations reported that in our Nation's schools there is over $25 billion in needed maintenance that remains unattended. Communities experiencing high unemployment often cannot, by themselves, afford to undertake these much needed improvements. By providing financial assistance to these communities, the Community Renewal Employment Act addresses both the unemployment problem and our deteriorating infrastructure.

This bill is well suited to the special needs of my district. The results of the $7.2 million estimated for allocation to the inland empire would be well utilized, and far exceed the short-term employment benefits which would result. This measure is not merely a jobs bill for today's problems, but an investment in our future. I encourage my colleagues to join me in support of this measure.●

● Mr. CARR. Mr. Chairman, I would like to join my colleagues and rise in support of H.R. 1036, the Community Renewal Employment Act, otherwise known as jobs bill II.

We hear plenty of talk these days about recovery, about light at the end of the tunnel of recession. Some people seem to forget there are still 10.7 million Americans out of work—one of the highest percentages since the Great Depression. Many of these jobless workers are not close to the end of the tunnel.

My congressional district in Michigan suffers from a very high unemployment rate; 30 percent of Pontiac, Mich., citizens are still without jobs. For many of these citizens, the rosy predictions of some economists are nothing more than abstract numbers. The only number that counts for these people is the number of months before they can work again. Many have given up all hope of finding work and are not even counted among the unemployed.

I am cosponsoring H.R. 1036 so that these workers can stand up and be counted again. This legislation will provide employment opportunities to long-term unemployed workers in communities experiencing high jobless rates. A majority of unemployed workers in rural and urban areas in Michigan will benefit greatly from this bill.

Make no mistake—this legislation is not a make work or giveaway program. As States face declining tax revenues and Federal budget cuts, localities are forced to cut back on essential services. H.R. 1036 would authorize funds to pay for the labor costs associated with the repair, maintenance, and rehabilitation of essential public facilities and services.

Local governments will receive funds for the renovation of public schools and community facilities, road and bridge repair, improvement of parks and playgrounds, and weatherization and other energy conservation activities. College and universities will be able to renovate their buildings. H.R. 1036 also provides jobs for youth and women—often left out of traditional public works bills—by allocating funds for domestic violence programs, emergency food and shelter sites, employment counseling, nutrition programs, child care, as well as for services for the elderly and handicapped.

H.R. 1036 will directly stimulate private-sector employment. Local governments may contract with private firms to carry out various projects authorized in this bill. Funds from this bill may also be used for training jobless workers for specific job openings in the private sector.

Most important, funds can also be used by States to respond to large-scale layoffs due to plant closings.

Mr. Chairman, this Nation's greatest resource is its people. If this bill is fully funded, over 900,000 jobs will be created. Why pour Federal dollars into welfare and unemployment benefits when we can make an investment in our future—for productive jobs that maintain our country's assets and essential services? I urge my colleagues to recognize the urgent need for this legislation and support the passage of H.R. 1036.●

● Mr. FRENZEL. Mr. Chairman, there are many problems with H.R. 1036, but the most ironic is that it will probably end up hurting most of those it intends to help because it will exacerbate the problems created by high unemployment.

No matter how much we would like to believe otherwise, government job creation does not work.

Of all ineffective Government jobs programs, the most ineffective is public service jobs.

Historically, such programs, passed in the depth of an economic recession, go into effect long after a recovery is underway. Spending for these programs eventually cause a stifling of the recovery because they increase the deficits and push up interest rates and inflation. The only difference this time is that we are not in the middle of a recession. The economy is growing, and so is employment. Unemployment, while still too high, has come down significantly over the summer.

To claim that H.R. 1036 will help the vast majority of unemployed is both cruel and misleading. It is cruel because of the negative effect the resulting deficits will have on future employment. It is misleading because every few without jobs will actually be employed by this bill. Those who are employed will mostly be in temporary, dead end jobs.

Nothing threatens this recovery more than high deficits. No Government program can come even remotely close to reducing unemployment more than a healthy economy. Therefore, those who truly care about unemployment will do everything in their power to reduce the deficit. The reason is obvious. Unless the deficit is controlled, interest rates will go up. High interest rates, and the resulting slowdown in capital investments, take their toll in jobs. The painful experiences of the past 3 years should have taught us that much.

A healthy economy is the best creator of new jobs. The lethargy of our economy is a condition created largely, and made worse, by unrestrained Federal spending. It is this spending that creates the huge deficits that crowd private borrowers out of capital markets and force factory layoffs. Any economic stimulation that may result from pouring billions into the economy in the name of job creation will be more than offset by the economic drag created by the increased spending.

I share my colleagues' strong desire to see unemployment brought down. However, I am convinced that this bill will only impede recovery, and reduce employment opportunities for all Americans, in every segment of our economy. Notwithstanding the high motivation of its sponsors, I see this bill as little more than another political gesture. Therefore I urge my colleagues to oppose it.●

The CHAIRMAN. Are there further amendments to the bill?

If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose, and the Speaker having resumed the chair, Mr. AUCOIN, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1036) to provide employment opportunities to long-term unemployed individuals in high unemployment areas in projects to repair and renovate vitally needed community facilities, and for other purposes, pursuant to House Resolution 302, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

□ 1800

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the Committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTIONS TO RECOMMIT OFFERED BY MR. ERLENBORN

Mr. ERLENBORN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. ERLENBORN. I am, Mr. Speaker.

The SPEAKER. The Clerk will read the motion to recommit.

The Clerk read as follows:

Mr. ERLENBORN moves to recommit the bill, H.R. 1036, to the Committee on Education and Labor with instructions that the Committee re-report the bill back to the House forthwith with the following amendment:

Strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE; AMENDMENTS OF 1954 CODE.

(a) SHORT TITLE.—This title may be cited as the "Enterprise Zone Act of 1983".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. PURPOSES.

It is the purpose of this Act to provide for the establishment of enterprise zones in order to stimulate the creation of new jobs, particularly for disadvantaged workers and long-term unemployed individuals, and to promote revitalization of economically distressed areas primarily by providing or encouraging—

(a) tax relief at the Federal, State, and local levels;

(b) regulatory relief at the Federal, State, and local levels; and

(c) improved local services and an increase in the economic stake of enterprise zone residents in their own community and its development, particularly through the increased involvement of private, local, and neighborhood organizations.

TITLE I—DESIGNATION OF ENTERPRISE ZONES

SEC. 101. DESIGNATION OF ZONES.

(a) GENERAL RULE.—Chapter 80 (relating to general rules) is amended by adding at the end thereof the following new subchapter:

"Subchapter C—Designation of Enterprise Zones

"Sec. 7871. Designation.

"SEC. 7871. DESIGNATION.

"(a) DESIGNATION OF ZONES.—

"(1) DEFINITIONS.—For purposes of this title, the term 'enterprise zone' means any area—

"(A) which is nominated by one or more local governments and the State or States in which it is located for designation as an enterprise zone (hereinafter in this section referred to as a 'nominated area'), and

"(B) which the Secretary of Housing and Urban Development, after consultation with—

"(i) the Secretaries of Agriculture, Commerce, Labor, and the Treasury; the Director of the Office of Management and Budget; and the Administrator of the Small Business Administration, and

"(ii) in the case of an area on an Indian reservation, the Secretary of the Interior,

designates as an enterprise zone.

"(2) LIMITATION ON DESIGNATIONS.—

"(A) PUBLICATION OF REGULATIONS.—Before designating any area as an enterprise zone, the Secretary of Housing and Urban Development shall prescribe by regulation no later than 4 months following the enactment of this Act, after consultation with the officials described in paragraph (1)(B)—

"(i) the procedures for nominating an area under paragraph (1)(A),

"(ii) the parameters relating to the size and population characteristics of an enterprise zone, and

"(iii) the manner in which nominated areas will be compared based on the criteria specified in subsection (d) and the other factors specified in subsection (e).

"(B) TIME LIMITATIONS.—The Secretary of Housing and Urban Development shall designate nominated areas as enterprise zones only during the 36-month period beginning on the later of—

"(i) the first day of the first month following the month in which the effective date of the regulations described in subparagraph (A) occurs, or

"(ii) July 1, 1983.

"(C) NUMBER OF DESIGNATIONS.—

"(i) IN GENERAL.—The Secretary of Housing and Urban Development may not designate more than 75 nominated areas as enterprise zones during the period beginning with the first day of the 36-month period described in subparagraph (B).

"(ii) MINIMUM DESIGNATION IN RURAL AREAS.—Of the areas designated under clause (i), at least one-third must be areas—

"(I) which are within a local government jurisdiction or jurisdictions with a population of less than 50,000 (as determined under the most recent census data available) and which are determined by the Secretary of Housing and Urban Development, after consultation with the Secretary of Commerce, to be rural areas; or

"(II) which are outside of a metropolitan statistical area (within the meaning of section 103A(1)(4)(B)).

"(D) PROCEDURAL RULES.—The Secretary of Housing and Urban Development shall not make any designation under paragraph (1) unless—

"(i) the local governments and the State in which the nominated area is located have the authority—

"(I) to nominate such area for designation as an enterprize zone,

"(II) to make the State and local commitments under subsection (d), and

"(III) to provide assurances satisfactory to the Secretary of Housing and Urban Development that such commitments will be fulfilled,

"(ii) a nomination therefor is submitted in such a manner and in such form, and contains such information, as the Secretary of Housing and Urban Development shall by regulation prescribe,

"(iii) the Secretary of Housing and Urban Development determines that any information furnished is reasonably accurate, and

"(iv) the State and local governments certify that no portion of the area nominated is already included in an enterprise zone or in an area otherwise nominated to be an enterprise zone.

"(3) NOMINATION PROCESS FOR INDIAN RESERVATIONS.—In the case of a nominated area on an Indian reservation, the reservation governing body (as determined by the Secretary of the Interior) shall be deemed to be both the State and local governments with respect to such area.

"(b) PERIOD FOR WHICH DESIGNATION IS IN EFFECT.—

"(1) IN GENERAL.—Any designation of an area as an enterprise zone shall remain in effect during the period beginning on the date of the designation and ending on the earliest of—

"(A) December 31 of the 24th calendar year following the calendar year in which such date occurs,

"(B) the termination date designated by the State and local governments as provided for in their nomination pursuant to subsection (a)(2)(D)(ii), or

"(C) the date the Secretary of Housing and Urban Development revokes such designation under paragraph (2).

"(2) REVOCATION OF DESIGNATION.—The Secretary of Housing and Urban Development, after consultation with the officials described in subsection (a)(1)(B), may revoke the designation of an area if the Secretary of Housing and Urban Development determines that the local government or the State in which it is located is not complying substantially with the State and local commitments pursuant to subsection (d).

"(c) AREA AND ELIGIBILITY REQUIREMENTS.—

"(1) IN GENERAL.—The Secretary of Housing and Urban Development may make a designation of any nominated area under subsection (a)(1) only if it meets the requirements of paragraphs (2) and (3).

"(2) AREA REQUIREMENTS.—A nominated area meets the requirements of this paragraph if—

"(A) the area is within the jurisdiction of the local government,

"(B) the boundary of the area is continuous, and

"(C) the area—

(i) has a population, as determined by the most recent census data available, of at least—

"(I) 4,000 if any portion of such area (other than a rural area described in subsection (b)(2)(C)(ii)(I)) is located within a metropolitan statistical area (within the meaning of section 103A(1)(4)(B)) with a population of 50,000 or greater, or

"(II) 1,000 in any other case, or

"(ii) is entirely within an Indian reservation (as determined by the Secretary of the Interior).

"(3) ELIGIBILITY REQUIREMENTS.—For purposes of paragraph (1), a nominated area meets the requirements of this paragraph if the State and local governments in which it is located certify and the Secretary of Housing and Urban Development, after such review of supporting data as he deems appropriate, accepts such certification, that—

"(A) the area is one of pervasive poverty, unemployment, and general distress,

"(B) the area is located wholly within the jurisdiction of a local government which is eligible for Federal assistance under section 119 of the Housing and Community Development Act of 1974, as in effect on the date of the enactment of this section, and

"(C) one of the following criteria is met:

"(i) the unemployment rate, as determined by the appropriate available data, was at least 1½ times the national unemployment rate for that period, or

"(ii) the poverty rate (as determined by the most recent census data available) for each populous census tract (or where not tracted, the equivalent county division as defined by the Bureau of the Census for the purpose of defining poverty areas) within the area was at least 20 percent for the period to which such data relate, or

"(iii) at least 70 percent of the households living in the area have incomes below 80 percent of the median income of households of the local government (determined in the same manner as under section 119(b)(2) of the Housing and Community Development Act of 1974), or

"(iv) the population of the area decreased by 20 percent or more between 1970 and 1980 (as determined from the most recent census available).

"(d) REQUIRED STATE AND LOCAL COMMITMENTS.—

"(1) IN GENERAL.—No nominated area shall be designated as an enterprise zone unless the local government and the State in which it is located agree in writing that, during any period during which the area is an enterprise zone, such governments will follow a specified course of action designated to reduce the various burdens borne by employers or employees in such area.

"(2) COURSE OF ACTION.—The course of action under paragraph (1) may be implemented by both such governments and private nongovernmental entities, may be funded from proceeds of any Federal program, and may include, but is not limited to—

"(A) a reduction of tax rates or fees applying within the enterprise zone,

"(B) an increase in the level of efficiency of local services within the enterprise zone; for example, crime prevention (particularly through experimentation with providing such services by nongovernmental entities),

"(C) actions to reduce, remove, simplify, or streamline governmental requirements applying within the enterprise zone, and

"(D) involvement in the program by private entities, organizations, neighborhood associations, and community groups, particularly those within the nominated area, including a commitment from such private entities to provide jobs and job training for, and technical, financial, or other assistance to, employers, employees, and residents of the nominated area.

"(e) PRIORITY OF DESIGNATION.—In choosing nominated areas for designation, the Secretary of Housing and Urban Development shall give special preference to the areas with respect to which the strongest and highest quality contributions described in subsection (d)(2) have been promised as part of the course of action, taking into consideration the fiscal ability of the nominating State and local governments to provide tax relief. The Secretary shall also give preference to—

"(1) the nominated areas with respect to which the strongest and highest quality contributions other than those described in subsection (d)(2) have been promised as part of the course of action,

"(2) the nominated areas with respect to which the nominating State and local governments have provided the most effective and enforceable guarantees that the proposed course of action under subsection (d) will actually be carried out during the period of the enterprise zone designation,

"(3) the nominated areas with high levels of poverty, unemployment, and general distress, particularly the areas—

"(A) which are near areas with concentrations of disadvantaged workers or long-term unemployed individuals, and

"(B) with respect to which there is a strong likelihood that residents of the area described in subparagraph (A) will receive jobs if the area is designated as an enterprise zone,

"(4) the nominated areas the size and location of which—

"(A) will primarily stimulate new economic activity, and

"(B) minimize unnecessary tax losses to the Federal Government,

"(5) the nominated areas with respect to which private entities have made the most substantial commitments in additional resources and contributions, including the creation of new or expanded business activities, and

"(6) the nominated areas which best exhibit such other factors determined by the Secretary of Housing and Urban Development as are—

"(A) consistent with the intent of the enterprise zone program, and

"(B) important to minimizing the unnecessary loss of tax revenues to the Federal Government.

"(f) DEFINITIONS.—For the purposes of this title—

"(1) GOVERNMENTS.—If more than one government seeks to nominate an area as an enterprise zone, any reference to, or requirement of, this section shall apply to all such governments.

"(2) STATE.—The term 'State' shall also include Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, and any other possession of the United States.

"(3) LOCAL GOVERNMENT.—The term 'local government' means—

"(A) any county, city, town, township, parish, village, or other general purpose political subdivision of a State,

"(B) any combination of political subdivisions described in subparagraph (A) recognized by the Secretary of Housing and Urban Development, and

"(C) the District of Columbia."

(b) CONFORMING AMENDMENT.—The table of subchapters for chapter 80 is amended by adding at the end thereof the following new item:

"SUBCHAPTER C. Designation of Enterprise Zones".

SEC. 103. EVALUATION AND REPORTING REQUIREMENTS.

Not later than the close of the fourth calendar year after the year in which the Secretary of Housing and Urban Development first designates areas as enterprise zones, and at the close of each fourth calendar year thereafter, the Secretary of Housing and Urban Development shall prepare and submit to the Congress a report on the effects of such enterprise zones' designation in accomplishing the purposes of this Act.

SEC. 104. INTERACTION WITH OTHER FEDERAL PROGRAMS.

(a) TAX REDUCTIONS.—Any reduction of taxes under any required program of State and local commitment under section 7871(d) of the Internal Revenue Code of 1954 shall be disregarded in determining the eligibility of a State or local government for, or the amount or extent of, any assistance or benefits under any law of the United States.

(b) COORDINATION WITH RELOCATION ASSISTANCE.—The designation of an enterprise zone under section 7871 of the Internal Revenue Code of 1954 shall not—

(1) constitute approval of a Federal or federally assisted program or project (within the meaning of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601)), or

(2) entitle any person displaced from real property located in such zone to any rights or any benefits under such Act.

(c) COORDINATION WITH ENVIRONMENTAL POLICY.—Designation of an enterprise zone under section 7871 shall not constitute a Federal action for purposes of applying the requirements of the National Environmental Policy Act (42 U.S.C. 4341) or other provisions of Federal law relating to the protection of the environment.

TITLE II—FEDERAL INCOME TAX INCENTIVES

Subtitle A—Credits for Employers and Employees

SEC. 201. CREDIT FOR ENTERPRISE ZONE EMPLOYERS.

(a) CREDIT FOR INCREASED ENTERPRISE ZONE EMPLOYMENT AND EMPLOYMENT OF DISADVANTAGED WORKERS.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting immediately before section 45 the following new section:

"SEC. 44H. CREDIT FOR ENTERPRISE ZONE EMPLOYMENT.

"(a) IN GENERAL.—There shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of—

"(1) 10 percent of the qualified increased employment expenditures of the taxpayer for the taxable year, and

"(2) the economically disadvantaged credit amount of the taxpayer for such taxable year.

"(b) LIMITATIONS BASED ON AMOUNT OF TAX.—

"(1) IN GENERAL.—The credit allowed by subsection (a) for a taxable year shall not exceed the tax imposed by this chapter for

such taxable year, reduced by the sum of the credits allowable under any section of this subpart having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, and 43. For purposes of the preceding sentence, the term 'tax imposed by this chapter' shall not include any tax treated as not imposed by this chapter under the last sentence of section 53(a).

"(2) CARRYBACK AND CARRYOVER OF UNUSED CREDIT.—

"(A) ALLOWANCE OF CREDIT.—If the amount of the credit determined under this section for any taxable year exceeds the limitation provided by paragraph (1) for such taxable year (hereinafter in this paragraph referred to as the 'unused credit year'), such excess shall be—

"(i) an enterprise zone employment credit carryback to each of the 3 taxable years preceding the unused credit year, and

"(ii) an enterprise zone employment credit carryover to each of the 15 taxable years following the unused credit year,

and shall be added to the amount allowable as a credit by this section for such years. If any portion of such excess is a carryback to a taxable year beginning before January 1, 1984, this section shall be deemed to have been in effect for such taxable year for purposes of allowing such carryback as a credit under this section. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 18 taxable years to which (by reason of clauses (i) and (ii)) such credit may be carried, and then to each of the other 17 taxable years to the extent that, because of the limitation contained in subparagraph (B), such unused credit may not be added for a prior taxable year to which such unused credit may be carried.

"(B) LIMITATION.—The amount of the unused credit which may be added under subparagraph (A) for any preceding or succeeding taxable year shall not exceed the amount by which the limitation provided by paragraph (1) for such taxable year exceeds the sum of—

"(i) the credit allowable under this section for such taxable year, and

"(ii) the amounts which, by reason of this paragraph, are added to the amount allowable for such taxable year and which are attributable to taxable years preceding the unused credit year.

"(C) SPECIAL RULE IF PERIOD OF ZONE EXTENDS MORE THAN 15 YEARS.—If the number of taxable years during the period—

"(i) beginning with the taxable year after the unused credit year, and

"(ii) ending with the taxable year in which the designation of the enterprise zone to which the credit under subsection (a) relates expires under section 7871,

exceeds 15, then subparagraph (A) shall be applied by substituting such number for '15', such number plus 3 for '18', and such number plus 2 for '17'.

"(c) QUALIFIED INCREASED EMPLOYMENT EXPENDITURES DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified increased employment expenditures' means the excess of—

"(A) the qualified wages paid or incurred by the employer during the taxable year to qualified employees with respect to all enterprise zones, over

"(B) the base period wages of the employer with respect to all such zones.

"(2) LIMITATIONS AS TO QUALIFIED WAGES TAKEN INTO ACCOUNT.—

"(A) DOLLAR AMOUNT.—The amount of any qualified wages taken into account under paragraph (1) for any taxable year with respect to any qualified employee may not exceed 2.5 times the dollar limitation in effect under section 3306 (b)(1) for the calendar year with or within which such taxable year ends.

"(B) APPLICATION WITH ECONOMICALLY DISADVANTAGED CREDIT AMOUNT.—Qualified wages shall not be taken into account under paragraph (1) if such wages are taken into account in determining the economically disadvantaged credit amount under subsection (d).

"(3) BASE PERIOD WAGES.—

"(A) IN GENERAL.—The term 'base period wages' means, with respect to any enterprise zone, the amount of wages paid to employees during the 12-month period preceding the date on which the enterprise zone was designated as such under section 7871, or the date on which the enterprise zone is designated under State law, enacted after January 1, 1981, if earlier, which would have been qualified wages paid to qualified employees if such designation had been in effect for such period.

"(B) RULES OF SPECIAL APPLICATION.—For purposes of subparagraph (A)—

"(i) subsection (f)(1) shall be applied by substituting '12-month period' for 'taxable year' each place it appears, and

"(ii) the dollar limitation taken into account under paragraph (2) in computing qualified wages shall be the amount in effect for taxable year for which the amount of the credit under subsection (a) is being computed.

"(d) ECONOMICALLY DISADVANTAGED CREDIT AMOUNT.—For purposes of this section—

"(1) IN GENERAL.—The term 'economically disadvantaged credit amount' means the sum of the applicable percentage of qualified wages paid to each qualified economically disadvantaged individual.

"(2) APPLICABLE PERCENTAGE.—For purposes of paragraph (1), the term 'applicable percentage' means, with respect to any qualified economically disadvantaged individual, the percentage determined in accordance with the following table:

"If the qualified wages are paid for services performed:	The applicable percentage is:
Within 36 months of starting date	50
More than 36 months but less than 49 months after such date	40
More than 48 months but less than 61 months after such date	30
More than 60 months but less than 73 months after such date	20
More than 72 months but less than 85 months after such date	10
More than 84 months after such date	0

"(3) STARTING DATE; BREAKS IN SERVICE.—For purposes of this subsection—

"(A) STARTING DATE.—The term 'starting date' means the day which the qualified economically disadvantaged individual begins work for the employer within an enterprise zone.

"(B) BREAKS IN SERVICE.—The periods described in the table under paragraph (2) (other than the first such period) shall be extended by any period of time during which the individual is unemployed, and by any period of time during which the individual is employed by a taxpayer in an enterprise zone designated under State law enacted after January 1, 1981, if such designation occurs prior to the designation of the enterprise zone under section 7871.

"(e) QUALIFIED WAGES DEFINED.—For purposes of this section—

"(1) IN GENERAL.—Except as otherwise provided in this subsection, the term 'qualified wages' has the meaning given to the term 'wages' by subsection (b) of section 3306 (determined without regard to any dollar limitation contained in such section).

"(2) REDUCTION FOR CERTAIN FEDERALLY FUNDED PAYMENTS.—For purposes of this section the wages paid or incurred by an employer for any period shall not include the amount of any Federally funded payments the employer receives or is entitled to receive for on-the-job training of such individual for such period.

"(3) SPECIAL RULES FOR AGRICULTURAL AND RAILWAY LABOR.—Under regulations prescribed by the Secretary, rules similar to the rules of section 51(h) shall apply with respect to services described in subparagraphs (A) and (B) of section 51(h)(1).

"(f) QUALIFIED EMPLOYEE DEFINED.—

"(1) IN GENERAL.—For purposes of this section, the term 'qualified employee' means an individual—

"(A) at least 90 percent of whose services for the employer during the taxable year are directly related to the conduct of the employer's trade or business located in an enterprise zone, and

"(B) who performs at least 50 percent of his services for the employer during the taxable year in an enterprise zone.

"(2) EXCEPTION FOR INDIVIDUALS WITH RESPECT TO WHOM CREDIT IS ALLOWED UNDER SECTION 44B.—The term 'qualified employee' shall not include an individual with respect to whom any credit is allowed the employer for the taxable year under section 44B (relating to credit for employment of certain new employees).

"(g) QUALIFIED ECONOMICALLY DISADVANTAGED INDIVIDUAL.—

"(1) For purposes of this section, the term 'qualified economically disadvantaged individual' means an individual—

"(A) who is a qualified employee,

"(B) who is hired by the employer during the period a designation under section 7871 is in effect for the area in which the services which qualify such individual as a qualified employee are performed, and

"(C) who is certified as—

"(i) an economically disadvantaged individual,

"(ii) an eligible work incentive employee (within the meaning of section 51(d)(9)), or

"(iii) a general assistance recipient (within the meaning of section 51(d)(6)).

"(2) ECONOMICALLY DISADVANTAGED INDIVIDUAL.—For purposes of paragraph (1)—

"(A) IN GENERAL.—The term 'economically disadvantaged individual' means any individual who is certified by the designated local agency as being a member of a family that had a combined family income (including the cash value of food stamps) during the 6 months preceding the month in which such determination occurs that on an annual basis, was equal to or less than the sum of—

"(i) the highest amount which would ordinarily be paid to a family of the same size without any income or resources in the form of payments for aid to families with dependent children under the State plan approved under part A of title IV of the Social Security Act for the State in which such individual resides, plus,

"(ii) the highest cash value of the food stamps to which a family of the same size without any income or resources would be paid aid to families with dependent children

under such State plan in the amount determined under clause (i).

Any such determination shall be valid for the 45-day period beginning on the date such determination is made.

"(B) SPECIAL RULE FOR FAMILIES WITH ONLY 1 INDIVIDUAL.—For purposes of clause (i) of subparagraph (A), in the case of a family consisting of only one individual, the 'highest amount which would ordinarily be paid' to such family under the State's plan approved under part A of title IV of the Social Security Act shall be an amount determined by the designated local agency on the basis of a reasonable relationship to the amounts payable under such plan to families consisting of two or more persons.

"(3) CERTIFICATION.—Certification of an individual as an individual described in paragraph (1)(C) shall be made in the same manner as certification under section 51.

"(h) SPECIAL RULES.—For purposes of this section—

"(1) APPLICATION TO CERTAIN ENTITIES, ETC.—Under regulations prescribed by the Secretary, rules similar to the rules of section 52 (other than subsection (b) thereof) and section 44F(f)(3) shall apply.

"(2) PERIODS OF LESS THAN A YEAR.—If designation of an area as an enterprise zone under section 7871 occurs, expires, or is revoked on a date other than the first or last day of the taxable year of the taxpayer, or in the case of a short taxable year—

"(A) the limitation specified in subsection (c)(2)(A), and the base period wages determined under subsection (c)(3), shall be adjusted on a pro rata basis (based upon the number of days), and

"(B) the reduction specified in subsection (e)(2) and the 90 percent and 50 percent tests set forth in subsection (f)(1) shall be determined by reference to the portion of the taxable year during which the designation of the area as an enterprise zone is in effect.

"(i) PHASEOUT OF CREDIT.—In determining the amount of the credit for a taxable year under subsection (a) with respect to qualified wages paid or incurred for services performed in an enterprise zone—

"(1) the following percentages shall be substituted for '10 percent' in subsection (l)(1):

"(A) 7.5 percent in the earlier of—

"(i) the taxable year which includes the date which is 21 years after the date on which such enterprise zone was designated under section 7871, or

"(ii) the taxable year which includes the date which is 4 years before the date (if any) on which such enterprise zone ceases to be a zone under section 7871(b)(1)(B),

"(B) 5 percent in the next succeeding taxable year,

"(C) 2.5 percent in the second next succeeding taxable year, and

"(D) zero thereafter, and

"(2) the amount determined under subsection (a)(2) shall be reduced by—

"(A) 25 percent in the case of the taxable year described in paragraph (1)(A),

"(B) 50 percent in the next succeeding taxable year,

"(C) 75 percent in the second next succeeding taxable year, and

"(D) 100 percent thereafter.

"(j) EARLY TERMINATION OF EMPLOYMENT BY EMPLOYER IN CASE OF QUALIFIED ECONOMICALLY DISADVANTAGED INDIVIDUALS, ETC.—

"(1) GENERAL RULE.—Under the regulations prescribed by the Secretary, if the employment of any qualified economically disadvantaged individual with respect to whom qualified wages are taken into account under subsection (a) is terminated by the taxpayer at any time during 270-day period beginning on the date such individual begins work for the employer, the tax under this chapter for the taxable year in which such employment is terminated shall be increased by an amount (determined under such regulations) equal to the credit allowed under subsection (a) for such taxable year and all prior taxable years attributable to qualified wages paid or incurred with respect to such employee.

"(2) SUBSECTION NOT TO APPLY IN CERTAIN CASES.—

"(A) IN GENERAL.—Paragraph (1) shall not apply to—

"(i) a termination of employment of an employee who voluntarily leaves the employment of the employer.

"(ii) a termination of employment of an individual who, before the close of the period referred to in paragraph (1), becomes disabled to perform the services of such employment, unless such disability is removed before the close of such period and the employer fails to offer reemployment to such individual,

"(iii) a termination of employment of an individual, if it is determined under the applicable State unemployment compensation law that the termination was due to the misconduct of such individual, or

"(iv) a termination of employment of an individual due to a substantial reduction in the trade or business operations of the employer.

"(B) CHANGE IN FORM OF BUSINESS, ETC.—For purposes of paragraph (1), the employment relationship between the employer and an employee shall not be treated as terminated—

"(i) by a transaction to which section 381(a) applies, if the employee continues to be employed by the acquiring corporation, or

"(ii) by reason of a mere change in the form of conducting the trade or business of the taxpayer, if the employee continues to be employed in such trade or business and the employer retains a substantial interest in such trade or business.

"(3) SPECIAL RULE.—Any increase in tax under paragraph (1) shall not be treated as tax imposed by this chapter for purposes of determining the amount of any credit allowable under subpart A."

(b) NO DEDUCTION ALLOWED.—

(1) IN GENERAL.—Section 280C (relating to disallowance of deductions for that portion of wages for which credit is claimed under section 40 or 44B) is amended—

(A) by adding at the end thereof the following new subsection:

"(c) RULE FOR SECTION 44H CREDITS.—No deduction shall be allowed for that portion of the wages or salaries paid or incurred for the taxable year which is equal to the amount of the credit allowable under section 44H (relating to the employment credit for enterprise zone businesses). This subsection shall be applied under a rule similar to the rule under the last sentence of subsection (b)."; and

(B) by striking out "or 44b" in the heading and inserting in lieu thereof ", 44b, or 44h".

(2) CONFORMING AMENDMENT.—The table of sections for part IX of subchapter B of chapter 1 is amended by striking out "or 44B" in the item relating to section 280C and inserting in lieu thereof ", 44B, or 44H".

(c) TECHNICAL AMENDMENTS RELATED TO CARRYOVER AND CARRYBACK OF CREDITS.—

(1) CARRYOVER OF CREDIT.—

(A) Subparagraph (B) of section 55(c)(3) (relating to carryover and carryback of certain credits) is amended—

(i) by striking out "or 44F" in clause (i) and inserting in lieu thereof "44F, or 44H", and

(ii) by inserting "44H(b)(1)," after "44F(g)(1)," in clause (ii).

(B) Subsection (c) of section 381 (relating to items of the distributor or transferor corporation) is amended by adding at the end thereof the following new paragraph:

"(30) CREDIT UNDER SECTION 44H.—The acquiring corporation shall take into account (to the extent proper to carry out the purposes of this section and section 44H, and under such regulations as may be prescribed by the Secretary) the items required to be taken into account for purposes of section 44H in respect to the distributor or transferor corporation."

(C) Section 383 (relating to special limitations on unused credits and capital losses), as in effect for taxable years to which the amendments made by the Tax Reform Act of 1976 apply, is amended—

(i) by inserting "to any unused credit of the corporation under section 44H(b)(2)," after "44G(b)(2)," and

(ii) by inserting "enterprise zone employment credits," after "employee stock ownership credits," in the section heading.

(D) Section 383 (as in effect on the day before the amendments made by the Tax Reform Act of 1976) is amended—

(i) by inserting "to any unused credit of the corporation which could otherwise be carried forward under section 44H(b)(2)," after "44G(b)(2)," and

(ii) by inserting "ENTERPRISE ZONE EMPLOYMENT CREDITS," after "EMPLOYEE STOCK OWNERSHIP CREDITS," in the section heading.

(E) The table of sections for part V of subchapter C of chapter 1 is amended by inserting "enterprise zone employment credits," after "employee stock ownership credits," in the item relating to Section 383.

(2) CARRYBACK OF CREDIT.—

(A) Subparagraph (C) of section 6511(d)(4) (defining credit carryback) is amended by striking out "and employee stock ownership credit carryback" and inserting in lieu thereof "employee stock ownership credit carryback, and enterprise zone employment credit carryback."

(B) Section 6411 (relating to quick refunds in respect to tentative carryback adjustments) is amended—

(i) by striking out "or unused employee stock ownership credit" each place it appears and inserting in lieu therof "unused employee stock ownership credit, or unused enterprise zone employment credit carryback;"

(ii) by inserting ", by an enterprise zone employment credit carryback provided by section 44H(b)(2)," after "by an employee stock ownership credit carryback provided by section 44G(b)(2)" in the first sentence of subsection (a);

(iii) by striking out "or employee stock ownership credit carryback from" each place it appears and inserting in lieu thereof "employee stock ownership credit carryback, or enterprise zone employment credit carryback from;" and

(iv) by striking out "research and experimental credit carryback)" in the second sentence of subsection (a) and inserting in lieu thereof "research and experimental credit carryback, or in the case of an enterprise zone employment credit carryback, to an investment credit carryback, a new employee

credit carryback, or an employee stock ownership credit carryback)."

(d) OTHER TECHNICAL AND CLERICAL AMENDMENTS.—

(1) Subsection (b) of section 6096 (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44G" and inserting in lieu thereof "44G and 44H".

(2) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting before the item relating to section 45 the following new item:

"Sec. 44H. Credit for enterprise zone employment."

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1983.

SEC. 202. CREDIT FOR ENTERPRISE ZONE EMPLOYEES.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable), as amended by section 201, is amended by inserting immediately before section 45 the following new section:

"SEC. 44J. CREDIT FOR ENTERPRISE ZONE EMPLOYEES.

"(a) IN GENERAL.—In the case of a qualified employee, there is allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 5 percent of the qualified wages for the taxable year.

"(b) DEFINITIONS.—For purposes of this section—

"(1) QUALIFIED EMPLOYEE.—the term 'qualified employee' means an individual—

"(A) who is described in section 44H(f)(1), and

"(B) who is not the employee of the Federal Government or any State or subdivision of a State.

"(2) QUALIFIED WAGES.—

"(A) IN GENERAL.—The term 'qualified wages' has the meaning given to 'wages' under subsection (b) of section 3306, attributable to services performed for an employer with respect to whom the employee is a qualified employee, in an amount which does not exceed 1½ times the dollar limitation specified in such subsection.

"(B) EXCEPTION.—The term 'qualified wages' does not include any compensation received from the Federal Government or any State or subdivision of a State.

"(3) ENTERPRISE ZONE.—The term 'enterprise zone' means any area with respect to which a designation as an enterprise zone is in effect under section 7871.

"(c) PHASEOUT OF CREDIT.—In determining the amount of the credit for the taxable year under subsection (a) with respect to qualified wages paid to qualified employees for services performed in an enterprise zone, the following percentages shall be substituted for '5 percent' in subsection (a):

"(1) 3¾ percent in the taxable year in which the date which is—

"(A) 21 years after the date on which such enterprise zone was designated under section 7871 occurs, or

"(B) if earlier, the date 4 years before the date the zone designation is to expire;

"(2) 2½ percent in the next succeeding taxable year;

"(3) 1¼ percent in the second next succeeding taxable year; and

"(4) zero thereafter.

"(d) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) for a taxable year shall not exceed the tax imposed by this chapter for such taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section, other than the credits allowable by section 31, 39, and 43. For purposes of the preceding sentence, the term 'tax imposed by this chapter' shall not include any tax treated as not imposed by this chapter under the last sentence of section 53(a)."

(b) CONFORMING AMENDMENT.—The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting immediately before the item relating to section 45 of the following new item:

"Sec. 44I. Credit for enterprise zone employees."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years after December 31, 1983.

Subtitle B—Credits for Investment in Tangible Property in Enterprise Zones

SEC. 211. INVESTMENT TAX CREDIT FOR ENTERPRISE ZONE PROPERTY.

(a) SECTION 38 PROPERTY.—Paragraph (1) of section 48(a) (defining section 38 property) is amended by striking out "or" at the end of subparagraph (F), by striking out the period at the end of subparagraph (G) and inserting in lieu thereof "; or", and by adding after subparagraph (G) the following new subparagraph:

"(H) enterprise zone property (within the meaning of subsection (r)) which is not otherwise section 38 property."

(b) AMOUNT OF CREDIT.—

(1) IN GENERAL.—Subparagraph (A) of section 46(a)(2) (relating to amount of investment tax credit) is amended by striking out "and" at the end of clause (iii), by striking out the period at the end of clause (iv) and inserting in lieu thereof ", and", and by adding at the end thereof the following new clause:

"(v) in the case of qualified enterprise zone property, the enterprise zone percentage."

(2) ENTERPRISE ZONE PERCENTAGE DEFINED.—Paragraph (2) of section 46(a) is amended by adding at the end thereof the following new subparagraph:

"(G) ENTERPRISE ZONE PERCENTAGE.—

"(i) IN GENERAL.—

"For purposes of this paragraph—

"In the case of qualified enterprise zone expenditures with respect to:	The enterprise zone percentage is:
Zone personal property (within the meaning of section 48(r)(2))	5
New zone construction property (within the meaning of section 48(r)(3))	10

"(ii) PHASEOUT OF CREDIT AS ENTERPRISE ZONE ENDS.—Clause (i) shall be applied by substituting the following percentages for 5 percent and 10 percent, respectively:

"(I) For the taxable year described in section 44H(i)(1)(A), 3.75 and 7.5.

"(II) For the next succeeding taxable year, 2.5 and 5.

"(III) For the second next succeeding taxable year, 1.25 and 2.5.

"(IV) For any subsequent taxable year, zero."

(3) ORDERING RULES.—That portion of paragraph (7) of section 46(a) (relating to special rules in the case of energy property) which precedes subparagraph (B) is amended to read as follows:

"(7) SPECIAL RULES IN THE CASE OF ENERGY PROPERTY OR ENTERPRISE ZONE PROPERTY.—Under regulations prescribed by the Secretary—

"(A) IN GENERAL.—This subsection and subsection (b) shall be applied separately—

"(i) first with respect to so much of the credit allowed by section 38 as is not attributable to the energy percentage or the enterprise zone percentage,

"(ii) second with respect to so much of the credit allowed by section 38 as is attributable to the application of the energy percentage to energy property, and

"(iii) third with respect to so much of the credit allowed by section 38 as is attributable to the application of the enterprise zone percentage zone property."

(4) CONFORMING AMENDMENT.—Section 48(o) (defining certain credits) is amended by adding at the end thereof the following new paragraphs:

"(9) ENTERPRISE ZONE CREDIT.—The term 'enterprise zone credit' means that portion of the credit allowed by section 38 which is attributable to the enterprise zone percentage."

(c) DEFINITIONS AND TRANSITIONAL RULES.—Section 48 (relating to definitions and special rules) is amended by redesignating subsection (r) as subsection (s) and by inserting after subsection (q) the following new subsection:

"(r) ENTERPRISE ZONE PROPERTY.—

"(1) The term 'enterprise zone property' means property—

"(A) which is—

"(i) zone personal property, or

(ii) new zone construction property,

"(B) not acquired (directly or indirectly) by the taxpayer from a person who is related to the taxpayer (within the meaning of section 168(e)(4)(D)), and

"(C) acquired and first placed in service by the taxpayer in an enterprise zone during the period the designation as a zone is in effect under section 7871.

"(2) ZONE PERSONAL PROPERTY DEFINED.—The term 'zone personal property' means property which is—

"(A) 3-year property;

"(B) 5-year property;

"(C) 10-year property; and

"(D) 15-year public utility property,

which is used by the taxpayer predominantly in the active conduct of a trade or business within an enterprise zone. Property shall not be treated as 'zone personal property' if it is used or located outside the enterprise zone on any regular basis.

"(3) NEW ZONE CONSTRUCTION PROPERTY DEFINED.—The term 'new zone construction property' means 15-year real property which is—

"(A) located in an enterprise zone,

"(B) used by the taxpayer predominantly in the active conduct of a trade or business within an enterprise zone, and

"(C) either—

"(i) the construction, reconstruction, rehabilitation, renovation, expansion, or erection of which is completed by the taxpayer during the period the designation as a zone is in effect under section 7871, or

"(ii) acquired during such period if the original use of such property commences with the taxpayer and commences during such period.

In applying section 46(c)(1)(A) in the case of property described in clause (i), there shall be taken into account only that portion of the basis which is properly attributable to construction or erection during such period.

"(4) REAL ESTATE RENTAL.—For purposes of this section, ownership of residential, commercial, or industrial real property within an enterprise zone for rental shall be treat-

ed as the active conduct of a trade or business in an enterprise zone.

"(5) DEFINITIONS.—For purposes of this subsection, the terms '3-year property,' '5-year property,' '10-year property,' '15-year property,' and '15-year public utility property' have the meanings given such terms by section 168(c)(2)."

(d) LODGING TO QUALIFY.—Paragraph (3) of section 48(a) (relating to property used for lodging) is amended—

(1) by striking out "and" at the end of subparagraph (C),

(2) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof ", and," and

(3) by adding at the end thereof the following new subparagraph:

"(E) new zone construction property."

(e) RECAPTURE.—Subsection (a) of section 47 (relating to certain dispositions, etc., of section 38 property) is amended by adding at the end thereof the following new paragraph:

"(9) SPECIAL RULES FOR ENTERPRISE ZONE PROPERTY.—

"(A) IN GENERAL.—If, during any taxable year, property with respect to which the taxpayer claimed an enterprise zone credit—

"(i) is disposed of, or

"(ii) in the case of zone personal property—

"(I) otherwise ceases to be section 38 property with respect to the taxpayer, or

"(II) is removed from the enterprise zone, converted, or otherwise ceases to be enterprise zone property (other than by the expiration or revocation of the designation as an enterprise zone),

the tax under this chapter for such taxable year shall be increased by the amount described in subparagraph (B).

"(B) AMOUNT OF INCREASE.—The increase in tax under subparagraph (A) shall equal the aggregate decrease in the credits allowed under section 38 by reason of section 46(a)(2)(A)(v) for all prior taxable years which would have resulted solely from reducing the expenditures taken into account with respect to the property by an amount which bears the same ratio to such expenditures as the number of taxable years that the property was held by the taxpayer bears to the applicable recovery period for earnings and profits under section 312(k)."

(f) BASIS ADJUSTMENT TO REFLECT INVESTMENT CREDIT.—

(1) IN GENERAL.—Paragraph (3) of section 48(q) (relating to basis adjustment to section 38 property) is amended to read as follows:

"(3) SPECIAL RULE FOR QUALIFIED REHABILITATION AND ENTERPRISE ZONE EXPENDITURES.—In the case of any credit determined under section 46(a)(2) for—

"(A) any qualified rehabilitation expenditure in connection with a qualified rehabilitated building other than a certified historic structure, or

"(B) any expenditure in connection with new zone construction property (within the meaning of section 48(r)(3)),

paragraphs (1) and (2) shall be applied without regard to the phrase '50 percent of'."

(2) CONFORMING AMENDMENT.—The heading for subsection (c) of section 196 (relating to deductions for certain unused investment credits) is amended by striking out "rehabilitated buildings" and inserting in lieu thereof "rehabilitation and enterprise zone expenditures."

(g) INVESTMENT CREDIT CARRYOVER PERIOD EXTENDED.—Paragraph (1) of section 46(b) (relating to carryover and carryback of unused credits) is amended by adding at the end thereof the following new sentence: "If the number of taxable years during the period beginning with the taxable years following the unused credit year and ending with the taxable year in which the designation of the enterprise zone to which the unused credit relates expires under section 7871 exceeds 15, then the preceding sentence shall be applied by substituting such number for '15,' such number plus 3 for '18,' and such number plus 2 for '17'."

(h) EFFECTIVE DATE.—The amendments made by this section shall apply to periods after December 31, 1983, under rules similar to the rules of section 48(m) of the Internal Revenue Code of 1954.

Subtitle C—Rules Reduction in Capital Gain Tax Rates

SEC. 221. CORPORATIONS.

(a) GENERAL RULE.—Subsection (a) of section 1201 (relating to alternative tax for corporations) is amended by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) a tax of 28 percent of the excess (if any) of—

"(A) the net capital gain for the taxable year, over

"(B) the qualified enterprise zone capital gain."

(b) DEFINITION OF QUALIFIED ENTERPRISE ZONE CAPITAL GAIN.—Section 1201 is amended by redesignating subsections (b) and (c) as subsections (c) and (d) and by inserting after subsection (a) the following new subsection:

"(b) QUALIFIED ENTERPRISE ZONE CAPITAL GAIN.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified enterprise zone capital gain' means gain which is—

"(A) described in section 1222(3),

"(B) attributable to the sale or exchange of qualified property, and

"(C) property allocable only to periods during which the property is qualified property.

"(2) LIMITATIONS.—The term 'qualified enterprise zone capital gain' does not include any gain attributable to the sale or exchange of an interest in a qualified business to the extent attributable to—

"(A) any property contributed to the qualified business within the previous 12 months,

"(B) any interest in any business which is not a qualified business, or

"(C) any other intangible property to the extent not properly attributable to the active conduct of a trade or business within an enterprise zone.

"(3) DEFINITIONS.—

"(A) The term 'qualified property' means—

"(i) any tangible personal property used by the taxpayer predominantly in an enterprise zone in the active conduct of a trade or business within such enterprise zone,

"(ii) any real property located in an enterprise zone used by the taxpayer predominantly in the active conduct of a trade or business within such enterprise zone, and

"(iii) any interest in a corporation, partnership, or other entity if, for the three most recent taxable years of such entity ending before the date of disposition of such interest, such entity, was a qualified business.

"(B) QUALIFIED BUSINESS.—The term 'qualified business' means any person—

"(i) which is actively engaged in the conduct of a trade or business within an enterprise zone during the period described in subparagraph (A)(iii),

"(ii) with respect to which at least 80 percent of such person's gross receipts for the taxable year are attributable to the active conduct of a trade or business within an enterprise zone, and

"(iii) with substantially all of its tangible assets located within an enterprise zone.

"(C) REAL ESTATE RENTAL.—For purposes of this section, ownership of residential, commercial, or industrial real property within an enterprise zone for rental shall be treated as the active conduct of a trade or business in an enterprise zone.

"(D) PROPERTY REMAINS QUALIFIED AFTER ZONE DESIGNATION CEASES TO APPLY.—

"(i) IN GENERAL.—The treatment of property as qualified property under subparagraph (A) shall terminate when the designation of the enterprise zone in which the property is located or used expires or is revoked.

"(ii) EXCEPTIONS.—Clause (i) shall not apply after the first sale or exchange of property occurring after the designation expires or is revoked,"

SEC. 222. TAXPAYER OTHER THAN CORPORATIONS.

Subsection (a) of section 1202 (relating to deduction for capital gains) is amended to read as follows:

"(a) DEDUCTION ALLOWED.—

"(1) IN GENERAL.—If for any taxable year a taxpayer other than a corporation has a net capital gain, there shall be allowed as a deduction from gross income an amount equal to the sum of—

"(A) 100 percent of the lesser of—

"(i) the net capital gain, or

"(ii) the qualified enterprise zone capital gain (as defined in section 1201(b)), plus

"(B) 60 percent of the excess (if any) of—

"(i) the net capital gain, over

"(ii) the amount of the net capital gain taken into account under subparagraph (A)."

SEC. 223. MINIMUM TAX.

Paragraph (9) of section 57(a) (relating to tax preference for capital gains) is amended by adding at the end thereof the following new subparagraph:

"(E) For purposes of this paragraph, gain attributable to qualified enterprise zone capital gain (within the meaning of section 1201(b)) shall not be taken into account."

SEC. 224. EFFECTIVE DATE.

The amendments made by this subtitle shall apply to sales or exchanges after December 31, 1983.

Subtitle D—Rules Relating to Industrial Development Bonds

SEC. 231. INDUSTRIAL DEVELOPMENT BONDS.

(a) LIMITATION ON ACCELERATED COST RECOVERY DEDUCTION NOT TO APPLY TO ENTERPRISE ZONE PROPERTY.—Subparagraph (C) of section 168(f)(12) (relating to limitations on property financed with tax-exempt bonds) is amended—

(1) by striking out "or" at the end of clause (iii),

(2) by striking out the period at the end of clause (iv) and inserting in lieu thereof ", or", and

(3) by adding at the end thereof the following new clause:

"(v) as enterprise zone property (within the meaning of section 48(r))."

(b) TERMINATION OF SMALL ISSUE EXEMPTION NOT TO APPLY.—Subparagraph (N) of section 103(b)(6) (relating to termination of small issue exemption after December 31, 1986) is amended by adding at the end thereof the following new sentence: "This

subparagraph shall not apply to any obligation which is part of an issue substantially all of the proceeds of which are used to finance facilities within an enterprise zone if such facilities are placed in service while the designation as such a zone is in effect under section 7871."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to obligations issued after December 31, 1983, in taxable years ending after such date.

Subtitle E—Sense of the Congress With Respect to Tax Simplification

SEC. 241. TAX SIMPLIFICATION

It is the sense of the Congress that the Secretary of the Treasury should in every way possible simplify the administration and enforcement of any provision of the Internal Revenue Code of 1954 added to, or amended by, this Act.

TITLE III—REGULATORY FLEXIBILITY

SEC. 301. DEFINITION OF SMALL ENTITIES IN ENTERPRISE ZONES FOR PURPOSES OF ANALYSIS OR REGULATORY FUNCTIONS

Section 601 of title 5, United States Code, is amended by—

(1) strike out "and" at the end of paragraph (5); and

(2) striking out paragraph (6) and inserting in lieu thereof the following:

"(6) the term 'small entity' means—

"(A) a small business, small organization, or small governmental jurisdiction within the meaning of paragraphs (3), (4), and (5) of this section, respectively; and

"(B) any qualified business; any governments which designated and approved an area which has been designated as an enterprise zone (within the meaning of section 7871 of the Internal Revenue Code of 1954) to the extent any rule pertains to the carrying out of projects, activities, or undertakings within such zone; and any not-for-profit enterprise carrying out a significant portion of its activities within such a zone; and

"(7) the term 'qualified business' means any person, corporation, or other entity—

"(A) which is engaged in the active conduct of a trade or business within an enterprise zone (within the meaning of section 7871 of the Internal Revenue Code of 1954); and

"(B) for whom at least 50 percent of its employees are qualified employees (within the meaning of section 44H(f) of such Code)."

SEC. 302. WAIVER OR MODIFICATION OF AGENCY RULES IN ENTERPRISE ZONES.

(a) Chapter 6 of title 5, United States Code, is amended by redesignating sections 611 and 612 as sections 612 and 613, respectively, and inserting the following new section immediately after section 610:

"§ 611. Waiver or modification of agency rules in enterprise zones

"(a) Upon the written request of the governments which designated and approved an area which has been designated as an enterprise zone under section 7871 of the Internal Revenue Code of 1954, an agency is authorized, in order to further the job creation, community development, or economic revitalization objectives of the zone, to waive or modify all or part of any rule which it has authority to promulgate, as such rule pertains to the carrying out of projects, activities, or undertakings within the zone.

"(b) Nothing in this section shall authorize an agency to waive or modify any rule adopted to carry out a statute or Executive order which prohibits, or the purpose of which is to protect persons against, discrimination on the basis of race, color, religion, sex, marital status, national origin, age, or handicap.

"(c) A request under subsection (a) shall specify the rule or rules to be waived or modified and the change proposed, and shall briefly describe why the change would promote the achievement of the job creation, community development, or economic revitalization objectives of the enterprise zone. If a request is made to an agency other than the Department of Housing and Urban Development, the requesting governments shall send a copy of the request to the Secretary of Housing and Urban Development at the time the request is made.

"(d) In considering a request, the agency shall weigh the extent to which the proposed change is likely to further job creation, community development, or economic revitalization within the enterprise zone against the effect the change is likely to have on the underlying purposes of applicable statutes in the geographic area which would be affected by the change. The agency shall approve the request whenever it finds, in its discretion, that the public interest which the proposed change would serve in furthering such job creation, community development or economic revitalization outweighs the public interest which continuation of the rule unchanged would serve in furthering such underlying purposes. The agency shall not approve any request to waive or modify a rule if that waiver or modification would—

"(1) directly violate a statutory requirement (including any requirement of the Fair Labor Standards Act of 1938 (52 Stat. 1060; 29 U.S.C. 201 et seq.)); or

"(2) be likely to present a significant risk to the public health, including environmental health or safety, such as a rule with respect to occupational safety or health, or environmental pollution.

"(e) If a request is disapproved, the agency shall inform the requesting governments in writing of the reasons therefor and shall, to the maximum extent possible, work with such governments to develop an alternative, consistent with the standards contained in subsection (d).

"(f) Agencies shall discharge their responsibilities under this section in an expeditious manner, and shall make a determination on requests not later than 90 days after their receipt.

"(g) A waiver or modification of a rule under subsection (a) shall not be considered to be a rule, rulemaking, or regulation under chapter 5 of this title. To facilitate reaching its decision on any requested waiver or modification, the agency may seek the views of interested parties and, if the views are to be sought, determine how they should be obtained and to what extent, if any, they should be taken into account in considering the request. The agency shall publish a notice in the Federal Register stating any waiver or modification of a rule under this section.

"(h) In the event that an agency proposes to amend a rule for which a waiver or modification under this section is in effect, the agency shall not change the waiver or modification to impose additional requirements unless it determines, consistent with standards contained in subsection (d), that such action is necessary.

"(i) No waiver or modification of a rule under this section shall remain in effect for a longer period than the period for which the enterprise zone designation remains in effect for the area in which the waiver or modification applies.

"(j) For purposes of this section, the term 'rule' means (1) any rule as defined in section 551(4) of this title or (2) any rulemaking conducted on the record after opportunity for an agency hearing pursuant to sections 556 and 557 of this title."

(b) The table of sections for such chapter is amended by redesignating "Sec. 611." and "Sec. 612." and "Sec. 613.", respectively, and inserting the following new item immediately after "Sec. 610.":

"Sec. 611. Waiver or modification of agency rules in enterprise zones."

(c) Section 601(2) of such title is amended by inserting "(except for purposes of section 611)" immediately before "means."

(d) Section 613 of such title, redesignated by subsection (a) of this section, is amended by—

(1) inserting "(except section 611)" immediately after "chapter" in subsection (a); and

(2) inserting "as defined in section 601(2)" immediately before the period at the end of the first sentence of subsection (b).

SEC. 303. COORDINATION OF HOUSING AND URBAN DEVELOPMENT PROGRAMS IN ENTERPRISE ZONES.

Section 3 of the Department of Housing and Urban Development Act is amended by adding at the end thereof the following new subsection:

"(d) The Secretary of Housing and Urban Development shall—

"(1) promote the coordination of all programs under his jurisdiction which are carried on within an enterprise zone designated pursuant to 7871 of the Internal Revenue Code of 1954;

"(2) expedite, to the greatest extent possible, the consideration of applications for programs referred to in paragraph (1) through the consolidation or forms or otherwise; and

"(3) provide, whenever possible, for the consolidation of periodic reports required under programs referred to in paragraph (1) into one summary report submitted at such intervals as may be designated by the Secretary."

TITLE IV—ESTABLISHMENT OF FOREIGN-TRADE ZONES IN ENTERPRISE ZONES

SEC. 401. FOREIGN-TRADE ZONE PREFERENCES.

(a) PREFERENCE IN ESTABLISHMENT OF FOREIGN-TRADE ZONES IN REVITALIZATION AREAS.—In processing applications for the establishment of foreign-trade zones pursuant to an Act entitled "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," approved June 18, 1934 (48 Stat. 998), the Foreign-Trade Zone Board shall consider on a priority basis and expedite, to the maximum extent possible, the processing of any application involving the establishment of a foreign-trade zone within an enterprise zone designated pursuant to section 7871 of the Internal Revenue Code of 1954.

(b) APPLICATION PROCEDURE.—In processing applications for the establishment of ports of entry pursuant to an Act entitled "An Act making appropriations for sundry civil expenses of the Government for the fiscal year ending June thirtieth, nineteen hundred and fifteen, and for other purposes," approved August 1, 1914 (38 Stat.

609), the Secretary of the Treasury shall consider on a priority basis and expedite, to the maximum extent possible, the processing of any application involving the establishment of a port of entry which is necessary to permit the establishment of a foreign-trade zone within an enterprise zone.

(c) APPLICATION EVALUATION.—In evaluating applications for the establishment of foreign-trade zones and ports of entry in connection with enterprise zones, the Foreign-Trade Zone Board and the Secretary of Treasury shall approve the applications to the maximum extent practicable, consistent with their respective statutory responsibilities.

Mr. ERLENBORN (during the reading). Mr. Speaker, I ask unanimous consent that the motion to recommit be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

POINT OF ORDER

Mr. HAWKINS. Mr. Speaker, I raise a point of order on the motion to recommit.

The SPEAKER. The gentleman will state his point of order.

Mr. HAWKINS. Mr. Speaker, my point of order is on the grounds that the motion to recommit contains language of a tax bill which cannot be put on a nontax bill; and, second, the amendment is not germane to the bill under consideration.

The SPEAKER. The Chair recognizes the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Speaker, the gentleman from California (Mr. HAWKINS) is correct in that there is language relative to tax law in the motion to recommit. I submit that the purpose of the motion to recommit and the purpose of the amendment would be to enact the enterprise zone proposal that has been supported very broadly in both Houses of the Congress, and that it would reduce unemployment in the communities across the country where we have high levels of unemployment, though I admit it would do so in a somewhat different manner. It would do so through tax incentives and the creation of real meaningful jobs in the private sector rather than public service type jobs.

Mr. Speaker, I hope it would be considered germane since the purposes are the same. We just have a better way of doing it.

The SPEAKER. The Chair is ready to rule.

It is very obvious to the Chair that the motion to recommit offered by the gentleman from Illinois (Mr. ERLENBORN) is not germane. This is a tax amendment, and the Committee on Education and Labor has no jurisdiction over it.

So the point of order is well taken under clause 7 rule XVI and under clause 5(b) rule XXI, and the point of order is sustained.

Mr. ERLENBORN. Mr. Speaker, I do have another motion to recommit at the desk, and I offer that motion to recommit.

The SPEAKER. Is the gentleman still opposed to the bill?

Mr. ERLENBORN. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ERLENBORN moves to recommit the bill, H.R. 1036, to the Committee on Education and Labor.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 246, nays 178, not voting 9, as follows:

NOT VOTING—9

Bonker	Gramm	Marlenee
Dingell	Heftel	Pritchard
Ford (TN)	Lundine	Roth

□ 1820

Mr. CRAIG changed his vote from "yea" to "nay."

Mr. STOKES changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Mr. Chairman, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. It there objection to the request of the gentleman from California?

There was no objection.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 1036, COMMUNITY RENEWAL EMPLOYMENT ACT

Mr. HAWKINS, Mr. Speaker, I ask unanimous consent that, in the engrossment of the bill, the clerk be authorized to correct section numbers, punctuation, and cross references and to make such other technical and conforming changes as may be necessary to reflect the actions of the House in amending the bill, H.R. 1036.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON ENVIRONMENT, ENERGY, AND NATURAL RESOURCES OF COMMITTEE ON GOVERNMENT OPERATIONS TO SIT TOMORROW, SEPTEMBER 22, 1983, DURING 5-MINUTE RULE

Mr. SYNAR. Mr. Speaker, I ask unanimous consent that the Subcommittee on Environment, Energy, and Natural Resources of the Committee on Government Operations be permitted to sit while the House is reading for amendment under the 5-minute rule on Thursday, September 22, 1983.

The minority has been advised of this request, and I understand they have no objection.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

GROSS INSENSITIVITY OF SECRETARY WATT

(Mr. COELHO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COELHO. Mr. Speaker, today I have sent the following letter to the President of the United States:

DEAR MR. PRESIDENT: I have been dismayed over the actions and statements of your Interior Secretary, James Watt, on many occasions. But I have never been so thoroughly disgusted and appalled as I am today.

During a speech today to trade representatives at the United States Chamber of Commerce, Mr. Watt reportedly said that he has a commission to advise him on coal leasing consisting of, and I quote, "a black, a woman, two Jews, and a cripple."

According to United Press International, his remark drew laughter from the audience. When one member of the group asked the Secretary whether he thought the comment was ill-advised, Mr. Watt told him that his question "shows that you do not have the ability to laugh at yourself".

As one of Mr. Watt's so-called "cripples", I do not think Mr. Watt's comment was funny. And I am not laughing.

Along with two million other Americans, I have epilepsy. I do not appreciate being called a "cripple", and I seriously doubt many of the 25,000 paralyzed American veterans who were handicapped while defending our country do either.

In fact, I do not think you will find any of the 35 million Americans who have some type of handicap very amused over Mr. Watt's gross insensitivity.

Mr. President, handicapped Americans have been struggling for years to overcome the mistaken impression that our respective conditions amount to being "crippled." It does not do our cause any good whatsoever when a high-ranking government official like Mr. Watt makes such a derogatory remark. Mr. Watt's sick humor only reinforces the widely held belief that your administration is insensitive towards minority groups, women, and others. His cavalier attitude is an embarrassment to you and to the entire country. I am writing to you today instead of Mr. Watt because he has proven himself incapable of comprehending such criticism. Moreover, as President of all Americans I believe you should rebuke him publicly for making such a callous statement.

Sincerely,

TONY COELHO.

HOUR OF MEETING ON TOMORROW

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 11 a.m. tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

TRIBUTE TO GEORGIA MAE EVANS WHITNEY

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, I speak today in tribute to a longtime friend of mine, Mrs. Georgia Mae Evans Whitney, who died unexpectedly at her home in Hopkinsville, Ky., on August 12 at the age of 68.

Mrs. Whitney was born in Hopkinsville on October 22, 1914, the daughter of the late George and Lucy Brewer Evans.

Georgia Mae Whitney had been a teacher with the Christian County School System for 43 years, teaching all grades, and was a member of the Kentucky Retired Teachers' Association when she died. Education meant a great deal to Georgia Mae and her family. Her husband, Francis E. Whitney, graduated from Kentucky State College with a B.S. degree in 1937 and did postgraduate study in accounting at Indiana University. Their only child, Gladys Ann Whitney Sivils of Hopkinsville, is a teacher in the Lacy Elementary School, Christian County.

Mrs. Whitney, along with her family, was active in the Virginia Street Baptist Church of Hopkinsville, and she was a member of its 50-year club. She was also a member of Beta Rho Omega Chapter of Alpha Kappa Alpha sorority, the Virginians Choir and the Pioneers Club Auxiliary.

Georgia Mae and F. E. Whitney have been leaders among the black community for many years. Her husband, F. E., is a Christian County magistrate and former Hopkinsville City councilman. He is a realtor who built the Gladys-Gail Village, the first subdivision developed by blacks and which set a new trend in housing for blacks. Georgia Mae was constantly by his side, and she will long be remembered as a civic leader, beloved by all who knew her.

In addition to her husband, F. E., and her daughter, Gladys Ann, Mrs. Whitney is survived by three sisters, Annie Mae Harvey of Chicago, Ill., Augusta Brewer of Hopkinsville, and Toni Buckner of Louisville. One of her cousins, Ping Brooks, works in my Hopkinsville district office. I extended my sympathy to the survivors and friends of this lovely woman, who was admired and respected by the entire Hopkinsville community.

TRIBUTE TO CARLISLE RUNGE

(Mr. KASTENMEIER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KASTENMEIER. Mr. Speaker, it is my sad duty to announce the passing of a distinguished citizen from

Wisconsin, Carlisle Runge, who served with great distinction as Assistant Secretary of Defense for Manpower under President Kennedy.

Carlisle Runge began a 40-year career of service to the Nation and the State of Wisconsin when he joined the U.S. Army in 1942. He served with the 3d Army in Europe and was discharged as a major in 1946.

After he received his law degree from the University of Wisconsin, Carlisle Runge spent 3 years as assistant U.S. attorney for Wisconsin's Western District. In 1951, he began his association with the University of Wisconsin Law School as assistant dean and director of the National Securities Study Group.

When he left the Department of Defense, Carlisle Runge returned to the University of Wisconsin as a professor of law. He was active in regional planning and environmental studies, serving as the director of the Center for the Study of Public Policy and Administration, chairman of the urban and regional planning department and chairman of the Institute for Environmental Studies. He also was staff director for the State of Wisconsin Coordinating Committee for Higher Education and was a member of the Wisconsin Water Resources Council. In addition, he served as a member of the City of Madison Planning Commission.

Carlisle Runge was a supporter of a strong military and he was associated with the State of Wisconsin National Guard and the University of Wisconsin ROTC. He was a close friend to the late Senator Henry Jackson.

Carlisle Runge was an extremely competent administrator, a distinguished academician, well liked and respected, a friend and constituent. I extend my sympathy to his wife, Eleanor, and his family.

Mr. OBERSTAR. Mr. Speaker, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Speaker, I am shocked by the news that the gentleman has just announced.

I have known Carlisle Runge for almost 20 years and join the gentleman in expressing my sorrow to his family over the loss of this very distinguished scholar, brilliant mind, very original mind, one from which I have benefited personally, and my predecessor, John Blatnik, a close friend of Carlisle's as well.

I thank the gentleman for taking the well at this time. I join in shock and sorrow on his statement.

THE CENTENARY OF CONGREGATION CHISUK EMUNA OF HARRISBURG, PA.

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GEKAS. Mr. Speaker, every community in our district takes great pride, I know, in the religious institutions that abound therein. Such an institution exists in my home community in Harrisburg, Pa., which community is celebrating its 100th anniversary this coming week. I would like to extend the personal commendation of the House of Representatives to that congregation, and to insert into the RECORD a history of the Chisuk Emuna Congregation of Harrisburg.

THE CENTENARY OF CONGREGATION CHISUK EMUNA OF HARRISBURG

1983 marks the 100th anniversary of the founding of Congregation Chisuk Emuna in Harrisburg, Pa. Founded by a small group of immigrants from Lithuania Chisuk Emuna, which means Shield of Faith, was the first Orthodox Jewish Congregation in Pennsylvania's capitol city. The founders of the synagogue were impoverished immigrants, knowing almost no English and having no real skills with which to make a living in America. They came to Harrisburg by accident, following friends and relatives who settled there by chance. They were fleeing the Russian Empire, which following a Czarist edict in 1881, had decided to reduce still further the areas of the Empire in which Jews were permitted to live. This act made physical survival for Jews virtually impossible. As an advisor to the Czar later said, the plan was to have one-third of all Jews convert, one-third emigrate, and one-third starve. Not at all successful in the first part of their plan, almost successful in the third, they achieved overwhelming success in forcing Jewish emigration. Congregation Chisuk Emuna stands as a monument to the strength of Russian antisemitism.

The founders made their living as peddlers and junk-dealers. Still barely able to support themselves and their families, they nonetheless felt a need for a place in which to pray as their ancestors had. First meeting in the homes of various members, the Congregation moved in due course into its own simple building, located on Filbert Street, in the center of what was becoming a Jewish neighborhood, poor but dynamic.

With hard work and American opportunities, the Congregants slowly prospered. The peddlers who arrived first opened small peddler supply shops, selling goods to other Jews who, arriving still more recently, travelled the countryside of Pennsylvania selling to farmers. These peddler-supply stores became the nucleus of other, grander businesses, and the simple peddlars became wholesalers, merchants, and importers, catering to the needs of their community. Similarly, the junkdealers, became scrap metal suppliers, and, with the fortunate location of Harrisburg at the juncture of several eastern rail-lines, made the city into the national center of scrap metal distribution during the first world war.

Prosperity created a need for a more impressive and capacious structure, and the Congregation moved from its simple quarters on Filbert Street to a large and imposing structure on 6th and Forster Street. It was in this building that the Congregation and Harrisburg's Jewish community matured, accustomed themselves to American life, and weathered the joys and hardships of American history. The Congregation grew and prospered during the 1920s. The 1930s brought hardship and threatened the survival of the Congregation, but through sacrifice and cooperation, it endured. During the 1940s, Chisuk Emma sent its sons and daughters off to war, where they represented the Congregation in every theater and in every service. Symbolic of the Congregation's commitment to America, was the death of its Rabbi's son, 1st Lt. Aaron Etter, who in 1944, was killed navigating a bomber in action.

The end of the war brought many changes to Harrisburg and Chisuk Emma. The old Jewish neighborhood was left behind as the children of impoverished immigrants prospered and moved to the suburbs. In 1956, the Congregation left its old building, and moved to its present building on Division and 5th Streets. Symbolic of changing times, the Congregation also left behind its Orthodox beginnings, and joined the conservative United Synagogues of America.

Chisuk Emma is today a large, growing and dynamic Congregation. Under the leadership of Rabbi Asher Ostrin, Cantor Phillip Wittlin, and President Ormond Urie, the Congregation completed in this, its centenary year, the construction of an addition to its building. This addition symbolizes the nature of Chisuk Emma: rooted in the ancient traditions of the Jewish people, but aware of the changing needs of Jews and of the community in which they live.

□ 1830

ACTION BY COMMITTEE ON APPROPRIATIONS CONCERNING TROOPS IN LEBANON

The SPEAKER pro tempore (Mr. KOGOVSEK). Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 60 minutes.

Mr. ALEXANDER. Mr. Speaker, this afternoon, late, the House Appropriations Committee, on a show of hands, voted for an amendment offered by the gentleman from Maryland (Mr. LONG) to cut off the funds for U.S. forces in Lebanon unless the President of the United States reports to Congress under the War Powers Act within 60 days.

While this action is merely a vote of one committee, and is far from final, I take this opportunity to advise the body of this action because it is a clear message to the President of the United States of the deep concern of the Members of this Congress and of the American people, that we expect him to come to this Congress and report to it on his policies in Lebanon and the reasons that our marines continue to be stationed there. The mandate of public accountability by the President for his policies are all within the provisions of the War Powers Act, adopted in 1973.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Mississippi.

Mr. LOTT. I thank the gentleman for yielding. I would like to inquire: Is the gentleman speaking on behalf of

the Democratic leadership, since I know the gentleman is the chief deputy whip, and as the gentleman makes this announcement, is this a leadership announcement?

Mr. ALEXANDER. No; I am speaking tonight as a Member of Congress who, like the gentleman from Mississippi, is deeply concerned about the course of events in the Middle East. I am here to report on the actions of the Appropriations Committee.

Mr. LOTT. If the gentleman would yield further, this action was taken this afternoon by the Appropriations Committee while working on the continuing resolution; is that correct?

Mr. ALEXANDER. That is correct.

Mr. LOTT. And this action was taken while, as a matter of fact, the Foreign Affairs Committee is this very day having hearings on a bipartisan resolution that had been agreed to by the leadership, both Republican and Democrat, and the administration; is that a fact?

Mr. ALEXANDER. As the gentleman knows, most of the actions that this body takes are bipartisan.

Mr. LOTT. I just have to say that I question seriously the judgment of the Appropriations Committee acting in this way on a continuing resolution while there is a pending resolution before an appropriation committee, the Foreign Affairs Committee, which has not even had time to consider this resolution. Now we have on a continuing resolution an amendment offered and adopted by one vote that undermines the whole process that so many people have been trying to work hard to put together.

I may agree with some of the sentiments behind it, but I think that the Appropriations Committee really needs to take another look at what they have done in view of the process that is already underway.

Mr. ALEXANDER. Of course, the gentleman will have an opportunity, either under the resolution which is proposed as a bipartisan compromise or during debate on the continuing resolution, to express his concerns. I am merely taking this time to report this action to the House. I do think this action reflects concern which is broadly based in this body on the question of U.S. forces in Lebanon. Futhermore, I believe it is a clear message to the President that he is obligated by law to publicly clarify his intentions in Lebanon.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I am glad that the gentleman took this opportunity to bring to the attention of the House and the country the actions of the Appropriations Committee regarding the U.S. military presence in Lebanon. The fact that it was done by the Appropriations Committee is also a commentary on the manner in which the matter now pending before the Foreign Affairs Committee, was arrived at.

The American people today still do not have any clear idea as to why the Marines are in Lebanon today or what the administration's policy is with respect to keeping them there or what policies they are to serve or how long or under what conditions they are going to remain there.

It seems to me that, with this escalation that is going on, we not only are entitled to have the War Powers Act complied with, which is all that the amendment to the appropriations bill does, but we are also entitled, and so are the American people entitled, to have the administration come before the country and Congress and explain to us why we should take this serious step of approving the continuation of U.S. Marines in that dangerous situation.

When the President wanted to send more advisers and have more aid for Central America, he came before a joint session of the Congress of the United States to give his reasons. Yet we see American marines being killed in Lebanon and the battle escalating every day, and all we have so far is a backroom deal, which, after it was all put together, the Speaker of the House was asked to bless, with the implied threat that, if he does not, we will be charged with undermining the objectives of the administration in Lebanon, whatever they may be.

We still do not know what they are.

So I would suggest that the action of the Appropriations Committee was appropriate. Maybe that is the best way to get the whole matter before us.

The purpose of the War Powers Act was to require the administration to come before the Congress just as this amendment would require.

It seems to me that before that is done—before we get that kind of explanation—we are under no obligation to take any action to support the continued presence of marines in Lebanon.

The Congress was not consulted when they were sent there and we have so far been given no official explanation as to why they should remain there.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I will recognize everyone standing but I first must yield to the majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. I appreciate my friends yielding.

I ask my very good and valued friend (Mr. ALEXANDER) to yield for purposes of clarification.

Did I understand the gentlemen to say that the Appropriations Committee has just acted to take it upon itself to invoke the War Powers Act of its own volition, and to deny any funds for the support of the U.S. forces in Lebanon until such time as the President were to take certain actions?

Mr. ALEXANDER. If the gentleman will allow me to state what happened again: During the consideration by the House Appropriations Committee on the continuing resolution for fiscal year 1984, on an amendment offered by the gentleman from Maryland (Mr. LONG) the committee voted in support of that amendment which states that the funds for U.S. forces stationed in Lebanon shall be cut off unless the President states to the Congress within 60 days, under the War Powers Act, his policy and the reasons for them being there.

Mr. WRIGHT. I appreciate the gentleman's clarification. It is as I understood him to describe it.

I surely do not want to be in a position of preemptorily disagreeing with or criticizing an action taken by the Appropriations Committee, but I wonder if the gentleman and his committee colleagues have considered that somewhat preemptory unilateral action on the part of the Appropriations Committee in light of the clear and altogether unambiguous instructions of the war powers resolution which on its face places the specific responsibility and authority for the reporting of such a resolution in the hands of the House Committee on Foreign Affairs.

□ 1840

And I wonder if the gentleman is aware that the committee so designated in the act is in the process of performing the function that has been placed upon its shoulders and is currently preparing for presentation, according to the clear mandates of the act, a resolution to the Congress for its action? Further, I wonder if orderly procedure under the House rules would not properly contemplate a final disposition of that resolution prior to implementing action by the appropriations process? I wonder if the gentleman considered that and if the members of the Committee on Appropriations considered this ongoing process mandated under the war powers resolution when they were taking the action he has just described?

Mr. ALEXANDER. In responding to the gentleman's inquiry, I think the vote by the Committee on Appropriations says two things. I think it says that, one, this body and Members of this body will take any opportunity that is presented to it to express their deep concern about the President's policy in Lebanon and that they will use any opportunity that they can avail themselves of in order to make that expression of concern.

As we know there are many roads to this well, and many opportunities which can lead to this forum for debating important issues which are before the U.S. Congress and are of concern to the American people.

Second, I think it was intended to send a clear message to the President of that deep concern, although it may have been precipitous.

Mr. WRIGHT. If my friend will yield further, again in the spirit of gentle debate and restrained commentary, I wonder if he would permit me to recite from the war powers resolution certain salient provisions.

Mr. ALEXANDER. I yield to the gentleman such time as he may consume.

Mr. WRIGHT. I thank the gentleman for yielding.

Section 4 of the war powers resolution as adopted on November 7, 1973 provides that "in the absence of a declaration of war in any case in which U.S. Armed Forces are introduced into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances * * * the President shall submit within 48 hours * * * a report in writing" in which he sets forth certain things.

It is further provided under section 5 that "within 60 calendar days after a report is submitted, or is required to be submitted pursuant to section 4(a)(1), whichever is earlier, the President shall terminate any use of U.S. Armed Forces * * * unless the Congress had declared war or has enacted a specific authorization for such use of U.S. Armed Forces."

I believe it is clear, by most common understanding of the language, that on August 29 when two American marines were killed and others wounded by hostile fire power, the conditions invoked under section 4(a)(1) came into being, in that our forces most clearly were subjected to hostilities and further were in situations where imminent involvement in hostilities clearly was indicated by circumstances.

Therefore it seems to me that section 5 was triggered. The law requires certain actions within 60 calendar days after the report is submitted "or required to be submitted." In this case the report was not submitted to that effect by the President, but I believe most of us would conclude that it was required to be submitted. Within that 60-day period under the law, the President is obliged to terminate any use of our Armed Forces unless Congress has declared war or enacted a specific authorization.

Now the law mentions an "authorization," and I suggest that the use of that term was deliberate, because in section 6 it goes forward to specify the precise type of action which the Congress shall take in such event.

Any joint resolution or bill introduced pursuant to section 5(b) at least 30 calendar days before the expiration of the 60-day period "shall be referred to the Committee on Foreign Affairs of the House of Representatives or the Committee on Foreign Relations of the Senate."

Now if we project 60 days beyond 48 hours after August 29 on which date, I believe, most of us by common interpretation of the English language would conclude that the War Powers Act was in effect, we would come, perhaps, to the 30th day of October.

It is further provided in the War Powers Act, that "such committee shall report one such joint resolution or bill," and that refers to the Committee on Foreign Affairs, "together with its recommendations not later than 24 calendar days before the expiration of the 60-day period."

If my mental arithmetic has correctly identified the date on which the 60 days would expire, then the law requires the Committee on Foreign Affairs to submit to the House not later than on or about October 6, one joint resolution, and it declares that the resolution shall become the pending business of the House and shall be voted on within 3 calendar days.

Therefore, given the very precise and unambiguous nature of the war powers resolution itself, I am simply wondering aloud if it might not be wise for the Committee on Appropriations to hold off, just for the time being, and give the committee of jurisdiction named in the war powers resolution an opportunity to perform the duties that have been imposed upon it by the law?

Mr. ALEXANDER. As I stated earlier, I want to thank the gentleman from Texas for his contribution, for his explanation of the War Powers Act.

As always, he enlightens those of us who have the opportunity and privilege to engage in discussion, dialog, colloquy, and debate with him.

And I believe the American people have likewise benefited from just these very few short exchanges that we have had this evening.

Several of the gentlemen who were in the Chamber were on their feet and I certainly would wish to recognize them.

First, I yield to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. I thank the gentleman for yielding.

Mr. Speaker, I thank the gentleman for bringing this issue here, but I would also want to indicate a little bit of concern from a Member who is terribly confused about not only the procedural issues under the War Powers Act but the substantive issues.

How do we pull our troops out of Lebanon? And how do we do it in a responsible way? I guess what concerns me is the mixed messages happening here. The chairman of the Subcommittee on Appropriations has one answer so to speak and is sending one message; the President of the United States with an agreement by the Speaker of the House, leader of my party, is sending another message. The messages are mixed, but the goals may be the same. I guess it concerns me that from the standpoint of trying to deal with this in a rational way we may have these messages crossing each other into the night.

I guess I would make the point that a lot of Members in this House are both unsure on the procedure and substance of the issue of Lebanon and hope that all of this does not confuse the matter further, especially to the American people.

□ 1850

Mr. ALEXANDER. I thank the gentleman from Kansas.

Mr. Speaker, I yield to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Speaker, I tell my colleagues on this side of the aisle they have no monopoly on the confusion on this issue. And certainly the question of concern that the American people know with clarity the policies of this administration are shared by all Members of this House.

I would like to say that in conversations I have had with the White House in the last 2 hours on this very subject the response was that the President will be addressing the United Nations on Monday and that there will be several other opportunities between now and the time this body votes on any war powers resolution, which will be the latter part of next week, for this clarification to be broadly known to the American people as well as to ourselves.

I thank the gentleman.

Mr. RAHALL. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from West Virginia.

Mr. RAHALL. I thank the gentleman for yielding.

Mr. Speaker, I want to comment on the remarks of the majority leader who read from the War Powers Act.

Regardless of one's position on whether he feels the War Powers Act should be invoked or not, or whether the President is abiding by the law, I think it is important that if we are calling and asking for the President to abide by the war powers law, that we in the Congress abide by that law also.

And what the majority leader has brought out is the fact that the Foreign Relations Committee is the appropriate committee, and in order to not further confuse the American people, in order to not confuse our marines, who are stationed in Lebanon, in order not to confuse our allies that

help make up the multinational peacekeeping force, I think it is important that we in the Congress keep it as simple and as clear cut as we possibly can.

Yes; I happen to feel that the War Powers Act should be invoked. And the law should be abided by. But I also think that the action that the majority whip has reported to the body this evening does send a confusing signal to our marines in Beirut and I would think that it just further adds to their frustration in not knowing fully themselves what perhaps their mission is, their frustration in seeing bombs that land all around them and not being able to respond in a manner that they think they should be able to respond. And this action being reported worldwide today, more than likely, is only going to further frustrate our men who are trying to serve our country under the most difficult and complex of circumstances in that part of the world.

Mr. ALEXANDER. I thank the gentleman from West Virginia (Mr. RAHALL), whom I know has visited the area numerous times and is well versed, not only on the questions of policy involved, but also on the facts and circumstances that exist within that area.

Mr. KEMP. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman for yielding.

Mr. Speaker, I was not here on the floor to hear his original statement, nor was I here to hear the remarks of the gentleman from Texas (Mr. WRIGHT). I understand that the majority leader, in a very prudent way, suggested that he hoped that the law would be complied with and I know it is the gentleman's hope that that is the case.

As one who argued in the Appropriations Committee in opposition to the Long amendment, I just want to say that I appreciated the previous speaker's comments, as well as those of the gentleman from Kansas even earlier, as to the confusion that must be reigning internationally at this point, not just regarding what that signal means to the safety of our own marines, I might say to my friend, but what it says to our allies, the British and the French and the Italians, who have a stake in this issue, and have committed even more troops than the United States.

I want to say to my friend that I recognize, as many do, that the Congress and the President must be in concert with regard to foreign policy. You cannot have a foreign policy without the Congress and vice versa.

So in that regard the gentleman's comments were right on target. However, as the gentleman from Texas pointed out, the law requires certain procedures, and I must say to my friend from Arkansas that I felt very bad down there in the Appropriations Committee when this passed over the objections of the minority and some members of the majority—I am sorry we did not get more than a voice vote. I think we should have had it on record, because I do not think it is the type of action that is consistent with a bipartisan foreign policy.

Let me make one other point, and the gentleman has been very generous and I appreciate that very much.

Not only are the signals confusing to our allies, but we are sending precisely the wrong signals to the other side. Everybody knows, liberal, conservative, Republican, Democrat, American and non-American, that Syria has a goal of forcing the United States to withdraw its support for a sovereign and independent Lebanese Government, a government headed by a legitimately elected President, Amin Gemayel, a government consisting of all the diverse elements of Lebanese society—Christian and Moslem. And the Soviet Union, of course, wants to force its way back into a position of influence in the Middle East. They are using the Syrians as surrogates, and the Syrians are using the Druze as surrogates.

The signals being sent are going to tend to encourage intransigence. We all want a negotiated solution to this crisis, but if we look like we are going to pull out, the Syrians are not going to come to the table to talk seriously. They are going to keep the pressure on militarily and seek a military solution. If we show unified resolve, then there is a chance for peace instead of tragedy in Lebanon.

For this reason, let me just say to my colleagues, the few who are here, and thanks for being here at this very important moment, I think the action was a mistake, I think it is a bad signal. It is a bad signal to the Syrians. I think it is an even worse signal to the Soviets. And I am deeply disturbed about its implications at this moment when this administration, and in this case it operates for all Americans, is trying to negotiate a cease-fire to bring about some modus vivendi in the Middle East that would allow the Druze and the Shiites and the Moslems and the Christians and the various elements that are part of this mix, to work out a reconciliation, to work out a political solution. And I might also commend this administration for doing its best to protect our marines. None of us wants to see the marines put in a position where they are simply targets for incoming artillery. They should be supported, and I am glad to see the President taking more steps in this direction.

The gentleman has been very generous, I appreciate that. It is typical of his approach to politics. But I wanted to register my concern. I had to say that I think it is a terrible mistake irrespective of the issues that the gentleman has raised.

Mr. ALEXANDER. That is why we are here.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding.

I thought that the majority leader made a very good point about following the War Powers Act procedure. However, I think it is important that the administration be reminded that, if the President chooses to ignore the War Powers Act, the Congress has other means at its disposal to see that the question of what our policy should be in a matter as serious as the Lebanon crisis is laid before the country and the Congress for a decision.

The failure to follow the War Powers Act started in the White House, when the President declined to acknowledge that the War Powers Act had been triggered when the U.S. marines had been attacked in Lebanon.

Perhaps the Appropriations Committee might do well to reflect on its action and reconsider it in the light of whatever plans are being made for bringing up the resolution and what conditions it is going to be brought up under—that is the resolution coming out of the Foreign Affairs Committee. However, even if it is reconsidered, it was a very constructive thing to remind the President that the War Powers Act is not something that is taken lightly by the Congress, furthermore the country has generally accepted the principle that is behind it. Surely, if we are going to follow the War Powers Act procedure, then that must apply to all branches of the Government and not merely to the House of Representatives.

Mr. KEMP. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from New York.

Mr. KEMP. In response—not antagonistically—but just in response to the gentleman from Ohio, the problem with putting a 30-day timeframe or a 60-day timeframe or putting time certain or date certain on this issue is that it encourages the obstinacy of the other side. It is going to encourage the Syrians to hold out and to continue this terrible violence for their own purposes.

Not only would they be more intransigent at the diplomatic level, but they could very well pick and choose the times in which they want to launch attacks against our marines and ultimately force upon this country a devastating political situation—not only if we lost more marines, which would be

a tragedy—no one needs to stand up and say they want to defend those lives, all of us do but a situation where the United States could lose all credibility as an important player in the Middle East, and indeed, around the world. I am concerned that the Syrians will be encouraged to hold out for 60 more days, I would say to my friend from Ohio and Arkansas, and keep this terrible caldron of violence boiling.

□ 1900

Mr. ALEXANDER. Does the gentleman from Ohio, Mr. SEIBERLING, wish to respond?

Mr. SEIBERLING. I would like to respond just briefly.

I think the gentleman makes a very good point. I do not think we want to convey that kind of a message.

But I am disturbed about two things, besides not having a clear picture as to just what our policy is and why the troops are there. First, I am concerned about the fact that it has been said that the deal that was worked out which led to resolution before the Foreign Affairs Committee is that if it is passed by both Houses, the President will sign it; but then he will make a statement that nevertheless he does not agree that the War Powers Act applies.

I think that would be a shabby way to treat the Congress of the United States and an important law that is on the books—a law, incidentally, that no court has held to be invalid.

And, second, let us suppose the House should adopt an amendment to the resolution, let us say, changing the period from 18 months to 12 months. I am told that 12 months would probably be adequate but 18 months was agreed to so that if it had to be extended, it would not come up just before the next Presidential election. My reaction to that is that, in a democracy, what could be better than to have an important decision like that come before the Congress just before the next election?

If the Congress should decide to amend the resolution in some major respect, it may well be that the President will then say, "Well, since they changed what we agreed to over in the White House, we are now not going to support the resolution." For that reason, I think we have to make it absolutely clear to the people in the administration, particularly the State Department, that the Congress has other means of enforcing its will, and that is what the Appropriations Committee's action today has done.

Mr. KEMP. If I could just take one more second—the gentleman has been very generous with yielding the time—I do not think there is anybody in this body who does not recognize that the U.S. Congress has a very key role, that you cannot finance any activity without the U.S. Congress. One of the biggest myths of all time, I would say to my colleagues who are still here, is that the Vietnam war was conducted surreptitiously by the President. There were 175 separate votes on appropriations from day one until they decided to cut it off. Congress has the greatest constitutional power that any legislative body has ever had on the face of the Earth—the power of the purse.

I think the President, I would say to my colleague, the gentleman from Ohio, knows full well the implications of having to work with the Congress. I do not want to just stand up here and defend everything that has happened in the Middle East, because there are some things with which I disagree. I think we treated Israel shabbily when they were negotiating their original agreement, with Lebanon. First, we pressured Israel to withdraw its forces. At the time we promised them that Syria would withdraw, too, which was foolish. Then we came back and started asking them to stay. All those months we leaned on Israel to get out and now we are doing everything we can to get them back. But irrespective of that, the President has dealt with Congress. The gentleman knows, as do I, that he has been talking to the Speaker, he has been talking to the majority leader, he has been talking to the House and the Senate. There is communication. It may not be strictly according to the agenda of the gentleman from Ohio, but he is quite aware of the extensive communication. I do not think the President has treated the Congress in a shabby nature. He has been wrestling with the problem of how to deal with an act that has been called into question—not by this President nor by the Congress, but by the Supreme Court, in some instances. But there has been communication.

Again, you do not have to agree with the policy to recognize that the President and the administration are attempting to communicate with this Congress. The majority leader spoke about it and the Speaker has, as well, and I do not think it should be called shabby. I think it was candid and open, and, irrespective of our differences, let us not let this deteriorate. I think our country should speak with one voice. Unfortunately, the Appropriations Committee today sent a very bad signal, I think, to that part of the world, to our allies, the French, British, and Italians, to be Gemayel government, which we have pledged to support and which looks to us for support, to the Syrians, and to the Soviets, who would like nothing better than for us to withdraw.

Mr. ALEXANDER. I think the gentleman from New York sums it up very well when he says that it was the intent of the Appropriations Committee to send a message.

It is not a simple issue. It is a confusing issue. It is one that will not be easily resolved. There is no intent by anyone to circumvent the law or usurp the jurisdiction of any committee of this House. But more than anything else, as the gentleman states, it is a message to the President of the United States that he must be accountable for his policies under the War Powers Act.

I see my friend, the other gentleman from New York, Mr. GILMAN, has been on his feet patiently, and I yield to the gentleman.

Mr. GILMAN. Mr. Speaker, I do thank the gentleman for raising the issue on the floor at this time. There is no question that there is a great deal of confusion with regard to the Lebanese crisis. It is a very confusing internal problem in Lebanon. It is a confusing problem for the multinational forces. It is certainly confusing for Members of Congress and for our entire Nation.

I would call my colleagues' attention to a very thoughtful analysis presented by the Secretary of State today before the House Foreign Affairs Committee of our policy considerations in Lebanon and where we intend to go with regard to our objectives in that region.

I hope to put that entire speech in the RECORD tomorrow, and I would hope that my colleagues in the Congress would review the analysis of the Secretary of State of the problem.

I would also like to call to the attention of my colleagues the fact that the House Foreign Affairs Committee today started consideration of the War Powers Resolution, a resolution that has been worked on, as the distinguished majority leader has indicated and the preceding speaker has indicated, after a great deal of work with the House leadership on both sides of the aisle and with the administration, in trying to mold a resolution that would have strong bipartisan support. Hearings were started today with the Secretary of State and with General Kelly, the Commanding general of the Marine forces. We will continue work on that resolution tomorrow. Hopefully, there will be a markup tomorrow and, hopefully, that resolution will be before this entire body within the next few days.

So there is not any attempt to set aside from our responsibility in the war powers resolution, nor is there any attempt at this time by the administration to disregard its responsibility to consult with the Congress with regard to the war powers.

I would hope that there would be, when this measure comes to the floor, a strong bipartisan support for a very critical measure at a very critical time for the Middle East.

Mr. OTTINGER. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding, and I join in congratulating them for raising this very importantt issue before us at this time.

I would like to take strong issue with the statement of my colleague, the gentleman from New York (Mr. KEMP), that the action of the Appropriations Committee sends any kind of wrong message to the Syrians or the Russians or the others in the Middle East. The 60-day limitation in the War Powers Act does not cut off support for the troops unless the Congress fails to act in that period. The whole purpose of the War Powers Act is to assure that Congress had the opportunity to speak on this measure.

I think that there is no message here that we intend to withdraw the troops from Lebanon or that we do not intend to withdraw the troops from Lebanon. I think there is an expression that the President should report under the law as the law was written, and the President has declined to do that. So the Appropriations Committee is saying, "Well, we will not support additional funds, we will use the leverage that we have, the ultimate leverage, to require the President to report under the War Powers Act so Congress can make the consideration that was there contemplated."

□ 1910

There is no abdication of our support for the Marines. I think everybody supports the Marines. The question is how are we best going to pursue a policy in the Middle East that will protect those Marines and protect the interests of the United States.

Mr. ECKART. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Ohio.

Mr. ECKART. I thank the gentleman for yielding to me.

Mr. Speaker, several of the previous speakers have spoken of the messages that may be sent by the activities of the Committee on Appropriations today. I suggest that there probably are several different messages, several different types of messages.

One, of course, is as my colleague, the gentleman from New York (Mr. KEMP), referred to, a message to the Middle East. One is a message to the world at large, certainly a message to the participants, but perhaps we forget who sends us here. There is a message to the American people.

Foreign policy is doomed to failure if it does not enjoy the support of people at home. That is a message that has been lost on this administration; I submit to you a message that has been lost in the last five administrations here. We cannot have a successful foreign policy if it does not enjoy broad-based domestic support as well.

Thus, the actions of the Committee on Appropriations, putting aside the question of the debate of whether it was in the appropriate context of the law, comes down to people in the Congress saying much in the same way that Gen. George Patton said upon his first defeat of Field Marshal Erwin Rommel: "I read your book."

The Committee on Appropriations and some of us here on the floor of the House have quickly begun to realize that perhaps there is more than one way to skin a cat. Perhaps we have read your book. A tactic of adding extra language to appropriations bills, which has been used to successfully in the past by others to achieve their goals, either ought to be accepted or rejected as a tactic and not exclusively cited as good or bad depending on whether or not you happen to agree with the particular end being sought in the course of that legislative debate.

So to the extent that the Committee on Appropriations sent a message to the American people, they ought to be supported, they ought to be applauded. To the extent that I believe that this does not in any way divest from the Committee on Foreign Affairs, of which I once served as a member, of the primary jurisdiction, I think instead that it adds another stone to the mosaic of the debate that has to be heard.

I would think that the President would welcome this debate in every committee of relevance simply because his hand is strengthened, the position of the American people abroad, of the American country abroad, is enhanced and ultimately our foreign policy is more successful. It is more successful when the American people support, it is more successful when the Congress supports it, and whether or not we like it, each and every single one of us ought to avail ourselves of the opportunity such as was presented to the Committee on Appropriations today.

Mr. RAHALL. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from West Virginia.

Mr. RAHALL. I thank the gentleman for yielding.

Mr. Speaker, I think one further point should be added in my concern with the action of the House Committee on Appropriations today.

Besides the confusing signals that I mentioned earlier, I think it also could be interpreted in many of the press around the world that the action of the Congress—and that is how it will be viewed, as an action of the entire Congress—has pulled the rug out from under our marines in Beirut, and that is a signal that I hope does not get conveyed and does not cause further frustration among our marines stationed in that country.

I might add one further point in response to the concerns on the other side of the aisle that have been expressed about the 18-month limit that is contained in the so-called compromise that the House Committee on Foreign Affairs has considered today.

The concern was expressed and the implication was relayed that this 18-month time period would only allow the Syrians to further gather Soviet firepower and perhaps introduce more Soviet weapons into the area and cause more turmoil in an effort to wreck the government of the current President of Lebanon. That is a concern, but I think it is also very important to realize that those who today call for an immediate pullout of our marines in Lebanon, and there are those who are making that call, are saying that our marines are becoming involved in a civil war in Beirut, that we have injected American firepower into internal matters of another country.

I had a meeting this afternoon for about 2½ hours with the Lebanese Ambassador to the United States, and this concern was raised. He made it quite clear to us that what is going on in Lebanon today is not a civil war. Yes; there have been civil wars in the past, and as the gentleman from Arkansas said in his opening comments, it has been going on for hundreds of years, this factional fighting. But factions change in that part of the world. They change quickly, and events change quickly, as we all know too well.

I would submit that those who call for an immediate pullout of our marines today are also acting or shooting from the hip, and their call is the wrong signal and not an action that I think the Congress should accede to. But I think it is important to realize that if there is not a time limit placed—and I am not advocating one way or another at this point the 18-month limit—but I do fear that if time is allowed to go on, if we were to give the President a blank check, then the point could very well come in the future when our marines, when our American men in Lebanon, will be drawn into supporting one side or another.

Those who ask for a pullout today are saying that the American marines are siding with the Christian Falanage, much as Israel has done in the years past in trying to beat back the leftist militias and the Moslems that they claim are trying to overthrow the Lebanese Government. I do not think that is a correct interpretation of what our marines are doing that right now. I do not see them injecting themselves into a civil war, nor do I see them

siding with any particular faction in the country at this time.

But I do fear that if there is not some type of short time limit put on action that this Congress may take, that the time could come when those of the leftist leaning in Lebanon will indeed make every effort to draw our marines into one side of the war on the problems of that area, and that is when we will become involved more deeply than I think we should.

Mr. ALEXANDER. I thank the gentleman.

Mr. Speaker, I will conclude by observing that there is one thing that is unmistakable on the issue that confronts the Congress, the American people, and indeed all freedom-loving peoples around the world. And that is that this: while Congress will debate this issue on numerous occasions in the days and weeks ahead, the debate that originates here tonight is a clear message to the President of the United States.

If he hears that message, if he acts upon it, if he clarifies his policy in the Middle East, and more specifically in Lebanon, by reporting to the Congress and the American people within the framework of the War Powers Act, we will see the emergence of the bipartisan support so essential to any successful foreign policy. I can assure the President that it is that kind of leadership which will find broad-based favor and be widely supported by the Congress and by the American people.

□ 1920

THE ALTERNATIVE BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 30 minutes.

Mr. DANNEMEYER. Mr. Speaker, over the course of the past several months this Member from California has taken the well of the House in a series of special orders to bring to the Members' attention the significance of the huge and horrendous deficit that faces the Federal Government and our country as a result essentially of the Congress, this House of Representatives, failing to exercise the responsibility to cut the spending to meet the income available, which we should be doing.

Over the course of these last few weeks and months during which I have taken these special orders, I have had occasion to read into the record an alternative budget which this Member from California prepared and would have offered to the House for its consideration and a vote up or down in March of this year, but the Rules Committee refused to give me the opportunity to do so.

I will this evening conclude the series by making reference to some of the final categories in the 21 categories that comprise our Federal budget process. I have taken this course for the purpose of demonstrating to the Members that the recommended spending cuts that are contained in this alternative are not unreasonable. They are not irrational, and they are not irresponsible, and to those in this Chamber who feel that we cannot cut spending or who do not like the cuts that this Member from California is proposing, my response to them is: "If you don't like these, what are yours?"

I think we all have a responsibility to try to work toward resolving this financial fiscal mess in which we have collectively placed our country.

In response to a statement that was made in the other body about the ability of our economy to assimilate these $200 billion dificits in the Federal budget, this comment was made: "This economy will find a way to assimilate these deficits with no sweat." This is how one member of the Senate Budget Committee responded to the spectre of $1 trillion worth of deficits over the next 5 years. One of his colleagues, Senator BILL ARMSTRONG of Colorado, wrote to former Secretary of the Treasury William E. Simon to elicit his opinion on the relationship of deficits to the economy. In response, Secretary Simon quoted Nobel laureate Friedrich Hayek:

> The only way you can finance a deficit is by inflation. You cannot raise this amount of money by genuine borrowing. You borrow from the banks, which creates credit for the purpose. A large government deficit is a certain way to inflation.

Mr. Speaker, I wish to reiterate another point which Secretary Simon made, paraphrasing a former Presidential adviser: There ought to be two requirements before anyone could become a Congressman: First, he ought to have taken a basic economics course; second, he ought to have passed it.

Few things become as counterproductive as remedial measures which exist long after the problems they were implemented to solve. It is no surprise, then, the Government programs and agencies born of the Depression 50 years ago, with hundreds more heaped on top of them, have created a vast Federal meatgrinder which consumes the savings and earnings of our citizens. And with Government borrowing devouring virtually every penny of savings, sustained, noninflationary prosperity in the years ahead will become a dream further and further removed.

It is tragic, then, and indeed frustrating, that the response is more of the same. After all, deficit financing enables politicians to be all things to all people, to promise an endless array of humanitarian programs in order to insure their own reelection.

The great and sinister irony, of course, is that this deficit-induced inflation is the most destructive tax of all; it constitutes a cruel and inhumane attack on the poor because it means their tax dollars buy less while they are themselves pushed into higher tax brackets.

□ 1930

If we were really concerned about all of our citizens, we would lighten the burden which deficit spending imposes. Long ago we found a flower withering in arid soil. We gave it water so that it might survive and the faucet has been at full force ever since, drowning that flower. We need to let it breathe a little. We need to surmount our me, the people, attitude and break our addiction to remedial measures with their short-term analgesia and long-term destructiveness.

We need the long-term cure of excising our inflation fueling deficits by reducing Federal funding.

The Members may recall that of the 21 categories, I had worked through category 800. This evening I would like to begin with a category that is famous in our Federal system, category 850, providing "General Purpose Fiscal Assistance," sometimes called revenue sharing. If you can believe this, in 1984 it is projected that in the day of a $200 billion deficit, it is planned to expend $7 billion whereby Federal borrowing would take place in the credit markets and will send that money under the guise of revenue sharing to local jurisdictions in this country. The truth is, we do not have any revenue to share. We only have got a deficit, but it is in there.

This program that this Member from California has crafted would reduce that expenditure from $7 billion to $3.2 billion, which would result in a savings in this category of some $3.8 billion.

In category 852, these changes would be proposed: District of Columbia, capital projects, reduce funding to level proposed by the President; repayable advances to the District of Columbia, terminated in accordance with the President's proposal.

The next category is net interest, interest on the national debt, projected for 1984 at $96 billion. Members may say, "Well, how would you suggest that we could cut down that interest expense?"

This is a constructive alternative as to how we could significantly reduce the interest expense. During previous periods when U.S. currency was based on the gold standard, interest rates averaged 3.6 percent, from 1879 to 1932, and 2.9 percent from 1933 to 1970. A return to the gold standard would sharply lower and stabilize inflation, cause interest rates to decline by 4 to 6 percent and stimulate economic growth, real growth averaged 8.4 percent following the restoration

of the gold standard in 1897, all of which would result in lower deficits and improved economic conditions.

If we in this country would reinstate a gold backed covertible dollar, such as by a fixed date, say October 1, 1984, it would project a decline in interest rates to 6.5 percent from the current average of 11 percent, applied to the marketable debt which constitutes about 75 percent of the total debt, and roll over this lower rate in the out years.

This change in our monetary policy would result in at least a reduction in projected interest costs of $26.3 billion in fiscal year 1984.

In category 920, allowances, here in category 921 the following changes would take place, resulting in a savings of some $5.4 billion.

Coast Guard pay raises, civilian agencies pay raises. Impose a pay freeze in 1984. Total compensation in 1983 was $63.946 billion, and allow for a CPI-based COLA thereafter in the outyears.

Category 922: Termination of Davis-Bacon Act requirements. This relic from the depression has been rendered obsolete by minimum wage and employee protection laws and is counterproductive in that it merely serves to drive up Government costs. Reports critical of the necessity and effectiveness of the law have been issued by the General Accounting Office, the U.S. Commission on Government Procurement, the U.S. Commission on Federal Paperwork, and academically, by the Wharton School and the Massachusetts Institute of Technology.

It is recommended that we repeal the prevailing wage requirements; savings are estimated at $2 billion annually by the U.S. Chamber of Commerce.

Category 923: Acceleration of contracting-out. The Congressional Budget Office reports that significant Government-wide savings can be obtained by increased contracting-out of activities. This policy should be expanded where feasible and to a point where it does not become counterproductive; for example, when layoffs in the Federal work force and resultant costs significantly offset savings from contracting out.

We would recommend that we accelerate shift of activities from Federal in-house labor to the private sector.

Category 924: Undistributed debt collection. As of September 30, 1982, the Office of Management and Budget estimated that of $161 billion owed the Federal Government, mostly loans, $41 billion was delinquent. Recovery of just a small portion of this delinquent debt would result in significant savings in the budget. We could recover an additional 3.5 percent of delinquent debts of a $40 billion base through more vigilant enforcement of collection procedures that would bring in substantial sums. In this category, we estimate the savings at $5.4 billion.

Category 950: Undistributed offsetting receipts.

Category 951: Employer share, employee retirement; increase level of payments in accordance with the President's proposal.

Category 952: Rents and royalties on the Outer Continental Shelf; accelerate receipts to level proposed by the President and as part of the plan to lease the Outer Continental Shelf for the development of the oil and natural gas resources of our country.

Category 954: Federal surplus property disposition. Increase level of receipts in accordance with the President's proposal.

We estimate that in this category we can increase receipts by some $5.4 billion.

The last category is 999: Miscellaneous offsets. The CBO estimated as part of its baseline economic assumptions that we would experience a 2-percent average growth in 1983; an assessment of various recent economic forecasts indicate that an annual rate, for calendar year 1983, of 3.7 percent is not unrealistic, which would result in a considerable increase in revenue in fiscal year 1984, with a rollover effect in outyears, as well as a modest decline in outlays Government-wide (CBO rule of thumb employed to project changes).

Lower oil prices. The price of oil, triggered by imports, affects budget outlays of several Federal programs, primarily indexed benefits, unemployment insurance, and interest costs; and to a somewhat lesser extent, revenues. Assumption of a $4 per barrel drop in oil prices, which to some degree has already materialized, will result in a reduction in the size of the deficit, a CBO projection.

These specific items total some $3 billion difference in the reduction of the deficit.

Then to sum up what this all adds to, the projected revenue for 1984 is some $692 billion. The CBO estimates a $653 billion base and with the additions that have been enumerated here, we would have $39 billion more, for a total of $692 billion of revenue in 1984.

We would reduce spending that has been enumerated over the course of the past several months by $94 billion, from $855 billion to $761 billion, which reduces the deficit from the projected $202 billion to $69 billion.

I would like to be able to stand here in the well of the House and tell my colleagues that as a result of this effort we can project a balanced budget in 1984. I no longer believe that we can balance the budget of this country by spending cuts alone. It is going to take more than that. It is going to take, not tax increases, but monetary reform so as to lay the foundation for economic recovery, meaning lower interest rates, real increase in our gross national product, without resulting in inflation.

□ 1940

That subject alone is time enough for a special order. And I think the debate on moving this country to the gold standard is going to have to be taken up time and time again.

Some Members may ask, well, what happended when you offered this proposal for reducing the deficit projected for 1984—what vote did you get on the floor of the House. And I can say to my colleagues in sadness we did not have a vote. Why did you not have a vote? Well, the Rules Committee in this House says that you may not offer this alternative proposal because we do not choose to make it in order. And when constituents say, when you go home, why in the world would somebody refuse to give you an opportunity for offering an alternative budget cutting spending by some $94 billion, why are you there, and the answer is, the only one I have been able to give, the leadership of this House in control of the Democratic Party does not want to have Members on record voting in favor or against cutting spending by $94 billion or anything close to it because they do not want to have to tell their constituents in November of 1984 when they campaign for reelection why they voted against cutting spending. That is the only answer I can give.

Now, I see several of my Democratic colleagues in the Chamber now. One of them took part in a special order last week, my colleague from California. Would he on behalf of his Democratic Party, since your party controls the Rules Committee by a 2-to-1 majority, would he care to give a response why this Member was denied the opportunity of offering this alternative budget on the floor of the House so we could vote as to why or if we are in favor of it.

I would be interested in the response.

I yield to my colleague (Mr. PANETTA).

Mr. PANETTA. If the gentleman would yield.

Obviously I am not going to speak on behalf of the Rules Committee. But I guess the question I would have to ask the gentleman is why he could not convince the leadership on his side of the aisle to in fact endorse your proposal because they did, in fact, have an opportunity to offer a substitute to the budget resolution.

Mr. DANNEMEYER. I can only say when I made this offer to the Rules Committee, one or more Members on the Republican side on the Rules Committee made the motion to make my alternative in order, and do you know that there was not one vote from

the Democrats on the Rules Committee, and your party controls it 2 to 1, to support my position. Can you explain to me why that would be?

Mr. PANETTA. I think you are going to have to ask those Members.

Mr. DANNEMEYER. Perhaps one of them here would have a chance to explain that. And it points up something we all admit, if we are honest with ourselves. We have two great political parties in this country. The people of our country are going to have to decide which party they want to control this Chamber. Now, my Democrat friends have controlled this place continuously since 1954.

In closing my remarks, I would just like to make reference to two votes that have taken place, not on the proposal that I talked about, but two significant votes, to give an illustration to the Members and the people of this country how the Representatives here in the House come down on the issue of spending and stewardship of the peoples' money here in the House.

On October 1, 1982, we had a vote here in the House, last year, on whether we would propose to the States a proposed constitutional amendment mandating a balanced budget. On that vote, 236 voted for it and 187 against it. Those who voted for it, 167, the Republicans, 87 percent of our membership, and those who voted against it, 167 Democrats, or 69.6 percent of the Democrats. To repeat—87 percent of the Republicans in this House voted for that proposal, to mandate the Federal Government balance the budget, and 69.6 percent of the Democrats voted against it.

The second vote of significance was taken last year on May 25, 1982, when a similar proposal was offered on the floor of the House for a vote. The Rules Committee last year made that in order. And on that occasion the proposal to cut spending in fiscal year 1983 by $70 million received 182 votes. Voting against it were 242. Now, of those voting for it, 137 Republicans, 71.7 percent of our membership, and those voting against it, 191 Democrats representing 79.3 percent of their membership in the House.

The point that I seek to make on these two votes is this: More important than what any Member of Congress says here in the House of Representatives or to his constituents in whatever State we come from is how we vote. If the people of this country truly want to change the spending habits of this Nation, they are going to have to change the party that controls the House of Representatives. And I hope in November 1984 all of the candidates for getting here starting January 1985 will have the privilege of answering to their constituents why they voted against spending cuts or why they are Members of a political party, the Democratic Party that controls this place, by 268 to 167, 82 percent of the slots in this House, why they will not even make a proposal to cut spending so that somebody on the floor of the House will have an opportunity to have a rollcall vote up or down on whether we truly want to cut spending in the House of Representatives.

I pray that that day will come, when the wisdom will come, to my esteemed Democratic friends, where they will make such a process in order

I yield back the balance of my time, Mr. Speaker.

DEFICITS DO COUNT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. REGULA) is recognized for 60 minutes.

GENERAL LEAVE

Mr. REGULA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of the special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. REGULA. Mr. Speaker, I am not going to take a lot of time because we have other Members that want to discuss this issue. I am pleased with the response we have had. I think it is a matter of great concern to many Members, a recognition that deficits do count.

Last week I commented that we seem to have a new economic religion in this city and in this Nation, that says "deficits do not matter." I disagree with this motion. I think deficits do matter, and matter a great deal. This is the concern that I and the gentleman from California (Mr. PANETTA) have and the reason that we have taken the time last week and this week to discuss it.

I do not think addressing the deficit problem is something that can be put off until after the election. I do not think it is something that can wait for a solution until 1985. By then we will be confronted with high interest rates as a fall out from high deficits. By then we run the risk that if we put the pressure on in terms of money supply to overcome the shortage of capital that we could be facing a rekindling of inflation. We feel it is important that we recognize these problems, that we in the Congress address this issue, and that we have the support of the American people in saying that deficits do count and that therefore, we in the Congress are willing to make the tough decisions that will address the problem.

Mr. Speaker, for nearly three decades Congress has been rambling down the deficit trail. Last week the gentleman from California and myself and others spoke out againsts this persistent deficit spending. I am encouraged by the response. We have been pleased by the number of Members expressing their support for some form of bipartisan effort to curb runaway spending.

Apparently deficits do matter. Our duty is to take a responsible attitude in reducing the deficit. Regardless of politics, our fiscal deeds will determine our Nation's future. Only a concerted bipartisan effort will be able to stem the flow of red ink.

The Chairman of the Council of Economic Advisers, Martin Feldstein, stated recently that high real interest rates are stunting the recovery. They boost America's trade deficit with an overinflated dollar while discouraging long-term capital investment by domestic business.

Economist Alan Greenspan, the former Chairman of the Council of Economic Advisers, agrees, warning that the lack of such investment inhibits any further growth in productivity and the standard of living.

One of the great strengths of America in the postwar era has been this tremendous real growth in productivity. It has come about because we have had new technology, new equipment to put into our factories and farms. It has come about because we have been able to work more efficiently, and the result has been an expanded, dramatically expanded standard of living for all Americans. But to continue to achieve these successes will require investment.

□ 1950

Obviously many opinions exist concerning the severity and correction of the problem. Tonight we will explore some of the possible responses.

The current recovery apparently has enough impetus to keep it going through 1983. Growth for the first two quarters of this year has been fueled by consumption expenditures, particularly in the area of consumer durables.

During the second quarter, consumption outran increases in disposable income, causing the lowest personal savings rate since 1950. I think that is a very disturbing factor.

Coupled with immense Government purchases of goods and services, these two factors are pulling America from out of the recession. Shifting from this explosive initial stage, characteristic of the era following World War II, the recovery of the economy is now moving into a period of growth and expansion.

During this period the effect on budget deficits will become increasingly apparent. Any prolonged recovery requires that business make capital investments to expand its capacity and improve competitiveness. Consumption and Government spending must make room for growing capital invest-

ments by our industries and our agricultural economy and many small businesses that have to have capital to invest to get a productivity growth, to create the jobs we need.

Any prolonged recovery requires that business make capital investments to expand its capacity and improve its competitive situation in the marketplace.

The credit market pie will be sliced more equitably between the private and public sectors if we can deal with the problem of deficits. Otherwise business growth will be stunted by their lack of borrowing power.

Private demands upon the credit market were 53.8, 69.2, and 78.4 percent in the 1975 through 1977 recovery years.

If the Federal Reserve is successful in restraining the growth of credit expansion to 8.5 to 11.5 percent only about 40 percent or less of the total funds will be available to private borrowers. This is not enough.

By early 1984, if we are to have a sustained recovery, business capital requirements will exceed substantially the 40 percent level.

One factor is undisputed: the more demand placed upon a finite number of widgets, the greater their value, and so it is with money. Business and personal borrowing will find itself paying more and more for the credit commodity.

Young people that want to buy that first home, of those that need loans to go to an educational institution, or to buy an automobile will discover that they are competing with the Government and the competition will drive up the price and take them out of the marketplace.

Those able to afford credit will find little room at the monetary watering hole alongside a bloated Federal Government.

A definiteness of purpose is the beginning of addressing any issue. Only with a clear vision of the issue can we take appropriate action.

Our special order has been an attempt to draw the House's attention to the problem. I think we are accomplishing that goal.

I think any solution that we arrive at has to have four parts to it because the driving factors and the main expenditures are in the entitlement areas, the defense spending, the interest on the national debt and, of course, the question of what the revenues should be.

It seems to me that in talking in terms of solution that what we need to do is to have a package that would fine-tune the revenue side, recognize some of the inequities in the Tax Code, address those, and bring about an increase in revenues coupled with, at the same time, a restraint in the growth of entitlements in the future and a restraint in the growth of defense spending.

It seems to me if we in the Congress could work together in a bipartisan way to put together a package that would achieve those objectives that we could reduce the deficit, that we could eliminate the danger that was outlined by the Director of the Budget when he stated not too long ago that we are facing $200 billion deficits as far as the eye can see.

I think that would be a tragedy for this Nation if we were to accept that as an accomplished fact and that is the reason we are here tonight. There has been discussion about the possibility of having a bipartisan commission. If that is what it takes I would support this concept.

I think we need to do something and if we can look to the success we had in addressing the social security problem in a similar fashion, then perhaps we should try that.

However, in the final analysis the responsibility rests with this body.

Obviously to accomplish the objective will require bipartisan effort. I hope that out of these special orders and the concerns that have been expressed by many others that we can, working together, not wait until after the election in 1984 but rather now, in 1983, put together a package that creates some additional revenues as envisioned in the first budget resolution; that puts at the same time and in the same package spending restraints on the growth in entitlement programs and spending restraints on the defense budget so that those who are looking at the fiscal policies of this Nation will recognize that the policymaking body under the Constitution of this Nation was willing to measure up, was willing to recognize the severity of the problem and was willing to do something about it.

It is a challenge, but I think that we can do this if we are willing to put aside partisan differences and work together to achieve that objective.

Last week, I commented on the drag placed upon our economy by the rising level of imports. Curing the budget deficit disease also means treating the symptom of trade deficits. The renewed demand for goods in our country are attracting an increasing amount of imports while our foreign trading partners, lagging behind in recovery, have not strengthened their demand for U.S. goods. Couple this with the competitive edge obtained by foreign industry receiving government subsidies. The sum total is a highly inflated dollar and a dwindling international market for U.S. goods. The trade deficit is expected to be $70 billion in 1983 and could reach $100 billion in 1984.

In October, as you may remember, after many months of complex negotiations the United States and the European Economic Community reached agreement on steel trade arrangements designed to restrain European exports of steel to the United States. The arrangement provided for the establishment of export licensing in the European Economic Community through 1985 for 10 major categories of steel products—carbon and alloy—exported to the United States limiting them to a predetermined share of the U.S. market for each product category. Most other exports of basic steel mill products are subject to consultations and possible licensing, if it appears that trade diversion is taking place. The Commerce Department estimated that well over 12,000 steel industry jobs would have been saved if the basic licensing arrangement had been in effect in 1981.

I strongly believe that by consolidating our trade functions into a single department we can begin to develop a consistent, coordinated and effective trade policy. That is why I introduced H.R. 2288. In April, the administration officially endorsed the concept of my bill by calling for the creation of a Department of International Trade and Industry. The organization would be a trade ombudsman for American business competing in the world marketplace. The goal of my proposal is to establish one voice on trade, by combining the policymaking function of the trade representatives with the policy-implementation job of the Commerce Department.

Evenutally U.S. exports will pick up and the inflated dollar—up 50 percent since 1980—will drop. Morgan Guaranty Trust Co. states the overvalued dollar has put domestic manufacturers at a 15-percent price disadvantage to foreign traders. As the trade deficit continues to grow foreign investments will become inadequate to support the dollar's weight. It is estimated the dollar could fall by as much as 15 percent in 1984. But this is little consolation. The deterioration would slow only because it could become no worse. The turnaround would mask the inner rotting of our capital structure. Long-term U.S. competitiveness would be seriously eroded. The symptom would subside while the cancer grows on.

As I indicated earlier, the budget deficit crisis will not be settled by a single piece of legislation. The crisis has taken years to develop and its solution mandates a prolonged response. But the export licensing agreement and Department of Trade proposal are examples of what needs to be done. Tonight, those taking part in this special order, seek to inspire Congress to act. I am hopeful that Congress will respond.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. REGULA. At this time I yield to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. I thank the gentleman from Ohio for yielding to me to participate in this joint effort at a special order to deal with the problem of the deficit and try to reflect on it, how real is the problem, what needs to be done to resolve it.

First of all I want to thank the gentleman from Ohio for his cooperation because I do believe that we have been able to get the Members interested again in this issue, to focus on it clearly.

As I said last week, we can all give a great Rotary Club speech on the problem of the deficit. But somehow when we comeback here, somehow nothing gets done in the effort to try to, in fact, reduce that deficit.

So that is the purpose of this special order, is to try to look at the issues around the deficit, at the long-term impact, the short-term impact, the possible solutions, and to try to not only educate the Members but hopefully the American public, because ultimately if there is going to be pressure on this institution to take the right steps on the deficit it ultimately must come from the American people.

Let me summarize very briefly, because we have put a great deal of material into the RECORD, let me summarize if I can the basic questions that I think need to be asked in terms of dealing with the deficit.

The first question is, What are, in fact, the projections for the deficit over the next few years. How bad is this problem that we are talking about?

The CBO tells us that between 1983 and 1988 if no future action is taken to cut spending or to raise revenues that in 1983 we are looking at a deficit of $207 billion; in 1984, $196 billion; in 1985, $205 billion; in 1986, $214 billion; in 1987, $233 billion; and in 1988, $252 billion; almost $1.3 trillion added between 1983 and 1988 to the deficit.

What about the size of the public debt as a consequence of that?

CBO tells us that the levels of public debt that we are looking at are as follows if nothing is done to cut spending or raise revenues: in 1983, $1.3 trillion; in 1984, $1.6 trillion; in 1985, $1.8 trillion; in 1986, $2.1 trillion; in 1987, $2.4 trillion; and in 1988, $2.780 trillion.

That means in interest payments we are looking at interest payments that will cost us in 1983, $89 billion; in 1984, $106 billion; in 1985, $119 billion; in 1986, $132 billion; in 1987, $148 billion; and in 1988, $165 billion.

□ 2000

By 1988 we will be spending about as much on interest payments on the debt as we will be spending on nondefense discretionary spending in the present budget.

Those are the figures that we get from the Congressional Budget Office. They tell us that the projections are for an explosion in the deficit over the next few years.

Why have these deficits occurred? That is the second question that needs to be asked. Frankly, my answer to that is there is enough blame on that issue to go around for everybody. If we spend our time trying to point fingers at one party or the other party, one House or the other House, one administration or another administration, we will be in such a quagmire we will never be able to get out of it and try to resolve the problem.

The reality is, there is plenty of blame to go around for everybody. Recessions have contributed to it, spending programs have contributed to it, loss of revenues have contributed to the size of the deficit, double standards that are implemented in one way or another by committees or by Members, and the tough choices that need to be faced in terms of trying to do something about it; all of these things have, to some extent, contributed to the problem we face now.

Will these deficits have a serious impact on the strength of our economy? That is the third important question. Obviously that is being debated now.

Secretary of the Treasury only last week again reiterated that he felt there was no relationship between the size of the deficits and high interest rates.

There are others who have argued there is frankly no relationship between the size of the deficits and the impact on the economy. But the vast majority of the economists, the vast majority of experts in the field, whether it is Martin Feldstein, whether it is the Congressional Budget Office, whether it is Henry Kaufman, whether it is Alan Greenspan, the majority, the vast majority of these experts agree that there is, in fact, a relationship between the size of the deficit and the impact it can have on the economy, in several key areas.

The crowding out that will take place on investment; we run high deficits, we are looking at borrowing 75 to 80 percent of net savings in this country.

On interest rates there is no question that as you reach out to borrow money you are impacting in terms of interest rates as far as the bonds that have to be sold.

You set a base with those 3-month interest Treasury bills because those are in fact the instruments that most people look at to determine a base on interest rates in other areas.

You are looking at an impact on trade. Martin Feldstein, better than anyone else, has pointed out how clearly this can impact on the trade area, to the tune this year of a trade deficit of somewhere around $75 billion.

Inflation is impacted because if the Federal Reserve tries to, in fact, deal with the economy by loosening up on the monetary supply, then there is a danger that inflationary pressures may indeed rise.

And the last point is just simple resources to do the job. If we look to Government, whether it is national defense, whether it is meeting the needs of people, whatever area of Government we look to, the reality is that the resources simply will no longer be there. Whoever is President, whoever is elected President in 1984, they are going to face a country that is literally hitting the walls.

Regardless of who becomes President, the major challenge will be to try to find the resources to do something and those resources simply will not be there.

Mr. REGULA. I think the gentleman is suggesting that this would have a severe impact on any new legislative initiatives, there simply would be nothing available to develop any kind of a new program, no matter how excellent it might be, in serving the people of the Nation.

Mr. PANETTA. The gentleman is absolutely correct.

I know there are those who are concerned about defense, obviously are concerned about the status of our defense posture. But the reality is right now we are borrowing to pay for defense. That is going to be the case down the road. Ultimately if the resources are not there it is going to impact on our national security. That is a reality. Something is going to have to give if in fact we are going to maintain our national security.

The other question is when will this impact occur, if, in fact, we agree those impacts are out there? When will they occur? In the short term the reality is we could probably live through the large deficits we are in, particularly if the Federal Reserve continues to be able to loosen up on the money supply.

We could continue a recovery in this country through the election of next year. So in the short term, most economists agree that perhaps you will not see the consequences of those large deficits; but the reality is that within 12 months, within 18 months, it will appear. It has to appear. There is simply no alternative.

At that time we indeed will have to face up to this issue.

The next question is what then can be done. Obviously, again, we run into a political problem in terms of deciding what the choices are in dealing with the deficit; do this, do not do that; cut defense, do not cut social programs; cut social programs, do not cut defense; raise taxes, do not raise taxes.

Everyone has their particular pet approach to dealing with balancing the budget.

The reality is that the nature of the budget no longer gives us those kinds of choices.

Last week I talked about percentages. Let me talk about numbers.

Out of a budget of $850 billion defense comes to $239 billion on outlays; entitlements comes to $389 billion; interest payments for 1984 come to $106 billion.

Add all of that up, that is $724 billion out of an $850 billion budget that goes for those areas about which I have just talked; almost 85 percent of the budget just for those areas.

So the reality is, as my friend from Ohio (Mr. REGULA) pointed out, there are only three areas you can turn to: one, to limit the growth in defense; two, to limit the growth in entitlements; and, three, to raise sufficient revenues to pay the bills.

There is no way around dealing with all three of those problems if you really want to have an impact on the deficit.

The last and perhaps most important question now is: How can all of this be done?

I am afraid no one party can accomplish it on its own; no one House, whether it is this body or the other body on the other side of the Hill, can in fact accomplish it alone. I do not even think one President can accomplish this acting alone. I am not sure that one commission can accomplish it, acting alone.

The reality is that all three, all three have to act in a partnership if in fact we are going to do something in the three areas I just discussed.

Whether the tool that is used to bring those three parties together is a summit or a conference or whatever it is, the reality is that the President, the other body, the House of Representatives have to join in the final solution and there is no way around that.

If we offer one solution on this side of the aisle, the other side offers their solution, we will be playing political games but we will ultimately not come to a solution.

We have got to all deal with the same basic problem and try to come up with, hopefully, the same basic approach as far as an answer is concerned.

Obviously one step is to do reconciliation on the budget resolution.

My hope is we can make an effort to try and get as close as we can to the targets established in the reconciliation and in the budget resolution. And that is a step in the right direction, it is an important signal to send to the American people.

In addition to that I think within the next 90 days it is absolutely essential for the three areas of Government, this side of the Congress, the Senate, and the Presidency, to join together in an effort to try to resolve it. It is not going to go away. We can pretend like ostriches that somehow this problem may disappear. We can hope that perhaps we can pass it on to the next year and maybe the year after that. But the reality is that if we continue to postpone it, ultimately a crisis will determine whether in fact we have to act.

If we have to respond to a crisis in our economy I am afraid that it may be too late at that point.

So ultimately the time is in fact now, act now, and the action must be bipartisan, it must be comprehensive, it must be now.

This is not a challenge that we cannot afford to meet.

Mr. LUNDINE. Mr. Speaker, will the gentleman yield to me?

Mr. REGULA. Mr. Speaker, I yield to the gentleman from New York (Mr. LUNDINE).

□ 2010

Mr. LUNDINE. Mr. Speaker, I welcome this opportunity to join in a discussion of the dangers to economic recovery posed by rising Federal budget deficits. I wish to commend my colleagues from California (Mr. PANETTA) and Ohio (Mr. REGULA) for their leadership on this issue.

In recent weeks a number of prominent economists have expressed concern that the economic gains of the past 6 months may be aborted by new increases in interest rates. Their comments reflect a growing fear in our financial markets that Congress will be induced by improved economic conditions to postpone actions to reduce the budget deficit.

The prospect of annual budget deficits in the range of $200 billion certainly justifies these fears and raises some serious questions about whether economic recovery can be sustained.

In response to these concerns, a number of proposals have surfaced recently calling for efforts, outside the normal processes of our Government, to address both current and long-term budget problems. These proposals range from the idea of a domestic "economic summit" to the creation of a long-term "blue ribbon" commission on the budget.

I welcome this growing recognition that some extraordinary effort may be necessary if Congress and the administration are to regain control of the Federal budget. Prior to any of these proposals, I advocated efforts by the Congress, the executive branch and the Federal Reserve Board to achieve a national accord on the budget and on interest rates.

In various letters, as well as in a House floor statement, I outlined the need for achieving a broad consensus on monetary and fiscal policy in order to reduce the budget deficit and lower market interest rates. Such an effort would necessitate not only agreement on a comprehensive program of spending reductions and tax increases, but also a specific commitment by the Federal Reserve to ease pressures on interest rates in response to improvements in the budget.

The potential of such an approach was illustrated in recent remarks by Federal Reserve Board Chairman Paul Volcker to the Senate Banking Committee. Chairman Volcker indicated that action by Congress to cut $50 billion from next year's budget deficit could prompt a drop in interest rates of as much as 2 percentage points. This would certainly be enough to reinvigorate our housing sector and provide added stimulus for new capital investment.

I do not claim to have the answers regarding how this accord would be achieved or what specific actions should be taken to reduce the deficit. I am convinced, however, that unless broad agreement is achieved along these lines, we will not be able to implement the directives of the fiscal year 1984 budget, nor establish meaningful objectives in the fiscal year 1985 budget.

And without significant progress in reducing the budget deficit, economic recovery will stall and the restructuring that is so critical to our economy will not occur.

Mr. REGULA. Mr. Speaker, I yield to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, deficits are threatening our society. Economically, financially, socially, and some would even say morally, our Nation is at risk. And as long as our Nation's economy is at risk, so too, are the economies of almost all other free nations.

Representatives REGULA and PANETTA deserve the highest praise for their leadership in bringing the issue of deficits into the political spotlight and educating the American public and the American Congress on the extreme dangers of prolonged high deficits. I hope that every Member of this body will find time to read the special order remarks of last Wednesday and of today, and I hope that the remarks will make a difference.

The deficit issue leaves no room for partisanship. According to a Chamber of Commerce/Gallup survey, 78 percent of Americans believe large deficits are a threat to the economic recovery. Congress cannot afford to waste time with partisan blamesmanship. What is needed now is the political courage and practical determination to battle the deficits and to win.

By 1988, if Congress and the administration fail to implement any significant deficit reduction plan, the U.S.

Treasury will accrue another $1 trillion in new public debt, bringing the total public debt outstanding to $2.6 trillion. Interest payments alone would be in the vicinity of $200 to $220 billion each year. That $200 billion in interest would be better not spent, or spent on worthwhile programs. For the purpose of discussion, the $200 billion in interest payments is telling proof of the eroding power which interest costs will have on other spending initiatives.

The problem of deficit spending is not a new one. The Federal Government has operated in the red every year since 1948 save 7. But only in recent years has the deficit become so ingrown, uncontrollable, and enormous that we are forced to live with deficits estimated for fiscal years 1983, 1984, and 1985 in the range of $200 billion.

ACTUAL BUDGET AGGREGATES

[In millions of dollars]

Fiscal year	Receipts	Outlays	Surplus or deficit	Debt subject to limit
1948	41,774	29,773	12,001	250,380
1949	39,437	38,834	603	250,964
1950	39,485	42,597	−3,112	255,382
1951	51,646	45,546	6,100	253,283
1952	66,204	67,721	−1,517	257,232
1953	69,574	76,107	−6,533	264,219
1954	69,719	70,890	−1,170	269,379
1955	65,469	68,509	−3,041	272,347
1956	74,547	70,460	4,087	270,619
1957	79,990	76,741	3,249	269,120
1958	79,636	82,575	−2,939	275,395
1959	79,249	92,104	−12,855	282,419
1960	92,492	92,223	269	283,826
1961	94,389	97,795	−3,406	286,308
1962	99,676	106,813	−7,137	296,374
1963	106,560	111,311	−4,751	302,922
1964	112,662	118,584	−5,922	308,582
1965	116,833	118,430	−1,596	314,125
1966	130,856	134,652	−3,796	316,292
1967	148,906	157,608	−8,702	323,143
1968	152,973	178,134	−25,161	348,534
1969	186,882	183,645	3,236	356,106
1970	192,807	195,652	−2,845	372,599
1971	187,139	210,172	−23,033	398,649
1972	207,309	230,681	−23,373	427,751
1973	230,799	245,647	−14,849	458,263

UNIFIED BUDGET DEFICITS (BY FISCAL YEAR)

	Actual 1982	Estimate 1983	CBO projection 1984	1985	1986
In billions of dollars:					
February 1983 baseline	111	194	197	214	231
August 1983 baseline		207	196	205	214
Budget resolution policies including reserve		207	192	180	146
Budget resolution policies excluding reserve		207	183	176	143
As a percent of GNP:[1]					
February 1983 baseline	3.6	6.1	5.6	5.6	5.6
August 1983 baseline		6.4	5.5	5.3	5.1
Budget resolution policies including reserve		6.4	5.4	4.6	3.5
Budget resolution policies excluding reserve		6.4	5.1	4.5	3.4

[1] Reserve fund does not significantly affect budget figures when expressed as percent of GNP.

Note.—For a detailed description of the February 1983 baseline estimates see CBO, "Baseline Budget Projections for Fiscal Years 1984–88," February 1983. For further details on the August 1983 baseline budget estimates see appendix A of this report.

As can be seen from the above chart, when fiscal year 1983 ends next week, the Federal deficit is expected to register at 6 percent of GNP. At $207 billion, the fiscal year 1983 deficit will be 101 percent higher than was originally projected in the fiscal year 1983 budget resolution. The fiscal year 1984 budget resolution, passed in June, projected a deficit of $84 billion. Since then OMB has updated the 1984 shortage to $180 billion, using the very optimistic assumption that the budget resolution's policy mandates will be acted upon. The less optimistic Congressional Budget Office projects the fiscal year 1984 deficit to be $192 billion if the resolution's policies are met, and $196 billion if the policies are not met.

In either case, as a percent of GNP, deficits will continue to hover around the 6 percent mark for several years to come. Perhaps even more frightening is the question of how we are going to be able to sustain a recovery while financing deficits that rise each year to the $200 billion mark.

For now, the recovery is booming. Leading the way out of last year's recession was real consumption, which increased at a 7-percent annual rate. Purchases of durable goods, cars, furniture, and large appliances made up most of the initial consumption increase, but housing starts are reported to be rising, as well. Industrial production was up a strong 1.8 percent in July, and unemployment fell from its December high of 10.8 to 9.5 percent, also in July. To round out the optimistic scenario, real GNP is increasing at an 8.7 percent annual rate in the second quarter of 1983.

With inflation at its lowest annual rate in 15 years—CPI grew only 2.9 percent annually for the first half of 1983, the recovery should remain strong at least through next year. GNP is expected to slow, but remain healthy at a 4.4-percent growth rate for 1984, and unemployment will continue to fall, nearing 8 percent by the end of next year.

So that no one is deluded by the happy news of economic recovery, interest rates remain high and are rising, personal savings dropped from 5.4 to 3.9 percent in the second quarter, inventories have declined, and our net exports continue to fall causing a difficult trade deficit situation. The ongoing failure by Congress to address the deficit crisis will only exacerbate these negative economic trends, and substantiate fears that the U.S. Congress and administration are unable or unwilling to make the difficult decisions necessary to reducing the deficit.

The decision to take on the budgetary and financial problems which underlie the skyrocketing deficits requires courage and a willingness to set aside partisan interests and special political interests in favor of the interests of the Nation as a whole. Statesmanship, courage, determination, in addition to an understanding of the very damaging economic impact of consecutive yearly deficits of $200 billion and a possible $2 trillion public debt outstanding in 1988, are essential to successfully overcoming the deficit problem.

There is some hopeful talk around town that the recovery will bring in sufficiently increased revenues so that the deficits will come down automatically. Although there may be some truth that once a recovery starts, it takes on a robust life of its own, it would be misguided and dangerous for Congress to default on passing deficit reduction measures now because of the slim chance that, thanks to the recovery, the deficits will come down on their own. Our budget assumptions are already rosy.

For the fiscal year 1984 budget, including defense, 76.5 percent of the $860 billion total budget outlays will go toward uncontrollable or mandatory program funding. Approximately 44.1 percent of that amount, or 33.7 percent of all Federal spending, is earmarked for entitlement payments to individuals—food stamps not included. That leaves only 24.6 percent of total outlays in the discretionary category, and sadly, our budget problems are so severe that even if we entirely eliminated all discretionary nondefense programs we would still not eliminate the deficits.

Between 1967 and 1983, expenditures for open-ended entitlement programs, such as social security, railroad retirement, UE assistance, medical care, student loans, food and nutrition programs—other than food stamps—increased by over 742 percent, rising from $42.1 billion in 1967 to $354.9 billion in 1983. Since enactment of the medicare and medicaid programs in 1965, total health care expenditures in the United States have increased at least 400 percent. In fact, total health spending took 6.2 percent of GNP in 1965, but 9.4 percent of GNP in 1982 or 11 percent of total Federal budget outlays.

Rising health costs are an obvious problem needing serious examination this decade, but they are not the only cause of the entitlement boom. Demographic changes, especially the increased population of elderly, have had an effect. Food stamp outlays have increased from $1.9 billion to $9.6 billion, or 400 percent. But the most significant cause of growth in entitlements has been indexing. In 1956, Federal civil service retirement was the first program to be indexed. By 1982, 86 Federal programs were tied in some way to price or wage indexes. Once a program is indexed, it is very difficult to legislate changes.

Allen Schick of the Congressional Research Service testified before the Rules Committee Task Force on the Budget Process last year. Regarding entitlements Mr. Schick said:

> Indexed entitlements vest certain interests with rights to payments from the Treasury. It takes great political effort to wrest these rights away from the persons entitled to them. Not many political leaders are willing to undertake this battle. When indexed entitlements are permitted a preferred claim on the budget, the political burden on those who would redistribute resources simply is too great to bear.

And yet, Congress does have the power to reduce or terminate entitlement programs. Using reconciliation, we can change the laws that originally authorized the programs. Further, we can make changes under the shelter of reconciliation, which when packaged as an omnibus bill, allows Members to streamline and reduce funding for programs without having to make politically difficult or impossible separate votes for each program. Subdividing reconciliation bills, as was done last year removes the needed shelter and undermines the effectiveness of the reconciliation procedure. The omnibus approach to reconcile is needed and should be utilized.

Reconciliation worked in 1981 to reduce spending between fiscal year 1982 and fiscal year 1984 by $131 billion. Although it successfully slowed the rate of Federal spending, the landmark 1981 bill was bitterly opposed, and has still not been forgotten. Last year, partly as a result of the bitter memories of the 1981 legislation. Reconciliation was underutilized. Instead of reconciling savings of $27.2 billion as instructed in the budget resolution, only $13.3 billion, or 51 percent of the instructed amount of reconciled savings were achieved.

The ranking minority member of the Budget Committee, Representative LATTA, declaimed the 1982 reconciliation savings as "not even chicken feed." However, in light of the extreme improbability that there will be any reconciliation at all this year, last year's $13.3 billion does not look so bad anymore. The fiscal year 1984 budget resolution instructed that $12.3 billion be reconciled, along with $73 billion in new revenues over 3 years. Due date for reconciliation had been set for July; it was moved up to September 23. It is clearly unlikely that we will make the deadline.

Reconciliation is our best weapon for bringing existing law into conformity with the current budget decisions. It is the single most important mechanism for dealing with uncontrollable spending and for getting at the budget base. Without reconciliation, spending that was authorized in earlier years would be locked in. Congress would be left to search for possible spending reductions within the small discretionary portion of the budget, where there is not a lot of fat to be cut. Meanwhile, benefit and payment schedules for entitlements, COLA indexes, and eligibility requirements for mandatorily funded programs would be left untouched and unreconciled to conform with Federal spending priorities.

Reconciliation is not one of many budget enforcement tools. It is the only tool. What will happen if we do not reconcile savings and revenues? What will be the result if Congress and the administration succumb to their own narrow-minded election interests and fail to beat back raging deficits once and for all?

Failure to bring down deficits through reconciliation or through other means will place our credit markets under severe strain. Federal deficits and net private domestic investments draw upon the same pool of resources. Net private savings, State and local government savings—what little there are—and capital flowing in from abroad make up our resource pool.

Financing deficits equal to 6 percent of GNP, when savings are also at 6 percent of GNP, will require virtually all of our private savings. Over the next 5 years, the Federal Government is expected to absorb 53 percent of total net private savings, or 165 percent more than the 20 percent absorption ratio common in the 1970's. After the Government has taken its share, private borrowers will be left to compete for the scarce remaining capital. Interest rates will be pushed upward until private demands for funds are reduced to equal the supply remaining after the Government's borrowing needs are satisfied.

Because of the strength of the current recovery, it is possible that the public sector/private sector clash at the credit markets could come sooner than expected. As business investments increase, the credit-crowd-out situation will intensify. If that happens, interest sensitive segments of society, such as housing, autos, and consumer durables would suffer. The construction, steel, machinery, and equipment industries would all experience depressed levels of outputs.

Capital investment is the single most important factor in stabilizing our economy and averting financial disaster. According to this week's Time magazine, the ratio of capital spending to consumption has dropped about 10 percent since 1979, and the investment rate may not return to pre-recession levels. In that case, the United States would increasingly be living off it's capital stock rather than adding to it.

Capital needs for the coming recovery year will be large, and meeting those needs will require all the effort that can be mustered. Like foreign trade, capital investments make possible wage increases, new jobs, new technologies, and overall gains in real growth and real income. Yet the prospect of a public debt approaching $2 trillion may keep interest rates high enough so that business investors may have to forgo otherwise attractive investment opportunities.

Rather than allowing the crowding out of credit markets, and all the public outcry that will accompany high interest rates, the Federal Reserve might decide to monetize the debt. If that were to happen, the overheated economy, faced with an expansion in the money supply, would grow much too fast and inflation would spiral back up into the double digits. Even if the Fed did not monetize the debt, the fear that it might do so is enough to kindle inflation-hedging/inflation-causing behavior. That fear or expectation is already apparent in that investors are insisting on higher interest to protect their investments from future inflation.

Another victim of high U.S. deficit spending is U.S. trade. The trade deficit ran at a record annual rate of $46 billion in the first half of 1983, it will probably exceed an annual rate of $70 billion by the end of this year. The 50 percent appreciation in the dollar since July 1980 increases our trade deficits because it is harder to sell our overpriced exports abroad, and easier to buy cheap imports at home. Thus deficits increase the tide of protectionism and the likelihood of another trade war. If world trade declines as worldwide protectionist sentiments grow, consumers everywhere will lose as prices for goods once again go up.

As long as the dollar stays strong, foreign investments will flow into the United States. The flood of foreign currencies will increase our availability of funds for credit, yet it will weaken the competitive position of our exports. Domestic industries competing with lower priced foreign imports will be hurt. Overall, productivity and per capita income will experience a downturn.

BEHIND THE DEFICITS

Federal deficits are too high. Had the recession not widened the differential between reduced tax revenues and increased transfer payments during fiscal year 1983, the deficit would still be very high. The term "structural deficit" has been common in this year's budget go-rounds. The structural deficit is that which does not result from recession. Instead, the structural deficit grows larger on its own through current tax laws and spending policies. Cyclical changes have no effect on the structural deficit.

UNIFIED BUDGET DEFICITS

[By fiscal year]

	Actual, 1982	Estimate, 1983	CBO projection 1984	1985	1986
In billions of dollars:					
February 1983 baseline	111	194	197	214	231
August 1983 baseline		207	196	205	214
Budget resolution policies including reserve		207	192	180	146
Budget resolution policies excluding reserve		207	183	176	143
As a percent of GNP: [1]					
February 1983 baseline	3.6	6.1	5.6	5.6	5.6
August 1983 baseline		6.4	5.5	5.3	5.1
Budget resolution policies including reserve		6.4	5.4	4.6	3.5
Budget resolution policies excluding reserve		6.4	5.1	4.5	3.4

[1] Reserve fund does not significantly affect budget figures when expressed as percent of GNP.

Note: For a detailed description of the February 1983 baseline estimates see CBO, "Baseline Budget Projections for Fiscal Years 1984–1988," February 1983. For further details on the August 1983 baseline budget estimates see appendix A of this report.

STANDARDIZED-EMPLOYMENT DEFICITS [1]

	Actual 1982	Estimate 1983	Projection 1984	1985	1986
In Billions of dollars:					
February 1983 estimate [2]	29	69	91	128	159
August 1983 estimate [3]	29	97	99	110	87
As a percent of cyclically-adjusted GNP:					
February 1983 estimate	0.9	2.0	2.4	3.1	3.6
August 1983 estimate	.9	2.8	2.6	2.7	2.0

[1] Unified budget estimate standardized at 6 percent unemployment. The estimates exclude the reserve fund. The programs included in the reserve fund would cost $9 billion in fiscal year 1984, $5 billion in 1985, and $4 billion in 1986. The impacts at the 6 percent unemployment rate that underlies the standardized-employment deficit would be less.

[2] Congressional Budget Office, "The Outlook For Economic Recovery" (February 1983). The 1982 levels have been revised to reflect revisions in economic data for that year.

[3] Assumes policies of first budget resolution for fiscal year 1984 passed last June.

The above charts show that structural deficits in 1984, 1985, and 1986 are 54 percent, 62.5 percent, and 60 percent of the respective unified budgets. While we have almost always had deficits, these deficits, especially the structural ones, are the most mammoth in the post-war period. Clearly, there is reason to be concerned about the deficits. Savings policies should be implemented. However, with the administration wanting spending cuts and no tax increases, and Congress looking for revenue increases, but only negligible spending cuts, it is difficult to be optimistic about the possibility of any compromise action.

Ultimately, the economic problem created by large deficits, especially large structural deficits, is that Federal debt may grow faster than the economy's capacity to absorb it. A reasonable criterion for determining the amount of deficit reduction that is needed is to make sure that any deficit reduction program will overcome or reverse the recent tendency for the debt to grow faster than the trend rate of growth in GNP.

Why has the Federal budget gone so completely out of control? The indexing and spending growth of entitlement programs, many of which have increased upward of 400 percent in the last 20 years, are a major cause of our budgetary paralysis. It is essential that Congress recognize the necessity of using the budget reconciliation process to deal with entitlement programs and uncontrollable spending.

No one wants to cut back programs, but in order to transcend the budgetary and financial crisis which now faces us, some spending will have to be reduced. With proper deliberation the reductions can be made fairly and equitably. There should be no sacred dogs. And that includes defense.

Beyond the question of uncontrolled spending and the need for an in depth examination of the problems associated with entitlement reforms, other factors interfere with our ability to determine responsible budget aggregates and spending assumptions. These factors are procedural and disciplinary.

Complaints are often registered about the Budget Act timetable. Appropriations chairmen complain that the May 15 reporting date for budget resolutions does not leave their committees with sufficient time to properly review and report out spending bills.

It is not responsible to blame a shortage of time, however, when appropriations bills are reported out containing appropriations for programs which have not yet been authorized. Such reporting violates rule XXI of the House and is subject to a point of order. Nor can a shortage of time be responsible for the spending bills that provide insufficient funding for mandatory programs. Knowing that supplementals will have to be granted to complete the funding for the mandatory programs, the funds are transferred from the mandatory program to a discretionary program. This form of backdoor spending results in increased outlay expenditures.

Waivers of the Budget Act make the red ink worse, too. Section 311 of the Budget Act provides for a point of order against any bill providing additional new budget authority for a fiscal year after a reconciliation bill or resolution has been enacted. There were twelve 311 waivers granted to last July's urgent supplemental appropriation bill. Six others were requested but not granted. In addition, the bill contained four waivers of rule XXI.

Like supplementals, continuing resolutions inflate deficits. The July 1982 supplemental contained $3 billion for a new housing subsidy program. The President showed his (then) commitment to deficit containment by vetoing that particular version. Last year's continuing resolution increased the deficit by $9 billion. The bill contained $5.4 billion for job creation. To make matters worse, the budget buster came to the floor under a closed rule. Getting control of deficits is going to require gaining control of our own temptations to spend, spend, spend.

In 1982 and so far in 1983, Congress approved approximately $12 billion in jobs creation and public works initiatives. Putting that $12 billion toward deficit reduction, and matching it with other deficit reduction measures, would do far more for providing jobs than a single $12 billion shot of jobs subsidy could ever do. Capital investments would be made, productivity would increase, and new permanent jobs would become available. There is a multiplier effect to reducing debt which should not be taken lightly.

Credit budget and off-budget programs increase spending without adding to the outlay, revenue, or deficit totals of the unified budget. Off-budget accounts, such as the Eximbank, FFB, Postal Service, and Synfuels Corp., amassed an additional $16 billion in fiscal year 1983 and 1984 deficit spending, and an additional $14 billion in fiscal year 1985 and 1986.

Clearly, there is a political advantage to off-budget status, and the lobbies for these groups effectively work to prevent change of their status. Nevertheless, bringing these programs on-budget and subjecting them to binding targets may improve deficit accountability, and the increased deficit totals might bring about an increased concern regarding the deficits.

OVERVIEW OF OFF-BUDGET ENTITIES

[By fiscal years; in billions of dollars]

Entity	Outlays 1981	Outlays 1983 [1]	Origin of off-budget status
Federal Financing Bank	21.0	12.1	Public Law 93–224 (1973).
Rural electrification and telephone revolving fund.	([2])	([2])	Public Law 93–32 (1973).
Rural Telephone Bank	.1	.2	Public Law 93–32 (1973).
Strategic petroleum reserve account.	([2])	2.8	Public Law 93–35 (1981).
Postal Service fund	.1	.7	Postal Reorganization Act of 1970.
U.S. Railway Association	—.3	([2])	Public Law 93–236 (1973).
Synthetic Fuels Corporation	([2])	([2])	Public Law 93–294 (1980).
Board of Governors—Federal Reserve System.	([2])	([2])	Federal Reserve Act of 1913.

[1] Estimated.

[2] Outlays (or receipts in excess of outlays) of $50,000,000 or less. The board of Governors of the Federal Reserve System uses a calendar year budget.

OVERVIEW OF FEDERAL CREDIT ACTIVITIES FOR FISCAL YEAR 1983

[Amounts in billions of dollars]

	Net outlays and loans guaranteed	New obligations and commitments	Outstanding direct loans and loans guaranteed
Direct loan obligations	14.2	[1] 49.0	219.9
On-budget	1.9	31.6	97.6
Off-budget	12.3	25.6	122.4
Loan guarantee commitments	46.6	98.4	399.7
Government-sponsored enterprise loans	53.1	206.3	285.5

[1] Total direct loan obligations equal on- and off-budget obligations, minus $8.3 in sales of assets by the Federal Financing Bank.

Overcoming political difficulties inherent to making budget policy may prove impossible at times. But not always. The trend $200 billion deficits is so grave economically that the

future of our economy and the economies of many of our world neighbors, the quality of our lives, the future prosperity that our children may enjoy are all at stake. Deficits will have to be reduced. But that already difficult decision is made even more difficult because the severity of the problem is camouflaged by the recovery.

It may be that the current impasse between the White House and Capitol Hill is not surmountable. But there are two hopeful possibilities. One is that the message that deficits do matter will catch on, and concern for addressing the issue will be raised anew. The other is not without costs, in the event that the recovery takes a painful bend downward much sooner than expected, legislators may be forced by renewed inflation or climbing unemployment into crisis action to bring down the deficits.

BRINGING DOWN THE DEFICITS

The simplest method is probably the most difficult. That is to discipline ourselves, to enact the mandates of the budget resolution, and to stay within the 302a and 302b spending allocations when passing appropriations. Only a hopeless optimist, like me, would think the simple solution would work.

Another method is to require reconciliation within 60 days and provide sanctions against committees which fail to meet their reconciliation instructions. Further enforcement powers might include allowing the Budget Committee to amend unreconciled legislation up to the levels of the Budget mandate. Rconciliation is the most effective tool for congressional control of Federal budgets.

The President proposed a contingency tax in his January budget request. The contingency would not go into effect until 1985. It was designed as a standby measure to insure that budget deficits for 1986 and beyond would not exceed 2½ percent of GNP. The tax would raise receipts by $46 billion in 1986. At this point, there is not much chance of the contingency going into effect.

Almost without exception, every economist who testified before the House Budget Committee early this spring told us that taxes should not be raised during a recovery. The $73 billion in 3 year new revenues included in this year's budget resolution, could, in my judgment, reduce the investments and savings which are needed if we are to sustain and strengthen the recovery.

Since there is not much chance of enacting anything more than a few billion in new revenue legislation, we cannot rely on that method for deficit reduction this year.

Eventually, revenue increases are clearly going to have to be a part of any comprehensive deficit reduction package. The CPI minus 3 percent proposal introduced by DANFORTH/BOREN in the Senate is a bipartisan proposal worthy of serious consideration. Outlay savings would be $4.4 billion in fiscal year 1985, $11.4 billion in fiscal year 1986, $18.6 billion in fiscal year 1987, and $25.8 billion in fiscal year 1988. Total outlay savings would be $70.2 billion. Revenue increases would be $3.6 billion in fiscal year 1985, $10 billion in fiscal year 1986, $17.3 billion in fiscal year 1987, and $25.7 billion in fiscal year 1988. Total revenues would be $56.6 billion.

Over the 4-year period, total deficit reductions from CPI minus 3 percent would be $126.8 billion. That is a significant total; it could make the difference in the lifespan of our recovery.

Another proposal, offered in the House, would tie indexing to CPI minus 2. Total savings under this proposal would only be $77.5 billion. While that is nothing to sneeze at if there are no better offers, it would not be nearly as beneficial as would the CPI minus 3 savings.

The balanced budget proposal had its chance last year. While I ended up cosponsoring the bill, I did so as a last resort. We should look for more workable solutions which will enable us to deal in policy questions and lead to more responsible budgeting. The balanced budget amendment looks nice to constituents, but has doubtful legislative or disciplinary bite, and no real hope of becoming a part of the Constitution.

Some changes in the budget process might enable us to produce better budget bills. The first resolution should be made binding, and the second resolution should be eliminated. Deferred enrollment would be sacrificed by such an action, which is too bad, deferred enrollment is a good thing to have hanging over appropriators' heads. But the benefits of eliminating the second resolution out-weigh the cost of deferred enrollment. The second and third budget resolutions are too convenient a way to spend even more money.

Capital budgeting, so that infrastructure needs could be responsibly met, and accrual forms of budgeting should also be studied for their merits.

The annual problem with appropriations bills is that the majority of bills that the House passes exceed their 302(b) spending allocations. The 302(b) allocations are the subdivisions made by the Appropriations Committee to each of its subcommittees. They are the budget benchmarks by which appropriations bills are measured, but these allocations are exceeded time and again. Budgetary discipline could be strengthened if a two-thirds majority vote was required to pass any spending bills which exceed their 302(b) allocations. I have introduced a bill, H.R. 3451, which would require the supermajority discipline and might give Members a chance to think twice before voting for spendthrift spending bills.

Entitlement reform needs to be studied. The group that does the studying, though, will need some form of shelter. No one committee should have full responsibility, because as the nondebate on social security last year proved, no person or group is going to want to lay their heads on the entitlement chopping block, at least not without a lot of cross-jurisdictional company from their congressional comrades.

There are a variety of proposals for entitlement reform. Entitlements could be put into a rescission/impoundment mode. Sunsetting legislation ought to be reviewed; the CPI minus 3 and CPI minus 2 proposals should be considered. Perhaps we need to resort to a summit meeting on entitlements between the President and the Congress, or perhaps another Presidential Commission should be appointed.

Congressman OBEY has proposed an omnibus budget approach which the Beilenson task force on the budget process is currently considering. The Obey approach would be to lump together all the spending legislation with the budget aggregates and then bring it all to the floor, where after a 1 month "Donnybrook", there would be a vote. Representative OBEY raises some interesting issues, but it is my feeling that his bill would not only fail to bring deficits under control, but also would increase them further. As it is difficult to practice spending restraint with continuing resolutions, so I believe it would be with the Obey proposal.

After Watergate, we controlled impoundments. Now it is time to decontrol them.

Senator BOSCHWITZ has introduced a plan which would place a 5 percent, across the board, lid on budget increases. Every program would increase 5 percent per year for 5 years. Although exact numbers for savings from the Boschwitz plan are not yet available, the Senator expects that his proposal will bring the budget into balance. Anything that suggests reducing deficits is worthy of consideration.

Those who support the repeal of indexing our tax schedules have not been forgotten. Repeal between 1985 and 1988 would increase revenues by nearly $100 billion. However, 78 percent of the tax increase would fall on those earning less than $50,000 per year. In my judgment, repealing indexing is very bad tax policy. If there is a trade off of large spending cuts, indexing might be sacrificed reluctantly, but it should not be considered in isolation.

Suggestions from opinion leaders in the business community have been helpful in the battle to come up with solutions to the deficit problem. The bipartisan appeal group proposed spending cuts of $60 billion in 1985, defense spending cuts needed to save $25 billion, and revenue increases of $60 billion. Total deficit reduction for fiscal year 1985 would be $145 billion, or $175 billion when reduced interest payments are included. The members of the bipartisan commission are to be highly commended for their efforts to seek change. Like them, I believe that we cannot put off deficit reduction measures any longer.

A recent proposal by Representative KEMP to restore the line item veto is sound policy. It ought to be enacted immediately. Without the line item veto the President's power to veto separate appropriations bills is highly restricted. The line item veto could well help us to insure that responsible budgets are being passed.

Congressman PANETTA has offered a biennial budget bill. The first year would be spent on oversight and authorizations, the second year would see the passage of the authorizations bills and the budget resolution and appropriations. In my judgment, biennial budgeting will not help the deficit situation. Economic forecasting will be very difficult, and the process which we now have would most likely remain the same, only stretched over a 2-year period instead of 1.

CONCLUSION

Whatever method is chosen for breaking open the huge deficits is not nearly as important as is the congressional resolve to take action. Every dollar of deficit reduction means one less dollar of Federal borrowing to compete with private-sector financial needs and one less dollar of debt that will have to be serviced by future taxpayers. Americans everywhere are complaining about the economic mess caused by unrestrained spending. It is well past the time for us to step forward and fight the battle against deficits, and to pave the way for an economy that can sustain the current recovery while continuing along a path of steady growth.

Every possible device or procedure to reduce the deficit must begin with a willingness to make changes. As long as Congress shows no self-discipline, its deficits will grow. The current profligacy will continue until Congress decides to change it. So far the Congress has opted for high deficits. I am enough of an optimist to believe that change is possible, but there is as yet no evidence of change.

□ 2020

Mr. REGULA. I thank the gentleman for his contribution. He made a point that is extremely important, and that is that there are no uncontrollables, that we can make conscious choices, and therefore this body, if it chooses to do so working together with the administration, as the gentleman from California pointed out earlier, can address the problem if we have the will to do so.

Mr. Speaker, I yield to the gentleman from Minnesota (Mr. PENNY).

Mr. PENNY. Mr. Speaker, I rise to join my colleagues from both parties in this discussion of the Federal deficit. I commend the gentleman from California (Mr. PANETTA), and the gentleman from Ohio (Mr. REGULA) for organizing this special order.

Two hundred billion-dollar deficits alarm us all. They are alarming because they threaten the fragile economic recovery.

These deficits threaten to choke off the recovery by absorbing most of the savings available for investment. The result? Higher interest rates, reduced exports, less economic activity. This means fewer jobs, fewer farms, and fewer small businesses.

In the First Congressional District of Minnesota, these are the concerns.

People are becoming more hopeful as interest rates drop a bit. People are pleased that unemployment is coming down slightly from the 10.5 percent of just months ago. But they are worried by the prospect of rising interest rates resulting from the deficits.

From the statements made last week, I know that the macroeconomic implications of this growing national debt were carefully discussed. I want to talk about microeconomics, about what the fallout from a large and growing Federal deficit would mean for individuals in southeastern Minnesota.

In southeastern Minnesota, farming and small businesses are the backbone of the economy.

High interest rates are one of the most devastating blows that a farm can receive. It pushes up the cost of seed, fertilizer, machinery, and other purchases for which a farmer must borrow to finance. Alarmingly, the highest portion of farm production costs in Minnesota last year was the cost of interest. High interest rates can take a viable, efficient, farm operation and destroy it. Family farms in Minnesota have suffered recently from low prices, the dairy assessment and the current interest rates. We must not penalize them still more in the future with even higher interest rates resulting from huge deficits that we refuse to control.

Reducing the deficit would also be a major contribution to the small businesses in the first district. Unlike major corporations, small businesses do not get preferential interest rates from banks. Yet small businesses have the same needs for capital. If we want to help small businesses, the businesses that create most of the new jobs in this country, we must get interest rates down to more reasonable levels and keep them there.

The same is true for home buyers. For people who want to buy homes, the interest rates we have now are still too high. The deficit has the potential of pushing these interest rates still higher.

If more people are unable to buy homes, obviously, the homebuilding industry will again be on the rocks, resulting in fewer jobs for construction workers and fewer jobs in related industries.

Farmers and working people will also be hurt by the effect high interest rates have on exports. When interest rates are high and the dollar becomes more valuable, our products cost more overseas and imports from other countries cost less. For farmers, that means fewer grain sales to other countries. For industrial workers, it means another economic slowdown here because we will export fewer of our products and import more. Reducing the Federal deficit to lower interest rates would be a major assist to the hard working people of southeastern Minnesota.

Because I believe that we must tackle the deficit issue, I supported the bipartisan compromise budget resolution. It represents a balanced approach to deficit reduction an approach that is essentially fair. However, more can and must be done. If we can move forward with balance and fairness in our efforts to reduce the deficit, we can achieve lower-term interest rates and revitalize the economy in Minnesota's First Congressional District and accross this great country.

Mr. REGULA. I thank the gentleman for his contribution. I think he makes a very important point, and that is that the high interest rates impact especially heavily on the small businessman, the small farmer, the entrepreneurial individuals who want to build a constructive enterprise.

Mr. Speaker, I yield briefly to the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. I thank the gentleman for yielding.

Mr. Speaker, may I commend the gentleman from Ohio and the gentleman from California for taking this special order on this most important subject. They are performing a great service for our country by allowing us this opportunity for discussion of this vital subject.

Mr. Speaker, while there is a great deal of debate over the impact of budget deficits on interest rates and the economy, I am convinced that future large deficits could do great harm to the economy. The mammoth size of projected deficits raises expectations about inflation and heavy Government borrowing that keeps interest rates high. Another round of rising in-

terest rates could send the economy into a tail spin.

The question then is, what do we do about future deficits? There are only three ways to reduce future deficits: First, there is a possibility that they could be reduced through faster economic growth, which would increase Federal revenues and reduce Federal outlays, second, reduce Federal spending, and third, increase Federal taxes.

Those are the options. Singly or in combination, there is no other way to reduce Federal deficits. It is the prospect of more Federal spending which is likely to reduce the prospect of the first.

It is spending, not tax cuts that are out of control. We must tackle the deficit through spending restraint. Increased tax rates are not the way to go. They stifle economic growth and aggravate deficits. To illustrate the power of economic growth, the Congressional Budget Office has estimated that, starting this year, if real GNP could grow 1 percentage point faster than projected over the next 5 years (e.g. 5 percent instead of 4 percent) the 1987 deficit would be $83 billion less than forecast. (We are off to a good start in 1983.) A 2 percentage point increase in the rate of growth in real GNP—6 percent instead of 4 percent—would result in roughly a $166 billion reduction in the 1987 deficit.

I am aware of the difficulty of attaining that fast a rate of economic growth on a sustained basis. But apart from the economic growth issue, everyone should be convinced by now that tax increases do not reduce deficits. There seems to be a natural tendency that whenever tax revenues rise, Federal spending rises to absorb it, and more, and the deficits go on. For example, from 1976 to 1983, Federal receipts doubled, from $298 billion to $600 billion. Over the same period deficits more than tripled, from $66 billion to $207 billion. The best way to stop Federal spending is to turn off the tap. Government always seems to spend any revenues it can get its hands on.

We all know that spending cuts are tough to achieve. I am a political realist. We have done about all we can do in the so-called controllable part of the Federal budget, comprising about one-fourth of the budget total. To get the job done we will have to turn to the big ticket items—entitlements and defense.

On defense—27 percent of the budget—I think there are some things we can do that will have large dollar impacts, without compromising our security.

On entitlements which represents 48 percent of the budget something must be done to reduce increases in benefits. The Greenspan Social Security Commission was successful in developing a package which passed Congress virtually unscathed. It gives us great hope that this, heretofore, politically untouchable sector—entitlements—is indeed touchable.

There is a chance that economic growth will be high enough to generate sufficient revenue at current tax rates to bring the budget close to balance by the late 1980's. But it is remote. We need time to determine how helpful economic growth will be in cutting the deficit. In other words, we need to buy time to deal with our fiscal problem, but to do so in such manner as to assure financial markets that the deficits in the outyears will be dealt with in an effective and timely manner.

It is the outyear deficits that are of greatest concern to me. The 1983 deficit, which was mostly recession induced, will be history in 10 days. Perhaps, the 1984 deficit of $170 to $190 billion need not be all that worrisome because of the prospects of healthy profits and strong business cash flows. But when we get into fiscal years 1985, 1986, and 1987 it is another matter. The prospect of huge $200 billion plus deficits, over 5 percent of GNP, would absorb most of our net national saving, ignite inflation, and bring back sky-high interest rates, and then we can pity the U.S. economy and the world economies.

For Congress to let this legislative year pass without making a convincing start toward controlling deficits would be a disaster for the economy. But options for dealing with so complex a problem are limited and no one approach is fully satisfying.

This brings up my final point. I think the proposal that offers considerable promise is for Congress and the administration to join together to create a blue-ribbon, bipartisan "Commission on Spending and Taxes" [CST], whose members would be directed to report back in January 1985 with recommendations for dealing with the outyear deficits that threaten the economy. The Congress could lead the way with in-depth hearings by its tax-writing, budget, and economic committees to establish the parameters for the CST studies, highlight questions to be answered, and provide credibility for the overall effort. Congress might direct the CST to examine new built-in devices to counter congressional spending bias, take a hard look at just how much Government we really want or can afford, question whether—if spending restraint is assured—large amounts of revenue are needed in 1985, 1986, and beyond. If so, how do we raise it?

The deficit commission idea—patterned after the social security, the MX, and the Central America Commissions—to deal with extremely tough political problems (and there is none tougher than budget deficits) has a lot of merit. I understand that the notion for such a Commission was first floated by business consultant Horace Busby, former aide to Lyndon Johnson. Republican consultant, Charls Walker, is strongly pushing the idea. Alan Greenspan has called for a variation on the commission idea—an intergovernmental summit meeting of the President, the Speaker, the Senate Majority Leader, and the chairmen of the congressional tax-writing committees. The key is that the Commission or Summit must be fully bipartisan. Otherwise there is no hope for success.

I believe the Commission approach is worth a try. A polarized Congress in a preelection year finds it exceedingly difficult to deal with taxing and spending issues. The Commission can serve as a political heat shield, and can develop the budget recommendations in a detached, objective way. Witness the success of the Social Security Commission. Congress rushed to approve that commission's recommendations, embraced by both the President and the Speaker, with very few changes.

The Constitution and the budget process are not violated. Congress still retains final authority. It can accept or reject the Commission's recommendations.

Maybe economic growth will be so strong that our future deficits will melt away like dew before the rising sun. That would be nice. But I am a realist on this. Strong recommendations from the CST Commission on spending restraint may well be necessary. If proposed by a bipartisan commission, or an intergovernmental economic summit, these budget-reducing proposals, like the Social Security Commission recommendations, may be easier to swallow and easier to enact than if Congress tries to fight them out among themselves. I think we should try it.

□ 2030

Mr. BROWN of Colorado. Mr. Speaker, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Colorado.

Mr. BROWN of Colorado. Mr. Speaker and my colleagues: The deficit in our budget in this body is a bit like the weather. We all like to talk about it, and yet when it comes time to do something about it we seem very short of strong action.

The truth is that we have not been willing to face the unpleasant truth that is before us. The truth is that we cannot continue on the road we have traveled, for if we do, we lie not ahead in terms of what we would like, we lie ahead with disaster, a disaster that we cannot avoid, that we must face up to now and resolve.

I often hear colleagues concerned about the deficit but willing to dismiss the consequences that they face, dis-

miss the deficit, and dismiss the overwhelming burden that has built up over these past years, that it has not been a great increase in terms of the percent of the GNP, and the reasoning goes that the GNP has grown greatly and that the deficit, while big, and the budget deficit accumulation over the years while large, has not appreciated that much in terms of the percent of the gross national product.

But the real way to look at that is not in terms of just the debt that we owe. The real way to look at it is the cost of carrying that debt, the cost of supporting that debt, the work that must be done by every working American to pay that bill for interest each year. It is almost overwhelming when you think that every single, working American in this country next year will be asked to come up with almost $200 to pay not the interest on the national debt but to pay the interest solely on the increase in the national debt just for this last year; $200 for the increase in the national debt for 1 year, and that is only the interest. That burden could well go on until we face up to the problem, year in and year out.

So I thought I would share a few thoughts with you this evening, first of all as to what the interest burden is, because that is the proper burden we have got to look at in examining the impact of these deficits, and second, what portion of the defict we pay out in terms of interest, because the portion of our budget that we pay toward interest has gone up dramatically.

First of all, with regard to the interest, let me draw my colleagues' attention to the chart over here on my left. It is a chart that simply records the portion of the budget that is expended with regard to interest payments on the national debt. It does not record payments with regard to the trust funds that have huge deficits. It is only the money that the American Government goes into the market and borrows each year.

It has gone from a little over $6 billion in 1955 to an almost fivefold increase by 1975, to a $33.5 billion level. So in those 20 years it increased more than fivefold. In the next 5 years it doubled from that previous level, up to $75 billion. In the next 4 years, the estimate is that in 1984 it will be at $148.6 billion, almost double again in 4 years.

The fact is, it is more than 23 times as large as it was in 1955. I often hear referrals to our budget problems and the interest cost and the impact it has in terms of "crowding out." All of us are familiar with that term. Anyone who travels the Metro in Washington, D.C., is familiar with that term.

But in budgets we refer to crowding out as what takes place in the marketplace when we go in to borrow money to sustain governmental activities, and we are familiar with the impact it has with regard to interest. Interest rates are dramatically higher now because of our failure to face up to that budget problem, but the crowding out does not stop there. As has been addressed tonight, it has also crowded out the savings in this country. A country that once had one of the strongest records of personal savings and capital formation of any country on the face of the Earth now has the lowest formation rate of savings of any major industrialized country on the face of the Earth.

Part of it is a result of our continued deficits and the crowding out with regard to the personal individual and their ability to save.

But the crowding out I want to draw your attention to is a different one. Much of our focus here is concern about people and the way they are affected by programs. The crowding out I want to draw your attention to is the crowding out that results in the Federal budget, the simple elimination of our ability to fund essential, good programs because we have to pay for the debts of the past.

Take a look for a minute, if you would, at the chart. All the chart is, is a representation of the percent of our budget that goes to pay for interest. It has followed a pattern that has ranged in the last few years from somewhere around the 8-, 9-, or 10-percent area to where it has exploded in recent years.

But what is the impact of that? The real impact of that is that portions of our budget which we value highly, which both sides of the aisle agree deserve top priority, have suffered, whether it is the President's office itself, which has dropped to one-fourth of the percent in the last decade, it takes up one-fourth of the share of the national budget it did 10 years ago, or whether it is education, training, employment, and social services, which is an important ingredient in our budget. That has gone up dramatically in spending, but interesting enough, the funds for education that we prize so highly, as a portion of the budget, have dropped dramatically.

National defense has been discussed greatly. In the last decade, the funding we have spent on national defense has gone up, but the truth is, the portion of our budget that goes to the protection of our budget has dropped as well.

What does it mean? It mean when we take the share of our budget from 8, 9, and 10 percent for paying interest to almost 18 percent, which it will be next year, what we have done is eliminated 8, or 9, or 10 percent of the budget that can be used for important programs that serve people, that serve America, that make our country stronger. It means that our ability to help people has been diminished. It means our refusal to face the problems with regard to the budget has reduced our ability to fund the programs so importat to our country.

We are crowding out. Our crowding out is not just in the marketplace for interest and not just with regard to the individual and the pinch on his or her pocketbook. The crowding out has come in our own budget as well.

What is the effect if our continued deficits? Can we ignore them, as some would say? The truth is, the cost of carrying those deficits, the cost of carrying the national debt, is becoming a crushing burden. There is no question that the continued deficits are going to cause higher interest rates. Each and every one of us is aware of that. There is no question that those high interest rates are going to cause higher unemployment, not lower unemployment.

The programs that we talk about with such enthusiasm to solve the problems of this Nation cannot solve the unemployment problem unless we cope with those interest rates.

What about crowding out? If we continue the deficit program that we have been on, it is clear that we will continue our crowding out of our ability to fund essential programs. So whether it is higher interest, or higher unemployment, or the crowding out of essential programs, the results of our continued ignoring of the deficit problem are bad.

I think many of us recall with some sense of humor the words of John Maynard Keynes, who was criticized at one point referring to the long-term effect of his programs and his suggestions. He replied quickly, pointing out that in the long term we would all be dead. The long term is now. The long term from the 1930's and 1940's and the irresponsibility in Congress of the 1960's and the 1970's has come to pass. In the 1980's we have to face that long-term impact.

It is a little like the auto mechanic who gets on television every now and then. He says: "Pay me now or pay me later." We are at that point. We can pay the piper now and face our problems with regard to the deficit and stop increasing spending for a year or two and bring this problem under control, or we can pay him later. And pay him later we will, because we have no choice.

The problem has grown to such an extent that we have to face it, because our very ability to fund this Government, our very ability to meet our obligations, our very ability to keep the economy moving, is endangered by our irresponsibility with regard to this debt burden. So indeed it is pay me now or pay me later. Let us hope the Representatives in this body who care so deeply about people will understand that those who vote to control spending indeed care about people. Perhaps

they care about people far more than those who would avoid the realities.

□ 2040

Mr. REGULA. Mr. Speaker, I thank the gentleman from Colorado (Mr. BROWN) for his valuable contribution. I think he highlights one of the serious problems of this deficit situation.

Mr. GEPHARDT. Mr. Speaker, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Missouri.

Mr. GEPHARDT. Mr. Speaker, I thank the gentleman from Ohio for yielding, and I thank the gentleman from California as well for taking this time and allowing us to have this discussion this evening on an issue that I think is the most critically important of any problem we could talk about in our national life at this time.

I am going to focus my remarks on how we deal with the problem. I think that previous speakers, both this week and last week, have done an excellent job of explaining why deficits are a problem, and I doubt that there are any Members in this body, or in the Senate, or any economists in the country who do not agree that the deficit path we face in the next 5 or 10 years creates terrible pressures in our economy and complicates any reasonable kind of economic performance.

I think what we need to do is focus on what we do about it, and I would like to focus tonight on two problems that I think the Congress faces in dealing with this issue that make it very, very difficult. One is a problem that Congresses in the past have always faced, and that is that we in our democracy over 200 years ago decided upon a system that diffuses power today as much as one could diffuse it.

Our forefathers decided that we would have a system where the President would be checked by a committee of 535, and so to come up with a consensus on a difficult economic policy like a budget, we have to have a committee of 536 forge a consensus, and that is a very difficult thing to do. In effect, we have 536 ideas of how the budget should be brought into control, and because of that we find it very hard to get a majority in either the Senate or the House to reach that control.

In addition, this is all complicated by the fact that for the first time in our congressional history perhaps, other than in the social security situation, we now are faced with politicians going to the voters every 2 years with the unenviable task of taking something away from them that was given to them by previous Congresses perhaps as long as 20 years ago.

I think it used to be common in this body to vote on bills that gave our constituents things, but in the last few years we have had to take things away, and that is not a happy political activity.

So all of that together, to me, means that it is almost an impossible political situation. We are in a political gridlock. We have the President's idea of how the budget should be controlled, we have 535 ideas here, and we have not enough agreement to make any of those ideas happen.

I really think that what we need to do in order to figure out how to tackle this problem is look at the model that was offered by the social security consensus that was forged earlier this year. I think it is important because that is the only time I can remember in our history when we have as a body of 536 decided upon a way to take some very important benefits away from people. There were some elements in that compromise that I think are important to look at and to use in the budget situation.

First, there was political necessity on the President's part, on the Congress' part, on Republicans' part, and on Democrats' part. Everybody felt an overwhelming necessity to get the problem solved. I am not sure we are there yet on the deficit. We may not be there yet until interest rates spike up or until the economic recovery starts to abort. I hope we do not have to wait that long, but I think we probably will, until everybody feels the need, the compelling need, the overwhelming need, to do something extraordinary to solve the problem.

Second, obviously the approach that was used involved everybody. The President was represented in the Commission, and the Congress was represented in the Commission. It was obviously bipartisan, between Republicans and Democrats and between the President and the Congress, and, importantly, there were outside constituencies represented on that Commission. We had both business and labor, as well as senior groups, that were represented at that table, and they felt a stake in the outcome that was arrived at.

I think that is an important thing to remember. I am not so sure that the President and the Congress alone can solve this problem and bring off a political solution.

Third, there was a political truce, and I do not think we can underestimate the importance of that. I heard Members come onto the floor of this House during the first 5 years I was here and give speeches that they would never, never cut social security. We passed resolutions by a vote of 400 to nothing that we would never cut social security. We passed resolutions that we would never, never include Federal employees in social security. We passed resolutions by votes of almost 435 to nothing saying that we would never tax social security benefits. And yet Members who made speeches on behalf of those resolutions stood in their offices here on Capitol Hill and gave speeches back to their interest groups saying they were going to vote for this compromise because a political truce had been reached.

The SPEAKER pro tempore (Mr. PENNY). The time of the gentleman from Ohio (Mr. REGULA) has expired.

THE FEDERAL DEFICIT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 60 minutes.

Mr. PANETTA. Mr. Speaker, I thank the Chair, and I yield to the gentleman from Missouri (Mr. GEPHARDT) so he may complete his remarks on this subject matter.

Mr. GEPHARDT. Mr. Speaker, I thank the gentleman for yielding, and I will be very brief.

My point is that a perception changed in Representatives' minds, and the perception that changed was that somehow they could vote for something to which they were diametrically opposed a couple of years before because there was a perception that they could vote for it and not be irreparably damaged politically since there has been a political armistice on this important issue. They felt that they could vote for it and have a hope of being reelected again. I think that we are kidding ourselves if we think anybody is going to vote for a budget compromise, with all the pain in it that we know has to exist, without that perception being changed.

Fourth, there has to be an even pain. A lot of Members here have talked about how defense has done this or that and how entitlements have done this or that. Let us not kid ourselves. In social security the pain was evenly divided over 75 years between tax increases that hurt the taxpayers and benefit cuts that hurt the recipients. It has got to be the same kind of arrangement here. The same philosophy has to be followed in working out a budget compromise.

And last, and perhaps as important as any of it, was the fact that once that compromise was arrived at by the Commission and all the parties had signed off, that package came to the Congress and was passed without any significant change. That is the way it has to be done here, because if we come back and start changing it—and believe me, we will still have 535 ideas about how it should be changed once we have got it—we have got to hold hands and hold those hands tight and not change one word of it, because once the elements of the society that have to be at the table have signed off on it, they have to stick. They have to stick through the whole process,

through all the heat, through all the pain, and through all the frustration that will go on during the debate on the package that is arrived at.

So I, with all humility, submit that we should look very closely at the social security experience. I think it provides for us a road map. I am not sure it needs to be exactly parallel, but it provides us with the road map that we need to use to solve this overwhelming deficit problem that we have.

Mr. Speaker, I thank the gentleman for yielding.

Mr. PANETTA. Mr. Speaker, I thank the gentleman for speaking to this issue, and I think the ideas he has addressed are valid.

Certainly the process that has to be involved in trying to find an answer requires the kind of consideration that went into the social security process, because there is no way to deal with this problem unless we can bring all those various parties together. The decisions are just too painful without that kind of unified approach to any answer.

□ 2050

Mr. Speaker, I yield to the gentleman from Florida (Mr. MACK).

Mr. MACK. Mr. Speaker, first of all, I guess I have a couple remarks about the Commission that has been discussed. It may be the way we are going to have to go to solve it. I guess I have some concerns that really we have the responsibility to try to work those problems out. I have heard people mention that we had a commission on the MX, we had a commission on Central America and a commission on Social Security. In essence, we are turning over our responsibilities to commissions.

It may be that in the very real sense, in the political sense, the only way we can accomplish the goal that we all want is to get some sanity back into the spending and taxing policies of this country and to turn it over to a commission.

I would hope, though, that we would have the political will to do it ourselves.

I speak, I guess, from a position of having only been here 8 months and having come from the banking business, and realizing that there is a very real impact that the deficits have on this country, specifically having to do with interest rates.

I think there are two impacts that deficits have as far as interest rates are concerned. The first one is the one that we are really experiencing today when we talk about the difference between real interest rates and the interest rates that we are experiencing, that is, what inflation, the anticipation of inflation is having on interest rates.

Again having the experience of being in the banking business, I remember back in 1973 and 1974 where those of us in Florida who were very active in real estate financing, even though we were in a commercial bank, we made the decision to help our communities grow by investing more dollars in long-term financing and things were going great until inflation seemed to be getting out of control.

We related that inflation to Government spending; so we found ourselves after a few years of heavy investments in long term real estate mortgages, finding ourselves having to pay high rates on savings and yet we had a fixed rate on our mortgages. The end result was that we were losing money.

Things changed. When 1979 rolled around, and in between that we decided, OK, we are going to go back in. We have got to help our communities again, so we invested more funds in long term mortgages and we got burned again in 1979.

I think basically what is happening in the financial markets today and in local community banks is that people are scared. They are looking to the future. They have heard the numbers that my colleague, the gentleman from California, mentioned a little bit earlier, the $1.23 trillion of deficits between now and 1988 and they translate that to what impact those dollars, those deficits, are going to have on inflation and they say, "Look, I am not going to make long term real estate mortgages at today's, what should be today's real interest rate. I've got to protect myself."

So I think one of the things that deficits clearly do is impact the attitude of the financial market about where the rates should be.

The second thing that happens, and I go back to the experiences I had the first several days that I was here in Congress at the hearings that we had on the Budget Committee. The very first statements were that we were looking at deficits, you know, in 1984 and 1985 in the $180 billion to $200 billion range.

The significant point that was made was that if we do that, we are going to consume 94 percent of the net private savings of this country. If that occurs, then we are going to see this thing that we have all talked about crowding out, or the clash between the private and the public sector.

I do not think there is any other way, other than for interest rates to go back up, unless we here take control and reduce the size of those deficits.

Let me move on to a couple causes, because I think that is one of the things we are trying to identify here. It is not only are deficits a bad situation. A couple of things hit me as I went through the process of learning the ropes here in Congress. The first one occurred when I made the first vote. It was a very small vote as far as the immediate dollar impact. I do not know whether you recall that particular vote we had, but that was whether we were going to establish a new committee here in Congress, a select committee in Congress. As I walked around and asked people what they thought about setting up a new committee, what it was going to cost, what it was going to be able to accomplish, how much staff we were going to have, everyone said to me, "We don't need another committee. It costs too much money. We will have to hire more staff."

So being a relatively bright individual, I came to the conclusion, well, I guess that everybody is going to vote against that new committee. Well, that was not the case. Thirty-four other individuals and myself, 35 of us voted against that particular committee. The committee was called the Select Committee on Families and Children. What people said to me afterward was:

> You know, you can't vote against something that is called families and children, because if you do, when you go home to run your campaigns two years from now, you are going to have a candidate who is going to say, "You know what, that fellow over there voted against families and children."

The point that I am trying to raise is that we are going to have to have some political courage and say that we are going to have to stop spending in many different areas if we are going to have an impact on the growth of spending.

The other thing occurred just recently and that was, I was attempting to get a particular project in my district to be included in some report or at least to be included to where it would have a chance to be funded. Without getting into the personalities involved, I basically was taught my first political lesson. If you want to get something for your district, you have to help somebody else get something for their district.

I happen to believe in this particular case that the position I have taken is the right position; reduce spending, cut out a certain project; but I found out if I took that position of cutting out that person's project, I had absolutely no chance of getting the funding for my particular district.

I guess at this point I am fortunate enough to come from a district that I think would rather me take the position of saying that I will give up what we need in order for me to keep up the fight of cutting out some things in other areas.

The point that I am making is that those are political things. Those are psychological reasons that impact why we do things in this House, which leads me to the conclusion that I have had for a long time. Some have men-

tioned it here and said that it is not what we should do, and that is to have a balanced budget amendment. I do not think a balanced budget amendment is the solution. It is something that is going to have to come after we have taken control of spending. If we could pass a balanced budget amendment, if we could tomorrow, we would not be able to balance spending and balance this budget immediately; so it has to be something that is done in the long run.

The last point that I would like to make is that during the last week I went down to my district, as I am sure many of you did, and had your town meetings. The question that I raised at those town meetings was, "If you had the opportunity to try to cut spending and control this budget, what would you do?"

We talked about how much money we spend on national defense, $213.5 billion was budgeted for 1983. We talked about income security, which is $277.5 billion, and we realized that we would have to treat the problem in both those areas; but I happen to come from a district that has the oldest people in the country. The average voting age in my district is almost 60 years of age. When I raised the question to them, what did they think we should be doing about automatic cost of living adjustments, what should we be doing about entitlement programs, their response, approximately 95 percent indicated we ought to either eliminate automatic cost-of-living adjustments or we ought to adopt some formula that reduces the increases in those benefits.

So what I am saying is that I happen to feel that the American people are willing to make the sacrifices in order to get spending under control. What they want to see is their political leaders have the courage to stand up and give them that leadership.

Mr. PANETTA. Mr. Speaker, I thank the gentleman from Florida.

I yield now to the gentleman from Colorado (Mr. KOGOVSEK).

Mr. KOGOVSEK. Mr. Speaker, I thank the gentleman from California.

Mr. Speaker, as other previous speakers, I wish to commend the gentleman from Ohio and the gentleman from California for putting together these special orders on a very important issue, not only this week but last week also, because I think it is this kind of discussion that is going to get us on the road to some kind of an economic recovery.

Mr. Speaker, I am not an economist and I am not a banker but over the last few months and years I have talked with a number of these people and we presently have a real contradiction about whether deficits have any impact on interest rates. Secretary of the Treasury Regan is not an economist or a banker either but it appears that he has not necessarily been talking with these people lately, he is just talking. The same may be said for Deputy Press Secretary Speakes. In last Sunday's Washington Post, the following exchange occurred between Speakes and some reporters:

Q. He (Reagan) said high deficits cause high interest rates.

A. Well, interest rates have been cut in half and the deficit has doubled.

Q. Well, was he wrong Larry?

A. No. He is never wrong.

Q. Does that mean we could bring the interest rate down even further by tripling the deficit?

And so the press conference went. But even this information, on further investigation, is not quite accurate. The deficit has not doubled, it has more than tripled since the President took office, and interest rates, real interest rates have almost doubled. Granted, nominal interest rates are down, but it is real interest rates that are what count.

Secretary Regan said that there is no reason for interest rates to be as high as they are, that the deficit is not the cause, and that the banks are to blame. While the issue of banks keeping interest rates high is of continuing concern and should be investigated, I must question the Secretary's theory that deficits do not impact interest rates. If our current deficit, and our outyear deficits, are projected higher, in real and nominal terms, than any other period in this country's history, how can he so emphatically say there is no correlation?

If there is no historical precedent to operate from, then it is all mere speculation. But then again, Mr. Regan is a stockbroker by trade and he has made his life in the speculating business. That aside, let us look at some other facts.

In his state of the Union address, the President stated that the deficits we are facing are not rooted in defense spending nor are they rooted in tax cuts. And the fact is that the deficits come from uncontrolled growth of the budget for domestic spending, according to the President. That, like all economic beliefs, is theory, but on that theory I must take a different view.

I do agree with the President that the deficits are not caused solely by the increase in defense spending, but this is primarily because we have paid for these increases with a shift in the budget allocations between domestic and military spending. This includes cutting the funds for nondefense discretionary programs in half. These are people programs. So the defense increase was paid for, then why do we have these persistantly enormous deficits? I believe we must look toward the tax cuts.

It truly bothers me at times that those of us who voted against the administration's tax cuts because we believed they would increase the deficit, are continually labeled as big spenders, when what we said would happen has actually happened. I am not in favor of tax and tax, spend and spend. What I am in favor of is realism in our economic policy. Cuts in spending, where we can afford it, cuts in taxes when we can afford it.

Now, is it really coincidental that the budget deficit from fiscal year 1982 to fiscal year 1988 has been projected to exceed $1.1 trillion and during the same period, the revenue loss because of ERTA is projected to be $1.5 trillion? I think not. As a noneconomist, it seems to me that if we had not cut as much, as deeply, as fast, we would not be in the deficit crisis we are in today. The cuts were popular, to some, but they were not responsible economics. However, that, too, was a difference in theory, and I cannot blame the President, the administration, or Congress for trying them. I only wish those of us who did not support it would stop being chastised, and that we will change the course, so we may correct the situation.

In the economic report of the President for this year, it was stated, and I quote "with a limited amount of savings available for borrowing, high budget deficits would cause interest rates to rise . . ." Now, who are we supposed to believe? We have a President who campaigned on the horrendous effects of a $59 billion deficit. Now it is projected to be $200 billion for years to come. One person in the administration says deficits cause higher interest rates and hurt the recovery. And another says it does not. Mr. President, what is the administration's position? Regan says one thing, Feldstein says another, and Larry Speakes does not know. If deficits increase interest rates, which hurts the economy, please let Mr. Regan and Congress know your feelings. If they do not, tell us so we can act accordingly.

Since we, the Congress, get conflicting answers to our questions, it is up to us to solve the problem. Blaming the problem on a particular economic theory is one thing, but it does not solve the problem; that is something we must do.

If our fiscal year 1984 outlays are budgeted to be about $850 billion, and our fiscal year 1984 deficit is projected to be about $175 billion, we must ask ourselves if it is possible to reduce these outlays by the required 20 percent to balance the budget without touching defense spending or interest payments out of the budget. That leaves us with about $510 billion to find the money to balance the budget.

That computes to cutting this spending by more than 34 percent. Personally, I do not think this can realistically be accomplished. So what alternatives

do we then have? The President says he will veto legislation to raise taxes and it does not appear feasible to cut spending enough. Even with an economic recovery, this will not balance the budget. And, I do not think any one here wants to continue with deficits as they are projected. Must Congress try to override vetoes? I certainly hope not. What I prefer is to see all positions modify to create a bipartisan concensus.

A few months back, a group of individuals put together what they called a bipartisan budget appeal. This appeal included an extremely distinguished list of public and private sector leaders. They concluded that we should slow the growth in domestic spending, slow the growth in defense spending, and increase taxes. This was a three-part program, implemented as a program, and it makes sense to me. In fact, it sounds a lot like the recent budget that passed both Houses. We have slowed the growth in domestic spending. We have slowed the growth in defense spending. But we still have not come up with the fortitude to implement the third phase. If we only accomplish two of the three objectives, we will only reduce the deficit by a lesser amount. We need bipartisan leadership, and hopefully the administration's support, for enacting this three-part appeal.

Personally, I believe we have cut domestic spending and increased defense spending disproportionately. I would have liked to see less cutting of assistance to the unemployed, the undereducated and the older citizens. I am still willing to go along with a program that will make additional cuts in domestic spending, if we are going to really implement all aspects of the appeal I spoke of earlier. And, I would hope that those who would like other options would also modify their position so we can implement a real deficit reduction and budget balancing program.

I do not have all the answers, but I do have some questions. Nevertheless, I have been willing to cosponsor bills to slow the growth of the automatic COLA increases, to sunset many Federal spending programs, to go to a 2-year budgeting cycle so we can better manage our fiscal affairs. None of these are a panacea, but we must do something. We must reform our entitlement programs. We must make changes in our budgeting process that are necessary. We must reform our tax code to close down the tax expenditure drain. Basically, we must change our ways, and the only time Congress has shown the guts to make major reforms is during a crisis. Well, here we are. Let us not let this opportunity slip by. I look forward to working with all of you to make fair, equitable, and necessary changes. The deficits will not go away by themselves, but if we the Congress do not correct this situation, we will go away and others who are willing to face the challenge will take our places.

I believe this body can change with the times, and that we can make the hard choices to accomplish these goals. This special order session is a step in the right direction because, while this does not accomplish any specific proposal, it establishes a needed forum to start the discussion to come up with the solutions we must have.

□ 2100

Mr. PANETTA. I thank the gentleman from Colorado. He has made a valuable contribution to this debate. I think he has presented some thoughts that all of us can benefit from in trying to find the answers to this problem.

I yield as much time as the gentleman from New Hampshire (Mr. GREGG) may use in making his statement.

□ 2110

Mr. GREGG. I thank the gentleman from California and, like the other speakers on this very critical issue, I wish to commend the gentleman from California (Mr. PANETTA) and the gentleman from Ohio (Mr. REGULA) who, as members of the Budget Committee, have been leaders in the attempt to bring some order to our budgeting process and specifically have raised this issue of our deficit problems.

The discussion which has gone before over the last two special orders here has been excellent. It has concentrated to a great extent on the effects of the deficit, the crowding out effect, the inflationary down-the-road effect, and on the functions of the deficit, the fact that we have our deficit which is being driven by two factors: First, our spending side, which is a situation where we have 77 percent of our spending into three basic areas: defense, entitlements, and interest payments, three areas which we as a Congress have been unwilling or unable to address for a variety of reasons.

Second, the tax side, the tax benefit, tax expenditure side, which has created a Tax Code which is so chaotic that I myself, who, after law school, went to 3 years of graduate school in order to get an LLM degree, and I practiced tax law for 3 years, I, myself, have someone fill out my own tax forms. It is a mess and we all recognize that, and is a totally incomprehensible piece of legislation which needs to be dramatically changed.

Those areas have been discussed, I think, with excellence and with substance.

The area which I would like to discuss is what is the cause, and I think we have had some discussion tonight about what is the disease that these symptoms represent.

I think we have to at this point look ourselves in the face as a Congress and recognize that over the years we have produced an institution which depends for its election on constituencies who benefit from either spending or tax expenditures which we create. We have gotten to the point where we have created constituencies that are demanding tremendous amounts of spending in excess of the amount of taxes which they are willing to pay.

It is our fault for reacting to that constituency and not having the courage to stand up to those constituencies which are myriad in their forms. But it is also, I think, inherent in the nature of our Government that such constituencies would inevitably develop influence within the legislative process because those constituencies which are most interested in an issue, whether it happens to be a spending issue or a tax benefit issue or a tax expenditures issue are going to be the ones to bring the most influence on the determination of that issue because they have something to lose or something to gain.

And in a capitalist society the person who is going to make the money is the person who is going to be most involved in the issue and that is certainly true also of the constituency which is going to benefit from the Federal expenditure, the constituency which is going to benefit from the Federal tax expenditure.

I think Theodore White really hit the nail on the head in his recent book "America in Search of Itself" where he said that 50 percent or over 50 percent of America today depends in some way or other on the Federal Government for its sustenance and support and, therefore, it is not unusual that that 50 percent of America, which is a very activist political percentage of America, should elect to Congress people who are going to be reflective of their views.

The classic line that yes, you can cut spending but do not cut my program, or you can raise taxes but do not affect my tax subsidy, are the lines which really dominate us as a political body. Therefore we must face ourselves as the expression of the problem which is driving the deficits in this country.

In order to do that I would represent that there are basically three things that we can do as an institution to reform our ways in order to try to seek some way out of this morass, this political morass.

One of the things that we can do has been raised as a proposal by the two Members who have organized these special orders, the gentleman from California (Mr. PANETTA) and the gen-

tleman from Ohio (Mr. REGULA) which is the commission concept.

We have unfortunately had to shift to government by commission as we have straitjacketed ourselves on other issues.

I do not resist, in fact I think I would support, in fact I do support the concept of a commission. But a commission is really just a one-time solution.

This problem, since it is the gravamen of the issue which the Congress deals with, the issue of spending money and taxes, the subject is not going to be with us one time but is going to be with us forever. Therefore, although a commission may remedy the problem and cure the disease, I believe that unless we do something more fundamental to the way this institution is managed, we are going to find that the disease reawakens and it is malignant and it arises again. It may not, depending on the strength of the commission report, it may not arise for 5 years, 10 years, but then again, the way things work around here, it may arise within 2 or 3 years.

So I think beyond the commission we must look at a restructuring of the manner in which the House proceeds.

In order to do that I make a representation that as a member of the minority I am hesitant to do but I think we have gotten to such a critical stage we must do it. That is that we have to centralize some authority within the House.

We have gotten to be such a disjointed institution as a result of the concerns raised out of the early 1970's that we are no longer able to energize any sort of discipline, especially in the financial area.

It seems to me, and I recognize that centralizing authority inevitably threatens the minority, but it seems to me if we are going to get aggressive action in the area of spending, we are going to have to do it through having an authority within the House which can exercise that authority and exercise it with strength.

The logical authority for that is the Budget Committee which presently has before it the ability and has as a capacity the ability to exercise reconciliation. We have not readily utilized that tool.

Once we have utilized it effectively, but we have not utilized it as aggressively as we could utilize it.

I think that there are political constraints which affect reconciliation and make it difficult to utilize.

So I think what we must go to is beyond the reconciliation issue and there are now pending a numbe of ways to strengthen the Budget Committee's ability to get discipline into the spending processes of the House.

I would hope that as we go down the road we will seriously look as a body at some of these and some of the ones I would throw out are the institutionalization of 302 with some force behind it so that you could not waive 302 without significant vote of the House.

An attempt to go to a single budget resolution or possibly even an approach suggested by the gentleman from Wisconsin (Mr. OBEY) which is to go to a single budget resolution which actually involves an appropriation process within the budget process over a month's period.

But, in any event, something must be done to significantly strengthen the centralized authority and centralize more aggressively.

I realize that centralize may be too expansive a term because we will never do that as a Congress. But at least to identify within an organization such as the Budget Committee more authority and the ability to manage spending of the House.

A third element which I think we have to look at—and again this may be heresy for someone to raise—is the question of electability of Members of Congress. The reason we spend this money, the reason that we give these tax benefits is because we recognize that that is essential for reelection, that that 50 percent of the constituency or more than 50 percent of the constituency which Theodore White so adequately acknowledged to be out there which is electing the majority of this Congress is not going to elect us unless we take that action and, therefore, either we hide behind the broad brush approach, or we too often fail and fall prey to the interest groups which have elected us.

In order to address that I think we have to limit the electability of the Members of Congress. I have supported and continue to support a constitutional amendment which would limit the number of terms which a Member could serve in the House to 12 years, 6 terms, and in the other body to 2 terms, 12 years.

The effect of that, of course, would be to cause a different mind set amongst Members when they arrive here at the body. They would know that their term was limited, that this was not going to be their life's work, and that this would be a phase within their life.

Therefore, I think that they would address the whole issue of spending and the pressure that comes from their constituencies in a different tone and from a different perspective than the Members who presently serve here, such as myself, who perceive that our terms are only limited by our ability to get reelected and, therefore, there is constant pressure on us to be responsive to those constituencies which demand spending or tax benefits in order for us to get reelected.

So those I see as three substantive changes which we could make in the process and which would address the disease specifically.

First, the excellent idea of a commission.

Second, the centralization or identifying of more power into a unit such as the Budget Committee.

Third, the limitation of terms of Members of Congress.

I would also like to again congratulate the Members who have orchestrated this very timely and very important discussion on the issue of the deficit.

□ 2120

Mr. PANETTA. I thank the gentleman from New Hampshire for the valuable contribution he has made. He has made a thoughtful statement regarding the institutional problems that contribute to the deficit issue that faces us all.

GENERAL LEAVE

Mr. PANETTA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PANETTA. I also again thank the gentleman from Ohio for his cooperation in providing the special order. I thank the Members who have made a contribution to the special order in discussing the causes, discussing the problems both institutional and economic and discussing the potential solutions trying to deal with this deficit issue.

This is a serious problem, it is a serious challenge.

We can think of a million and one reasons why the Congress, why Members can dodge the reality of having to deal with this challenge. But the fact is that if it is not a political problem now, we are looking at the most explosive political problem within the next few months, because the deficit is such a crucial issue to economic recovery, to economic strength, to the ability of this country to respond to its responsibilities here and abroad.

So, ultimately we must face it. I guess, hopefully, these special orders have contributed to some sense of commitment that we have to face it now.

Mr. REGULA. Mr. Speaker, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Ohio

Mr. REGULA. It has been interesting that in the course of the special order there seems to be some consensus emerging on the idea of a special commission. I would be curious as to whether the gentleman thinks that appointment of such a commission would give enough confidence in the

marketplace that there would be a willingness to wait for results from that without having this explosion in interest rates and some of the things that will result if we fail to address the deficit problem.

Mr. PANETTA. I guess my sense on what kind of particular tool is used is not so much committed to what we define that tool as, whether it is a commission, or summit meeting or whether it is a conference.

I think what is needed is to bring together that coalition of the executive, the legislative branches, business, what other areas are important to developing that compromise.

It appears that, obviously, the commission is the most viable tool that we have used over the last few months to try to respond to that problem and, therefore, I can understand why Members feel that that is a reasonable approach to try to take.

My view is the tool does not matter as much as the goal of seeking all of the players in one room to come up with that answer, because that I think is the most important thrust right now.

Mr. REGULA. If the genleman will yield further, if there were to be a consensus emerging within the House and the Senate and, of course, in the executive branch, would the present tool of reconciliation provide an adequate mechanism to accomplish the objectives that have been outlined? Assuming of course the consensus?

Mr. PANETTA. I do not think there is any question but that, as the gentleman from Minnesota pointed out, reconciliation is really the only tool of enforcement we have now in the budget process as the situation exists, as the gentleman well knows. Therefore, if in fact a commission or a summit meeting resulted in a consensus as to what steps needed to be taken I think it would not take us very long in the Congress to then implement those kinds of proposals using the reconciliation tool as the key process, the key legislative process for getting it accomplished.

Mr. REGULA. I thank the gentleman from California (Mr. PANETTA).

Mr. PANETTA. I thank the gentleman from Ohio (Mr. REGULA).

● Mr. SLATTERY. Mr. Speaker, I wish to commend the gentlemen from California and Ohio for arranging a discussion of what many would rather ignore—the enormous Federal deficit.

Deficits can be ignored only at our own peril. In my opinion, $200 billion deficits are the most urgent and overriding economic issue we face as a nation.

One prevalent view holds that our current mild recovery, which is starting to show signs of cooling off, will pull us out of danger. I have no idea if such a mistaken opinion is based on a sense of resignation or cynicism, but I do believe it is a false hope eagerly accepted by far too many in Washington.

Conventional thought holds that nothing will be done about the deficits until after the 1984 elections. The idea that deficits are of little consequence in an election year is even more of a risk than the famed riverboat gamble that helped propel us down this dangerous course in the first place.

We must return to reality. Operating in an economic dreamworld, with frail hopes and intentional procrastination, will only hasten the day of reckoning.

We were promised a balanced budget by 1984. Instead, we have record $200 billion deficits stretching out for years to come. A great deal of our troubles can be traced to the discredited notion that the economy will boom with two contradictory schemes: Enact the largest tax cut in U.S. history and embark on the most massive peacetime defense buildup of all time. As troubling as that contradictory theory was, we should be even more worried about mammoth deficits that will remain even if the economy does improve.

Huge future deficits have been built into the budget because of failed tax and spend policies. We will pay a horrible price for our past follies unless these deficits can be dramatically reduced.

The Morgan Guaranty Survey of August 1983 put the danger in perspective:

> Unless checked, the Treasury's red ink will add over $1 trillion to the public debt during the fiscal 1984–1988 period—a near doubling in just five years. If such a rise occurs and market interest rates remain at approximately present levels, the Treasury by fiscal 1988 will find itself facing about $220 billion of interest payments annually to service over $2 trillion of outstanding debt. Such an interest burden would be roughly equivalent to current spending on national defense.

The hazards should be obvious. Federal spending policies and the Government's bloated demand for money to finance its debt will continue to crowd out private investment. Federal spending this year will be 25 percent of GNP, a peacetime record.

Our unwillingness to create a sane spending policy means that the structural portion of the deficit will climb to an unprecedented 4 percent of GNP in 1987, compared to an average of 1 percent in the 1960's and 1970's when the economy was admittedly stronger.

The victims of ongoing Federal deficits will be ourselves and future generations unless the administration, the House and Senate, and the public can work together to reduce Government spending in a fair and responsible way.

Left untouched, the Government's voracious appetite for money threatens to consume 75 to 80 percent of net private savings in the United States.

The scramble for savings left after the Government satisfies its needs will result in higher interest rates that will cripple productivity, create more unemployment, and worsen our trade deficit. It is storybook economics to say there is no connection between deficits and interest rates.

Because the deficits will crowd out private borrowing needs, corporations and businesses will be unable to expand. I further believe there is a direct link between deficits and unemployment. The heavy financing needs of the Federal Government will create a massive obstacle to productivity, and particularly to small businesses, which are responsible for a vast majority of new jobs and innovation.

High interest rates have reduced the competitiveness of U.S. goods on the world market. Continued deficits will only worsen an already precarious trade situation.

The No. 1 industry in Kansas is agriculture. Farmers know all too well what high interest rates have done to their lives and business. They have suffered what I refer to as a triple whammy—high interest rates have hit them hard with huge operating expenses, appreciating land prices, and a noncompetitive price for their products in the world market.

An expanding economy will mean lower interest rates and reduced unemployment. A deficit-ridden economy will lead to intolerable interest rates, more unemployment, low productivity, and stagnation.

To avoid further calamity, the all-too-easy spending practices of the past must halt. The answer is a dramatic reduction in the growth of Government spending, and it will require courage on the part of everyone connected with the Federal budget. The President, the House, and the Senate have all had a part in creating huge deficits; now they must begin the process of bringing the budget under control.

It will not be easy because the choices are so limited.

The growth of defense spending should be limited. Some increase in defense spending is necessary, but not to the degree sought by the administration.

Second, we need to limit the growth of entitlement programs, which now account for almost half of the Federal budget. Benefits from nonmeans tested entitlement programs are important to millions of Americans, and current benefits should not be reduced. The rate of future growth in these programs should be moderated slightly. I believe the cost of entitlements is not uncontrollable but has rather been allowed to grow uncontrolled because Congress has lacked the will to impose discipline on this area of the budget.

Sufficient revenues should be raised so the Government can pay its bills. It

is interesting to note that the large income tax cuts are being financed by Government borrowing.

The fiscal condition of the Federal budget is intolerable and inexcusable. The choices for reducing deficits are painful, but they can be accomplished with commonsense, responsibility, and fairness.

All we need is the political will.

It may be politically unpopular to begin a deficit reduction plan, but we will all be paying a heavy price in a matter of months when the economy begins to sour again and the public realizes we failed to act.●

● Mr. OTTINGER. Mr. Speaker, I would like to commend my colleagues from California (Mr. PANETTA) and Ohio (Mr. REGULA) for calling this special order on the deficit. It is absolutely imperative that Congress act to reduce the swollen deficit; failure to act will invite economic ruin.

It is usual and proper to suffer a deficit during an economic slump, although the size of Mr. Reagan's deficit is unprecedented in our history. As employment declines, the Government spends more to compensate the unemployed and collects fewer revenues. But as the economy begins to improve, the deficit, under normal circumstances, should decrease. Despite the current "recovery" which the Reagan administration is touting, there are no signs of a shrinking deficit. On the contrary, the administration projects triple-digit deficits for the foreseeable future and there are indications that the recovery could very well be strangled by this deficit before it takes hold.

This enormous deficit has been brought on by President Reagan's misdirected economic policies. He slashed taxes and endorsed soaring military spending. He abandoned job programs, work incentives, and Government training efforts. He encouraged a restrictive monetary policy that discouraged investment. The outcome was the worst recession since the Great Depression, double-digit unemployment, a decimated revenue base, and $200 billion deficits as far as the eye can see. Only recently has this country begun to recover from this onslaught, though the so-called economic recovery remains weak by historical standards.

In order to shrink the deficit which is plaguing our economy our economic priorities must be redirected. Reducing the deficit requires a full-scale recovery which will produce a stable and thriving economy. We must institute an economic program which promotes high investment, high production, and the creation of jobs in every community for those who need work.

I have been working with a group of Democrats in the House on an maximum production plan: the national economic recovery project. The principles of the project are outlined in a statement "A High Production Strategy To Rebuild America" which has been endorsed by 153 House Democrats. We are currently drafting legislation, based on these principles, which will be introduced by the end of session.

The central thrust of the project is: High production, high investment, and maximum employment as the means by which we can bring about economic recovery, restore the tax base and reduce the deficit. Nancy Barrett, chairman of the department of economics at American University and formerly with the Congressional Budget Office, developed a preliminary series of economic scenarios based on the project's proposals. Under a variety of high production policy options, the study indicated that by 1984 deficits could be reduced to as little as $84 billion and by 1987, to $67 billion. The CBO estimates, the deficit will remain at an intolerable $179 billion under current Reagan tax and spending policies.

Let me briefly outline for you the goals of the project which will bring about economic recovery and reduce the deficit:

The Federal Government will nurture investment, innovation, and growth in the private sector. Business, labor, and Government will work together to rebuild our aging industries and promote new technologies. Funds will be provided to rebuild the national infrastructure. Meanwhile the Fed will to respond to national economic policy be reducing interest rates and insuring there are sufficient capital for investment.

The tax base will be restructured to close loopholes, encourage investment, and thus generate new tax revenues.

An inflation control program will be enacted aimed at controlling prices and wage increases through a tax incentive plan to reward wages and price restraint, together with specific measures to relieve inflation in the necessities; namely health, food, housing, and energy, which have led inflation in recent years.

The billions of dollars which have been poured into the Pentagon by the Reagan administration will be redirected to creating jobs and rebuilding industry. The defense budget will be cut to no more than 3 percent real growth thereby forcing the Pentagon to eliminate its blatant waste.

These policies will foster strong economic growth in the next 5 years. As our industrial capacity is rebuilt, as workers are rehired, the direct result will be a dramatic decrease in the deficit which is essential to sustained recovery. The tax base will be rebuilt as the economy begins to grow and produce revenue.●

● Mr. YATRON. Mr. Speaker, I rise to join with my colleagues on this most important discussion on the deficit issue. I want to take this opportunity to commend the gentleman from California (Mr. PANETTA) and the gentleman from Ohio (Mr. REGULA) for taking the initiative to focus our attention on the potential long-term impact of deficits and possible solutions to this problem.

Our economy is rebounding from the most severe recession since World War II. If this momentum is to be sustained, deficits must be brought under control in an effective and prudent manner.

A considerable portion of the deficit is recession induced. High unemployment means a loss of revenues to the Treasury and more emergency appropriations to stave off the catastrophic consequences of economic downturns. To a degree, the current huge deficit reflects the severity of the recession. There is still over 9 percent unemployment and industrial capacity in many sectors is still underutilized.

Therefore, we must continue to address the unemployment situation in all its dimensions. We cannot expect significantly lower deficits while over 9 percent of our population is unemployed, and there is little likelihood of any appreciable decline in the jobless rate in the near future.

Even with lower unemployment, deficits are still expected to be high by historical standards and action is warranted to address this issue. We are fast approaching that critical period where deficits could prevent us from reaching new heights of economic progress and return us to higher levels of inflation and interest rates.

The reduction of the deficit is important because as the Government increases its borrowing to finance the difference between revenues and outlays, it will use a greater portion of the available pool of credit, crowding out the private sector and creating higher interest rates. If the Federal Reserve Board tries to meet borrowing needs by expanding the money supply, inflation will ensue.

Moreover interest on the national debt represents the third largest area of Federal spending, accounting for 13 percent of outlays.

The answer to the deficit problem is not a dramatic increase in tax rates, or is it radical budget surgery. The answer is a balanced, evenhanded approach placing tighter reins on Federal spending, while closing tax loopholes and other unjustified tax advantages.

We must continue to explore possible alternatives to reduce the deficit in a sound, prudent, and bipartisan manner. I am hopeful that this discussion here today will serve as a springboard to greater action and create a positive environment which will enable us to make the necessary deci-

sions to guarantee long-term economic growth.●

● Mr. SKELTON. Mr. Speaker, I appreciate this opportunity to address in a special order the long-term impact of deficits on interest rates. Ten days ago I met with business leaders from every part of my congressional district representing many different types of small businesses. During our meeting, they were asked to write down the major problems that face their businesses today; 85 percent of those responded listed high interest rates and uncertainty about future interest rates as a primary problem. They understand that when the Government, because of huge deficits, soaks up the majority of the available credit, interest rates remain high and this tends to crowd our businessmen and their customers out of the credit market.

The real damage is from the long term and self-perpetuating side effects of high interest rates, Mr. Speaker. It has a chilling effect on the business growth and activity we need to create a healthy economy. The businessman or woman that is uncertain about the future and cannot depend on the availability of reasonable credit will not expand his business or create new jobs. Neither can he commit new funds to innovation, research, and development. That is the underlying danger of high deficits. Until the business community is convinced that solid action is being taken to face the deficit problem in a responsible manner, then I believe that the healthy economic growth that we need cannot occur.●

● Mr. GLICKMAN. Mr. Speaker, this discussion is badly needed because it seems that many who have long argued that deficits are a problem have now decided that that is no longer the case. Certainly, differing economic conditions can effect the relative impact of deficits, but there is absolutely no doubt in my mind that deficits do have a negative impact on the economic well-being of this country. That is especially true when the deficits are at today's massive levels and when they are with us for long durations as appears likely unless we decide to deal with the budgetary problems confronting us.

As far as I am concerned, all of the rationalization about the benign nature of current deficits is just hogwash. The huge deficits we confront are largely responsible for interest rates which last year were 8 percent above the inflation rate. Traditionally, the cost of money as reflected in interest rates has been about 3 percent over and above the inflation rate. The fact that those rates have surpassed the inflation rate by 3 percent instead has definitely slowed economic recovery. Interest-sensitive industries remain extremely jittery. Housing starts dropped in June and July; they went up in August, but at the same time new construction permits dropped off. Realtors are predicting that the increase in housing sales this year will be followed by significant dropoffs next year and in 1985. Likewise, while auto sales have increased dramatically in recent months, concern continues to be expressed within the industry that it might not hold up. Net farm income was $7.6 billion last year; it had been $14.8 billion in 1979. And, from an overall perspective, new manufacturing orders were down $10 billion in 1982 from 1981; similarly, there was a drop in orders from June to July this year.

I am sure that many have decided to change their perspective on the deficit problem because they simply do not see a palatable way out of this dilemma. The general wisdom is that the deficits will not be dealt with until the 1984 elections are behind us. To that, all I can say is that kind of general wisdom, if it prevails, will only serve to fuel the cynicism which exists around the country about the kinds of decisions that come out of Washington.

I am afraid some others might have changed their views about the deficits because of whose deficits they are this time.

WHAT TO DO

Enough about the problem. Let me shift now to what can and should be done to get the budget on a track toward reducing deficits and, before it is too late, back into balance. First, let me stress that the budget is the responsibility of elected officials—the President and the Congress together. It is too fundamental to our Government to pass the buck, even temporarily, to a national commission to come up with a budget plan. Instead, we need to knock heads among ourselves, put aside our own budgetary preferences and develop a comprehensive plan that necessarily will affect every aspect of the budget.

We do need to be alert to whatever steps we can take to modify every program that comes before us to make them more cost-effective. For example, steps must be taken to end abuses in contracting that have resulted in the Government paying thousands of dollars for nuts and bolts that cost only a few cents to produce.

We also must assure that changes we make result in real overall savings to the Federal Government. We need to consider the ripple effects of changes; some ideas that look like they would mean savings actually end up costing us more in the end. Two examples immediately come to mind. First, the 1981 Budget Reconciliation Act made a number of changes in public assistance programs aimed at trimming the welfare rolls. As it turns out, some of those changes served as work disincentives encouraging people on the margin economically to decide they were better off giving up low-paying jobs and accepting welfare. Second, in an attempt to make savings in the food stamp program, new legislative requirements were imposed calling for monthly reports by every recipient whether or not their situation has changed in any way. The result, according to my State's department of social and rehabilitation services, has been far more costly in errors than any anticipated savings. In short then, we need to carefully scrutinize every Federal program to see where we can make changes that will eliminate inefficiency and inequity. There are plenty of savings that can be achieved if each of our committees would meet and report out bills to make those kinds of savings.

THE BROAD PICTURE

Beyond that, and more importantly, we need to look broadly at overall budgetary reforms that will have big impacts on our deficits. For example, I have recently asked to be added as a cosponsor of legislation introduced by Budget Committee Chairman JONES to scale back both the formula for cost-of-living adjustments in a number of entitlement programs and, likewise, to reduce the planned indexing of the Tax Code. By hitting both the expenditure and revenue sides of the problem, the impact will be balanced in terms of who bears the cost. That is fair, and only by adopting fair approaches to these difficult problems will we be able to sell the unpleasant solutions to this serious problem to the American people.

On a positive note, I would point out that we can deal with this budget problem without having to resort to massive cutbacks in Government benefits on which people have come to rely. Instead, in all likelihood, rational revisions in current programs and a concerted approach to dealing with the automatic changes built into a wide range of programs and the Tax Code, coupled with normal economic growth if that can be sustained, can put us on course to bringing expenditures into line, thus eliminating the deficits.

Taking this approach would not mean balancing the budget overnight. With deficits of $200 billion projected in the administration's budget for next year, the changes that would be necessary to achieve an instant balance would have unacceptable economic consequences. Still, having talked to many financial experts—on Wall Street, in government, and, most importantly, in Kansas—I am convinced that there is a general realization that the economy will respond positively to seeing a plan put in place that will mean consistent incremental deficit reduction. Our economy is resilient; it has shown that. It will help us pull out of this, if we help.

IN CONCLUSION

I am saying we have to be realistic in dealing with these deficits. All of us, liberal Democrats to conservative Republicans, the President and the congressional leadership, have to be willing to be flexible, to accept that we cannot have everything we might like in the budget, and to recognize that others are not going to give up everything they might like to have either. We also need to recognize that the $200 billion deficit, let alone the trillion dollars in national debt, did not appear overnight, and we cannot expect to slay the budget dragon with a single blow.

In wrapping this up, I also think we need to look closely at changes in the Budget Act to keep spending and revenues generally in line. Basically, we need to move in the direction I proposed legislatively several years ago and which has been popularized recently as "Pay As You Go." In effect, we need to get in the habit of routinely including provisions in the same legislation which authorizes increased expenditures a means to pay for it, either by reductions in other spending or by raising the needed revenues.●

● Mrs. BOXER. Mr. Speaker, as this body is well aware, a new economic terminology has been introduced with the election of this administration. The concept, widely quoted, of Reaganomics, first came on to the scene in 1981 when President Reagan amended the budget request for fiscal year 1982 and proposed to cut taxes and entitlements and increase spending in specific areas. The result of this legerdemain is that the United States will have a deficit estimated to be as high as $203 billion, the highest in its history.

It is clear that there are some serious implications that must be examined and addressed if we are to maintain the current economic recovery. If the problem of the deficit is not addressed, and solved, then it appears to be a recipe for a new upward surge in interest rates, higher inflation, and a crowding out of private capital investment caused by excessive borrowing on the part of the Federal Government.

The prospect of large deficits throughout the business cycle expansion, work now to maintain real long-term interest rates at extraordinarily high levels. Such high rates tend to sap the vigor of a strong economic recovery.

Ideally, as the economy recovers, we would see the release of investment capital to finance inventory accumulation, business-capital formation, housing and so on. The President's deficits are so large that when the Federal Government must borrow to meet them, investment capital for private concerns will dry up. The private sector will be crowded out of the market.

To prevent capital from drying up the Federal Reserve could print more money. Should they do so inflation will most certainly rise and the economic recovery would be derailed.

Thus we are on the horns of a critical dilemma. We can see private investment crowded out and interest rates increase or we can have a return to runaway inflation. Neither alternative is desirable.

The deficit must be reduced this year and particularly in the out years of fiscal year 1985 and fiscal year 1986. We cannot allow the current economic policies of the administration to continue as they will become a greater and greater hardship on the American people.

There are a number of alternatives to the current policy and I hope that Congress, in its wisdom, will choose to change the course and guarantee and economic recovery that will benefit all the American people.●

● Mr. HATCHER. Mr. Speaker, mounting Federal budget deficits have reached the point of impending crisis which, if action is not taken, will undermine our economic recovery and damage the security and stability of this Nation for decades to come.

As we discuss this situation today, the impact of Federal budget deficits threatens to wreck many of the dreams Americans have cherished since the founding of this Nation. Absurdly high interest rates, which have denied homes to many and bankrupted others, and inflation, which has eroded the savings and security of our elderly, together have threatened the hopes and aspirations of young people, wage earners, parents of children, and those who have long worked for a well deserved retirement.

It serves no responsible purpose today simply to point the finger of blame at any political party or individual. The question of responsible government fiscal and budgetary policy transcends party lines and partisan interests. We are talking about the survival of our free economy and the maintenance of our American way of life.

Within the lifetimes of those of us in this Congress, the American people have willingly shown the determination to make whatever contribution or sacrifice found necessary to preserve our security and our freedoms. If general sacrifice is called for to overcome these terrible deficit cycles, I have no doubt that our American people will once again prove their strength and commitment.

It seems to me, though, that two first steps are essential to lay a basis for credibility to our efforts to get the Government's house in order: We must review our Federal tax laws to make them simple and understandable and we must eliminate unfair treatment and loopholes to insure that everyone, individual and corporation, pays his fair share; and we must begin to insure our commitment to balancing Government revenues and expenditures.

Last year, I was happy to have the opportunity to cosponsor and vote for the proposed constitutional amendment to require balanced Federal budgets. My State, Georgia, has operated for decades under the requirement of a balanced budget and, in part due to the discipline of this requirement, is today a growing and healthy State. I continue to believe this principle of a balanced budget is a sound one upon which the finances of this U.S. Government should rest.

Before I close, let me also mention, Mr. Speaker, the need for continuing and redoubling our efforts to eliminate so far as is possible the waste and fraud which, unfortunately, have plagued Federal spending. It is wrong to ask the American taxpayer to work hard all his or her life to line the pockets of anyone stealing or improperly taking from the Government.

As we rededicate our efforts to bringing sanity to Federal fiscal policy and to eliminating the budget deficits, let us all approach our duties with a dual perspective: The genuine rights of the American citizens to enjoy a responsible government spending revenues responsibly; and the compassion of a nation for those truly in need and who cannot help themselves. We do not need meat axes or budget busting. We need what is proclaimed for all the world by the great seal of the State of Georgia: Wisdom, justice, and moderation.●

● Mr. ROTH. Mr. Speaker, I first want to commend my two colleagues from Ohio and California on the success of the special orders they initiated on the Federal budget. They provided a forum for some very interesting and enlightening discussion that was sorely needed. I regret that I was able to participate in only one of the sessions, but I greatly appreciate their efforts in highlighting the importance of reducings current Federal deficit levels. Unfortunately, what once seemed to be deep congressional concern regarding these deficits has recently developed into a mood of complacency and resignation.

This is an issue that must supersede political bantering and rhetorical wars. These large yearly budget deficits are threatening the health of our Nation's economy and thus jeopardizing the very foundations upon which this country was built.

Current projections for fiscal year 1984 indicate a national debt in excess of $1.6 trillion. Unless swift and decisive action is taken immediately, Federal deficits for the fiscal 1984–88

period will add an additional $1 trillion to this debt. By the end of fiscal year 1988, the Federal Government will then owe more than $10,000 for every man, woman, and child in this country.

These deficits cannot be sustained without adversely affecting the economy in several ways. First, the Federal Reserve System will eventually be forced to pursue one of two possible avenues in regard to monetary policy. Both of these options are entirely unacceptable to me. The first option is to partially or fully finance the debt, thereby increasing the money supply and adding to inflationary pressures. We have just recently emerged from a period of excessively high inflation, and cannot afford to return to another.

The other alternative would be to hold the line on the money supply, thereby pressuring the Government to finance the debt by borrowing and increasing the demand for credit. This would force the Federal Government into direct competition with the private sector for available credit thus driving up interest rates. It would also produce a crowding out of private interests for available credit. Both of these effects would preclude new capital investment needed to propel our economy on to a sustainable growth path.

As a member of the Foreign Affairs Subcommittee on International Economic Policy and Trade, I am keenly aware of the consequences of large deficits on our foreign trade. Should high interest rates accompany these deficits, the exchange value of the dollar would likely continue its current upward trend in international currency markets. A stronger dollar would appreciably reduce the competitiveness of U.S. exports and encourage foreign producers to sell their goods in this country at a time when we are already faced with a substantial trade deficit. This will reduce productivity, depress income and employment, and significantly injure exporting and import-competing companies here in the United States.

The consequences of continuing these budget deficits are grave indeed. The question should not be whether Congress has the courage to make the difficult decisions necessary to reduce these deficits, but whether we can afford not to. This must remain our No. 1 priority.●

● Mr. AuCOIN. Mr. Speaker, I want to express my support for the efforts of my colleague from California, Mr. PANETTA, and my colleague from Ohio, Mr. REGULA for organizing special orders to call attention to the No. 1 problem facing our Nation today: Deficits.

In fact, solving the problem of our burgeoning budget deficit is the critical domestic policy issue standing in the path of future economic recovery.

As I travel through the First Congressional District in Oregon, the question most often asked by mill workers in Toledo, by fishermen in Astoria, and by small businessmen in Beaverton is this: Is the recovery going to be a strong one, is it going to be sustainable, and is it one that can bring us out of one of the deepest economic holes we have been in for decades?

When we look at the statistics of what we have been through in terms of bank failures, financial institutions which have been merged, jobs which have been lost, some of which, frankly, will never come back, I think we have paid a very dear price to reach this point at which we might just be able to see economic recovery.

Those who have survived the recession have every right to expect a recovery that rewards them for one of the sharpest sacrifices the economy has been put through in decades. And I believe the recovery can be sustained. I believe the policymakers in Congress and in the executive branch owe those who have survived by being as skillful as they have during this recession a recovery which rewards their enterprise and nurtures those who are picking up the pieces now and are trying to put it all back together again.

But to be quite frank, Mr. Speaker, there is one thing standing in the way of a prolonged and sustained economic recovery—deficits. Structural deficits, deficits which are estimated, conservatively, at $200 billion. Not only this year, but next year, the year after that, and, in David Stockman's words, as far forward into the future as the eye can see. These Federal budget deficits have driven up interest rates, which have in turn devasted the automobile industry, the housing industry, the wood products industry, and other credit sensitive businesses.

As is illustrated by the close cooperation of my colleagues from Ohio and California who have organized this special order, this is a problem which knows no political bounds. It does not matter whether you are a Republican or a Democrat. It does not matter whether your world revolves around capital formation or whether it revolves around providing social services to help the needy. Neither of those things will happen if budget deficits of $200 billion are allowed to occur. If, in 5 years' time, we amass an additional $1 trillion to the national debt, on top of the current accumulated $1 trillion debt, neither of those things will occur. Neither of those things will occur if Government borrowing absorbs 78 percent of the total savings pool of this country, which is where we will be if our deficits grow unabated.

You cannot help your fellow man and you cannot form capital to get the business machinery of this country going if debt service alone becomes one of the major items in the Federal budget. And neither of those things will happen if interest rates destroy the principal source of wealth needed to make this country the kind of society I think we all want it to be.

This is why I feel it is so important for responsible members of both parties to join in an effort to bring our fiscal policy under control. If we fail in this effort, or even worse if we continue on our present course as if there were no problem, we will be courting a financial and economic crisis which will shred the social fabric of this country, making the riots of the 1960's and 1970's look like small potatoes.

And what stands in the way of decisive action which can reduce the size of the deficits which loom on the horizon? There has certainly been no lack of ideas as to how the deficit can best be reduced.

My conservative friends suggest that we only need to cut nondefense discretionary spending further in order to bring the budget into balance, although with the magnitude of the deficits which we face you could shut down every function of the Federal Government with the exception of the Department of Defense and the Social Security Administration and still face a $20- to $30-billion deficit. Some would even advocate amending the Constitution to require balanced budgets as if by magic that would provide the votes to pass the legislation which will cut these deficits.

My liberal friends, on the other hand, similarly refuse to consider changes in entitlement programs which will be necessary to provide the substantial savings needed to reduce the deficit. There are still too many sacred cows, despite substantial budget cuts, in the area of domestic spending.

What we have on our hands is a state of paralysis, legislative gridlock, in which the political muscle of various factions within both political parties has been applied skillfully enough to bring both sides to this state of paralysis.

It is imperative that something be done to break through. There are dogmas on both sides of the aisle which must be broken. Something has to give.

But if we can form a Presidential commission to deal with the impossible task of social security, and we did and, if we can form a Presidential commission to deal with the intractable and vexing problems of Central America, and we have, and if we can form a Presidential commission to deal with strategic forces—the Scowcroft Commission—which we have done, then it seems to me there is an argument for

using this "secret weapon" on the most critical problem facing not only the domestic structure of this Nation's economy and strength, but also, ultimately, its foreign strength as well.

We should be able to bring the leadership together from both parties, in the executive branch and on Capitol Hill, and have a national commission composed in a way that represents balance to come forward with a deficit reduction package which will be balanced and, most importantly, will command the support necessary to pass both the House and Senate.

I feel a solution to this is critical and I am alarmed by the prospect that the inertia which has set in will continue. This is why I will be introducing a joint resolution calling upon the President to set up such a commission. Patterned after the National Commission on Social Security Reform, the National Commission for a Responsible Budget calls upon the President, the Senate majority leader, and the Speaker of the House to nominate a 15-member commission charged with reviewing all elements of fiscal and monetary policy with particular emphasis on the causes of the cyclical and structural budget deficits and come forward with a set of options for the President and the Congress.

This is the most difficult task facing Congress, and the most important. I urge my colleagues who may be interested in breaking this gridlock and setting up such a commission to contact me and cosponsor this resolution. It is crucial that we act now.●

● Mr. HUGHES. Mr. Speaker, in recent months we have seen hopeful signs of economic recovery. Unemployment and interest rates have fallen, while housing starts and domestic auto sales are up from a year ago. However, there is still an ominous cloud on the economic horizon. Many economists believe that our country's economy is courting disaster due to severe and unrelenting borrowing by the Federal Government.

In the coming year, the Federal Government alone will borrow approximately 60 percent of all the private savings available for lending and investment. Washington is by far the largest borrower in the United States, if not the world. Federal borrowing demands are likely to reach the point where Government is taking nearly all the money available for lending. The resulting upward pressure on interest rates will be severe. The only alternative to raising interest rates would be to increase the money supply and monetize the debt, but this would translate directly into inflation.

Structural deficits will seriously damage if not destroy our fragile economic recovery. By 1986, the national debt will reach the $2 trillion level. Clearly, we cannot continue on the present course of borrowing. It is imperative for Government spending to be brought under strict control.

We in the Congress have some hard choices to make, but they are choices we must make. I believe we must carefully scrutinize every aspect of the Federal budget, and make prudent and fair adjustments in expenditures, entitlement programs, and taxes. Most importantly, we must put an end to deficit spending—that is the only way, in my judgment, to find a practical and workable solution to our current financial chaos, and to lead our country into a lasting recovery.●

Mr. PANETTA. Mr. Speaker, I yield back the balance of my time.

HONORING AMERICAN VICTIMS OF KAL FLIGHT 007

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. McCANDLESS) is recognized for 60 minutes.

Mr. McCANDLESS. Mr. Speaker, after my initial outrage at the shooting down of KAL flight 007, my reaction was that of sadness, for the senseless waste of 269 innocent lives.

Despite the condition of East-West relations, there was no reason for such an unprovoked act of aggression.

It remains inconceivable how anyone could give the command to end so many innocent lives since, and I quote one high ranking U.S. Government official—the airliner was only 1 minute away from leaving Soviet airspace.

Discussion has centered on retaliation and retribution. At times the fact that 62 of our fellow Americans perished on the flight is lost in speeches denouncing the Soviet Union. As Members of Congress, it is important for us to honor and recognize each and every one of the 62 Americans.

We owe them that much.

The surviving members of their families should know that we think of each person separately and as much more than the tragic results of Soviet thinking.

Death is often not understood. Despite the strength of our religious convictions, we often question the end of a life. When death occurs at the hands of an aggressor country, it becomes difficult to accept.

The individuals on KAL flight 007 did nothing to cause their death. They were each on that plane attempting to fulfill a personal dream.

Some were on business, others vacationing. Some had lived a full life, while others had just begun.

The Soviet Union had no right to take any of them from us.

I had wanted to mention something special about each individual, but because of the circumstances surrounding the deaths and because I respect the right of the surviving families to their privacy, I will not be able to do this.

I will, however, make mention of all the names as I have received them from the State Department.

After I read the names, and before my colleagues add their sentiments, I hope you will join me in a moment of silence to remember these Americans:

Diane Lebow Ariyadej, New York.
Sammy Ariyadej, New York.
James Beirn, New York.
Richard J. Bevins, New York.
Eleanor Bissel, Michigan.
Eusebio Bolante, New Jersey.
Kathy Brown-Spier, Washington.
James H. Burgess, South Carolina.
Susan L. Campbell, Massachusetts.
Maria Elizabeth I. Carrasco, New York.
Christian Carrasco, New York.
Joyce Chambers, Michigan.
Celita Chuapoco, New Jersey.
Joseph Chuapoco, New Jersey.
Mary Chuapoco, New Jersey.
Alfred Cruz, New York.
Marie Culp, Michigan.
Lucille Dawson, Massachusetts.
Stanley Dorman, New York.
Sarah Draughn.
Richard Ellgen.
Alice Ephraimson-Abt, New Jersey.
Lillian Fitzpatrick, Rhode Island.
Carol Grenfell, New York.
Noelle Grenfell, New York.
Stacey Grenfell, New York.
Tara Guevara.
Thomas Homlaor.
Hyong Yung Hong, South Carolina.
Hazel James, Michigan.
Jacob Katz, New York.
Allen Kohn, Kentucky.
Lillian Kohn, Kentucky.
Muriel Kole, New York.
Jong J. Lim, New Jersey.
Alden Lombard, Pennsylvania.
Donald Lombard, Pennsylvania.
Lawrence McDonald, Georgia.
Mark McGetrick, Connecticut.
Kevin McNiff, Massachusetts.
Christa Metcalf.

Sara Park, California.
Raymond Petroski, New Jersey.
Rebecca Scruton.
Jessie Slaton, Michigan.
Anna Song, New York.
Irene Steckler, New York.
Stuart Steckler, New York.
Frances Mae Swift, New York.
Michael Truppin, Massachusetts.
Ming Tsan Weng, Ohio.
Sirena WuDunn, New York.
Chung Soo Yoo, Pennsylvania.
Margaret Zarif, Michigan.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. McCANDLESS. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I would like to thank the gentleman from California (Mr. McCANDLESS) for being so thoughtful in arranging a special order today in memory of the innocent men, women, and children who were the victims of Soviet brutality while traveling as passengers on KAL flight

007. This heinous crime cannot go unnoticed or unpunished. Earlier this week we paid tribute to our distinguished colleague from Georgia, Larry McDonald; today our thoughts are with the friends and families of the 268 other passengers whose lives were cut short in such a tragic and inhuman manner. One of my constituents, William Oren, of Middletown, N.Y., was among those victims. Mr. Oren was a young husband and the father of a 17-month-old infant. Along with many others who gathered at his memorial service last week in Middletown, N.Y., I was deeply moved by the outpouring of love and concern expressed by his many friends and neighbors.

Mr. Speaker, permit me to take this appropriate opportunity to insert at this point in the RECORD the remarks that I had the occasion to deliver at the Oren memorial service, which included a condolence message from our Vice President, GEORGE BUSH.

The remarks follow:

Rabbi Schwabb, Mrs. Oren, Friends, We are gathered here, on this National Day of Mourning, to honor the memory of a neighbor, a member of our community, William Oren, who, in the prime of his life, was taken from us by a hostile nation's act of aggression.

William Oren will be remembered by many as a friend, as a dedicated fellow worker and by his family as a loving husband and devoted father.

He will be remembered by our nation and by the world, along with his 268 fellow passengers of KAL flight 007, as a victim of a barbaric, criminal act by a hostile sovereign power—the Soviet Union.

Mrs. Oren, Vice President Bush has asked me to deliver to you his message:

THE VICE PRESIDENT,
Washington, September 9, 1983.

MRS. WILLIAM OREN,
Middletown, N.Y.

DEAR MRS. OREN: Our prayers are with you during this tragic time. The circumstances of the loss of your husband are an outrage, rallying mankind's sense of justice.

All sorrow is essentially personal, but in this critical case, your sorrow is deeply shared by all of us. Your grief is humanity's, touching the hearts of people around the world.

Barbara and I join in this collective expression of condolences. May God's peace be with you during this painful hour.

Sincerely,

GEORGE BUSH.

Today is not a time for us to speak of retribution. Over this past week we have heard many words condemning the shooting down of the Korean passenger plane.

And, sadly, we have heard too of the abominations brought upon the innocent who had done nothing to deserve the sufering and death they have had to undergo.

Bill Oren was a peace loving man, living in harmony with his family and neighbors. He committed no crime, yet a hostile, criminal act was inflicted upon him and his family.

This tragic event has imposed a severe burden on the Oren family.

We may never be able to provide any reasonable explanation for this abominable event. We may never learn all the facts.

But what we can do is to reach out to the Oren family and to the families of the other victims of this downed airliner—to help them in their hour of need, to comfort them, to pray for them, to listen and to help them seek reparations for their loss.

The Talmud, a great source of inspiration in moments like this, tells us a story:

"A wise man said: Do not rejoice over a ship that is setting out to sea, for you cannot know what storms it may encounter, what fearful dangers it may have to endure . . . but rejoice over a ship that has safely reached port, and brings home all its passengers in peace.

"And this is the way of the world: When a child is born, all rejoice. . . . When a man or woman dies, all weep. . . . We should do the opposite. . . . No one can tell what trials and travails await a child: But when a mortal dies in peace, we should rejoice, for he has completed his long journey, and is leaving this world with the imperishable crown of a good name."

KAL 007 encountered a storm of hostility—preventing it from reaching port.

But William Oren and his fellow passengers have now reached their ultimate destination. They are at rest. Let us gain some strength and meaning from their loss.

We may never be able to fully explain to Bill's young son, Joseph, what really happened to his father and why it happened.

And it may take a lifetime to sort out all the reasons and all the explanations.

We hope it is of some consolation to you, Maureen, and to your family that the world shares your loss and that the world is outraged over the criminality of this act.

The Talmud says:

"In death two worlds meet with a kiss: The world going out and the future coming in."

We know how much William was loved by his family, friends and fellow workers.

We know he left memories which cannot be taken from you.

May you be somewhat consoled by the fact that each day will help to ease your pain, making life a little easier. And may we, and the entire world, learn and benefit from this tragic event.

Mr. FISH. Mr. Speaker, will the gentleman yield?

Mr. McCANDLESS. I yield to the gentleman from New York.

Mr. FISH. Mr. Speaker, I thank my colleague very much for yielding.

Mr. Speaker, it is most unfortunate that we must take the time today to speak about the loss of life aboard Korean Air Lines flight 007.

One of my constituents, Mr. Richard Bevins, was aboard flight 007 on business to Seoul. Mr. Bevins lived in the town of New Windsor, Orange County, N.Y., and left behind a loving wife and two small children. Mrs. Bevins and her family attended the memorial service at the National Cathedral, and I was impressed by the strength of character demonstrated by the family.

There were a number of people who helped the Bevins through this difficult time besides her friends and family. New York State Assemblyman Bill Larkin was instrumental in alerting the Bevins to the memorial service and in contacting my office to help coordinate their trip to Washington. Free air travel was provided by Jim Aspin, president of Air Vector, from Stewart Airport in Orange County to Washington National Airport. The Chrysler Corp. loaned to my office a limousine to transport the Bevins family in Washington for the day. My good friend and colleague Ben Gilman offered his comfort and assistance as the former Representative of New Windsor. I know that this volunteer effort by concerned citizens and companies was extremely helpful to the Bevins family in coping with their loss.

Last week the House of Representatives unanimously passed House Joint Resolution 353 condemning the Soviet Union. During the debate, many of my colleagues expressed their revulsion and outrage at the complete disregard of life evidenced by the Soviet Union in shooting down the Korean plane. There can never be an adequate explanation for this incident. Compensation, apology, and serious efforts to prevent further acts of this nature are the very least we should demand from the Soviet Union, as stated in House Joint Resolution 353. At the same time, I share the concern of the Congress that we use good judgment and wisdom in dealing with this tragedy.

Many of my constituents, and I am sure many other Americans, have written letters strongly condemning the barbaric Soviet action. I certainly understand the view that we should cut off all relations with the Soviet Union, and expel all diplomats. However, we must do what is in our best interests.

The existence of the Soviet Union and the United States in the same world is a fact of life. Each must deal with the other. Both nations have the capacity to destroy the world many times over. It is essential that we maintain the basis for a relationship and communication from which we can have clear knowledge and understanding of the other's policies and pursuits. I share the President's view that nuclear disarmament talks are too important to postpone or eliminate. I also feel that in light of the latest actions by the Soviet leadership, we should make our points more forcefully and not give in to Soviet proposals that are unreasonable.

No one can question President Reagan's anti-Communist feelings. I am proud that the President has conducted himself with restraint and diplomacy, recognizing that we cannot permit this situation to escalate into an armed conflict. This is an international problem, and the President is making every effort to turn world opinion against the Soviet Union, their actions, and their philosophy.

It is also important to remind the world that this type of unreasoned and automatic response could occur only in a country such as the Soviet Union. Democracies throughout the world shudder at the thought of kill-

ing innocent civilians, even on the pretext that they were part of a spy mission. Evidence of such a mission will most certainly be fabricated by the Soviet Union and in fact the groundwork for this claim has already been laid. I do not think the Soviet Union was prepared for the world's outrage, and we should take every opportunity to emphasize that without continued pressure, changes in international aviation procedures, and stern warnings to Western pilots, it is entirely possible that this could happen again.

Mr. Speaker, I know my colleagues remain astonished at the events surrounding the shooting down of flight 007. Each day we hear of acts by the Soviet Union to harass U.S. ships in international waters as we search for key flight data from the black boxes that went down on the plane. The reaction to and the continuing denial of responsibility by the Soviet Union in this matter convinces me that they are unfit for the family of nations.

I again regret the tremendous waste of valuable human lives and resources, such as Mr. Richard Bevins. I sat through the moving service at the National Cathedral with his wife and family, and having felt their loss, remain angry and appalled by the entire incident and deeply moved by the tragedy that has struck innocent people such as the Bevins.

Mr. MOLINARI. Mr. Speaker, will the gentleman yield?

Mr. McCANDLESS. I yield to the gentleman from New York.

Mr. MOLINARI. Mr. Speaker, I thank the gentleman for yielding, and I appreciate the courtesies extended in permitting us to speak on this subject.

I feel compelled to participate in this special order, of course, because tragically in my district I lost five of my constituents on flight 007. So there is a great sadness in my community over that tragedy, and I am here with a very heavy heart. We are trying to console the families as best we can, but it is very difficult. I think this is one way that we can help a little bit, and I thank the gentleman in the well for putting this special order together.

Mr. Speaker, the tragedy of Korean Air Lines flight 007 has taken on many dimensions since that moonlit night almost 3 weeks ago. The first reactions were a mixture of shock, horror, anger, and frustration. The world was immediately confronted with an act so heinous that it was at first difficult to react in any way commensurate with the deed. After the initial disbelief started to fade, we began to analyze the situation with greater purpose and clarity. We have attempted to analyze Soviet behavior from both a political and a military standpoint. We have closely scrutinized our own intelligence network as well as that of the Japanese. We have pondered many questions, some unanswerable. No matter where our thoughts and queries lead us, we always arrive at the same irrefutable conclusion—269 men, women, and children, 61 of whom were American, lost their lives that night.

We have by no means ignored the human dimension. Quite the contrary, there has been a vast outpouring of sympathy from every segment of this great country and from around the globe. The outrage and deep sense of personal loss that flows from this incident remind us that these victims had their futures taken away, not only their personal futures, but those of the families left behind.

Mr. Speaker, I am here today to pay tribute to five of my constituents who were aboard flight 007. The story of these people is not unlike the 264 other stories of fractured families, lost opportunities, and absolute despair. However, the two affected families on Staten Island have experienced unique agonies and tribulations. For Edward Ocampo, who lost his wife, Suellen, two children, Corazon, 4, and Cecilia, 2, and his mother-in-law, Jovita Putong, the future is something frightening and uncertain. The four members of the Ocampo family were on their way to Manila to attend a funeral for Mrs. Putong's sister. Now Edward Ocampo must go on without his most cherished loved ones because of this senseless act.

Lee Sik Kim, 25, was also aboard flight 007. He was a Korean student studying at Wagner College on Staten Island. He had decided to return to his homeland to finish his undergraduate studies and planned to return to this country after completing his work in Korea. It is not difficult to imagine what it must have been like for Mr. Kim's brother, Dyong Hyan Kim, who saw his brother leave Staten Island to travel back to his homeland to continue work on his professional future, only to be intercepted by a force that possessed neither right nor reason to decide Mr. Kim's future for him.

The saddest thing about this whole tragedy is that no matter what reparations we exact or what sanctions we apply, we will never be able to place the four Ocampos and Lee Sik Kim back together with their families, enjoying all those things that a full life has to offer. So then, we must ask ourselves, what can we do to best pay tribute to those who perished in the Sea of Japan? Certainly, this gathering here tonight is a small part of the answer to that question. America's response, as well as the response of the world community, should all be viewed not only in terms of international law and principle but also in terms of a global respect for human life. We have a common responsibility to the innocent passengers on that plane to insure that such a travesty of human values is never repeated.

Mr. McCANDLESS. Mr. Speaker, I thank the gentleman from New York (Mr. MOLINARI).

● Mr. RINALDO. Mr. Speaker, President Franklin Roosevelt called December 7, 1941, "a day which will live in infamy."

For 38 years since World War II, no ememy of the United States dared to launch a cold-blooded attack on hundreds of American civilians. In more than 6 decades of Soviet-American relations, in cold war and alliance, in détente and deep freeze, the Soviet rulers had never slaughtered 61 unarmed Americans in one murderous blow. Not till 3 weeks ago. September 1, 1983, was also "a day which will live in infamy."

Many words have been uttered claiming the Soviets suffer from paranoia, because they fear American power. Does that make sense?

Thirty-five years ago, we were immensely stronger than the Soviet Union. The United States was sole possessor of atomic weapons; the Soviets had none. Why were not they paranoid then?

Thirty-five years ago, Soviet advisers or troops were not in Cuba, or Afghanistan, or Vietnam, or Angola, or Ethiopia, or Nicaragua. Thirty-five years ago, the Soviet Navy had not turned the Mediterranean into a Russian lake, outnumbering our forces there, 3 to 2. Today the Soviets have more vessels of war roaming every sea on the globe than any other nation.

Thirty-five years ago America had never lost a war: we were thought to be invincible. Today this is no longer so.

The Soviet problem, of course, is not paranoia—it is arrogance. The arrogance of those who think a vast empire and powerful arms give them a license to act like international gangsters.

Mr. Speaker, civilized nations live by certain simple, elementary standards in their behavior with other nations. Civilized nations, for instance, do not shoot unarmed passenger planes out of the sky and they do not boast they would do it again. Only two sorts of people do these things: Savages and the arrogant. The Soviet rulers are both.

I was proud of our President's deliberate actions in responding to this atrocity. He has shown that self-restraint is the essence of civility. The dramatic contrast between Mr. Reagan's coolness under provocation, and Mr. Gromyko's lunatic threats, shows clearly how different civilization is from barbarism. It reminds us that our Nation's eternal mission is inseparable from the cause of civilized humanity everywhere.

Moreover, the President's one act in closing down Aeroflot is a severe blow to Soviet espionage in the United

States. Yet we must be concerned that Premier Andropov does not mistake self-restraint for exhaustion. I cannot help believing some further actions is called for, on our part and in conjunction with the family of free nations.

Is there any reason we must have Soviet ballet dancers and cultural delegations in our country? Let them stay at home within Mr. Gromyko's sacred borders.

I suggest the Federal Government consider buying up our banks' compromised loans to Iron Curtain countries at a 50-percent discount, and declare them in default. Let the Kremlin worry about propping up the economies of their European colonial satellites. They will have to choose between saving their empire or spending more on their military—a tough choice.

I certainly believe the administration should put every ounce of effort into convincing the rest of the free world nations to shut down Aeroflot indefinitely. This way they can reduce Soviet free world penetration, complicate life for the KGB, and condemn Soviet barbarity.●

● Mr. RODINO. Mr. Speaker, it is with great sadness that I rise today to pay tribute to four of the victims of KAL flight 007 who resided in my congressional district. I commend my colleague, Mr. MCCANDLESS, for allowing us the opportunity to honor the victims of this tragedy.

The realization that four of my constituents—Edgardo and Frisca Cruz of Irvington, N.J. and Eusebio and Maria N. Bolante of East Orange—were passengers on the plane brought the entire incident to an even more personal note. In addition to my feelings of outrage about this terrible action, I could also feel the personal pain and anguish of the Cruz and Bolante families.

For the Cruz family, the tragedy was compounded by the fact that at the time of her death, Frisca Cruz was trying to reunite her family in America, and wanted to bring six of her children who lived in the Philippines to this country. Her oldest son, who is an American citizen, asked for my help in continuing his mother's dream of bringing her children here. With the assistance of Attorney General William French Smith, we are successfully arranging for the Cruz children to come to America. This was, of course, the least that we could do for the victims of this senseless tragedy.

Mr. Speaker, words are not sufficient to express our sorrow and sour sympathy to all of the victims' families. I hope that they know, however, that our thoughts are with them in this time of grief.●

● Mr. BARNES. Mr. Speaker, for 21 days the world has mourned the senseless deaths of 269 people who were ruthlessly killed when the Soviets shot down Korean Air Lines flight 007. The Soviet action demonstrates a blatant disregard for human life and there is absolutely no justification for shooting down an unarmed civilian plane. It is an outrage that these lives were so brutally taken.

Individuals of 14 nationalities lost their lives on that airliner. Sixty-one of these were U.S. citizens. One of them lived in my congressional district in Montgomery County, Md. His name was John Rochester Oldham.

John Oldham was 27 years old when that flight went down. He had graduated from Princeton and Columbia Law School. He had won a Fulbright scholarship and studied in Geneva. He had worked for two Washington, D.C., law firms, and a serious interest in international affairs prompted him to make plans to study Chinese language and law at Beijing University.

When I reflect upon the life of John Oldham, and upon the loss of these 269 lives, I feel personally the impact of this tragedy and realize how much we, as Americans, have lost and what the world has lost. John Oldham has been described by friends as "very warm" and "really committed to * * * helping people." It is clear that he had a very significant influence on people's lives. He was making his way and pursuing the goals that were important to him. He was an individual who made a difference.

This is what the United States is all about. Whether one calls it democracy, or human rights, or freedom, or justice, there is, associated with each, a fundamental respect for the individual and the highest regard for the worth of individual potential. Having opportunities, developing potential, pursuing interests, defending ideals, working toward a goal, committing oneself for a purpose; these are all the basis for positive change in our own society and are the avenues that each of us take to make a contribution to the world around us. John Oldham was doing this.

John Oldham was good to people; he helped them. He went out of his way, delaying his departure from the United States, to find housing for visiting Chinese scholars, after others had failed to find housing. He wanted to be involved with people and do what he could to make their way easier.

John Oldham promoted understanding. He was committed to working in international affairs and he understood the value and importance of learning about people, cultures, countries very different from our own. He realized how languages can open the door to an appreciation and understanding of the world.

John Oldham was moving forward. He knew what was important in life and went after it. He had a good education, but wanted to learn more.

One of John Oldham's law professors described him (as he is quoted in the Washington Post) like this:

> He was the very definition of outgoing—very warm, gregarious, sunny. He always had a smile for everyone.
>
> Just as soon as we received confirmation . . . we just all thought it could not end this way, for someone who was so vibrant and thought friendship was the best way.

It is a great tragedy that such a promising young man was killed. I wish I could have known him; we shared a strong interest in international affairs and had both studied in Geneva. Moreover, it appears that he was a wonderful human being.

John Oldham would have, most certainly, helped to make this world better. He had so much to offer. My own hope is that we will remember his commitment and let his life be an inspiration to all of us.●

● Mr. ANDREWS of Texas. Mr. Speaker, last week the House unanimously passed a resolution condemning the Soviet Union's cold, calculated, and criminal destruction of KAL 007. The resolution clearly expressed our Nation's outrage that 269 innocent civilians have been murdered in the name of protecting the sacred airspace of the Soviet Union. But to just say that there were 269 civilian deaths does not explain the extent of the loss. Each one of those 269 people killed had a personal history and story, and their deaths will haunt the lives of their friends, families, and coworkers.

Specifically, we have lost a gifted student who could have taken an earlier plane, but stayed behind in New York a couple of extra days in order to help a recently arrived exchange student find a place to live. We lost a young widowed mother who was on her way to visit her parents. We lost a distinguished judge and civil rights activist, as well as businessmen, whole families, engineers, doctors, and a Member of Congress. Our outrage will eventually subside as we resume our work and daily lives. But for many, the loss of KAL 007 is a very personal loss from which they will never completely recover.

Almost as outrageous as the downing of the plane itself are the words and deeds of the Soviets in the aftermath of this tragedy. The Soviets have responded to the world's outrage with falsehoods and absurd accusations. Initially, in the face of clear evidence to the contrary, the Soviets claimed that they had not shot down the plane. They then claimed it was a spy plane and that they had confused the 747 with an RC-135, a military reconnaissance aircraft. The 747 is one of the world's best known and most recognizable aircraft.

The distinctive shape of its fuselage, as well as its sheer size, clearly differentiate it from the RC-135 or any other aircraft currently flying. Fur-

thermore, the night was clear—again contrary to Soviet claims that visibility was poor and since it was near dawn, the Soviet pilot could have clearly made out the distinctive commercial blue and red markings of the Korean airliner. Additionally, the Soviets were aware that Korean Air Lines flights make the trip from Anchorage to Seoul five times a week, each flight occurring at the same time of day and following basically the same course that was intended for KAL 007.

The Soviets claim that, unlike most commercial airliners, the KAL flight did not have on its navigational lights. They claim this in spite of the fact that we have a transcript of their radio communications in which the Soviet pilot said that he could see the navigational lights of the 747 blinking. The Soviets claim that they tried to contact the Korean airliner through radio transmissions and warning shots but again our transcript of their conversations does not support their claims. Nowhere in the transcript is there any mention of the Soviet pilot firing warning shots, tipping their wings as a signal for the 747 to land, or reaching the plane on an international civilian radio frequency. In fact, this last option was not even available to the Soviet pilot: Their radios are not equipped with international civilian radio frequencies because the Soviets are afraid that their pilots will use these frequencies to defect to the West.

As the Korean jet was about to pass out of Soviet airspace, the pilot did the one thing which he had always been told to do with an unidentified intruder: Shoot first, identify later. As a recent article in Newsweek stated:

> At this point, KAL 007 was within minutes of passing out of Soviet airspace. If the Russians didn't act now, they would have to take all the blame for allowing a foreign intruder to escape. The commander instructed him to drop back and fire. "I received an order, a precise and definite order." At 3:26 a.m., almost as KAL 007 was about to pass back into international airspace, pilot 805 played by the Soviet book—and killed 269 people.

The Soviets clearly believe that their airspace is more sacred than human lives, and their previous behavior reflects this fact. Since 1950, the Soviets have attacked close to 30 civilian and military aircraft that have strayed into, or close to, Soviet airspace. These include an attack on a French airliner in 1952 in which two were killed, a 1963 attack on an Iranian airliner that had strayed into Soviet airspace but had returned to Iranian airspace, and an attack that killed two passengers on another Korean airliner that went off course in 1978.

The resolution of condemnation that we passed last week reflects our resolve that this kind of action cannot be, and will not be, tolerated by the civilized world. It calls on the Soviet Union to assist international efforts to recover the remains of the victims, to cooperate with an international investigation into the attack, to modify their brutal and uncivilized air defense strategy, and to adopt new procedures to assure the safe passage of civilian airliners in and near the Soviet Union and throughout the world. I support the specific sanctions listed in this resolution. I also support the closing of the Soviet airlines' U.S. offices. I am encouraged by the actions to date of our European allies, especially their participation in the growing international civil aviation boycott of the Soviet Union. The American people are also to be commended for their voluntary action in boycotting Soviet-made products.

While I feel that the resolution was a good and effective measure, there is more that we can, and should, do. Although we must return our primary focus to the legislative agenda before us, we cannot lose our resolve that this tragedy not reoccur. We must make it clear to the Soviet Union that in the wake of this most recent atrocity we will not return to business as usual. I feel that it is essential to our own national security that we continue to pursue high-level talks with the Soviets on major issues such as arms control. But why should we continue to maintain our low-level economic contacts as if nothing has happened? These nonessential contacts should be reduced to a minimum. Now is the time to reexamine comprehensively our trade relations with the Soviets, especially the sale of potentially sensitive high-technology equipment which the Soviets so desperately want and need. The withholding of this type of equipment could prove to be a very effective economic sanction.

Finally, we should examine the range of Soviet imports into this country, particularly how they are built and by whom. Many charge that the Soviets use slave labor in such areas as mining operations and the construction of the Trans-Siberian pipeline. We should look into this, and if these charges can be substantiated, then we should be boycotting those products. If we take these measures and stick to them, then we will have successfully put substance behind our statements. When the Russians find that their trade with the West has been suspended for a few months, and as a result, their reserves of hard currency depleted, then they will understand that our outrage is genuine. Only then will we have fully conveyed our resolve that KAL 007 must be the last commercial airliner ever to be shot down for innocently wandering off course.●

● Mr. MAVROULES. Mr. Speaker, in the early morning hours of September 1, all of America was rocked by the stunning news—an unarmed civilian Korean airliner had been shot down by a Soviet warplane, killing all 269 passengers and crew members aboard. No words can express the horror and revulsion I felt—that we all felt—over this barbaric act.

Perhaps we will never know the full story of what happened to Korean Air Lines flight 007 on that fatal night. Regardless, many innocent people were needlessly killed.

Onboard the doomed flight was our colleague, Congressman Larry McDonald of Georgia. I served with him on the House Armed Services Committee. Congressman McDonald was a loyal American who always put his political ideology above all other considerations. While many might disagree with his politics, all can respect his personal commitment to the causes in which he believed.

Also on that plane was a young teacher and constituent of mine, Kevin McNiff from Beverly, Mass.

Kevin was only 28 years of age, a young man in the very prime of his life. His loss is a grievous tragedy for his family and the community.

After graduating from high school in Beverly, he attended the University of Alabama and received a liberal arts degree in 1977. For the last 3 years, he had studied the Chinese language at the university.

Bound for Taiwan, Kevin had planned to teach freshman English at the Tai Chung University for the next 2 years as part of an exchange program conducted by the University of Alabama.

Kevin was known to his community as a friendly, outgoing and creative individual. With his joy for life, proven abilities and limitless potential, Kevin's senseless death is a tragic loss for all who had the opportunity to meet and know him.

For his mother, brothers and sisters, I pray that their faith will comfort them, that their courage will sustain them and that their grief may pass.

I ask all Americans to include in their hearts and prayers, the McNiff's and all other families who lost loved ones on flight 007.●

● Mr. McGRATH. Mr. Speaker, I want to commend my colleague for taking this special order to remember those Americans who lost their lives in the Korean Air Lines tragedy. When the furor dies down over what this Nation should or should not do in response to this abominable Soviet action, the fact will remain that 269 people—61 of them Americans—will be gone, and no action of any government can bring them back.

One of those who lost his life on flight 007 was a resident of my congressional district, Stanley Dorman of Malverne, N.Y. I regret that I never knew Stanley Dorman personally. I

know only that he was a family man, a businessman, and a good friend to many people. I know that he will be missed by the many people who knew him, and my heart goes out to his family and friends.

I was particularly moved by a letter to a local newspaper by a friend of Mr. Dorman, Leonard Nadel. I would like to close by quoting Mr. Nadel's letter:

Most of us rarely become involved in such earth-shaking events and are relieved of any direct entanglements. This time we were not so lucky, for one of the victims, Stanley Dorman of Malverne, was a respected associate and friend of long standing to many of us, as are the members of his family.

Our ties cannot be severed by his precipitous removal from the scene in the prime of his full and successful life. He was the natural and devoted patriarch of a large and closely knit family which included his wife, his elderly parents, his three children and their spouses, his brother and his family and many others. He was a source of strength to all who functioned within his sphere, whether family or profession. He was the fulcrum of a proud and loving group of relatives, and a hardworking, dedicated business enterprise. He was a one-man goodwill ambassador for our country among his many good friends and associates developed among Far Easterners over the years. He set many of the examples which others gladly followed. He set the tone for positive attitudes among his numerous confreres. His magnetism was contagious.●

● Mr. ROE. Mr. Speaker, it is with much sadness in my heart that I rise today to join my colleagues in honoring those 60 brave Americans who died by Soviet hands aboard Korean Air Lines flight 007 earlier this month.

Yesterday we paid tribute to our slain colleague Larry McDonald of Georgia, who unfortunately was also a passenger on that ill-fated flight. Larry McDonald was a well-respected Member of this Chamber, and his death made headlines around the world.

The other 60 American passengers on that plane, that was so wantonly blown out of the sky by a Soviet missile, were not as well known as Larry, but their sacrifice of course was just as great. I am sure that if he had survived this tragedy, Larry McDonald would have been the first to call for a special order to honor these American heroes.

Among them were teachers, doctors, scientists, students, nurses, mothers and fathers with children in arms, and others whose names, while not familiar to us, indeed, represented a true cross-section of America. And they are gone, taken away from us by a blatant act of aggression that will go down in history as one of the most heinous crimes ever committed against mankind.

Their deaths must not be in vain. They must serve as a reminder to us all of the continued ruthlessness of the Soviets in their dealings with other nations of the world. They must be remembered in the future whenever this country begins to be lulled into a false sense of security in our dealings with the Russians. This indeed was a crime against all humankind that must never be forgotten.

The unprovoked Soviet attack against Korean Air Lines flight 007 was a direct assault on the basis of international law by which the nations of the world deal with each other.

By this dastardly act, the Soviet Union has branded itself a lawless bandit, not worthy of full participation in the international community.

While our great Nation is limited in the recourses it can take in response to the Soviet action, we must never go back to "business as usual" with the Soviet Union until that nation accepts full responsibility for this tragedy and provides full compensation to the families of those slain by the Russians aboard the airliner.

Any other response would be an insult to the memory of these brave Americans who have been lost to us forever.●

● Mr. OTTINGER. Mr. Speaker, the callous destruction of the Korean jetliner with 269 innocent people aboard was a shock and an outrage to civilized people around the world. But the loss of those people was a personal tragedy for all those who had family or friends on flight 007, and today I would like to commemorate two members of my district whose lives were lost.

Alfredo Cruz had been a resident of New Rochelle for 12 years, where he lived with his wife Roberta and their five children. Mr. Cruz was born in the Philippines, and was returning there following the death of his mother. I know Mr. Cruz will be sorely missed in his community, and I would like to add my personal condolences to his family.

Hiroki Haba was only 19 years old, and had been spending the summer in Scarsdale with the family of Klaus Schwabe. This had been Hiroki's first visit to the United States, and friends say he had plans to try to return for school. Hiroki's death is a tragic loss both to his family in Japan and to his American family in New York. I share their sorrow over the senseless death of such a young and promising man.

Nothing we can say or do can replace or bring back the individuals who were lost. So what we must commit ourselves to is the pursuit of agreements and understandings with the rest of the world to insure that such a heinous act cannot and does not occur again.●

● Mr. CAMPBELL. Mr. Speaker, I would like to thank the gentleman from California for giving me the opportunity to pay tribute to those who died in the Korean air tragedy.

One of the passengers on KAL 007 was from my congressional district. Billy Hong of Mauldin, S.C., was Korean born and was traveling back on business and to see friends and family. He had come to the United States to escape communism and to be reunited with Jim Martin, who he had met and become friends with during the Korean war when Billy was a homeless war orphan, wandering the Korean countryside.

In the United States, Billy found happiness and success. Jim Martin adopted him, he married and had children and started a business. His karate schools grew and prospered with branches in several cities, and Billy's devotion to his students was well-known in the community. He instilled in them a discipline and respect for themselves and their country that will always stay with them. Most of his students thought of Billy as a second father, someone they could go to for advice or just to talk.

Billy Hong represented everything good about this country. The freedom and opportunity we so often take for granted were greatly cherished by him and he was proud to be an American citizen. He once told an American friend, "One thing I learned for sure, you can never trust a Communist." And it was the Communists who took Billy Hong's life, nearly a decade after he became an American citizen.

Mr. Speaker, to Billy Hong's wife, Joy, to his children, Eunice and Billy, Jr., to his adopted family, I extend my heartfelt sympathy. I extend it to the families and friends of all the passengers and crew, for I am sure that the stories of all the innocent victims of flight 007 are just as poignant and just as tragic.

I sincerely hope that none of us ever have to stand in the well of the House again as the result of such an international outrage.●

● Mr. GRADISON. Mr. Speaker, Ming T. Weng of the city of Montgomery, near Cincinnati, became an American citizen 3 years ago. He was only 41 years old. He worked as a mechanical engineer in General Electric's Aeromechanics and Blade Stress Division in their Evendale plant since 1975. He was fiercely proud of his American citizenship, but after 10 years in the United States, it was his dream to return to his native land of Taiwan to contribute something of what he had learned to his native China.

His wife Tai Li—known as Terri—and two sons, Mark, 8, and Eric, 7, were to join him as soon as their home was sold. Dr. Weng returned to Ohio to visit his family in June. During his brief stay in Taiwan, he had secured an even better position as head of the mechanical engineering department at a university. Dr. Weng had also obtained a job as a consultant to the Chinese National Research and Development Center.

However, his house on Capricorn Drive was still not sold when it was

time for his to go back to his new responsibilities. A Russian air-to-air missile ended Dr. Weng's dreams.

Dr. Weng was known as a gentle man, a devoted, loving husband and father of two young children. The senseless act of the Soviet Union shattered his dreams and aspirations. His wife and children will now remain in America and seek to build new dreams of their own.

Mr. Speaker, I wish to commend the gentleman from California for taking this special order to honor the Americans who died on the Korean Air Lines flight 007.●

● Mr. EARLY. Mr. Speaker, it is an unhappy but, I think, an essential duty to join with House Members in special remembrance of and tribute to all the innocent American citizens who lost their lives in the recent and barbarous air massacre, ordered by the Soviet Government officials, of the men, women, and children riding aboard a regularly scheduled Korean Air Lines commercial flight.

We all recognize and would like to share in the overwhelming grief that was so unexpectedly thrust upon their surviving family members, relatives, and friends by this senseless and shocking Soviet action. We must persistently seek in every way possible to obtain the fullest compensatory damages from the Soviet Union for the survivors of these murdered victims.

My separate and particular sympathy goes out to the mother and family members of a victim from my own congressional district, Susan L. Campbell, a native of Shrewsbury, Mass. Miss Campbell was a doctor of veterinary medicine. She was on the Korean airliner returning to her position as associate professor of animal pathology and director of the Sanbar Deer Research Center at Tung Hi University in Taiwan. She planned to return to the United States next year to practice veterinary medicine in her home area in Massachusetts. At 28 years old, she was a young and brilliant medical teacher, researcher, and scientist with a very satisfying and rewarding career ahead of her. Dr. Campbell's untimely death serves to highlight the Soviet leadership's total and contemptuous disregard of the sanctity of human life and the basic worth of lawful individual industry and ambition.

We in the House also suffered the loss in this tragic incident of a dedicated colleague, Larry McDonald, of Georgia. Ironically, he was the most vocal Member of the Congress in his repeated warnings and criticism of Soviet communism as an ungodly force that conducted itself at home and throughout the world without any regard for human rights or human life. We can truly say that Larry McDonald gave up his life for his personal convictions and to awaken the consciousness of the United States and the rest of the free world to the real nature of Russian terrorism. Our deepest sympathy is extended to his gracious wife and grieving family members.

Mr. Speaker, it is practically impossible for any of us to understand the uncivilized conduct of the Soviet Government in this tragic affair. Two hundred and sixty-nine harmless, unarmed, and innocent human beings—men, women, and children—in a commercial airliner, were cold bloodedly shot down to death because of excusable off-course intrusion into Soviet-claimed air space. We wonder why such barbarous action was taken for so minor an offense.

However, our more important objective is to try to figure out how to change the Soviet terroristic and destructive attitude toward innocent, fellow human beings. The record of Communist authorities pretty clearly shows they pay attention to and respect only material actions. Therefore, it seems obvious that we and the rest of the free world should together exercise every possible effort to withold any material help to the Russian economy and any high-technology advice or information that could possibly strengthen their military expertise and effectiveness. We should also impose limitations, equal to what they require of us, on the number of personnel permitted in their embassies and place severe restrictions on their travel privileges.

These and a host of other measures designed to persuasively impact the Soviet Government are already in operation or development by the President and the Congress. Hopefully they will tend to convince the Soviets of our combined serious intent and deter them from any additional inhuman destruction of innocent lives. A further, and probably the most effective, deterrent action that can be taken against Russian terrorism is public denunciation of their savagery of human life that echoes around the world from assemblies like this.

The Communists have demonstrated that they are expert propagandists. They have desperately tried to build themselves a world image as a peace-seeking, compassionate government; apparently they would hate to have that hypocritical image universally blotted, rejected, and ridiculed. They have proven themselves very sensitive to world opinion. Therefore, it would seem that if anything would incline the Soviet powers to change their ungodly actions and uncivilized behavior, it might well be a continuing blanket of cooperative condemnation by all the peoples of the free world. Let us unceasingly emphasize that it would be in their own best self-interest to make such a wholesome change.

We must never abandon our efforts to reach a verifiable arms limitation agreement with the Soviet Union. At the same time we must perseveringly cooperate among ourselves and all other free nations to encourage the Soviets to base their conduct as a country upon the same moral and ethical standards that are in common use and application throughout the civilized world. If they do so they can be assured they will be granted their high and rightful place among the family of civilized nations.

We may well be embarking on a long and agonizing effort. However, there could hardly be a more worthy remembrance of our fellow Americans and the other innocent dead to whom we are offering tribute today than to lastingly dedicate ourselves to the establishment of earthly peace, the prevention of worldwide nuclear destruction, and the conversion of the Soviet Government to conformity with the standards of human behavior that govern the conduct of all free and civilized peoples.●

● Mr. ACKERMAN. Mr. Speaker, I join this special order today on the tragic attack on Korean Air Lines flight 007 because I believe we must take the time to remember the people who died in this massacre, and try to see what lesson we can possibly glean from this inexplicable disaster. The debate on whether we should institute sanctions, suspend grain sales, and halt the landing of Aeroflot planes has sometimes obscured the meaning of this event in human terms for the families and friends of the victims.

When considering the loss of life on that fateful day, a stream of questions comes to mind. Why do a mother and her young child lose their lives before they have even begun to fulfill their human potential? Why does a research scientist who can contribute so much to his fellow human beings fall victim to this attack? Why are five children left as orphans due to the deaths of their parents? Why must 269 people die as a result of an animosity which leaves us constantly on the brink of nuclear annihilation? There are no rational answers; only more questions.

Particularly unnerving for all of us has been the Soviet strategy for dealing with the near universal condemnation they have received from the world community. It appears that the Soviets will continue to pursue the old tactic of hunker down and tough it out, refusing to acknowledge their culpability for this act. Mr. Speaker, the rest of the world has spoken out in the clearest of terms on this incident. There is a fundamental abhorrence to the innocent death of so many unarmed civilians by the people of all countries regardless of ideology, economic wealth, race, or ethnic background.

Mr. Speaker, these strong reactions must be transformed into productive

use, in order that the lives of these people are not lost completely in vain. As we take this time to remember the victims of KAL flight 007, let us also take this opportunity to reaffirm our commitment to the pursuit of world peace. Central to this pursuit is the continuing effort by our Government to work with the entire world in sending a message to the Soviet Union that our values and respect for human life demand that such senseless acts do not occur again. We owe it to the 269 passengers on flight 007 to remain vigilant in our pursuit of this goal.●

● Mr. SOLOMON. Mr. Speaker, some 2,400 years ago, the ancient Greeks gave funeral orations for those who had laid down their lives in defense of their fellow citizens. The dead were honored for their sacrifice, and the living were reassured that their tragic loss was not in vain.

Today, in this Chamber, orations are being given in commemoration of 269 men, women, and children killed in the dispicable downing of Korean Air Lines flight 007, a deliberate act of barbarism perpetrated on the world community by the Soviet Union. They did not die in combat, nor were they on some preposterous espionage mission, as the Soviets have charged. Yet the passengers of the flight 007 are, nonetheless, our war dead, innocent civilians killed in the war now being waged against humanity by the evil Soviet empire. Their families—and free people everywhere—have a right to ask that their deaths be not in vain.

They have a right to ask if any good can come from this evil. Can security be salvaged from an act of terrorism? Can the cruel excesses of a barbaric regime enhance our opportunities for peace and freedom?

The answer to this paradox, Mr. Speaker, is yes. Yes, good can come from evil, if this heinous crime stiffens our resolve to stay the course President Reagan has set out for America's defense, a course toward lasting peace through strength.

The Soviet Union has tripped the warning wire that Representative Larry McDonald, myself and countless other conservatives long ago set up to alert the free world about the threat of Marxist imperialism. Now, by the hellish light of flight 007's burning wing, the entire world can see the evils and the inherent dangers of Soviet-brand communism.

All of us are joined now with our spiritual brothers in Afghanistan, in Poland, in Cambodia, and in El Salvador who have witnessed first hand the cruelities—the atrocities—the human rights abuses that Soviet-brand communism is capable of. The whole world now knows that communism is an atheistic philosophy of raw, brute force that stands in total disregard of human rights, or indeed, of human life itself.

Now is the time to unite behind the President's firm, yet measured response to this latest Soviet atrocity. We must rally behind his attempt to win worldwide condemnation for this dispicable crime against humanity. And we must once again pledge to work for his program to modernize our military to assure a lasting peace through strength.

American strength is the only thing that the Soviets are capable of understanding or respecting. A nuclear freeze is not an alternative, it is a plan for the unilateral disarmament of America. It would leave us defenseless before a regime as bestial and bloodthirsty as the Nazi regime that millions died to rid the world of.

We cannot reclaim the lives lost of flight 007. And while we can demand it, we cannot expect the Soviets—who recognize no universal law, code, or right—to make reparations for to the victims to their crime. But we can renew our commitment to our President's program of peace through strength. To our President must go our prayers for peace and ultimate liberation from the worldwide scourge of communism.●

● Mr. STRATTON. Mr. Speaker, I was detained in an urgent Armed Services Committee meeting when the gentleman from California (Mr. McCANDLESS) took his special order to honor the American victims of the Korean Air Lines flight 007. But I wish to comment on the same project.

Nothing brings out more clearly the barbarity of that Soviet action more than the stories of the innocent victims of this incredible and dispicable tragedy.

One of these American victims was a constituent of mine, Mrs. Muriel Kole of Loudonville, N.Y. Mrs. Kole, a psychotherapist, was on her way to Tokyo to deliver a lecture to the Business and Professional Women's Club when her life was cut short by the Soviets' murderous and unconscionable act. The tragedy became what her husband, Dr. Michael Kole, termed "a bad dream;" for he, like many of us, could scarcely believe the news as it unfolded on the morning of September 1, 1983.

Mrs. Kole was born in Queens County, N.Y., and her mother remains in New York City. She and here husband had moved to the Albany area about 15 years ago, where they have been practicing family counseling. Mrs. Kole received bachelor's and master's degrees from Russell Sage College in Troy, and was working on her doctorate at the time of her death at age 36. Mrs. Kole had worked for the New York State Department of Mental Hygiene and then worked on civil rights issues in the State Education Department until recent years. Muriel Kole was also active in the Albany Business and Professional Women's Club, serving as chairman of the State Street Chapter of the International Committee of the Club.

Mr. Speaker, what a tremendous waste of talent and of promise for the future has resulted from this terrible deed. How could the Soviet Union fail to apologize for this action? How could the Soviet leadership fail to express regret and sorrow for the loss of 269 promising lives? How could they possibly fail to provide compensation to the families and the relatives as a result of their hair-trigger border paranoia?

Mr. Speaker, our heartfelt sympathy goes out to Dr. Michael Kole, Mrs. Kole's husband, who was in their home at Loudonville when he heard the reports of the stricken airliner and to Mrs. Kole's many friends, associates, and admirers in the Albany, N.Y. community. The scars of this tragedy will live for years to come in every one of the dozens of homes that have been marked by this aggressive act—something that still strikes all of us as utterly inconceivable in a supposedly civilized world.●

GENERAL LEAVE

Mr. McCANDLESS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and entend their remarks on the subject of my special order tonight.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

AIDS EPIDEMIC

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Mrs. BURTON) is recognized for 15 minutes.

● Mrs. BURTON of California Mr. Speaker, the Government Operations Subcommittee on Intergovernmental Relations and Human Resources, chaired by my friend and colleague TED WEISS, recently held critically important hearings on the AIDS epidemic. During those hearings Dr. Marcus Conant of the University of California at San Francisco presented cogent testimony outlining several proposals for Federal action to prevent this epidemic from reaching even more tragic proportions.

Dr. Conant's testimony follows:

My name is Marcus A. Conant. I am a physician at the University of California at San Francisco and the co-director of its Kaposi Sarcoma Clinic. I wish to thank Representative Weiss for calling this hearing.

Some time three or four years ago, in a manner that will probably forever remain unknown, a new and terrifying illness was introduced into the human population. At first, we did not even know that it had arrived. Instead, it was thought that for some bizarre reason there was an epidemic of a

rare skin cancer called Kaposi Sarcoma among homosexual men in a few large cities. At about the same time, it was also noted that others in the same population group were coming down with a lethal form of pneumonia in unusually large numbers. It was not until several months later that public health officials realized that the illnesses they were seeing were actually only the symptoms of a much more fearsome disease, the phenomenon we have come to call Acquired Immune Deficiency Syndrome. AIDS has since become America's most feared acronym. The statistics on its proliferation have become numbing, but they bear repeating here. Last year, there were a few hundred persons with AIDS. Now there are 1,800. The number of AIDS victims currently doubles every six months, and by the end of the year, more than 3,000 people will have it. As the number of persons with AIDS grows, the growth rate of the disease itself also increases, with the AIDS population expected to be doubling first every four months, and then every two. The number of people with AIDS could easily reach the tens of thousands in the very near future. Because the incubation period for AIDS is so long—we believe it to be 18 months—even if a vaccine were found today, the number of victims would continue to grow until at least 1985. The final statistic in this grim litany is that nearly 60 percent of the people who contract AIDS die from it. The disease, quite simply, is the most lethal infectious killer known to modern medicine, and it is on a rampage in this country.

In the face of this appalling specter, one would expect the government of the United States, the world's most affluent and technically advanced nation, to be sparing no resource in its fight to stop AIDS. But as a physician and researcher who has worked with this problem from the beginning, I have to characterize the Federal response to AIDS as bordering on the negligent. I see in my office every day young men who should be in the prime of life but who instead are wasting away towards an early, pointless but once-preventable death. They regularly ask me why their own government does not seem to care if they live or die. The question is not a rhetorical one. I have no answer for it.

I would like in my testimony to explain briefly how the Federal response has been inadequate, and then to propose what I think we as a nation should be doing.

Recently, the administration announced that conquering AIDS is, in the words of the Secretary of Health and Welfare, the nation's number one health priority. We welcome this verbal support, especially after such a long period of official silence. However, I wish it was being backed up with financial support as well. The record clearly shows that it is not.

We often hear that from the National Institute of Health that it has all of the money it needs to deal with AIDS. However, my every experience with AIDS contradicts that. I can, with no effort at all, think of two dozen research projects that could be crucial to the fight against AIDS that aren't being carried out for the simple lack of grant money. I know of any number of colleagues who, instead of staying in their laboratories doing vital resarch, have to spend their time chasing funds. Compared to the enormity of the problem, the federal funding response has been, relatively speaking, a pittance. The failure of the federal government and the NIH to respond promptly and forcefully to this crisis is a national disgrace. It has helped the spread of two epidemics, one of a deadly disease, the other of public hysteria. I cannot help but conclude that federal officials who say that enough money is being spent on AIDS are simply mouthing some required political line that has nothing to do with reality. I wish they could be with me in my office every day as I have to face yet another patient who will likely die because a major federal commitment to fighting AIDS was not made sooner.

I would also question whether the federal government has actually committed as much money to this fight as it says it has. I believe that the NIH has been less than candid in describing the amount it is spending on AIDS. For example, the NIH includes in its figures monies it was spending on projects that have nothing directly to do with AIDS; projects that were underway before the AIDS epidemic even began. I also know that the National Cancer Institute has not released some of the monies for research projects that it has already approved through its laborious peer review process. It is almost as though dubious accounting methods are being used to inflate the federal government's purported AIDS budget in order to create the appearance of a major effort being undertaken, when in fact that is not the case.

The United States can be proud that its research establishment is the ablest in the world. It stands ready to be unleashed against AIDS; all that is needed is the backing of the federal government. The tremendous intellectual resources of the public sector, including private industries and the universities of America, must be utilized in solving this problem. This can only be accomplished if Congress appropriates enough money to stimulate research outside of the NIH and the Center for Disease Control. I am sure we all have different opinions about how active the federal government should be in matters of social welfare. But no matter what your notion of the proper federal role is, it has to include taking the lead in a fight against a disease that has struck citizens in every state of the union; a fight that only the federal government has the resources to undertake.

There is one point I would like to address here briefly before moving on. Most of my patients with AIDS are gay, and almost to a man, they tell me that they believe the federal government would have acted against AIDS with a vengeance had it only struck a segment of the population that was in better standing at the moment in the nation's capitol. While gay men are by no means the only persons afflicted by AIDS, it is clear they have suffered from it more than any other group. I personally find it hard to believe that any member of Congress would deny funds for research into an disease because they did not approve of certain aspects of the lifestyle of most of the people contracting it. AIDS is a medical problem, and questions of the legitimacy or illegitimacy of the modern gay movement must be left to some other forum. But if anyone is reluctant to fund the fight against AIDS becasue most of its victims happen to be gay, let me lead them to the crib of a newborn child who has AIDS, so they can watch as the infant screams with pain. There alone they will find reason enough to want to halt this killer.

One misconception frequently heard from funding agencies is that AIDS is such a complex, enigmatic pathological phenomenon that providing funds for research would be like throwing money down a bottomless hole. The analogy is sometimes drawn to cancer, where a final cure is probably still many years away. This is a grievously mistaken assumption, which if not corrected, could spell the deaths of tens of thousands of Americans.

AIDS is a baffling medical mystery. But it is a solveable medical mystery. AIDS is a new infectiuous disease agent, and all available evidence indicates that it is some form of virus. Fortunately, at this point in the twentieth century, (thanks in no small part to the support for scientific research provided in the past by the Congress) we have the knowledge and tools at our disposal to isolate a virus. We can then procedd to sequence the genetic information in the virus; to produce a vaccine that will protect people from acquiring the virus without incurring the disease; to clone that genetic material; and to then produce large amounts of the vaccine for public distribution. We are hopeful that, given the proper support, we can accomplish all of this reasonably quickly, and thus break the chain of transmission of this disease.

But even with that achieved, there would remain another enormous medical and social problem connected with AIDS. By the time a vaccine is developed, there will likely be tens or hundreds of thousands of persons already afflicted with AIDS. In those cases, a vaccine would be useless, since the virus is already present in their bodies and wreaking havoc with their immune systems. We therefor need to continue, at fever pitch, research into the exact mechanism by which AIDS does its work. This is so we can save the lives of those already with the disease, and the many more we know will be contracting it before the vaccine is available.

These, then, are the two ultimate goals of AIDS research—creating a vaccine for the well and finding a course of treatment for the ill. How do we accomplish all of this?

I would like to put forward the proposal that AIDS is such an unparalled threat to the American people that an emergency task force be created at the very highest level of government. The task force would be headed by an emergency coordinator whose job it would be to act as steward while we, as a nation, join together to fight this threat. The group would report directly to the President or to the Secretary of Health and Welfare.

There are dedicated men and women throughout the country making heroic efforts every day to solve the AIDS mystery. I have nothing but respect for my research colleagues at the NIH and the CDC. Without them, we would be crippled in this effort. But the work of those scientists, along with those at research centers throughout the country, is not being coordinated; it is as though they are along the rim of a wheel that has no center. A task force would be that center of the wheel. This is not some symbolic action or hollow public relations gesture, but a desperate need. Today, with no one group overseeing the entire AIDS effort, it is easy for research to be duplicated; for vital scientific findings not to be passed along to those needing them; for researchers in one part of the country to pursue leads already discredited somewhere else. As you can well guess, any of those scenarios can be deadly in such a time of crisis. Equally deadly is the business-as-usual attitude of federal health officials in the timetables they use to approve funds for research studies. We desperately need to expedite the funding of worthy

projects. If the Jonas Salk of AIDS were to come to Washington today with a research proposal, he would probably be told to come back in two years after his papers had been reviewed.

The National Conference of Mayors, at its recent annual conference, passed a resolution asking the Congress to appropriate $50 million a year to combat the AIDS threat. I think that is an acceptable minimum amount. In considering the question of funding, the Congress must understand that AIDS is a new disease being visited on the population, and therefor new monies must be made available to deal with it. Some have suggested that AIDS research be funded by diverting money from other public health projects. But it makes no more sense to do that than it does to find the money for Social Security payments for a new retiree by cutting off payments to someone already in the system. The public health concerns towards which those earlier funds were appropriated are still with us even with AIDS, and they deserve continued federal support. As a researcher, I would also wish to point out that it would be extremely shortsighted to fund AIDS by cutting money that was earmarked for other, more basic, research. We would be helpless in the fight against AIDS—or in any other battle in medicine—had it not been for the basic research done in years past. Continuing that research is part of our commitment to the future.

I would like to make one additional observation about money. I think it demeans this body to suggest that it would only make a judgement on matters of life and death because of economics. The main reason we must vanquish AIDS is because it is the only moral choice presented to us. But should anyone need further persuading, consider the simple dollars and cents of the matter. It now costs about $70,000 to provide care for a patient with AIDS. Thousands have, or will get, the disease. Simple multiplication makes it clear that it is cheaper for us to cure AIDS than to treat it.

I have already spelled out the ultimate goals of AIDS research, and asked you to commit federal resources to help us achieve those goals. But there are a number of other steps we must take in the interim.

While everything possible must be done to disseminate information about AIDS to all interested researchers, this must be done in such a way that patient confidentiality is preserved at the same time. Growing millions of Americans are completely comfortable with their homosexuality and do not regard it as any source of embarrassment. But there are, of course, many others who are unwilling to be publicly identified as being gay. As a result, a firm federal policy on patient confidentiality would be a boon to research, since it would make closeted homosexuals much more willing to fully and candidly discuss their AIDS problems and related issues with their doctors. Such a policy would also respect the right to privacy that every American cherishes.

We need to greatly expand the extramural research being done into the epidemiology of AIDS. The disease baffles us on a number of fronts, not the least of which is the networks by which it is transmitted. Some examples of the questions we would like answered—San Francisco has a very large Asian population, yet there are only four Asian-Americans there with AIDS, while most other ethnic groups have the illness in proportion to their percentage of the population. Why is this so? In the first sets of studies on AIDS patients, they were revealed frequently to be highly promiscuous gay men. This is not at all the case today. Why the change? Among the Hatian males who have AIDS, nearly 100 have described themselves as hetrosexuals. How did the disease spread to them? The questions go on and on.

Fundings for research proposals are generally reviewed through the peer review process of the National Institute of Health. This is a time-honored procedure, and one that all scientists, including myself, regard as the very cornerstone of our work. Truth flourishes and science advances only in an atmosphere of skepticism, questioning and caution. I think we must also remember, though, that we are in the middle of a public health emergency unlike any other of our generation, and that, as I indicated earlier, the slow, deliberative evaluations that in less critical times are the lifeblood of research could, in this instance, quite literally spell the death of untold thousands of Americans. In the average case, the time that elapses between a proposal being put before the NIH and the funds for the project being released is 18 months to two years. As I think you can appreciate, that is close to an eternity when it comes to the current AIDS crisis. The NIH needs to very quickly establish an ad hoc review committee made up of able, dedicated experts who can review proposals for AIDS research on an emergency basis. These scientists would bring with them both their expertise as researchers as well as their recognition that a grave public health crisis exists that demands prompt action.

I also think it is important for the NIH to issue a general call for research proposals dealing with AIDS. This would send a signal from the federal government to the scientific community that it is genuinely serious about AIDS. I know of a number of able scientists who currently will not even bother spending the time putting together an AIDS-related proposal because they feel it will not be seriously considered by the authorities in Washington.

Every American has an interest in seeing to it that the nation's blood supply is protected. Efforts must be made to develop a reliable, scientific method of screening that supply for infectiuous agents such as AIDS. In recent months, as it has become suspected that AIDS may be transmitted through blood transfusions, the vast majority of gay men have taken themselves out of the pool of blood donors for the duration of this health emergency. Most blood banks have also cut back on blood drives in gay neighborhoods. But a policy of protecting the blood supply by screening donors, rather than blood, is ultimately shortsighted and ineffective. It is easy to imagine, for example, an office blood bank drive where a closeted gay man, and a potential AIDS carrier, wishes to "prove" his hetrosexuality to his co-workers by going along with the others and donating blood. No amount of pre-donation screening or question can prevent a person like that from donating blood. And a massive screening effort to determine who is, and who is not, a homosexual (or, for that matter, an intravenous drug user or a Haitian or a hemophiliac) is a social policy that is, at very best, of questionable wisdom, and at worst Orwellian. As far as the nation's blood supply is concerned, the emphasis must therefor shift from the donor to the blood.

There needs to be increased federal support for persons actually afflicted with AIDS. The cost of AIDS treatment is staggering, and is simply beyond the financial resources of most Americans. In the case of kidney dialysis, the federal government long ago realized that it was not befitting a civilized nation for its citizens to die because they could not afford the cost of medical care. The situation is much the same today with AIDS, and I believe the federal response should be the same.

Six months ago, those of us doing research into AIDS were frightened by two things—the disease itself, and the complete lack of awareness of it outside of the gay community. Now, we have the opposite problem. There are, in fact, now two AIDS epidemics; one involving immunology, the other involving fear. There are any number of horror stories in this regard; one of the most appalling has to do with a San Francisco bus driver who, out of a fear of contracting AIDS from a tattered slip of paper, refused to take a bus transfer from a man he presumed to be a homosexual. I also hear too-frequent reports of hospital workers refusing to care for AIDS patients. It is a sad time indeed when members of the healing professions no longer wish to care for the sick.

I don't wish to belittle the fear of AIDS; no one knows more than myself what a truly fearsome medical phenomenon it is. But I think there is a considerable public education project ahead of us to tell the public who is, and who is not, at risk. It cannot be repeated too often that there is no evidence that AIDS is transmitted through casual social contact. Common sense alone would lead one to that conclusion. If AIDS were easily transmitted, then by now millions of Americans would have it, not 1,800, most of whom are gay men.

In several ways, this fear of AIDS is a public health problem in its own right. The health and welfare department's new toll-free phone line is a small step in the right direction. (I would point out, though, that the phone lines are receiving up to 10,000 calls a day—testimony indeed to the concerns Americans have about AIDS.) There are also grave questions of social justice in this regard. I have heard too many stories of persons with AIDS being fired from their jobs or evicted from their homes once their condition became known. There are also economic aspects to the AIDS hysteria. My businessmen friends back in San Francisco have started to worry about the effect of the fear of AIDS on tourism in that city. They also say that friends in other big cities have started to echo the same concern. There is even the worry that foreign tourism to the U.S. could begin to suffer because of the world-wide attention given to AIDS. All of these AIDS-related fears are, of course, groundless. A high-level task force could do much towards reassuring the public of that fact.

The definition of AIDS must be broadened by the Social Security Administration for the purposes of providing benefits. Currently, the Social Security use the definition provided by the Center for Disease Control, which defines as AIDS patients as a person under 60 with either Kaposi Sarcoma of pneumocystis pneumonia, and a few other disease. However, we have recently see a number of new infectious agents take hold in AIDS patients. These people are just as disabled, just as in need of Social Security help, as a person with KS. Yet they are currently denied that help because of an outdated definition of the problem.

Due to the publicity AIDS has received in large cities with substantial gay popula-

tions, most physicians and other health care workers are now familiar with the clinical manifestations of AIDS, as well as the appropriate treatment protocols. But this awareness of AIDS must be spread to doctors all over the country, so that persons suffering from the disease are diagnosed correctly and from the very start receive appropriate medical care. This will help save the lives of these patients; it will also help curb the spread of the disease.

In closing, I would like to point out that last week alone, my home city of San Francisco buried four of its sons; young men who only months ago were in the prime of their lives. At a time such as this, one can't help but recall that it is the right to life that is the first of the three unalienable rights set forth in our Declaration of Independence; and that, as Jefferson wrote 207 years ago, that it is to secure those rights that governments are instituted among men. Any government has no higher purpose than to protect the lives of its citizens, and the citizens of the United States today face no greater public health threat than they do from AIDS. We have the profound moral obligation to take every step necessary to conquer it as rapidly as is humanly possible.

Thank you.●

PUBLIC ASSISTANCE FRAUD AND ABUSE PREVENTION ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. FRANK) is recognized for 5 minutes.

● Mr. FRANK. Mr. Speaker, today I have introduced a bill that would require States to match their public assistance rolls on a regular basis against all relevant Federal, State, and local wage and benefit records in order to verify the eligibility of applicants and recipients under the various federally assisted public assistance programs that are administered at the State level.

By filing this bill I do not mean to imply that the majority of public assistance recipients cheat. In fact only a small minority of recipients receive benefits by fraudulent means. Nor do I mean to imply that the levels of benefits received by recipients are too generous. It is because of my commitment to public assistance programs that I am working to make these programs more efficient. By eliminating the fraud that does exist we can be assured that the money designated for these programs goes to those who are in fact legitimately eligible to receive public assistance.

Whenever the Government uses computers to check individuals' financial records the question of privacy arises. I am sensitive to this problem. I believe that this bill includes the necessary safeguards so that while it meets the objective of eliminating fraud it does not violate the recipients' privacy.

When I served in the Massachusetts State Legislature I filed a similar bill that becomes law. The Massachusetts law that matches public assistance records and employment records has worked well because it does include the necessary safeguards that protect recipients privacy. It has enabled the State to run more efficient public assistance programs. I believe it is time to implement this type of legislation on a national level.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. STENHOLM, for 60 minutes, on September 27, 1983.

Mr. ROBERTS, for 60 minutes, immediately following Mr. STENHOLM.

(The following Members (at the request of Mr. BURTON of Indiana) to revise and extend their remarks and include extraneous material:)

Mr. MCCANDLESS, for 60 minutes, today.

SENATE BILL AND JOINT RESOLUTIONS REFERRED

A bill and Joint Resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1448. An Act to designate the square dance as the national folk dance of the United States; to the Committee on Post Office and Civil Service.

S.J. Res. 121. Joint resolution to designate November 1983 as National Diabetes Month; to the Committee on Post Office and Civil Service.

S.J. Res. 128. Joint resolution to designate the day of October 22, 1983, as "Metropolitan Opera Day"; to the Committee on Post Office and Civil Service.

S.J. Res. 134. Joint resolution to provide for the designation of the week of November 27 through December 3, 1983, as "National Entomology Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 140. Joint resolution to provide for the designation of the week of October 2 through October 8, 1983, as "Myasthenia Gravis Awareness Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 142. Joint resolution designating the week of October 3 through October 9, 1983, as "National Productivity Improvement Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 146. Joint resolution to designate March 23, 1984, as "National Energy Education Day"; to the Committee on Post Office and Civil Service.

S.J. Res. 150 Joint resolution to designate August 4, 1984, as "Coast Guard Day"; to the Committee on Post Office and Civil Service.

S.J. Res. 157. Joint resolution designating November 13, 1983, as "National Retired Teachers' Day"; to the Committee on Post Office and Civil Service.

ENROLLED JOINT RESOLUTIONS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee has examined and found truly enrolled joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.J. Res. 132. Joint resolution designating the week beginning September 25, 1983, as "National Adult Day Care Center Week"; and

H.J. Res. 218. Joint resolution to designate the month of September of 1983 as "National Sewing Month."

SENATE ENROLLED JOINT RESOLUTIONS SIGNED

The SPEAKER announce his signature to an enrolled joint resolutions of the Senate of the following titles:

S.J. Res. 81. Joint resolution to authorize and request the President to designate October 16, 1983, as "World Food Day";

S.J. Res. 82. Joint resolution designating November 1983 as "National Alzheimer's Disease Month"; and

S.J. Res. 119 Joint resolution to designate the week of December 11, 1983, through December 17, 1983, as "National Drunk and Drugged Driving Awareness Week."

ADJOURNMENT

Mr. KOGOVSEK. Mr. Speaker, I move the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 25 minutes p.m.) under its previous order, the House adjourned until Thursday, September 22, 1983, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

1887. Under clause 2 of rule XXIV, a letter from the Secretary of Labor, transmitting a draft of proposed legislation to provide for the modification and extension of the Federal supplemental compensation program, and for other purposes, was taken from the Speaker's table and referred to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PEPPER: Committee on Rules. House Resolution 312. Resolution providing for the consideration of S. 602. A bill to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes (Rept. No. 98-368). Referred to the House Calendar.

Mr. MOAKLEY: Committee on Rules. House Resolution 313. Resolution providing for the consideration of H.R. 2144. A bill to amend part C of title III of the Higher Education Act of 1965 to establish an endowment program for developing institutions, and for other purposes. (Rept. No. 98-369). Referred to the House Calendar.

Mr. BEILENSON: Committee on Rules. House Resolution 314. Resolution providing for the consideration of H.R. 2782. A bill to amend the Defense Production Act of 1950 to revitalize the defense industrial base of the United States (Rept. No. 98-370). Referred to the House Calendar.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 3648. A bill to improve the cost effectiveness of the National Railroad Passenger Corporation, to authorize appropriations for such Corporation for the fiscal year ending September 30, 1984, and for other purposes, with amendments (Rept. No. 98-371). Referred to the Committee of the Whole House on the State of the Union.

Mr. DELLUMS: Committee on the District of Columbia. S. 1625. A bill to amend the District of Columbia Retirement Reform Act (Rept. No. 98-372). Referred to the Committee of the Whole House on the State of the Union.

ADVERSE REPORTS

Under clause 2 of rule XIII.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 1234. A bill to establish domestic content requirements for motor vehicles sold or distributed in interstate commerce in the United States (Rept. No. 98-287, Pt. II). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. AKAKA (for himself, Mr. FUQUA, Mr. VOLKMER, Mr. LUJAN, Mr. NELSON of Florida, Mr. LOWERY of California, Mr. BROWN of California, Mr. CHANDLER, Mr. ANDREWS of Texas, Mr. BATEMAN, Mr. RALPH M. HALL, Mr. WALKER, Mr. DYMALLY, Mr. MINETA, Mr. MACKAY, Mr. TORRICELLI, Mr. MCGRATH, Mr. SCHEUER, Mr. YOUNG of Missouri, and Mr. GORE):

H.R. 3942. A bill to provide for commercialization of expendable launch vehicles and associated services; to the Committee on Science and Technology.

By Mrs. BYRON:

H.R. 3943. A bill to amend the Railroad Retirement Act of 1974 to remove the "last employer" limitation on the receipt of certain annuities in cases where the employment concerned is part-time nonrailroad employment; to the Committee on Energy and Commerce.

By Mr. DELLUMS:

H.R. 3944. A bill to protect the public interest in maintaining the stability of professional sports, and for other purposes; to the Committee on the Judiciary.

By Mr. FRANK:

H.R. 3945. A bill to require States to match their public assistance rolls on a regular basis against all relevant Federal, State, and local wage and benefit records, in order to verify the eligibility of applicants and recipients under the various federally assisted public assistance programs to which such rolls relate; to the Committee on Government Operations.

By Mr. FUQUA:

H.R. 3946. A bill to amend the Internal Revenue Code of 1954 to allow a deduction of $1,000 for each dependent who has attained age 55 and who is a member of the taxpayer's household; to the Committee on Ways and Means.

H.R. 3947. A bill to amend title II of the Social Security Act to eliminate benefit disparities by increasing primary insurance amounts, in cases where the benefits involved are computed under the present formula (enacted in 1977), to the extent necessary to assure that such benefits are no less than they would have been if computed under the pre-1977 formula; to the Committee on Ways and Means.

By Mr. GOODLING:

H.R. 3948. A bill to provide for a study of work and earnings limitations on the receipt of certain railroad retirement benefits and the effects of a proposed modification of those limitations; to the Committee on Energy and Commerce.

By Mr. HARRISON:

H.R. 3949. A bill to recognize the organization known as Veterans of the Vietnam War, Inc.; to the Committee on the Judiciary.

By Mr. MATSUI (for himself and Mr. HANSEN of Utah):

H.R. 3950. A bill to amend title 10, United States Code, to require authorization by law of certain consolidations of functions within the Department of Defense; to the Committee on Armed Services.

By Mr. MONTGOMERY (by request):

H.R. 3951. A bill to amend title 38, United States Code, to provide for the exclusion of residents and interns from coverage under the Federal Labor-Management Relations Statute; jointly, to the Committees on Veterans' Affairs and Post Office and Civl Service.

By Mr. PEPPER (for himself and Mr. QUILLEN):

H.R. 3952. A bill to amend titles XVIII and XIX of the Social Security Act to provide medicare and medicaid coverage of personal emergency response services, and for other purposes; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. TAUZIN (for himself and Mr. HUBBARD):

H.R. 3953. A bill to amend the Panama Canal Act of 1979 in order that outside-the-locks claims for vessels damaged may be resolved in the same manner as those damaged inside the locks, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. WON PAT:

H.R. 3954. A bill to establish a commission to review the facts and circumstances surrounding Guamanian losses caused by the occupation of Guam by Japanese Imperial Forces during World War II; to the Committee on Foreign Affairs.

By Mr. GINGRICH:

H.J. Res. 365. Joint resolution to designate December 17, 1983, as "Erskine Caldwell

Day;" to the Committee on Post Office and Civil Service.

By Mr. GONZALEZ:

H.J. Res. 366. Joint resolution to provide for the temporary extension of certain insurance programs relating to housing and community development, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. GAYDOS (for himself, Mr. MURTHA, and Mr. KOSTMAYER):

H. Con. Res. 170. Concurrent resolution expressing the sense of the Congress with respect to the ongoing discussions of a proposed joint venture; to the Committee on Ways and Means.

By Ms. KAPTUR:

H. Con. Res. 171. Concurrent resolution expressing the sense of the Congress with regard to defense burden-sharing efforts of the United States and Japan; to the Committee on Foreign Affairs.

By Mr. PEASE:

H. Con. Res. 172. Concurrent resolution requesting the President to call on pertinent member nations of the North Atlantic Treaty Organization and on Japan to meet their respective commitments to increase defense spending in 1983 and in 1984; to the Committee on Foreign Affairs.

By Mr. STARK:

H. Con. Res. 173. Concurrent resolution expressing the sense of Congress that the President should instruct the U.S. Ambassador to the United Nations to introduce a resolution, promptly, that calls upon the Government of Iran to cease its persecution of Baha'is in Iran and allow Baha'is who desire to emigrate from Iran to do so; to the Committee on Foreign Affairs.

By Mr. BROOMFIELD (for himself and Mr. ZABLOCKI):

H. Res. 315. Resolution expressing the appreciation of the House of Representatives of the United States to the Government and people of Japan; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HOPKINS:

H.R. 3955. A bill for the relief of Elvis J. Stahr, Jr.; to the Committee on the Judiciary.

By Mr. PANETTA:

H.R. 3956. A bill for the relief of Velid Mehmed Dag; to the Committee on the Judiciary.

By Mr. PEPPER:

H.R. 3957. A bill for the relief of Jeffrey Young of Miami, Fla.; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1010.

By Mr. CRAIG:

(Amendment to the amendment in the nature of a substitute (text of H.R. 3857).)

—H.R. 1010 is amended by inserting the following new Section 9(a)(5):

"Section 9(a)(5). Notwithstanding any law, practice or procedure for acquisition by eminent domain in the state where the property is situated, the following requirements apply to the acquisition of rights of way through the power of eminent domain under this Act:

"(A) No less than ninety (90) days prior to the filing of an application with the Secretary, the applicant shall give notice of intent to acquire to the owner of the specific lands sought.

"(B) The applicant shall obtain an independent appraisal of the property to be acquired, and the landowner shall have the right to be present during said appraisal. The applicant shall provide a copy of said appraisal to the owner.

"(C) The applicant shall disclose to the landowner the prices offered for similar land sought to be acquired in the area for the same project.

"(D) Formal condemnation procedures shall not be initiated less than ninety (90) days following the initial notice to the landowner of the intent to acquire.

"(E) Landowners shall have a right to judicial review under this subsection, in the appropriate court of the State in which such lands are located.".

By Mr. SHUSTER:

(Amendments to the amendment in the nature of a substitute (text of H.R. 3857).)

—Page 14, line 17, strike out "private lands" and insert in lieu thereof "those lands owned by any common carrier engaged in the interstate transportation of coal which are".

—Page 15, lines 12 and 13, strike out ", except that" and all that follows through the period on line 16 and insert in lieu thereof a period.

—Page 21, line 5, after "point of destination" insert ", at the point of origin,".

—Page 21, after line 6, insert the following new sentence: "The Secretary shall consult with the United States Geological Survey in making findings under subparagraph (D).".

—Page 23, line 13, strike out "and".

Page 23, line 14, strike out "(iv)" and insert in lieu thereof "(v)".

Page 23, after line 13, insert the following:

"(iv) a list of the names of persons who have a financial interest in such pipeline or extension and a certification of whether or not any coal to be transported in such pipeline or extension is owned by any such person or any person affiliated with any person who has such a financial interest; and".

—Page 28, after line 17, insert the following:

(1) No certificates may be issued to or held by any person under this section who controls, is controlled by, or is under common control with, any person who—

(1) uses or will use coal transported by the coal pipeline constructed or proposed to be constructed pursuant to such certificate, or

(2) supplies or will supply coal to such pipeline.

In addition to the meaning given the term 'control' by section 10102(7) of this subtitle, any person who owns 5 percent of the voting stock of another person shall be deemed to control such other person for purposes of this subsection.

—Page 41, after line 16, insert the following:

"(i) Not later than 10 days after the date of filing of a contract under this section, the Commission shall notify the Attorney General of its consideration of such contract. The Commission shall provide such information as the Attorney General shall require to conduct an antitrust review to determine the likely effects upon competition associated with the approval of such contract. No contract shall be approved under this section unless the Attorney General shall have advised the Commission in writing that, on the basis of such review, approval of the contract will not be inconsistent with the antitrust laws and will not restrain competition.".

—Page 41, after line 16, insert the following:

"(i) If a coal pipeline carrier is providing transportation of coal under a contract approved under this section in competition with a common carrier providing transportation subject to the jurisdiction of the Commission under subchapter I of chapter 105 of this title, such common carrier, for purposes of chapter 107 of this title, shall be irrebuttably presumed not to have market dominance over any transportation of coal in competition with the transportation of coal provided by the coal pipeline carrier.".

—Page 44, lines 16 and 17, strike out "or under construction".

Page 44, line 16, strike out "with" and all that follows through the period on line 18 and insert in lieu thereof the following: "facilities of a coal pipeline or extension thereof construction of which are substantially completed on such date.".

—Page 48, after line 19, add the following new section:

LIMITATION ON OWNERSHIP OF COAL PIPELINES

SEC. 19. No coal pipeline for which a certificate has been issued under section 10 of this Act may transport coal owned by any person who has a financial interest in such coal pipeline or who controls, is controlled by, or is under common control with, any person who has such a financial interest. For purposes of this section, the term "control" has the meaning such term has under section 10102 of title 49, United States Code.

At the end of the table of contents on page 2 before line 1, insert the following:

SEC. 19. Limitation on ownership of coal pipelines.

—Page 48, after line 19, add the following new section:

NONSEVERABILITY

SEC. 19. If any provision of this Act or the applicability thereof to any person or circumstance is held invalid, the remainder of this Act and the application of such provision to other persons or circumstances shall be invalid.

At the end of the table of contents on page 2 before line 1, insert the following:

SEC. 19. Nonseverability.

—Page 48, after line 19, add the following new section:

NONAPPLICABILITY

SEC. 19. Notwithstanding any other provision of this Act (including any amendment made by this Act), nothing in this Act (including any such amendment) shall apply to any carrier of coal by pipeline with respect to which a certificate is not issued under section 10 of this Act.

At the end of the table of contents on page 2 before line 1, insert the following:

SEC. 19. Nonapplicability.

H.R. 3913

By Mr. BIAGGI:

—Page 32, line 2, strike out "$1,825,436,000" and insert in lieu thereof "$1,841,438,000".

EXTENSIONS OF REMARKS

SECRETARY OF STATE GEORGE SHULTZ TALKS ABOUT LEBANON

HON. WM. S. BROOMFIELD
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BROOMFIELD. Mr. Speaker, let me call to your attention an excellent statement regarding American foreign policy in Lebanon.

Today, Secretary of State George P. Shultz met with the members of the House Foreign Affairs Committee to discuss Lebanon, and what our Nation's goals and objectives are in that critical area of the world.

I commend the Secretary for his frankness, clarity, and vision. The Middle East is a complex and turbulent area and it is vital to all of us that we understand why America is doing what it is doing in that strategic area.

I am delighted that our domestic controversy over the war powers issue is behind us for awhile. We must show the world that we can unite and stand behind a policy. I share the Secretary's sentiments about the need for cooperation between the executive and legislative branches of Government on this issue. It is truly a challenge that we must face together.

Our goals in Lebanon are sound and straightforward. We are working toward the withdrawal of all foreign forces from that country so that Lebanon can assert its own independence. We are also concerned about the security of Israel's northern settlements and the need to protect the people living there.

Although we have lost a number of fine young marines, the presence of the Multinational Force is designed to provide a sense of security for the Government of Lebanon as it proceeds ahead with national reconstruction. There are obviously elements in Lebanon who are opposed to internal stability. We must not allow these groups to lead us away from our objective of bringing peace to that embattled land.

With these thoughts in mind, I again thank Secretary Shultz for his wisdom and guidance and strongly recommend that his remarks be read by all Members of the Congress.

STATEMENT BY HON. GEORGE P. SHULTZ, SECRETARY OF STATE

Mr. Chairman, members of the Committee: I welcome this chance to talk with you about our objectives in Lebanon and about the importance President Reagan attaches to cooperating with the Congress in pursuit of these objectives.

The challenge in Lebanon is a challenge we face together, as a nation. The issues are not partisan issues. At stake are goals and principles of American foreign policy on which I dare say there is a broad measure of consensus. Whatever legitimate differences there may be over tactics or prerogatives, our leadership in the world is clearly impaired if the President and the Congress attempt to conduct two different foreign policies. We must work together to meet our common, national responsibility or else our common, national interests in the world will suffer. In the last 15 years, there have been instances of deadlock between our two branches of government which resulted in harm to our foreign policy, and human tragedy. The President is determined that this will not be such a case.

This is the spirit in which we approach this problem, and I am heartened by the similar spirit I have been in the Congress. As President Reagan said yesterday, we support the bipartisan leadership agreement that has been reached. This agreement, in my view, serves the national interest.

Let me explain the Administration's view of what is at stake in the Middle East, and in Lebanon; what our diplomacy is attempting to accomplish there; and why the presence of our Marines has been of enormous importance.

OUR POLICY IN THE MIDDLE EAST

It is almost 10 years since the October 1973 war, and for the past decade, the United States has been vigorously and almost continuously engaged in Middle East diplomacy.

Given our strong moral and political commitment to Israel and our many strong friendships in the Arab world, we have always perceived that a negotiated solution to the Arab-Israeli conflict was in the national interest of the United States. Israel and its Arab neighbors deserve to live in peace and security; the Palestinian people deserve a just solution to their legitimate rights and aspirations; all the nations of the region deserve a future free of external intervention or superpower confrontation.

The road to peace is long and hard, and we have no illusions about it. But we can be proud of the role our country has played in bringing about many significant steps toward peace in the past 10 years.

Just over a year ago, President Reagan addressed himself to the broader questions of Middle East peace in a major initiative, which offered—and still offers—the most practical and workable and hopeful basis for negotiation. Anyone in the Middle East who truly seeks a just, secure, and comprehensive solution to the conflict will have to turn in the direction of the President's initiative, firmly grounded as it is in the Camp David Accords and UN Security Council Resolutions 242 and 338.

The crisis in Lebanon cannot be isolated from the larger Middle East crisis. It involves many of the same parties concerned with the broader issues of Middle East peace. It involves similar questions of security, respect for sovereignty, and peaceful settlement of disputes. To advance toward a peaceful solution in Lebanon will contribute to the broader peace process; setbacks in Lebanon will make the broader effort that much harder.

OUR OBJECTIVES AND POLICY IN LEBANON

Our objectives in Lebanon have, from the beginning, been essentially threefold:

The withdrawal of all external forces from Lebanon;

A sovereign independent Lebanon dedicated to national unity and able to exercise control throughout its national territory; and

Security for Israel's northern border, so that the inhabitants of northern Israel can live in safety and without fear of artillery and rocket attacks.

These objectives are not changing. They are, and have been, a constant of our policy. The latest outbreak of fighting should not cause us to lose sight of them.

Lebanon is a proud and beautiful country, whose people have contributed much to the world. Yet it has also had a complex and turbulent history. The roots of enmity in that country go very deep indeed. Nevertheless, for many years Lebanon thrived because political rivalries were accommodated and a delicate balance maintained. Our country too suffered a tragic civil war, but we survived and overcame it. The people of Lebanon remember a happier time when their nation was a dynamic, progressive, and prosperous democracy. The yearning for peace, too, runs deep in Lebanon.

With the end of the terrible ordeal of Beirut last summer and the election of President Amin Gemayel shortly thereafter, it appeared that Lebanon would get a second chance after all. Almost all of Lebanon's many confessional groups pledged their loyalty to their new leader and seemed ready to bury their differences in the name of political and economic renewal. War damage was quickly being removed from Beirut and reconstruction seemed well underway.

To consolidate this hopeful beginning, it was clear that Lebanon had, as a matter of top priority, to see to the withdrawal of all non-Lebanese armed forces from its soil. Whatever indigenous barriers to national reconciliation the Lebanese may face and however prepared they may be to overcome them if given a chance, that process can never really get underway so long as Lebanon remains occupied by foreign armies, foreign paramilitary forces, and foreign terrorist groups. The United States responded favorably to the request of the Lebanese government—and of many of our Arab friends—to help Lebanon and Israel reach an agreement that would be a first step toward this objective. Israel was prepared to withdraw, and Lebanon was willing to negotiate an agreement that also met Israel's legitimate need for security on its northern border. After lengthy negotiations, and with a great deal of goodwill on both sides, Lebanon and Israel reached such an agreement on May 17.

In parallel with this effort, we put our weight behind President Gemayel's movement toward political accommodation. On August 31, President Gemayel, with his

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Council of Ministers, issued a call for key Lebanese leaders to join in a dialogue on a new national approach to reconciliation and unity. He has made clear his willingness to broaden the base and composition of his government to reflect a true sharing of power. This is a policy we have strongly urged, supported, and assisted, and we have no doubt of President Gemayel's sincerity. Ambassadors Robert McFarlane and Richard Fairbanks have devoted considerable time and effort to this enterprise, as has Saudi Arabia.

The problem, of course, has been Syria. The two tracks of Lebanon's policy—foreign troop withdrawal, and national reconciliation—have both been blocked by Syria, which has been heavily rearmed by the Soviet Union since Syria's defeats in battle last summer. No one questions Syria's legitimate security concerns with respect to Lebanon. But Syria, unlike Israel, has been unwilling to negotiate with Lebanon over how to reconcile its security concerns with Lebanon's sovereign right to follow its own path. The question arises whether Syria's aim is to assure its security or assure its domination of Lebanon:

Syria now has the largest army in Lebanon, but it has refused to negotiate the withdrawal of its forces, reneging on repeated pledges that it would do so once the Israelis did.

Syria has persisted in this course even in defiance of the Lebanese government's formal requests at the beginning of September to Syria, the PLO, and the Arab League that all external forces withdraw. Israel has stated its unwillingness to withdraw totally as long as Syrian forces are there; thus Syria is in the ironic position of keeping Israeli forces in Lebanon. Syria is also permitting the reentry of armed Palestinian groups into the Aleyh/Shuf area in violation of the agreements reached through Ambassador Habib's mediation last year.

At the same time, Syria is using its leverage within Lebanon to obstruct the process of national reconciliation. Indeed, Syria has instigated political opposition within Lebanon and armed several factions engaged in military actions against the legitimate government.

Therefore, the immediate focus of our diplomacy, conducted by Ambassadors McFarlane and Fairbanks, is a ceasefire between the various groups in Lebanon. Saudi Arabia has been actively pursuing the same goal. Jordan, Egypt, and other friendly Arab countries have been very supportive of these diplomatic efforts.

The outcome of this negotiation, as of any negotiation, will depend on the balance of forces. Those who seek to improve their position by force will probably not agree to a ceasefire until they run up against a stalemate on the battlefield.

This brings me to the military situation, and to the role of the Multinational Force now in Lebanon, which includes, as you know, approximately 1200 U.S. Marines on the ground in the Beirut area.

THE MULTINATIONAL FORCE AND THE U.S. MARINES

A year ago, President Reagan dispatched these Marines to participate in the Multinational Force requested by the government of Lebanon. The presence of this force was designed to help ensure the Lebanese government's sovereignty and authority; it was also intended to further that government's efforts to assure the safety of people in the area and to end the violence that had tragically recurred in the massacres of Sabra and Shatila.

British, French, and Italian forces are serving alongside our Marines, and thus the MNF is a truly multilateral, cooperative effort. Its task is a peacekeeping mission, not a warfighting mission.

Its job is not to take sides in a war, but, on the contrary, to help provide a sense of security for the legitimate government of Lebanon as it pursues its national soverignty and national unity. Most of the key confessional groups and friendly Arab countries supported this role for the MNF when it was sent to Lebanon, and they continue to support this role.

Now the MNF is under challenge by those apparently determined to prevent an internal political accommodation. The President has augmented US Naval support forces offshore and has authorized US forces to exercise their right of self-defense should attacks on them continue. Our MNF partners have taken similar or other measures to assure security and self-defense.

We are concerned that key strategic positions in the vicinity of Beirut, which are vital to the safety of our Marines, of other American military and diplomatic personnel, and to the security of Beirut, have recently come under attack. We have responded to these attacks in order to protect our personnel, and will continue to do so. General Kelley will be able to discuss the military situation in greater detail.

A ceasefire, as I have suggested, will come about only when all parties conclude it is in their interest.

Our strategy in Lebanon is to help create conditions that will make it in everyone's interest—to help produce a kind of equilibrium which will encourage a ceasefire, a political accommodation, and ultimately the withdrawal of all foreign forces. We are seeking to build a structure of stability, on the following pillars.

The first element is political negotiations to bring about national reconciliation within Lebanon, to ease or resolve the internal rivalries and mutual suspicions that are at the heart of Lebanon's agony. The United States has strongly supported this endeavor. We are also concerned for the safety of the Palestinian civilians in Lebanon.

The second element is diplomacy to organize international support for the legitimate government of Lebanon, for its efforts at reconciliation, and for a ceasefire. The United States is actively engaged in this effort.

In the military dimension, the primary responsibility rests on the Lebanese Armed Forces, which have acquitted themselves well. We have helped train and equip these forces, and we are pleased that these forces have been reconstituted to take into account.

An army that would be more than adequate for its mission of keeping order once foreign forces were removed, however, is now understandably under severe pressures because it is under assault by forces protected, armed, and encouraged by Syria. It is the external, non-Lebanese involvement that is enormously exacerbating the problem.

Israel continues to have influence with many groups in Lebanon, and has an interest in encouraging national reconciliation and stability. Events north of the Awwali River must be of concern to it, since its long-term security cannot but be affected by Syrian and PLO dominance of the rest of Labanon.

The MNF, including our Marines, provide an added measure of stability in the overall question, as I have described.

Our Marines, or the MNF as a whole, cannot tip the balance of forces alone—and it is not their mission to do so. But their presence remains one crucial pillar of the structure of stability. As a former Marine, I will not allow anyone to cast doubt on how formidable even this small number of Marines can be.

They are an important deterrent, a symbol of the international backing behind the legitimate government of Lebanon, and an important weight in the scales. To remove the Marines would put both the government, and what we are trying to achieve, in jeopardy.

This is why our domestic controversy over war powers has been disturbing. The uncertainty about the American commitment only weakens our effectiveness; doubts about our staying power can only cause the aggressors to discount our presence—or to intensify their attacks, in hopes of hastening our departure. An accommodation between the President and Congress to resolve this dispute will help dispel those doubts about our staying power and strengthen our hand.

The Executive and Legislative Branches, as you know, have important differences of principle with respect to the War Powers Resolution. The Executive Branch has traditionally had questions about the requirement of Congressional authorization for Presidential disposition of our armed forces, both in light of the President's Commander-in-Chief power and on practical grounds. Congress, of course, has had a different view. We could not expect to resolve this basic difference definitively now, but the Administration has been prepared to consider practical proposals that enabled us to protect our common, national interest in Lebanon without prejudging our respective positions on the basic issue of principle.

In this regard, we are gratified that an agreement has been reached among the bipartisan leadership of the Congress to introduce and seek to enact a resolution authorizing the continued presence and mission of the US peacekeeping forces in Lebanon. As the President stated yesterday, although he has substantial reservations about parts of this resolution, he would be willing to sign the proposed resolution while expressing those reservations. We are especially pleased that the proposed resolution not only supports our policies in Lebanon, but now enables us to advance our national interests on the solid bipartisan basis that has been the traditional hallmark of American foreign policy.

WHAT IS AT STAKE IN LEBANON

At stake in Lebanon are some basic principles of international law and international morality that have wider relevance for American foreign policy:

At stake is a small country's right to decide for itself how to achieve its sovereign objectives, free from outside pressure, threat, or blackmail.

At stake is the principle that international disputes should be settled by peaceful means, not by the use or threat of force.

At stake also are some concerns that affect our national interest and the security of our friends and allies. If American efforts for peaceful solutions are overwhelmed by brute force, our role is that much weakened everywhere. Friends who rely on us will be disheartened, and will be that much less

secure. Moderates in the Arab world whom we are encouraging to take risks for peace will feel it far less safe to do so. The Soviet Union's efforts to disrupt our diplomacy will have scored a victory; radical and rejectionist elements will be strengthened. The cause of peace and justice will have suffered a setback. Israel's security on its northern border will be weakened.

What we are doing in Lebanon is right. There are risks involved, but any important undertaking involves risks. If we want the role and influence of a great power, we have to accept the responsibilities of a great power. Many millions of people around the world look to us as the strongest defender of freedom, justice, and peace; we cannot walk away from responsibilities without paying a moral and political price.

I prefer to look at it positively: After all the experience of the last 15 years, nothing would give more reassurance and hope to all our friends in the world than to see the President and Congress working in harmony, united behind a strong and purposeful national policy. This is our opportunity now. We cannot afford to let it slip away.●

TERENCE CARDINAL COOKE—AN APPRECIATION

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BIAGGI. Mr. Speaker, all of those of us who live in the archdiocese of New York are saddened by the news that our spiritual leader Terence Cardinal Cooke is terminally ill with leukemia. This sadness goes far beyond the parameters of the archdiocese and is shared by Pope John Paul and President Reagan—each of whom communicated their sentiments to Cardinal Cooke.

Since 1968, Cardinal Cooke has served as the leader of the archdiocese of New York which has some 1.8 million Roman Catholics. Further Cardinal Cooke also serves as our Nation's Roman Catholic military vicar.

Terence Cardinal Cooke has been a priest since his ordination on December 1, 1945. He taught at both Catholic and Fordham Universities and by the year 1957 he was named as personal secretary to his predecessor Cardinal Spellman. By 1965 he was ordained as an auxiliary bishop.

He was installed as archbishop of New York on April 4, 1968, with President Lyndon B. Johnson in attendance. Cardinal Cooke has counseled all of the President's who have served during his years as archbishop and has been especially close to both President and Mrs. Reagan.

Terence Cardinal Cooke is a native New Yorker having been born on the upper West Side of Manhattan. He knows New York as well as anyone having visited its neighborhoods and seen its people for many years. At one time in 1945 Cardinal Cooke was assigned as assistant pastor at St. Athanasius Church in the Bronx. Cardinal Cooke despite his national and international prominence and position has always felt most comfortable in New York.

Cardinal Cooke is viewed by those who have known him as a patient, compassionate, and highly intelligent man more content with being in the role of a pastor than a church administrator. I have the personal honor and privilege to have known Cardinal Cooke for many years found his counsel invaluable to me personally. One of the proudest pictures I have in my office is with Cardinal Cooke and former President Gerald R. Ford at the annual Al Smith dinner in New York City.

Cardinal Cooke once said his main goal was to be a "good priest." He gained a reputation over these past 15 years as a master conciliator. He has also maintained a remarkably close relationship to the individual people who make up his massive archdiocese. He has been one of the most accessible and visible of all cardinals in this Nation. This tradition of maintaining close touch with people also has carried into his work in the archdiocese. Few positions which Cardinal Cooke has taken over the years have come without the benefit of consultation with individual priests and pastors from within the archdiocese.

It is impossible to predict how much longer Cardinal Cooke will live. He has been administered with last rites by the church. His spokesman has said that the cardinal is taking the news "with faith and peace of soul." He is continuing to work and attend to his responsibilities.

The people of New York have been blessed by Cardinal Cooke through his work. There are few people who have given so much of themselves for their fellow man than Cardinal Cooke. Whether he provided counsel or solace to an individual parishioner or to a fighting man overseas or to a Chief Executive, Cardinal Cooke was a man of commitment and compassion. I have had the distinct honor of being in the company of Cardinal Cooke on numerous occasions. I have been enriched as a person because of having known this man. There are few people who will be missed more than Cardinal Cooke.

It has been said that death, like life, is a gift of God. Cardinal Cooke's life was a gift to the millions who know him and join with me in praying that the cardinal live his remaining days in peace and without suffering.●

THE 200TH BIRTHDAY CELEBRATION OF THE TOWN OF CHESTER, MASS.

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. CONTE. Mr. Speaker, I would like to take this opportunity to congratulate the board of selectmen, the bicentennial committee, and the townspeople of the beautiful community of Chester, Mass., on the occasion of their 200th birthday.

Chester is a lovely rural community that is nestled among the rolling hills of Hamden County. Flowing through its green valley are the western and middle branches of the Agawam River. Throughout its history, Chester has typified the struggle and enlightenment of the early New England settlers. Hardy men and women coming to this raw country with nothing more than a few tools and animals, built farms and homes with their own hands.

As New England progressed toward the industrial age, Chester townspeople developed small industries. Typical of these were mining, papermills, wood products factories all built around the natural resources that abounded in the area. The residents utilized well the ingenuity ascribed to New Englanders.

Politically, the townspeople of Chester mirrored the opinions of their fellow colonists. Men of Chester joined the fight for freedom early in the Revoluntionary War.

Today, Chester remains intact, as a symbol of the bucolic lifestyle inherent to the countryside of Massachusetts. The current population of 1,100 reflects the changing times. Many of Chester's residents commute to jobs in nearby cities, but return home each evening to enjoy the rural lifestyle.

Chester is still home to farmers. It numbers among its residents artists and artisans. These groups continue the traditions of the past while accommodating the technology of today.

The schedule of the bicentennial festival exemplifies the varied interests and concerns of the citizens of Chester. The 2-day schedule included arts and crafts exhibits, performing arts presentations, agricultural displays, community group performances, special children's events, and popular entertainment.

To the people of Chester, I commend you for your respect of traditions and your accomplishments of today. I extend my sincerest congratulations to you on this most glorious occasion.●

GETTING THE DEFICIT DOWN

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, September 21, 1983, into the CONGRESSIONAL RECORD:

GETTING THE DEFICITS DOWN

The rosiest economic forecasts still show enormous budget deficits in the years ahead. When the government closes its books on the 1983 fiscal year at the end of September, it will have run its first annual deficit in excess of $200 billion, nearly double the record $111-billion deficit of 1982. The 1984 deficit promises to be as big.

These surging deficits have come about because tax cuts and defense spending increases, many of which are still ahead, far exceed domestic spending cuts, many of which have already occurred. It does not appear likely that Congress will pass the tax increases called for in its most recent budget resolution, and it seems equally unlikely that Congress will make massive spending cuts in any budget accounts, so deficits may very well remain high beyond the middle 1980's even if the economic recovery is stronger than expected. Eventually, the deficits could put us in a cruel dilemma. On the one hand, the Federal Reserve could loosen monetary policy in order to keep the credit-hungry government from crowding out private borrowers and driving interest rates up. The problem with this approach is that loose money would lead to a resurgence of inflation. On the other hand, the Federal Reserve could tighten monetary policy in order to keep inflation from resurfacing in the deficit-driven economy. The problem with this approach is that heavy government borrowing would drive interest rates up, particularly in the sectors of the economy that are sensitive to interest rates, and choke off the economic recovery. High interest rates cost jobs and discourage business investment, home building, consumer spending, and exports.

Suitable policies that substantially reduce the budget deficits will do much to sustain noninflationary growth. Everyone who has analyzed the budget carefully, however, knows that reducing the deficits will not be easy. Those who say that the deficits can be eliminated painlessly by stamping out waste, fraud, and abuse are doing the nation a disservice. They are implying that the task of reducing deficits is far easier than it really is. Reducing the deficits is important to liberals, but not as important as protecting domestic programs; reducing the deficits is important to conservatives, but not as important as increasing defense spending. Strong leadership will be necessary to portray the complexity of the task of reducing the deficits and to suggest the appropriate solution. We must defuse the economic "time bomb" set ticking by the deficits.

Although the Reagan Administration argues that there is no relationship between the big budget deficits and high interest rates and that strong economic growth will continue even with the deficits, it has not been notably successful in convincing others of that view. Most of us would agree that the government cannot continue to spend hundreds of billions more than it takes in each year. Acknowledgment of this fact, however, brings us face to face with some hard political realities. As much as most of us would prefer to close the gap between revenue and spending by cutting spending, the difficulty of cutting spending, the huge cuts that have already been made in domestic spending, and the broad support for spending on military and entitlement programs make it extremely unlikely that the budget would be balanced by spending cuts alone. Neither those who favor reducing the deficits by spending cuts nor those who favor doing so by tax increases have the political power to make their preferred approach law. A government fairly evenly divided between Republicans and Democrats requires that any important initiative be undertaken in a bipartisan fashion. In effect, this means that we must deal with both revenue and spending. More taxes are part of the package, and we should begin the difficult job of identifying the taxes that can be raised with the least danger to the economy. Cutting spending is part of the package as well, and we must start looking for the cuts that can be made with minimum damage to our national goals and priorities, recognizing that the elimination of misspending is only the first and easiest of many steps.

I think the Congressional Budget Office is right when it says there is a strong possibility that neither the President's ideas for managing the budget deficits (deep domestic spending reductions and a $45-billion "contingency tax" to take effect in 1986) nor Congress' (much slower growth in defense spending and new taxes amounting to $73 billion over the next three years) will be accepted. It disturbs me that neither the President nor Congress is really proposing and pushing an aggressive plan to get the deficits down. The reason, I suspect, is that the economic indicators have been improving. For the present, both the executive and legislative branches of government apparently have lost a sense of urgency. The current optimism about the economic recovery has obscured the tough choices and real sacrifices that lie ahead. Our government tends to swing into action only when faced with a crisis (the social security problem, for example), and there is no feeling of crisis in the air today. Members of Congress who returned to Washington at the end of the August recess noticed concern about the deficits in their states and districts, but they saw no panic.

My view is that the paramount objective of economic policy should be a sustained period of non-inflationary growth. The preferred course toward that objective requires an accommodative monetary policy from the Federal Reserve (one assuring that the economic recovery will not run aground for want of credit) and a responsible fiscal policy from the President and Congress (one assuring lower budget deficits in the future).

The political jockeying should cease, and a bipartisan summit on the budget deficits should be convened. The summit would bring together the President, the Speaker of the House, the Senate majority leader, and key budget and tax-writing committee chairmen and ranking members in a series of meetings for the purpose of finding a workable solution to the deficit problem. The President and the congressional leadership have a duty to meet the threat the deficits pose to the economy by doing what all of us know must be done: getting the deficits down.●

ROUKEMA SALUTES TRICENTENNIAL OF GERMAN SETTLEMENT IN AMERICA

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mrs. ROUKEMA. Mr. Speaker, the members of the German American Club of North Jersey and New York will be gathering next Wednesday, September 28, to celebrate a truly significant milestone—300 years of German settlement in the United States. They will be honored at this celebration by Mr. Herman Schnipkoweit, the social minister of the state of Lower Saxony, and by Mr. Heinrich Bierman, county executive of Hildesheim.

This group celebrates what at first glance seems to be a small event lost in the grand sweep of history. On October 6, 1683, a small sailing boat left the port of Krefeld in Westphalia. Aboard were 33 Mennonite Germans fleeing to the haven of North America. They were coming to America, like so many other settlers from all over the world, to live free. Germany was reeling from the aftermath of the terrible 30 years war, where the German people had been held hostage to politics and wars of the royal dynasties of Europe. The 33 Mennonites were destined for Pennsylvania where William Penn had encouraged German settlement in his 1-year-old colony. These 33 Germans were the vanguard for many, many millions of their countrymen in the next 300 years.

Today, nearly 60 million Americans, almost one-third of our people, can proudly claim Germany as their ancestoral home.

And the contribution of German Americans, both in the past and at present, is immeasurable.

At the time of the American Revolution, so many Germans lived in the newborn United States that the Declaration of Independence was reportedly first read in German to the eager crowds of Philadelphia. Indeed, tradition tells us that the Continental Congress considered and failed by only one vote to make German the official language of the new nation.

The United States may not have even gained its hard-fought independence if it were not for the able Gen. Friedrich von Steuben, only second to George Washington in his contribution to the cause of American independence.

German was the usual language heard in the steel mills, in the coal mines, and on the construction site. From New York to Chicago from St. Louis to San Francisco—German Americans helped to build America's great cities. From the valleys of Penn-

sylvania to the plains of Nebraska, they settled the farms. Many German surnames have become household words from German American success at business. Indeed, it would be impossible to find a field where German industriousness and ingenuity have not had a considerable impact.

I recently returned from a business trip to Germany. There, I experienced firsthand the kindness, the strength, and the good will of the German people and the beauty and richness of their land. The Bundesrepublik is our trustworthy ally both in the necessity of defense and the prosperity of trade. We share a common faith in the democratic ideals that constitute mankind's most noble experiment.

So it is with much pleasure that I congratulate the German American Club on this historic occasion. I am sure that all the Members of this body join me to wish for a fruitful future for German Americans and all Americans as we work together to build even a better world for our children.●

FIRE MARSHALS URGE FEDERAL, STATE, AND LOCAL COOPERATION

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. FRANK. Mr. Speaker, I recently had the opportunity to address the banquet of the New England Association of Fire Marshals. One of the major concerns of this important and useful association is to improve the job our society does in the prevention of fires. Those in the fire service know that sensible regulation by government can do a great deal to save lives and protect property from preventable fires. The Fire Marshals also understand the importance of cooperation among the various levels of government as well as the private sector in achieving these sensible regulatory policies.

I am very pleased to enter here into this RECORD the resolution calling for Federal, State, and local cooperation in the implementation of new residential fire sprinkler technology adopted on September 15 in Plymouth, Mass., by the New England Association of Fire Marshals.

NEW ENGLAND ASSOCIATION OF FIRE MARSHALS

RESOLUTION

Whereas it is recognized that the fire problem is the responsibility of State and local jurisdictions and

Whereas the Federal Government through FEMA and the U.S.F.A. will provide assistance to encourage states and communities to expend effort to solve the fire problem and

Whereas there still exists an unacceptable level of fire deaths, fire injuries, and fire property losses and

Whereas the majority of deaths, injuries and property losses are a result of residential fires and

Whereas there now exists a new quick response residential fire sprinkler technology which provides an enhancement to life safety and significant reduction of fire property losses.

Now therefore be it resolved that the New England Association of Fire Marshals encourages a coalition of effort on the parts of the Federal Government, Industry, State, and Local government to implement this new residential fire sprinkler technology through the use of incentives, promotion, public education, and continued research and development.

Dated this 15th day of September at Plymouth, Massachusetts.●

CONGRATULATIONS TO EASTER SEAL SOCIETY

HON. JOSEPH M. McDADE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. McDADE. Mr. Speaker, on October 11, 1983, the Easter Seal Society of North-Eastern Pennsylvania will be celebrating the 50th anniversary of their founding. I want to take this opportunity to congratulate the society and their president, Dr. Selma Doloff, for all of the outstanding community service they have provided Pennsylvania over the past 50 years.

When Congress talks about the contributions of the private sector, we mean organizations such as Easter Seal. Their work with handicapped Americans is invaluable in the rehabilitation of young minds and bodies. Selfless dedication and integrity are the cornerstone of the reputation of the staff and the many volunteers. When we make a contribution to Easter Seal, we know that our support is going to help those in need, in a caring and efficient manner.

I encourage this Congress to examine the work and the skills of Easter Seal, and especially the outstanding efforts of the North-Eastern Pennsylvania Easter Seal Society. I commend them for their work, their effort, and their patience. In a society where we sometimes forget to say thank you, the North-Eastern Pennsylvania Easter Seal Society on this, the occasion of their 50th founding anniversary, deserves our heartfelt thanks for a job well done. My best wishes for the society on their special night.●

IN MEMORY OF JAMES CURTISS HARPER

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. STOKES. Mr. Speaker, it is with a deep sense of personal loss, that I inform my colleagues of the death of my good friend and administrative assistant, Mr. James C. Harper. Mr. Harper passed on during the recess period, August 26, 1983.

Harper, as we fondly called him, served as my administrative assistant for more than 12 years. We had been friends for over 35 years. He was an exceptionally capable and highly respected professional. Beyond that, he was an individual of impeccable integrity.

Many of my colleagues and many employees on Capitol Hill knew James Harper. Those who knew him admired and respected him immensely.

His death leaves a void in the lives of myself, my wife, Jay, my family and staff, as well as in the lives of the people he came in contact with each day on Capitol Hill.

At this time, I would like my colleagues to join me in expressing their condolences to the Harper family on the passing of my friend, Jim Harper. Mr. Speaker, I would like to insert in the RECORD the remarks which I delivered at the funeral services which were held in Cleveland.

The remarks follow:

IN MEMORY OF JAMES CURTISS HARPER

THE HOUSE BY THE SIDE OF THE ROAD

There are hermit souls that live withdrawn,
in their place of self-content
There are souls like stars, that dwell apart,
in a fellowless firmanent;
There are pioneer souls that blaze their
path where highways never ran
But let me live by the side of the road and
be a friend to man.

Let me live in a house by the side of the
road where the race of men go by—
The men who are good and the men who are
bad, as good and as bad as I.
I would not sit in the scorner's seat or hurl
the cynic's band--
Let me live in my house by the side of the
road and be a friend to man.

I see from my house by the side of the road
by the side of the highway of life,
The men who press with the ardor of hope,
the men who are faint with the strife.
But I turn not away from their smiles nor
their tears, both parts of an infinite
plan—
Let me live in a house by the side of the
road and be a friend to man.

I know there are gladden meadows ahead,
and mountains of wearisome height;
The road passes on to the long afternoon
and stretches away to the night.
And still I rejoice when the travelers rejoice
and weep with the strangers that
mourn,
Nor live in my house by the side of the road
like a man who dwells alone.

Let me live in my house by the side of the
road, it's here the race of men go by—
They are good, they are bad, they are weak,
they are strong, wise, foolish—so am I.
Then why should I sit in the scorner's seat,
or hurl the cynic's band?
Let me live in my house by the side of the
road and be a friend to man.

This poem by Sam Walter Foss seems more than any other to express Jim Harper's philosophy about life and friendship. In

this church today are many people who enjoyed a unique friendship with him. He was my best friend and I was privileged to enjoy that friendship with him for more than 35 years. For the last 12 years we worked together every day.

At a time like this one's memory bank flashes back. As the memories continue to flash by, I realize that we shared many hopes, dreams, fears, confidences and innumberable experiences over these years.

Interestingly enough, Harper's friendship with my brother Carl began before he and I met. In fact, it was at my mother's home where Jim and Barbara were visiting Carl that I first met Barbara when she and Jim had just begun dating. And Barbara when you remarked to me a few days ago that you and Harper had 31 beautiful years of marriage together, I had no idea that time had passed so swiftly. I think all of us know how much you loved Harper and how much he loved you. A few weeks ago he came into the office one morning during the time he was very sick. I opened the door to his office and went in to see him. Right after we exchanged greetings he looked up at me and said, "Barbara is beautiful. She really takes care of me. Barbara is beautiful."

All of us knew of the special love and devotion you gave him throughout your marriage and especially over his long period of illness. And he loved and was devoted to you. So you have much to be thankful for. You had a beautiful marriage to a wonderful man and my wife, Jay, and our children and I cherish the relationship our families have had. He was special to each of us.

To Jimmy and Malcolm and Sandy and Kim, your father loved the ground each of you walked on. You were privileged to have an extraordinary father who set a sterling example for each of you. Not only was he a good husband and father but he also set a high standard of achievement and performance for himself. Both in Washington and Cleveland he was highly respected in his field. Jim Harper was unquestionably the best Administrative Aide on Capitol Hill.

In this capacity his integrity was impeccable and his loyalty was unsurpassed. Throughout his lifetime and his various positions he helped a lot of people. While he was with me he helped a lot of little people who could not help themselves. He never talked much about what he accomplished for them. He would bring a situation to my attention and ask if he should do something about it. Once I ok'd it he would remedy the situation and then move on to something else. There is a lesson for you in his work. He had a dedication and commitment to helping the less fortunate. He loved people and he treated people like he wanted to be treated—with respect.

In order to put Harper's life in perspective we need to comprehend the whole man. Harper was fun loving. He loved a good time. He enjoyed his friends, both in his home and in their homes. Until he got sick, he really enjoyed life. Above all he loved to tease and the more he got the best of you—the more he teased. He loved cars. He loved to talk about them and he loved to drive them. He also loved to argue and he didn't care which side of any issue he took, for he often took the side opposite to his own views just so that he could get the argument.

Here today are both the Cleveland and Washington staffs. Most of these people on both staffs were hired by him. Almost all of them had some daily interaction with him. I know that I speak for them when I say that each of them had their own special relationship with him and he will always have a special place in each of their hearts.

Last night Mother Harper said to me, "He was my heart." We know he was your heart, Mom, and you were his heart too. We know that he called you every day. He loved you and Doris and Mildred and Chris and Al, and all of his relatives. He will live on in each of your hearts.

The day before Harper passed Jay White came to my Washington Office and visited with Harper. Buddy James spent an afternoon with him a week ago. Carl Stokes and Russell Adrine spent time with him in Washington two weeks ago. These last visits with him will be precious memories for each of us. Each cherished their friendship with him. Someone has said that, "friendship is a sweltering place, yet its pillars always hold—and never do come tumbling down to leave one in the cold."

Over the last 12 years there were many times when Harper would complete some special affair or project for me. Generally, in order to express my appreciation I would say to him, "Harper, you really did a beautiful job." In typical Harper fashion he would never say, thanks, Lou. He would always say with a sly grin, "As usual," and he would walk away.

The other thing he would do was to come into the office every morning at eight o'clock—he would work all day—most days he ate his lunch at his desk—and worked throughout the day. But every day at precisely 5:30 he went home.

Today as I look back over his life and try to put it into perspective for a final comment, I guess the best way to summarize his life is to say: Harper, you did a beautiful job, as usual—and now it's 5:30—time to go home.●

TRIBUTE TO EDWIN G. MICHAELIAN

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BIAGGI. Mr. Speaker, the people of Westchester County in New York have lost one of their finest and most dedicated public servants with the passing on September 9 of Edwin G. Michaelian.

Few men in this century have done more for Westchester County and its people that Edwin Michaelian. For 16 years Edwin Michaelian served as county executive and for those 16 years "set the standard for good government in Westchester," according to the Herald Statesman newspaper. He served in the position longer than anyone before or after him—four terms. He was an activist as county executive, dedicated to the development of Westchester County.

Among his notable achievements were the acquisition of 4,000 acres of parkland, the development of Westchester Community College, the transfer of New York Medical College to Westchester, and the opening of a branch of the State University of New York in Purchase. Edwin Michaelian further enhanced his record as county executive by first persuading the State government to take over the operation and rebuilding of the county's highway system and then working with the State on behalf of improving existing roads and opening new ones, such as the Cross-Westchester Expressway.

Edwin Michaelian was born in New York City in 1906 but was a resident of White Plains for 70 of his 77 years. He graduated from Yale University in 1929 and was a member of Phi Beta Kappa. He also attended the University of Virginia and Columbia University and held an honorary degree of doctor of law. He served in World War II as a management consultant in the office of Quartermaster General and as a naval officer.

He served as an elected councilman from White Plains from 1939 to 1943 before his war service. He returned to the council from 1947 to 1949. He served as mayor of White Plains from 1950 to 1957, when he was elected as county executive.

Edwin Michaelian was a bold and innovative county executive. He was a governmental cheerleader who coined the promotional phrase "the Wonderful World of Westchester" as an inducement for corporations and people to come to the county. He laid the foundations which helped bring some of the giants of industry to Westchester, such as General Foods, IBM, Pepsico, Nestles, and Texaco and others.

His decision not to seek a fifth term as county executive did not signal an end to Edwin's career in service to Westchester County. In fact, according to an article in the Herald Statesman reporting on Michaelian's death, it states: "Michaelian confided to friends several times in recent years that he had never worked harder for the county than he did after he retired as county executive on December 31, 1973, later serving on a number of boards and in many civic capacities."

Edwin Michaelian was also active in Republican Party politics in Westchester County, serving as Westchester Republican Committee chairman from 1958 to 1963.

It is noteworthy that Edwin Michaelian succumbed to his fatal heart attack in a sense while on duty. He had just finished speaking at a dinner party honoring Mount Pleasant Supervisor Micheal Rovello—one of the many dinners and other functions routinely part of his schedule.

Ed Michaelian was the consummate public servant, someone who wanted a better life for all of the people of Westchester. I know this from personal knowledge and friendship with Ed that actually dated back to the time when I was a police officer in New York City. I used to attend and speak at functions where Westchester law enforcement groups would be and Ed

always seemed to be there in his different elected capacities. He was a great supporter of police and their work.

I also know of Ed's commitment to Westchester from the many times I would see him in the Halls of Congress lobbying for adequate Federal funding for his county. He was an ambassador of good will and a shrewd bargainer. His accumulated knowledge of the county, from having lived in it for 70 years, made him an especially effective spokesman for it. His enthusiasm for his work proved critical in producing results for the betterment of life in Westchester. Edwin Michaelian was indefatigable in all aspects of his work. He maintained a pace at the age of 77 which would tire people half of his age.

As we mourn his sudden passing, let us do so with a positive appreciation for all of the good which this remarkable man did for people. Let his record serve as an example for those of us in public life and those who will follow. I express my condolences to his beloved wife, Joyce, and assure her that the legacy of her husband will endure for years to come.●

H.R. 3840, RISK ASSESSMENT RESEARCH AND DEMONSTRATION ACT OF 1983

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. RITTER. Mr. Speaker, I introduced H.R. 3840, the Risk Assessment Research and Demonstration Act of 1983 on August 4, 1983. The text of the bill follows:

H.R. 3840

A bill to establish coordinated interagency research and demonstration projects for improving knowledge and use of risk assessment by those Federal agencies concerned with regulatory decisions related to the protection of human life, health, and the environment.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Risk Assessment Research and Demonstration Act of 1983".

FINDINGS AND DECLARATIONS

SEC. 2. (a) The Congress hereby finds and declares that—

(1) a number of Federal agencies have been mandated by law to protect, or provide information to protect, human life, health, and the environment;

(2) the Congress in writing the laws, and the courts in interpreting the laws, have often required Federal agencies to consider risk and ways of reducing risk in those agencies' efforts to protect life, health, and the environment;

(3) decisions by Federal agencies, legally mandated to protect human life, health, and the environment, often involve rules to reduce risk to human life, health, and the environment;

(4) such regulatory decisions involve scientific, economic, social, and philosophical considerations;

(5) these decisions must often be made even in the face of uncertainty and incomplete scientific and technical information;

(6) these decisions may involve an assessment of risks of human life, health, and the environment and a balancing of those risks against the economic and social consequences of controlling them;

(7) improving the quality of the scientific component of such decisions is an important aspect of securing the public's ability to properly weigh the social and philosophical values intrinsic in them; and

(8) analysis of the comparative risks to health and welfare can assist in setting public policy objectives and gaining public understanding of regulatory management decisions.

(b) Accordingly, it is necessary for Federal agencies—

(1) to use the best possible methods for securing information on, and an understanding of, the scientific bases for their regulatory decisions;

(2) to utilize such information and understanding, whenever appropriate, in the assessment of matters pertaining to decisions related to the protection of human life, health, and the environment; and

(3) to delineate, as specifically as possible, the scientific basis for agency decisions from their more subjective, judgmental aspects.

(c) Since the methods of risk assessment are increasingly relevant to regulatory decisionmaking, research and demonstration of such methods should be encouraged.

(d) A study of risk assessment needs to be made to learn what is known and what is not known about assessing risks in the face of incomplete scientific and other information;

(e) Risk assessment is basically a multistep process consisting first of a scientifically based risk analysis, which concentrates on the identification, probability, and consequences of risk, followed by a risk evaluation which is more judgmental in nature and concentrates on decisions defining acceptable levels of risk. Risk assessment will not provide a formula for setting public policies and making regulatory decisions; however, it may be a procedure by which the delineation in subsection (b)(3) is facilitated.

(f) Regulatory decisions concerning risk must usually consider alternative courses of action and may therefore involve comparative risk assessment. Better comparative risk assessment will improve the balancing of alternatives. Comparison of risks represents a means by which levels of risk can be presented to the public in terms which facilitate their understanding and appreciation of various regulatory alternatives.

(g) A variety of Federal agencies use the results from risk analyses to varying degrees in regulatory decisions. A systematic effort to improve the quality of risk analysis should be established to enable agencies to more effectively use risk analysis as an instrument in making regulatory decisions.

(h) Recent judicial decisions have demonstrated the need to further develop risk analysis to meet standards required by Federal courts for Federal Government actions.

PURPOSE

SEC. 3. In view of the findings and declarations set forth in section 2, it is the purpose of this Act to provide for comprehensive and coordinated research and demonstration projects for the study of risk assessment and its relationship to the regulatory process.

DEFINITIONS

SEC. 4. For the purposes of this Act—

(a) the term "risk" means the potential of a given action to cause unwanted, negative consequences to human life, health, or the environment;

(b) the term "risk analysis" means the process of quantification, as much as possible, of the probabilities of an identified risk;

(c) the term "risk evaluation" means the process of judging the acceptability of various levels of risk to individuals, society, or the environment;

(d) the terms "risk assessment" and "assessment of the risks" mean the total process, including both risk analysis and risk evaluation; and

(e) the term "comparative risk assessment" means a procedure in which the assessment of the risks associated with one course of action and the assessment of the risks associated with an alternative course or courses of action are compared with each other and with the kinds of risks people normally face in their individual lives; and

(f) the term "Federal regulatory agencies" means agencies within the Federal Government which are involved with regulatory decisions concerning human life, health, and the environment.

OBJECTIVE AND ESTABLISHMENT OF PROJECTS

SEC. 5. (a) The objective of the projects established under subsection (b) is to develop the necessary knowledge to—

(1) improve the use of risk assessment within those Federal agencies (referred to in subsection (b)(2) and (b)(3)) which are concerned with regulatory decisions related to human life, health, and the environment, giving particular emphasis to the use of comparative risk assessment;

(2) develop a coordinated and systematic approach to the conduct and use of risk assessment by such Federal agencies;

(3) define criteria and standards to guide the development and use of risk assessment;

(4) identify research needed by Federal agencies to improve the methodologies and use of risk assessment in regulatory decisionmaking;

(5) coordinate among Federal agencies the use of common research results and information required for risk assessment;

(6) establish within such Federal agencies a means to promote an understanding by the public of those agencies' efforts to address risks to life, health, and the environment by expressing those risks in terms of easily understood, everyday experience; and

(7) facilitate public understanding of the nature of regulated risks and the means of their quantification.

(b) The President shall direct in accordance with the provisions of this Act the establishment of coordinated inter-agency projects which shall—

(1) be designed to achieve the objectives set forth in subsection (a);

(2) involve, where appropriate, Federal agencies responsible for regulatory decisions or providing information for regulatory decisions, including but not limited to, the Food and Drug Administration, the Environmental Protection Agency, the Occupational Safety and Health Administration, the Food Safety and Inspection Service of the Department of Agriculture, the Nuclear Regulatory Commission, the Department of Energy, the Consumer Product Safety Com-

mission, and the Department of Transportation; and

(3) involve, where appropriate, the agencies with basic and applied research programs applicable to the improvement of risk assessment.

(c) The President shall designate an agency to coordinate the projects.

(d) The coordinating agency designated under subsection (c) shall present to the Congress within twelve months after the enactment of this Act a report which shall include—

(1) a review of the risk assessments presently being carried out within the Federal regulatory agencies specifically designated in subsection (b)(2) and the use of such assessments in the regulatory decisionmaking process;

(2) a review of the risk analysis research being carried out by Federal agencies specifically designated in subsection (b)(2), and the procedures within those agencies for linking this research to the regulatory decisionmaking process;

(3) identification of specific areas of emphasis for research conducted within Federal agencies, and recommendations for funding priority of such research outside such agencies by the Federal regulatory agencies the National Science Foundation, and the National Institutes of Health;

(4) recommendations for a coordinating mechanism to transmit and share research results among Federal agencies, between Federal agencies and other public agencies, and between Federal agencies and private and nonprofit corporations and institutions;

(5) a proposal for the risk assessment demonstration projects to be carried out under section 7 within the Federal regulatory agencies specifically designated in subsection (b)(2);

(6) identification of the areas where the use of the results of a risk assessment is required, encouraged, limited, or prohibited by current law, regulation, or practice; and

(7) recommendations for increasing public awareness and understanding of risk.

(e) The agencies participating in this effort are encouraged to utilize independent scientific advice from recognized experts in risk analysis.

RESEARCH

SEC. 6. The Federal regulatory agencies specifically designated in section 5(b)(2) shall recommend to the coordinating agency designated under section 5(c) research required to meet the objectives stated in section 5(a).

DEMONSTRATION PROJECTS

SEC. 7. (a) Each of the Federal agencies specifically designated in section 5(b)(2) shall undertake a risk assessment typical of that agency, in accordance with section 5(d)(5). These assessments should utilize presently available information and techniques, or new developments where available, and wherever appropriate should include the following elements:

(1) Comparison of risk of alternative courses of action.

(2) Delineation between scientific and policy judgments.

(3) Description of the present roles, if any, of technical or scientific advisory boards with respect to risk assessment.

(4) Identification of specific assumptions, guidelines, models, and uncertainties.

(5) Identification of limitations placed on the assessment due to relevant scientific, organizational, and statutory constraints.

(6) Identification of specific tradeoffs posed in the particular risk assessment.

(7) Suggestions of how additional information, or changes in statutory language and organizational structure, could change the strategies chosen in risk assessment.

(8) Discussion of how comparative risk assessment could be utilized to make the public aware of the relevance of the decisions, including a consideration of factors such as voluntary versus involuntary nature of similar risks, manmade versus natural risks, and necessary versus unnecessary risks.

(9) Delineation of information concerning the different levels of risk to health and welfare among different groups within the population, including consideration of socioeconomic, geographic, and other pertinent factors, to assist in the equitable sharing of the risks and benefits (including those that can and cannot be quantified in monetary terms) to be realized from the regulatory process and the implementation of public policy.

(b) Such studies shall be completed within two years after the date of the enactment of this Act, and shall be available to experts in the field for critical peer review and to the public at large.

REPORT

SEC. 8. (a) The coordinating agency designated under section 5(c) shall issue a report to the Congress within thirty months after the date of the enactment of this Act, which shall include—

(1) a summary of the findings made in or pursuant to the report presented under section 5(d);

(2) a summary of the risk assessment activities conducted pursuant to section 7.

(3) recommendations for future research necessary to achieve the purposes and objectives of this Act;

(4) recommendations for legislation needed to implement and facilitate the use of risk assessment within Federal agencies;

(5) recommendations for nonlegislative changes, including organizational changes, to implement a policy of risk assessment within Federal agencies;

(6) recommendations that will result in the improved transfer of risk-related research and information between Federal agencies and private and nonprofit corporations and institutions; and

(7) recommendations for improving and increasing public understanding and appreciation of risk and regulatory decisions.

(b) In the preparation of the report the coordinating agency shall seek advice and comment from organizations and representatives of both public and private interests, and any comments made shall be included in the final draft of such report submitted to Congress.

SEC. 9. Nothing in this Act shall constitute an authorization for the appropriation of funds from the Treasury of the United States.●

KERO-TV CELEBRATES ITS 30TH ANNIVERSARY

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. THOMAS of California. Mr. Speaker, I would like to commemorate an important milestone which will soon be reached in my district—the 30th anniversary of television station KERO in Kern County, Calif.

In television terms, 30 years represents nearly the entire life of the medium; it has been scarcely longer than 30 years that television was widely available to Americans. When television came to Kern County, it was KERO-TV which brought it, signing onto the air on September 26, 1953, as Kern's pioneer television station.

Since its first broadcast, KERO-TV has daily brought the world into the homes of the people of Kern County, not just the network programs and world and national news, but the events happening close to home as well. The station's dedication to locally oriented public affairs programs is well known and has several awards for KERO-TV.

In local competition, for example, KERO took 15 of 19 awards in broadcast journalism this year, including 8 of 10 first-place awards. The station garnered more awards than any station of its market size in California, Nevada, Oregon, and Hawaii in the yearly Associated Press competition, and tied with a Los Angeles-area station for overall honors in journalism.

KERO produces 52 prime-time half-hour public affairs programs each year devoted to local concerns and achievements, and it has originated several prime-time documentaries on local problems.

Among the broadcast firsts which KERO-TV has brought its viewers are the first on-location television pictures of any local newscast, the first live remote news broadcast, the first locally originated color newscast and the first all-electronic journalism, which gave the station more flexibility in news coverage and access to events and places which had been off-limits to bulkier equipment. Another first which occurred on KERO-TV was news footage of one of the earliest locally performed open-heart surgeries in Kern County, which was included in a KERO prime-time documentary on heart disease highlighting the efforts of the Kern County Heart Association.

KERO has taken the lead in highlighting community service efforts in Kern County, devoting a recent series of 30-second segments to job announcements from the State Employment Development Department that has resulted in more than 200 responses from viewers seeking jobs. The station helps each year with the muscular dystrophy telethon by publicizing local MDA efforts in addition to the nationwide telethon. Many other local charities such as Buck Owens Days receive KERO's support.

Mr. Speaker, the world is a far more closely knit community today than in 1953 and television is greatly responsible for this change. Conveying this powerful medium to the public is a

great responsibility, and I think no station has better discharged that responsibility than KERO-TV. I would like to extend my congratulations to the management of KERO and to everyone down through the years who has had a hand in making the station a true pioneer in Kern County broadcasting. I extend my best wishes on its 30th anniversary.●

BERKS COUNTY COLUMBUS DAY BANQUET

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. YATRON. Mr. Speaker, Christopher Columbus, the famed Italian navigator, discovered America 491 years ago on October 12, 1492. Every year the Italian community of Berks County, Pa., celebrates this monumental event on the first Sunday in October. This year the Columbus Day banquet, which is sponsored by the Columbus Day Committee of Berks County, chaired by Mr. Sam Chirieleison, will be held on October 9, 1983.

Christopher Columbus continues to be an inspiration for all of us. He was indeed our first immigrant and on Columbus Day we all pay tribute to his spirit of adventure which has led to the ethnic diversity of our country. The voyage of Columbus symbolizes the many outstanding contributions of Italian Americans to our country, including their history, traditions, and culture which are so vital to our civilization. The Italian community is joined by all Americans on this important day to commemorate the achievements of Christopher Columbus and to pay tribute to one of America's greatest strengths—our diverse ethnic heritages. Columbus Day affords us the opportunity each year to reafirm the vital importance of each heritage in American culture.

In June, the House of Representatives passed legislation, H.R. 1492, to establish the Christopher Columbus Quincentennary Jubilee Commission. This legislation seeks to establish a 31-member Commission for the purpose of planning and coordinating domestic and international events marking the 500th anniversary in 1992 of the historic voyages of Christopher Columbus. The passage of the bill illustrates the importance this body assigns to the lasting accomplishments of Christopher Columbus and the debt we owe to him for the discovery of America.

I know that my colleagues will join me in wishing Mr. Chirieleison, all the members of the Columbus Day Committee of Berks County, and all the participants in the Berks County Columbus Day banquet, a most successful and enjoyable celebration. I deeply appreciate that their tribute to Christopher Columbus has given me to opportunity to underline, Mr. Speaker, the reaffirmation of our everlasting debt to this truly great navigator.●

MEDICARE HOSPICE REGULATIONS

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Ms. SNOWE. Mr. Speaker, a few days ago the president of the Maine Community Health Association, Beverly Terrill, testified before the Senate Subcommittee on Health regarding the proposed medicare regulations governing hospice care.

There are approximately 1,200 hospices in the United States caring for 40,000 terminally ill patients. These hospices provide physical and emotional support for dying patients and their families.

Maine is a small, rural State with hospice care now being given through home health agencies, volunteer hospices, and a Blue Cross/Blue Shield pilot program. These programs have worked. The proposed medicare hospice regulations, however, provide no incentives for home-care agencies in Maine to participate unless the regulations are revised to reflect very real people problems.

Although the regulations reflect Congress concern with an appropriate cost reimbursement ceiling by setting the ceiling at $6,500 per patient, the proposed regulations offer other significant problems for hospice providers. Ms. Terrill's statement very adequately outlines these problems, and I request that her statement be printed in the RECORD.

Ms. Terrill's statement follows:

TESTIMONY BY BEVERLY TIRRELL, R.N., C.N.A., PRESIDENT, MAINE COMMUNITY HEALTH ASSOCIATION, INC., BEFORE THE SENATE COMMITTEE ON FINANCE SUBCOMMITTEE ON HEALTH, SEPTEMBER 15, 1983

Senator Durenberger and members of the Committee, my name is Beverly Tirrell and I am President of the Maine Community Health Association, which is made up of 15 non-profit and proprietary home care agencies serving every county in Maine. Our agencies provide visits each year to more than 50,000 Maine citizens, the majority of whom are frail elderly people.

We greatly appreciate the opportunity to provide testimony to the Senate Subcommittee on Health regarding the Medicare Hospice Benefit because of our long standing history of providing care for the terminally ill and our great concern over what the Medicare benefit, as now constituted, means for our ability to provide that care.

Home care agencies in Maine provide a very wide range of services to people in their homes and in the community. We provide the traditional home care services, such as skilled nursing, physical therapy, occupational therapy, social work, speech therapy, homemaker and home health aides. We also do much more, such as long term care, communicable disease control, maternal and infant care, blood pressure screening, referral and follow-up and, most importantly for today's hearing, care of the terminally ill.

We believe it is important for you to fully understand the way in which the terminally ill are cared for in our small, rural state. There are four important elements in how this care is now being provided and how future planning for this care is being developed.

The first element is our home health agencies. These agencies have been caring for the terminally ill as an integral part of their continuum of services for many years. We have not only been providing direct nursing and related skilled care, we have been arranging for other components of care equally important; respite, transportation, pastoral, counseling and so on.

As the hospice movement has spread in recent years, volunteer community resources came together with home health agencies to organize volunteer hospice services. As a result we now have 20 volunteer hospices in Maine. That is the second element of our system.

Earlier this year Blue Cross/Blue Shield of Maine, recognizing the developments I have described, and realizing the importance and value of hospice care, initiated a joint pilot program with our home health agencies to determine how insurance coverage for care of the terminally ill can best be provided. The focus of this pilot is to provide benefits for terminally ill patients through Blue Cross' existing Coordinated Home Health Program. Blue Cross decided that they should integrate this insurance coverage into their existing system rather than create an entirely new benefit program. This integration, accomplished primarily by waiving several requirements of their basic home health coverage plan, has resulted in strong support by home health and hospice organizations for the Blue Cross approach, and virtually every home health agency in the state has signed onto it. It allows the patient to receive hospice benefits without waiving other potentially necessary benefits and without being forced into an awareness of the terminal nature of the condition, for which they may not be ready. We will not be able to say the same for the Medicare hospice benefit.

The fourth element in our system is the establishment of a future planning group. In the summer of this year, representatives of home health agencies, volunteer hospices, insurance companies, hospitals, state government, elderly advocacy groups and other health care professionals came together, at their own initiative, to discuss and look at the development of hospice care in Maine. This group is reviewing hospice standards, reimbursement issues, and is especially determined to impact public policy in and for the state of Maine.

Thus, we in Maine must look at the proposed Medicare Hospice benefit in the light of the developments described above. Our Association has done that. All of our agencies, with the assistance of legal and financial professionals, are reviewing the Medicare hospice regulations to determine their feasibility. While many decisions are yet to be made, I can report to you today that we have reached a clear consensus that as now constituted there are not incentives for our

home care agencies to participate in the Medicare program for hospice. Likewise, there is a clear concern as to what the effects of a decision not to participate will mean for the citizens of Maine who are and will be eligible for this benefit.

The failure of many of the regulations to address the true needs of a viable, cost-effective hospice program, along with substantial legal and financial risks, are the basis of our concern. Following are some specific examples:

1. The intentions of Congress in enacting this benefit were laudable, and we note with great pleasure that several of the statements included in the preamble to the regulations indicate an understanding and philosophy consistent with our view, and the view of others in the hospice movement, of care for the terminally ill.

Unfortunately, we must note with great concern that the reality of the regulations will not allow that philosophy and understanding to happen, at least through the Medicare program.

2. The statutory requirement for nursing services to be offered directly by the Medicare certified hospice virtually precludes rural home health agencies from becoming Medicare certified hospices. Let me explain this dilemma through use of a specific example.

One rural home health agency has committed its resources to seeing that comprehensive hospice care is a reality for the people they serve. The major hospital in the community has recognized their key role in hospice care as well. Therefore, they have joined together, through an interdisciplinary team, to develop shared beliefs and goals about hospice care. With these as their foundation, they logically wished to pursue the coalition model of providing hospice care which would contract with community organizations, including themselves for the needed services.

The law as it presently stands would not allow this. In pursuing models of hospice programming which exclude contractual arrangements for nursing services, this community is faced with duplication of nursing services coupled with an already evident shortage of R.N.'s and L.P.N.'s.

Duplication should be of great concern to the payors of services as well as providers. One of the rural counties served, with 888 square miles and 27,013 people, has a population density of 30 people per square mile. On an average, a full-time nurse travels 14,000 miles per year to provide nursing services to residents of that county. Currently, there are four full-time equivalent nurses assigned geographically and providing care to patients with all types of diseases, including the terminally ill. If a duplicate nursing service was set up to care exclusively for hospice patients, the cost to Medicare would be unnecessarily high in view of the extensive travel and duplicative general and administrative expenses spread over a small base of operations.

In addition, recent attempts to recruit licensed nurses (both R.N.'s and L.P.N.'s) for this rural area have been frustrating since there have been few or no applicants. What applicants there are very often have no experience in home health care in general, not to mention care of the terminally ill or elderly.

3. The requirement of a separate Medicare provider number for hospice agencies presents unique circumstances for the existing certified home health agencies.

Agencies who wish to provide hospice services to Medicare beneficiaries and receive reimbursement for services would seek certification through the State Agency. Upon completion of the certification eligibility requirements the State Agency submits the applicant provider's certification package to the Regional Office for review, final determination and approval. Regional Office approval thus enrolls the hospice agency into the Medicare program and assigns the agency a provider number. For the vast majority of potential hospice providers in Maine, this will require that a second provider number be sought by agencies that have existing provider numbers for Medicare home health participation.

This means two things. (1) additional costs will be incurred by agencies starting hospice programs in Maine, and (2) additional costs will be incurred by the Maine Department of Human Services to conduct yet another certification survey on already certified agencies. This duplication of effort is costly, ill advised and contrary to the efforts of government and the health care industry to contain health costs.

With good reasons many home health agency providers are unclear as to whether they should seek Medicare reimbursement as a hospice or continue to provide home care services to the terminally ill under traditional agency programs and services.

In addition, the regulatory requirement to have a separate hospice provider number may negatively impact a home health agency's cost report. If, for example, a home health agency elects to become a hospice provider and provides care services itself under its own organizational structure, those costs of services will be recorded in the agency's general ledger.

The potential problem lies in the methodology of cost reporting required of home health agencies. The Medicare cost report provides for the step-down of overhead costs based upon the cost of the various reimbursable and non-reimbursable cost centers within the individual agencies. Under the hospice reimbursement system, with two provider numbers, a significant amount of overhead costs may be allocable to the hospice based upon the process used in the cost report. If the hospice reimbursements a home health agency receive do not compensate for the overhead allocation, the home health agency will incur a deficit caused by the requirements of current cost reporting. The net effect of an agency deficit could potentially destroy the home health agency's fiscal integrity and jeopardize the provision of services to all Medicare beneficiaries. Clearly, home health agencies will be caught in the regulatory web of cost reporting requirements.

In Maine, this very dilemma has been demonstrated in agencies beginning to provide long term care (extended hours of services) programs. If long term care services reimbursements don't adequately compensate for the overhead allocable to the long term care program, the results are devastating, particularly to the medium and smaller sized agencies. The identical situation exists for all non-reimbursable programs in Medicare certified home health agencies.

There should be no separate hospice provider number required for existing Medicare certified agencies wishing to provide hospice care.

4. The continuous care requirement of preponderance of nursing care may result in an unnecessary level of care which costs more than home health aide or homemaker care.

Most hospice patients do not need 8-24 hours of licensed nursing care, even though they may desire that kind of support. The experience in Maine in caring for terminally ill patients has proven that the type of care needed over a period of a day is the home health aide level of care which is much less costly then licensed nursing care. We suggest that a revision be made in the regulations to allow home health aide and homemaker care to be covered under the continuous home care rate regardless of whether skilled nursing care is the preponderance of care.

5. The requirement that only the patient can elect the hospice benefit poses a serious obstacle to reaching the many people who might need the care. For example, it may be evident to the interdisciplinary team and family a patient has only a few weeks to live, yet the patient may continue to refuse to accept the terminal illness. The family wishes to elect the hospice benefit because of the support and help it gives them and the patient in dealing with the remaining days of life. However, the proposed election system does not allow a family in this situation to elect Medicare coverage. In fact, it almost appears through the proposed regulations that the Medicare hospice beneficiaries will be a select group of people who have had the educational, emotional, and financial breaks in life to enable them to deal head-on with their death. Our experience as providers of care to the terminally ill is that the ability to accept dying is a major struggle and one that for many just does not happen. The preamble to the regulations recognize the goal of hospice care is to help terminally ill continue life with minimal disruption in normal activities while remaining in the home environment.

We must recognize that it may be essential that the best way for one individual to continue his or her life with minimal disruption while remaining at home is to deny the fact that he or she is terminally ill.

6. In the proposed regulations (Sec. 418.22), the hospice must obtain the certification that an individual is terminally ill and that the individual's medical prognosis is that his or her life expectancy is six months or less. It has been our experience in Maine that many physicians—specialists and generalists alike—have not been able to admit to the patient that he or she will die within six months and would benefit from the specialized services of a hospice. One physician expressed the opinion that to certify imminent death and the need for hospice is equal to abandoning all hope for his patient and admitting that nothing more can be done to preserve life. This particular physician is unwilling to accept the role of a "certifier" of near-future death. We believe that regulations that require certification of death within six months or less violate many physicians basic philosophy of practicing curative medicine.

Physicians are in a "gatekeeping" role in referring patients to appropriate sources of care. This role is vital to the viability and cost-effectiveness of the health care continuum and must not be be upset by regulations that offend many physicians.

Furthermore, this regulation creates still one more obstacle and roadblock to individuals and families in need of hospice care and the Medicare benefit.

The "six months certificate of death" should be removed from the regulations.

7. Critical legal requirements for the patient's informed consent form are lacking. Since the patient electing hospice care is giving up certain other benefits, the consent form requirements absolutely must include

a clear delineation of what the patient is giving up, what the alternative is that they are electing, what the risks are involved with those alternatives, what right there is to revoke the election, what right there is to select another hospice, and what right there is to see members of the clergy. Given the legal ramifications of an informed consent, for quality assurance purposes, and protection of providers, patients and and families, we believe it imperative that H.C.F.A. require the above items on the informed consent form.

8. The requirements for volunteer participation do not address the legal implications of use of volunteers. The governing body of the hospice will be responsible for the action of the volunteers and, therefore, the regulations should require certain quality assurance standards for the volunteers such as liability insurance coverage.

9. The regulations are seriously lacking when it comes to appeal rights, both for patients and providers.

Patients have few rights in the procedures established by these regulations, lacking even the basic right to appeal denial of admission into the hospice. A patients' bill of rights is needed.

Providers have no appeal rights for critical certification and coverage disputes. Providers of hospice under Medicare should be entitled to the same rights and procedures of appeal as any other Medicare provider.

I have provided you today with a summary description of our home health system in Maine, our concerns about the problems these regulations present to Maine people and our suggestions for resolution of some of these problems.

I would like to conclude by presenting our suggestions and recommendations for steps the Congress should, in our judgment, consider not only to ameliorate these vast and serious problems, but to develop a policy and program of care for the terminally ill that will truly result in community based hospice coalitions and free-standing hospices capable of providing all the patient and family contered services needed with adequate and efficient reimbursement through Medicare. We in Maine want to work a Medicare benefit into our current programs, as we have done under the Blue Cross/Blue Shield pilot program. Instead, we are being forced to take a great many complicated, risky and costly steps to qualify our patients for the Medicare hospice benefit under these proposed regulations.

What should Congress do?

Congress must assure itself and the American people that hospice regulations more clearly reflect the needs of patients, families and providers in the provision of hospice care.

Congress should enact amendments to the law that may be necessary and appropriate to eliminate problems created by the regulations.

Congress should look not only at the H.C.F.A. hospice demonstration projects for information and evaluation, but should utilize the unique strength of the hospice and home care movements in America, recognizing their history, use of volunteers and community resources. You should also look at private third party hospice and home health payor programs as I have described here. Only by viewing all the hospice and home care activity now taking place will you get the full understanding you need to make policy.

Congress must take a long-term view of hospice and determine a national policy for care of the terminally ill that recognizes the uniqueness of this type of home centered health service, and the strengths of delivery systems which have been in place for the past decade.

Finally, Congress should translate that national policy into appropriate action through statute and regulations, and assure that the regulations faithfully implement your policy.

Thank you again for the opportunity to present our views to you. We look forward to the steps you will be taking.●

FREE TUITION FOR THE UNEMPLOYED

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mrs. ROUKEMA. Mr. Speaker, as school resumes this fall at Passaic County Community College in New Jersey, among those attending classes is a group of students who are particularly appreciative of the opportunity to be there. These are unemployed individuals for whom the college is waiving tuition charges.

At a time when we, at the Federal level, are trying to solve the twin problems of high unemployment and unfulfilled training needs, I am encouraged to see Passaic County Community College contributing to the solution by taking this action entirely of its own volition with no Federal funds or incentives involved.

The college began the program this summer and is able to provide it at little expense because the students are assigned to classes on a space-available basis—that is, they are sitting in seats that would otherwise be empty. The student must have been continuously employed for at least 2 years before becoming unemployed and must meet the stated prerequisites of the college and the course. Up to six credits per semester may be taken.

It seems that every day we hear more about workers who are either unemployed or fear unemployment because their skills are no longer relevant. This Congress and the administration have made a commitment to channel precious Federal dollars into programs that will retrain these workers so that both the workers and the economy can benefit from new, marketable skills. But, obviously, we are limited as to how much we can accomplish in this effort.

Passaic County Community College is to be commended for its innovative leadership. This program could stand as a model and serve to encourage other institutions across the country to benefit from this example and proliferate programs of their own to serve their local communities.●

TRIBUTE TO JIMMY WECHSLER

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BIAGGI. Mr. Speaker, the world of journalism has lost a giant with the passing of famed New York Post columnist and former editor, James A. Wechsler. I take this opportunity to pay tribute to the man and to the institution he became in the newspaper business.

Jimmy Wechsler was a native New Yorker and proud of it. He displayed his keen journalistic talents at an early juncture in his career when he served as editor of the Spectator, the newspaper of Columbia College where he was admitted at the age of 16. Following graduation, Jimmy continued his interest in journalism serving as the editor of the Student Advocate, the publication of the American Students Union.

Just 2 years after his graduation, he joined the Nation magazine as an assistant editor. Three years later, he became the assistant labor editor of the old daily newspaper PM.

The year was 1947 when Jimmy began his distinguished career with the New York Post when he was hired by its owner Dorothy Schiff to be the paper's editor. For more than 23 years Jimmy ran the editorial page of the Post guiding it through some tremendously important moments in world and national history. Jimmy Wechsler was referred to by the New York Times as "a prominent voice of American liberalism for 40 years." Jimmy's liberal sentiments were reflected in his writings—but more importantly in his assessment of the role of a newspaper. He once said "the function of a newspaper is to comfort the afflicted and afflict the comfortable."

Since 1980, Jimmy contributed a weekly column to the Post and provided its readers with the benefit and expertise of his views on a variety of contemporary subjects. Some of his final comments demonstrated his extensive knowledge of the world of sports and his views were most entertaining.

I had the pleasure of knowing Jimmy and respected him enormously. I especially recall seeing him at a number of football games involving the Columbia Lions which my son Mario played on while he was in attendance. Jimmy the ever faithful and active alumni was practically a fixture at Baker Field. We shared many good times those fall afternoons and Jimmy really loved Columbia football.

It was not important whether you agreed philosophically or ideologically with Jimmy. What was important was to recognize the enormous talent and command he had of the English lan-

guage. What was important was to recognize the inherent level of compassion that was so much associated with Jimmy Wechsler which was converted into his writings many times bringing an important human dimension to newspapers.

Jimmy Wechsler is gone but his words and wisdom will live on. He made life better for his family and his friends. He made the New York Post a vitally important voice in New York City. We will all miss him.

I wish to express my condolences to his wife Nancy, and his daughter Holly. At this point in the RECORD I wish to insert an article discussing the memorial service for Jimmy held last week in New York. The article comes from his own New York Post.

[From the New York Post, Sept. 15, 1983]

SAD FAREWELL TO JIMMY WECHSLER, MODEL JOURNALIST

(By Sam Rosensohn)

They came from all walks of life to praise Jimmy Wechsler, columnist and former editor of The Post, at his memorial service yesterday.

There was not enough standing room in the Frank Campbell Funeral Chapel on Madison Avenue to accommodate the men and women who wanted to say their final farewell to an independent spirit, a model of a crusading journalist.

Politicians, former White House advisers, newspapermen, and some 600 people who read his prominent voice of American liberalism for more than 40 years gathered to remember Wechsler, who died Sunday.

"Above all, Jimmy believed that justice and truth will ultimately prevail in our democratic society," Joseph Rauh, Jr., civil rights activist, told mourners.

Some who came to pay their last respects were forced to strain their ears from Madison Avenue to hear Rauh's voice. They came in such strength that they spilled out on to the street.

Pulitzer Prize-winning author Joseph Lash spoke of Wechsler's candor, his refusal to hide behind his passion, his ability to fight to the end, and of his editorials, which were "pillars of fire."

Wechsler's lifelong friend, Arthur Schlesinger Jr., was not able to speak, because he attended his brother's funeral, but his son, Stephen, read his words.

Schlesinger spoke of Wechsler's "passion for justice that never failed," and his contributions to the liberal movement and the city of New York.

Wechsler's daughter, Holly Schwartztol, quoted President Kennedy: "John F. Kennedy said that life is not fair. Never before have I so acutely agreed with that statement . . . [Wechsler] was in many ways my best friend."

Abe Raskin, who got to know Wechsler while he worked as a cub reporter for The Times in the depths of the Great Depression, spoke lovingly of Wechsler.

"Any curb on frank, free expression was intolerable to Jimmy. So was pomposity, that most universal of occupational diseases afflicting journalists, and particularly those accustomed to pontificating as columnists and editorial writers.

"He never learned to strut. Indeed, he never tried, though his talents as a newspaperman were prodigious.

"He was with painful acuity the catastrophic evils that menace us all, and the monstrous injustices we inflict on one another, but none of that ever induced him to yield to combat fatigue, much less despair, in the ceaseless battle against oppression."

Some of those who attended the service besides Wechsler's wife, Nancy, and daughter, Holly, were former Gov. Carey, former Mayor Lindsay, former Atty. Gen. Louis Lefkowitz, Deputy Mayor Robert Wagner Jr., Manhattan DA Robert Morgenthau, Parks Commissioner Henry Stern, City Controller Harrison Goldin, Mrs. Rupert Murdoch, Jean Kennedy and Steve Smith, City Councilwoman Ruth Messinger, columnists Murray Kempton, Pete Hamill, Max Lerner, Archer Winsten, former Post publisher Dorothy Schiff, former Post executive editor Paul Sann, Stuart Scheftel, and former city youth board chairman and Post executive editor Roger Wood, along with a great assembly of Jimmy's colleagues.●

HOME TAPING: LIKE "BUYING STOLEN GOODS"

HON. WILLIAM HILL BONER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BONER of Tennessee. Mr. Speaker, as the House continues consideration of legislation addressing the issues raised by home audio recording, the viewpoint of the songwriter must be considered. We must remember that home audio recording injures those whose creative works we enjoy.

This viewpoint has been succinctly expressed in a recent letter to the editor of the New York Times. I urge my colleagues to read and heed its words. If we fail to recognize and take into account the songwriter, we will all, in the long run, be poorer.

[From the New York Times, Sept. 10, 1983]

HOME TAPING: LIKE "BUYING STOLEN GOODS"

To the Editor:

I write as president of the principal United States organization of professional songwriters, AGAC/The Songwriters Guild, to add a creator's viewpoint to the discussion of home taping.

Most statements on home taping, whether of records or of movies, ignore the effect of such taping on the creators. A recent letter from an official of the Electronic Industries Association, like most arguments in favor of "free" home taping, assumes that it hurts no one. But as usual, the free lunch isn't really free. Home taping simply takes income from writers and other creators.

Most songwriters earn only modest amounts from their music (the songwriter's life as portrayed in movies like "10" is as much a fantasy for most writers as it is for everyone else). It can be wonderfully satisfying to compose, but like everybody else, writers need to eat regularly, to keep a roof over their heads and to pay for the education of their children.

If their income is cut substantially, many will be forced to give up songwriting, so in the longrun, home taping reduces both the amount and the quality of music being created. Eventually, everyone loses.

All the arguments in favor of home taping can be applied with equal validity to buying stolen goods. In each case, the buyer gets something cheap because the maker is not paid. To writers, the comparison is not farfetched: home taping takes the writer's creation without permission and without payment.

It is estimated that home taping already cuts record sales and writers' royalties by one-fifth. If record rental for taping grows here as it has in Japan, sales and royalties will be cut by another quarter, to about half of what they would otherwise be. There is no way for most songwriters to absorb such losses and keep on writing good music. And I'm certain that the public doesn't want to harm those very people who create entertainment and pleasure for them.

The electronic manufacturers may argue over the extent of the damage home taping inflicts, but there is no dispute that it does indeed harm the creators of music and of other works, and that it eventually will harm the listening public as well.

The home-taping and record-rental bills now before Congress are not perfect, but they are the best solutions anyone has been able to devise, and it is in everyone's longrun interest that they be adopted.

GEORGE DAVID WEISS,
New York, Aug. 31, 1983.●

A TEACHER'S LOVE AFFAIR WITH THE CLASSROOM

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. WOLF. Mr. Speaker, public education in America today has been the focus of attention recently and included in the discussion has been the problem of attracting and retaining quality teachers in our public school systems.

I would like to share with my colleagues the following article from the September 19, 1983, edition of U.S. News & World Report written by Maureen O'Donnell, a teacher at W. T. Woodson High School in Fairfax County, Va., which expresses a refreshing viewpoint on teaching and education today from a teacher who loves her job.

SLICE OF LIFE—A TEACHER'S LOVE AFFAIR WITH THE CLASSROOM

It's no secret that teachers have been leaving their chosen field in droves. Poor pay, children who don't want to learn, parents who don't care—the reasons why they quit are almost endless.

But not every teacher is "burned out." Maureen O'Donnell, a 52-year-old Latin teacher at W. T. Woodson High School in suburban Washington, D.C., can't imagine life outside the classroom. Honored in 1983 as Virginia teacher of the year, she tells why she loves her profession.

FAIRFAX, VA.—I can easily empathize with colleagues who have left our field for professions that pay higher salaries or that seem to offer more prestige—or because administrators or parents wouldn't lend enough support.

I know what it's like to be introduced in an almost condescending tone as a "teacher." I also know the feeling of being looked on as a curiosity. You're a Latin teacher?

Why that's as practical, some would say, as being an instructor in the minuet or voodoo.

Why, then, do I stay in teaching?

Well, I can't imagine not doing it, and the attraction goes back as far as childhood. I vividly remember sitting on the lap of my father, who never graduated from high school but loved just the same to recite for me from Shakespeare.

There were frequent trips to Boston with my mother to see the sites—the museums, the automat, the fairyland store windows. Children learning, sharing, and giving—those were my parents' top priorities, and I guess it was contagious.

I love teaching, and I love and respect the young. The prestige some feel is denied the classroom teacher seems of little importance when weighed against my strong conviction that my job is one of the most important and rewarding in the world.

What other profession offers the privilege of instilling in the young a desire and love of learning? A student rushes in during break to tell how he understood every classical allusion in English class because of his Latin training.

Another telephones after taking college-entrance tests to tell how knowledge of Latin root words helped her on English-vocabulary questions. A university student visits on Christmas break and relates how grammar learned in Latin class gave him a boost in college Russian.

A friendly ear. It isn't just the joy of seeing kids learn. I spend perhaps half my time in what some would call a counseling role—just listening and talking to students in the "Latin Hut," my temporary classroom at the rear of the high school.

When school is out, a summer evening often finds college students—kids I taught—draped over chairs in my basement, sharing ideas and plans. My students feel comfortable about just dropping in, like the time I made the offhand remark in class about being behind in my housework and returned home later to find students cleaning my house.

Every teacher knows that if we are ever to realize such joys, we must first motivate. For me, the way to do that is to praise.

It is always easy to praise the A student, but I don't have all A students. In my classes are a variety of youngsters, including many members of the football, soccer and swimming teams. Whether good students or just average, there is some quality, some talent that warrants praise.

A student may grapple and sweat over translating Caesar's Commentaries on the Gallic War but may have artistic talent that I can encourage by having him draw a Roman legionary in full military uniform. Or the manually adept student might build a scale model of a piece of Roman artillery. My classroom overflows with such work, and each accomplishment has given me the opportunity to praise.

There's a tremendous thrill in seeing a student realize—perhaps for the first time—a sense of self-worth, of self-confidence. Sadly, hundreds of students go through high school without a taste of personal success.

But as much as I get back from my students, I have to acknowledge the role my own children have played in my life as an educator. I've taught for 14 years, but another 15 years were spent away from the classroom caring for my six children—four of whom were to die of cystic fibrosis.

What I learned during those years made my return to education a "must." I saw the imagination of a child so caught up in a great story that physical pain was momentarily assuaged. I saw the beauty of art and music ease the bitter disappointment of a child's confinement. I learned to respect the resiliency of the human mind—alive, well and in control of a less-than-perfect body.

One of my most treasured memories is of my 16-year-old daughter, now dead, after we had taken her on a tour of Greece. Her eyes sparkled as she told me, "I've learned so much!"

Trying times, too. I wouldn't be truthful if I didn't say that teaching is hard work. There are the endless stacks of papers to grade, the clerical duties, the administrative hassles. More than once, I've driven home in tears at the end of a day.

Like anyone, I need concrete rewards to sustain my energy and enthusiasm—things like seeing our Latin enrollment soar from 87 to more than 300 students in just five years or watching parents donate hundreds of hours to support our programs and raise money for Latin activities.

When I do feel discouraged, I am able to put things in perspective by recalling the Latin phrase "Quid ad aeternam?" What is it in the light of eternity? Beyond the facts and figures that we teach, each of us in the classroom has the commitment to pass on the values of honor, tolerance, justice and loyalty.

If our students come away with an appreciation of those qualities—and I have seen many who do—it is worth far more to me than a 10 percent raise, social prestige or public acclaim. It is something that can get a teacher fired up about her job—instead of burned out.●

WESTERN RESOURCES WRAP-UP

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. LUJAN. Mr. Speaker, next year is the 40th birthday of one of New Mexico's most beloved and renowned celebrities, Smokey the Bear. To commemorate the occasion—and at the same time to promote its highly successful forest fire prevention program of which Smokey is the unforgettable symbol—the U.S. Forest Service is distributing a Junior Forest Ranger Kit to any youngster who writes in and asks for it.

Heading up the Smokey Bear program is a new manager, Mrs. Gladys Daines of Salt Lake City, who has planned an extensive national public relations program around Smokey's 40th birthday observance.

A detailed description of the program of Smokey's own personal history is contained in the August 4, 1983, edition of the authoritative newsletter, Western Resources Wrap-Up, published in Washington by the well-known and respected writer, Helene C. Monberg. Helene was kind enough to provide me with an advance copy of her newsletter and I am certain my colleagues will find it of great interest, both personally and as information to be relayed to constituents.

I wish to compliment Western Resources Wrap-Up and its indefatigable publisher Ms. Monberg for another excellent job of timely and in-depth reporting on a matter of interest not only to westerners but to all Americans who see a big brown bear in a ranger's hat everytime they hear the slogan: "Remember—only YOU can prevent forest fires."

"Smokey Bear is an idea" to promote fire prevention. "That idea's time had come back in 1945, and it has lived because its time is still now. As long as we have forests that need protecting we will have a need for his familiar reminder: 'Remember—only YOU can prevent forest fires!' "—Guardian of the Forest by Ellen Earnhardt Morrison, 1976

WASHINGTON.—Hey, kids, Smokey Bear's going to be 40 years old next year, and his new manager invites you to get in on the celebration.

You can start right now by writing to Smokey Bear Headquarters, Washington, D.C., 20252 (Smokey has his own zip code), and ask him for your Junior Forest Ranger Kit. If you want to include a small donation, Smokey will use it to help prevent forest fires in the forests in your neck of the woods.

Smokey's helpers will send you your personally addressed Junior Forest Range Kit.

The Smokey Bear fire prevention program for many years has been jointly sponsored by the U.S. Forest Service of the U.S. Department of Agriculture, the Association of State Foresters and the Advertising Council. It hasn't been as up-front in recent years as it used to be, so the Forest Service put out the word that Smokey needed a new manager to press ahead with the campaign after the previous manager resigned last August. At least 15 applied for the job before the new Smokey manager was selected in March. And guess what! Smokey's new manager is a woman—Gladys Durtochi Daines, a Salt Lake City native, a widow with five children and three grandchildren whose four-year-old grandson thinks her new job is just great. She got it as a result of a bilingual education program, on which she worked as editor for six years, conducted by the Northwest Regional Education Laboratory jointly funded by the U.S. Government and local education organizations. It worked in particular with the Indian tribes of the Pacific Northwest and Alaska, Alaska Natives and natives of the Mid-Pacific Islands under U.S. protection. In recent years she has also worked for the U.S. Forest Service; she had completed a six-year stint with the Service when she was notified in March that she was Smokey Bear's new manager. She reported for her new job on April 1.

LOVES NEW JOB

Mrs. Daines loves her new job. "It's a thrill to be the manager of a bear that I have known and loved since I was a child in school in Salt Lake City," Smokey's first woman manager told Western Resources Wrap-up recently. She has known of Smokey all of her life. But she never thought she would be involved with his fire prevention program. "If anyone had told me a year ago that I would be here" at Forest Service headquarters as Smokey's manager "I wouldn't have believed it," she said.

One of the first items on her agenda is to rev up the Smokey Bear Junior Forest Ranger program. Only 25,000 kits were mailed out to kids in this country last year,

she said. "Next year we plan to mail out at least 200,000," she told WRW.

Here is Mrs. Daines' "general plan" for the 40th birthday activities of Smokey Bear, which is, of course, subject to change:

Postage Stamp: First Day of Issue scheduled for Aug. 9, 1984, with ceremonies scheduled by the U.S. Postal Service.

Presidential Proclamation: The Advertising Council is working to get a Presidential Proclamation issued, In May of 1984, to usher in Smokey Bear Week the week of May 13, 1984.

Appearances: For the first time in several years, there will be a Smokey Bear float in the 1984 Tournament of Roses Parade featuring Smokey and his 40th Birthday under the sponsorship of the Square Dancers of America, headquartered in California. There will be salutes to Smokey's 40th birthday in other parades, and Smokey will be invited to attend a number of national sports events, including the 1984 summer Olympics.

Public Service Advertising: All saluting Smokey on his 40th Birthday in 1984.

Touring Exhibits: With the aid of some hoped-for but not yet realized corporate funding from large corporations, the Smokey Bear program hopes to provide traveling exhibits made up of brand new posters and materials in 1984 to be shown at museums and other educational and regional and local centers.

Field Guide & Other: A field guide is expected to be ready by fall to help your local forest ranger promote Smokey Bear during his 40th birthday activities next year. Stories are planned by the Forest Service press office in many publications in 1984.

LICENSING

Because Smokey Bear is one of the most recognized VIP's in the World today, a lot of businesses want to sell Smokey Bear items. They have to conform to a law passed by Congress on May 23, 1952, which is designed to protect Smokey Bear from exploitation. The law gives the Secretary of Agriculture, in consultation with the Association of State Foresters and the Advertising Council the authority to grant permission for the manufacture, reproduction and other use of the Smokey Bear character. Each person or company that wants to obtain a license to use Smokey must sign a contract which usually extends from 1-5 years paying the government a small percentage of annual estimated sales of the product. The licensees must abide by regulations issued by the Secretary of Agriculture to assure that the use of the Smokey symbol is in good taste and is in line with the Smokey fire prevention program.

Remember the Smokey Bear cartoons sketched several years ago by Forest Service artist Rudy Wendelin and other artists? Well, the Forest Service is now in the final stages of negotiating a new cartoon series featuring Smokey with a Los Angeles company, according to Smokey Manager Daines. "It is expected to be a weekly cartoon series," she said.

Other newly licensed or recently licensed items include a Smokey belt buckle—"it comes in pewter, grass and sterling silver," she said, children's slippers, a stuffed animal including Smokey's trademarks—his ranger hat and dungarees, watches for children and adults, and a new assortment of jewelry, including pins and rings.

If you want to obtain a license to use the Smokey symbol, write to Smokey Bear Manager Gladys D. Daines, Smokey Bear Headquarters, Washington, D.C., 20252.

BURNING QUESTION

Smokey and his message have been eminently successful, by any yardstick. The forest area burned annually in this country has dropped from about 31 million acres in 1942, just before the Smokey campaign began, to less than 3 million acres annually at the present time, according to the Forest Service.

But Smokey's message: "Only YOU can prevent forest fires" by keeping such fires from starting in the first place does not have universal appeal. Environmentalists have observed, particularly in recent years, that some forest fires which occur naturally are needed to keep nature in balance. There are also occasions when prescribed burning by man is called for, even the Forest Service concedes.

But on this point former Forest Service Chief John R. McGuire stated in April 1973: "Prescribed fire is for professionals only! We know of no place in the nation where we can turn our backs on fire and let it run ... 'Careless fires' don't fit" in any situation. " 'Careless fires' are the ones we can get at with a mass media approach like Smokey Bear's," said McGuire a decade ago. Present Forest Service Chief R. Max Peterson underwrites that message again today.

So as not to mislead a whole generation of youngsters, the Forest Service makes it very plain that the 40th birthday that it will be observing next year is of an idea hatched mainly by professionals within the Service, NOT the bear itself. The original Smokey Bear was found as a cub, abandoned and partially burned as a result of a forest fire, in the Lincoln National Forest in New Mexico in 1950. Personnel from the New Mexico Gas and Fish Department found him clinging to a charred tree and brought him to Santa Fe for treatment during the spring of 1950. After the little cub was nursed back to health, he became the first living symbol of the national forest fire prevention campaign which had started in the mid 1940's. He was flown to Washington, D.C., on June 27, 1950, and became the official Smokey Bear. This Smokey Bear died on Nov. 9, 1976 at Washington's zoo, where he had lived since 1950, and he was buried at the Smokey Bear Historical State Park at Capitan, N.M., several days later.

A new Smokey Bear, also found abandoned and half starved as a cub in Lincoln National Forest in 1971, came to the Washington zoo that year to understudy the original Smokey. Little Smokey took over as the official Smokey Bear four years later on the retirement of the original due to old age in May 1975. Since 1950 millions of children have come to the Washington zoo to see Smokey #1 and Smokey #2. Smokey has taught two generations of children not to be careless with fire. And like the great Mississippi River, "he just keeps rolling along," his admirers note, with his ever-timely message.●

ROUKEMA LAUDS HOMETOWN FOR LOW CRIME RATE

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mrs. ROUKEMA. Mr. Speaker, last week, a study on crime rates throughout the United States was released. I am extremely pleased to call to your attention the fact that my hometown of Ridgewood, N.J., was among the top 15 safest cities in the country. I believe that not only are congratulations in order for the residents and law enforcement officials whose combined efforts made this possible, but we all may be able to learn a lesson from the community's spirit, as noted in the following New York Times article from September 14:

The article follows:

[From the New York Times, Sept. 14, 1983]

JERSEY TOWN: A FEELING OF COMMUNITY

(By Lisa Belkin)

RIDGEWOOD, N.J.—The border here is marked by a road sign with a single staring blue eye. The caption, painted in peacock-blue letters on an unscarred white background, reads: "Welcome to Ridgewood. Crime Watch."

"The people in this community are like family," said Police Chief Frank Milliken about this upper-income Bergen County township of 26,000, where he has lived all his life.

Chief Milliken is proud that his town, the town where his great-grandfather opened the first telegraph office a century ago, has been singled out as one of the safest in the country. But, he said, he is not surprised.

"We have good police and we have good people," he said. "That's all you ever need."

Only a half-hour drive from Manhattan and populated mostly by New York City professionals who commute by train and bus daily, Ridgewood seems an era away in its old-fashioned atmosphere and its yesteryear rate of crime.

In sight of castle-like Tudor homes or more modest two-story ranch houses, children play and laugh on the sprawling porches and Kelly-green lawns.

The railroad station, a flashback to the 1800's with its filigreed railings and tiled roofs, is considered safe at all hours of the night.

And in the business district, where even the fast-food restaurants are built of Colonial brick, no bars or grates cover the windows and few burglar alarms are turned on at night.

There was one murder in Ridgewood last year, when a woman shot her husband to keep him from seeking a divorce. It was the first killing in the town in more than three years. In 1982 there were 73 burglaries, down 52 percent from 1981. Mr. Milliken says his police force of 46 men and 1 woman is only partly responsible for the low rate of crime.

'WATCH OUT FOR EACH OTHER'

"My men are good," he said. "We come when we're called, we notice things. But these people who live here, they watch out for each other. That's why they feel safe."

That safety is expensive. According to the 1980 census, Ridgewood is populated mostly by two-salary professional families, and the average family income is $34,500. The national average is $11,000. The average cost of a home is $170,000, with taxes of $3.54 per $100 assessed value.

Different forces draw these residents to Ridgewood, but two pulls appear to be strongest. Some people are here because their families have lived in the village for generations.

Others moved here for the quiet, the safety and the chance to send their children to Ridgewood High School, an ivy-fringed

structure on the outskirts of town that is considered one of the best schools in the country.

"Ridgewood's a town where we can start in a small house," said Kathleen Pesanell, who was knitting in her car at the train station waiting for her fiancée, John Dolan, to come in from New York. "As the family gets larger, you move to a larger house. Then when the children leave you retire and move to a smaller house again."

Miss Pesanell is a schoolteacher in neighboring Glen Rock. Mr. Dolan is an operations manager at Merrill Lynch & Company. They bought a $117,000 two-bedroom house on Albert Place in June, and she will join him there when they get married later this year.

"Safety was a consideration," Mr. Dolan said after getting off the 6 p.m. train. "So were the schools. I know all my neighbors, it's that kind of a place. I plan to stay here a good long time."

Michael Esposito, the local butcher, has already stayed in Ridgewood a long time. He moved to the town in 1942, after his father, Ralph, took a bus trip from the Esposito home in Hackensack, N.J., saw Ridgewood High School through a window, and decided that that was where his children should go to school.

The younger Mr. Esposito graduated from the school of his father's choice in 1944, served in World War II, then returned home to open the butcher shop on Ridgewood Avenue he has run for more than 30 years.

He has been visited by burglars twice in three decades, the last time more than 10 years ago. Less than $50 was taken he said, and he suspects the culprits were "kids, not real robbers."

"THERE'S SOMEONE TO DO IT"

It is the "love affair" between Ridgewood and its residents, Chief Milliken says, that keeps the area so safe. "We have volunteers coming out of our ears," he said. "Anything we need, there's someone to do it."

For example, he said, there was the Police Department drive for 47 bulletproof vests at a cost of $200 each. An article appeared in the Ridgewood News, the town's newspaper, and in a week another article was needed to tell people to stop sending money.

That sense of community involvement has led to the success of several citizen crime-prevention programs.

One, called Crime Watch, trains citizens to be aware of suspicious people in their neighborhoods. It has been directly responsible for a half-dozen arrests in the last year, the Chief said.

All is not perfect in Ridgewood, however. There were no rapes last year but there were 4 robberies and 55 assaults, and those numbers are high enough to make many people wary.

"I'm not compulsive about it, but I'm careful," said one woman, who asked not to be identified for fear that burglars would choose to visit her five-bedroom spired mansion on Highland Ave., a wealthy area of town known locally as the Heights.

"Just because there's less crime here doesn't mean you're safe," she said. "Nowadays, nothing's really safe."●

STRUCTURAL CHANGES IN ECONOMY AFFECT AMERICAN WORKER

HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. ST GERMAIN. Mr. Speaker, the significant effects that structural changes in the American economy are having on the American worker is becoming apparent in very bold relief. While many are making the transitions, an increasingly large number are having difficulty, and their growing numbers underscore the fact of the existence of millions of undertrained employed workers scattered through our economy.

Through her statement made on September 16, 1983, before the Industrial Union Department, AFL-CIO Conference on Technology, our distinguished colleague from Ohio, MARY ROSE OAKAR, has provided us with a penetrating analysis of this problem. In her prepared remarks, she has not only suggested a number of the major legislative tasks to which we are urged to turn our energies, but has also suggested some very meaningful priorities for our consideration.

Mr. Speaker, so that my colleagues may share in the insights and commonsense presented through her statement, I ask consent that it be made part of the RECORD at this point:

SPEECH BY HON. MARY ROSE OAKAR BEFORE THE INDUSTRIAL UNION DEPARTMENT, AFL-CIO, CONFERENCE ON TECHNOLOGY, WASHINGTON, D.C., SEPTEMBER 16, 1983

It is a pleasure to join all of you here today at the Industrial Union Department's Conference on Technology. Conferences such as this are essential if we are to understand the momentous changes occurring in the workplace and develop programs that will provide the American worker with the expanded economic opportunities and improved standard of living that have been the hallmark of our economy for the past third of a century. I want to commend the IUD and its member unions for being in the forefront of this effort.

The challenge we face today is unlike any other we have faced since the Great Depression. We are recovering—ever so slowly—from the worst recession in over 40 years. Unemployment is slowly declining. Consumer spending is picking up. Auto sales and housing starts are up over last year's dismal figures.

Yet recovery does not mean that fundamental problems are being solved. Our heavy industries are still weak. This is particularly the case in steel and metals, railroad equipment, machine tools, and heavy equipment. The steel industry continues to show losses, and the National Tool Builders' Association reports that tool shipments declined 56 percent in the first half of the year, with orders for some key specialized machine tools off 20 percent. Real interest rates remain at historically high levels and edged up once again last month. The overvalued U.S. dollar threatens exports of U.S. goods. The federal deficit continues to balloon.

And while unemployment has been dropping nationally, it remains a grim, ever-present reality in many cities and towns of the Frostbelt and for many workers in our backbone basic industries. This unemployment is a result not only of a weak recovery but also of major technological and structural changes in our economy that have eliminated millions of jobs. We are witnessing a recovery that will not make a serious dent in unemployment in these areas.

I cite these problems to remind all of us of the tasks that lie ahead if we are to create a society in which economic opportunity will be a reality and in which people can look forward to an expanding future for themselves and their children.

It is to these tasks that Congress must now apply its creative energies. They include:

The development of strategies for long-term economic growth that are essential if we are to make America's businesses and America's workers competitive in the domestic and world marketplace and provide our citizens with productive jobs and an improved standard of living; and

The development of strategies to make sure that all regions of our country, all industries in our economy, and all of our workers will share in this long-term growth.

Many Congressional panels and task forces have been examining our economy's problems. The House Banking Committee's Economic Stabilization Subcommittee and the Northeast-Midwest Congressional Coalition, of which I am a member, are attempting to be thorough in their review. The Subcommittee has held extensive hearings this year on the problems facing the U.S. economy and its industrial sectors. So has the Coalition. The Coalition went to Cleveland in June for a fascinating and very productive hearing which I chaired on the future of heavy industry. The AFL-CIO and its member unions contributed greatly to the hearing's success.

The Coalition followed up on its hearings by recently appointing a new Task Force on Employment and Training. The Coalition has asked me to co-chair the task force. This is a very important assignment. I intend over the next few months to undertake a comprehensive study that will define job creation and employment training issues facing the Northeast-Midwest region. The next step will be to initiate a vigorous implementation of new programs.

These are issues of great concern to unions and the business community, to Congress and state and local governments. I would welcome the opportunity to hear your recommendations on efforts to develop new strategies. Obviously, we will work closely.

The legislative plate is filled with proposals. One calls for the creation of an Economic Cooperation Council to provide broad analysis and guidance. A second combines a stronger Economic Cooperation Council with a financing mechanism to assist mature industries and emerging industries that need patient capital. Other proposals focus on greater public investment in rebuilding the nation's infrastructure, and channeling a greater share of the Gross National Product into research and development.

These are excellent ideas. However, they address only bits and pieces of the problem we face. They lack the broad vision that is essential to capture the public's attention

and imagination. The strategy that we are developing is not only economic but also political.

Developing a successful approach requires that we make choices and that we know what we want to achieve. It requires us to look to the future for our goals and for our mechanisms and policies. It requires us to develop a balanced, practical strategy that not only addresses the serious economic, technological and structural problems but, as important, one that is perceived as dealing with these problems.

What do we want to accomplish?

First and foremost, we want to get our economy growing fast enough to fully utilize our productive capacity. Second, we want to stimulate a productive investment pattern that broadens and modernizes our economy and makes it competitive. Third, we want to help firms and workers adjust to the structural and technological changes in our economy. And lastly, we must create millions of new and productive jobs so that the young person entering the work force can find a job with a future while the over-forty worker remains a useful, productive worker.

How do we achieve this?

We must go beyond the mix of fiscal and monetary policies needed to stimulate the economy and bring about low and stable interest rates.

We must act on several important initiatives that fall under the jurisdiction of the House Banking Committee and its Economic Stabilization Subcommittee. These initiatives are integral parts of a strategy for long-term economic growth. They include:

Export promotion. U.S. export programs should be revitalized and Federal efforts must be coordinated. In particular, the Export-Import Bank must not serve solely as the banker for a handful of corporate giants. It must help large, medium and small concerns to be internationally competitive. Innovative state programs should be encouraged. Several state export programs—in Florida, Tennessee and Massachusetts in particular—appear to be effective and well managed and could provide models for other states. They could work closely with the Eximbank in spurring exports by medium and small firms.

Development financing. A national development bank must be established to provide loans to mature and emerging industries. Two approaches are possible. The first could be a sizable bank. Alternatively, we could have a small, experimental bank. In addition, there could be matching funds for state or regional development banks. The matching formula could be drawn to benefit areas of chronic unemployment. The matching ratio could also be designed so that the Federal share would increase as a state committed more money to its development bank. The bottom line for a development bank should be that its loans contribute to the revival of important but declining mature industries, help promising new industries develop to the point where they can attract private capital, and promote the creation of new and productive jobs.

Adjustment assistance. Workers and communities affected by plant closings or major layoffs resulting from technological changes must be helped. This is especially critical in the Midwest industrial belt where factory employment is contracting and where new industrial robots threaten to displace more workers. Assistance could take several forms. These include comprehensive job retraining; work-sharing programs; and industrial development bank loans to companies and communities for economic development and plant and infrastructure revitalization.

As we draft implementing legislation,we must be sensitive to our national needs. To stress one industry and neglect others in an economic growth strategy would be a fundamental error. If our country is to maintain its world leadership, its national security and its economic health, we cannot allow our economy to become one-dimensional. We need to develop our high technology industry but we also need to stengthen our tool and steel industries, our auto and base metals industries and our rubber and metal fastener industries.

I have been greatly involved in assisting the metal fastener industry because of its importance to the economy of my state and its basic role in maintaining our national security. Very simply, metal fasteners are the nuts and bolts that hold together every tank, airplane and aircraft carrier we have. It should be a matter of great concern that 8 of every 10 fasteners in this country are imported. That is why I have been battling the current Administration to save the U.S. metal fastener industry.

Amazingly enough, a Commerce Department report earlier this year concluded that our dependence on imported fasteners is no cause for alarm. During a national emergency, the Administration contends we could ship steel to Asia if necessary and ship finished fasteners back across the Pacific to supply our defense efforts.

Commerce is now studying the defense strategic implications of our declining machine tool industry. A similar investigation is also being conducted into the ferroalloy industry. The Soviet Union is currently trying to undercut the U.S. ferroalloy industry by dumping ferroalloys such as ferrosilicon on the U.S. market at predatory prices. It was bad policy to allow this before the recent shooting down of the Korean civilian airliner. It is unconscionable to allow this today. I called on the President earlier this week to bar further imports of strategic Soviet materials to protect our country's strategic industrial base and deny the U.S.S.R. critically needed hard currency.

My own contention is that the ferroalloy and metal fastener industries are bedrock industries that we must have if we are to preserve our defense industrial base and have the balanced economy essential for strong economic growth in the near and distant future.

We also need to turn our attention to where help is needed most to bring visible results soon. I would like to focus today on those workers who lack a solid education and marketable skills. According to a study of the Urban Institute released earlier this year, these are the workers who face the greatest difficulty adjusting to the structural and technological changes in our economy. They are the ones who need our immediate help. Their unique problems are subsumed by the problems of the displaced workers in declining industries. The Urban Institute found that displaced workers who are better educated and who have marketable skills have an easier time finding new employment than the undertrained worker. I would hazard to say that we have millions of these undertrained employed workers throughout the economy who do not have the wherewithal to adjust. Their inability to make the transition is a tremendous drag on our economy and a waste of their potential.

These undertrained employed workers receive little if any help from industry or government today. There are few retraining programs to integrate them into the skilled work force. This problem can be remedied.

I would like to put forward a proposal to help these workers by leveraging government's resources. I propose that we use our $245 billion defense budget as a vehicle for job retraining. National security includes not only weapons but a strong economy.

The proposal would work as follows. Each defense prime contractor or major subcontractor would have to agree to a training obligation as a condition of receiving a defense contract. The obligation would consist of a certain percentage of wages paid under the contract that would be used for a fund for employee training. The firms would be required to identify skills in short supply and the most efficient training methods.

Let me add parenthetically that the Department of Labor predicts major shortages of skilled workers in several key areas throughout this decade. These include an annual shortage of 57,000 positions in industrial machinery repair; 21,300 machinists; and 5,000 tool and die makers. By 1990, the Labor Department projects a cumulative skilled labor shortage of 2.5 million workers in just 13 occupations.

The idea would be for the company to be required as a condition of receiving the contract to leave a skilled pool of manpower in place at the completion of the work.

This proposal could be implemented through the procurement process. It would entail no new bureaucracy and would require minimal public expenditures. The level of training, however, would be increased. And companies would be motivated to train their undertrained workers for skilled jobs.

These are the outlines of a proposal that could be embodied in concrete legislation. One readily available vehicle is the Defense Production Act which is under the jurisdiction of the House Banking Committee and its Economic Stabilization Subcommittee. This proposal could be included in the Subcommittee's overall strategy for economic growth which is being drawn up.

One would expect strong support from the Department of Defense for this proposal. The Pentagon has expressed concern about whether the labor market will be able to supply the skilled workers needed for our ongoing defense efforts. This is a practical way not only to provide skilled workers but also to retrain workers for available jobs.

This proposal could also be broadened to cover companies from which the Federal government makes non-defense purchases. The government would thus be using vast procurement budget to establish a nationwide job training program.

I welcome your comments on this suggestion. This proposal would help workers in industries with many industrial union members. It is a proposal that has been quietly discussed by thoughtful members of Congress.

In developing the new policies and programs to bring long-term economic growth, we must be sensitive to the role of government. Bureaucracy should be minimized and programs should be kept practical and flexible. Government's role should be to support the operation of the private market, not replace it. Government should not be picking winners and losers. It should be a facilitator, a coordinator and a cooperator. It should bring together labor and business, state and local government and private efforts. It should help us solve problems together that we cannot solve alone.

As Congress works out the specifics of these policies and programs, we must have three simple requirements: the policies and programs must make American business competitive, they must create new and productive jobs, and they must be workable. Meeting these requirements is essential if we are to develop coherent policies and programs for long-term economic growth.●

CHILDREN'S FEAR OF WAR

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. DELLUMS. Mr. Speaker, in our daily hustle to formulate and implement military policy, Members of this Congress often overlook the psychological impact of our policies. The Select Committee on Children, Youth, and Families held a hearing September 20 on children's fears of war in which several young Americans, aged 11 to 16, expressed intense worry about the possibility of a nuclear holocaust.

Increasing numbers of children seem to be feeling similar fear and distress as the arms race continues to spiral out of control and our country is brought closer to a nuclear disaster. It is utterly shameful that the young should have to carry such a burden of fear because the superpowers refuse to explore serious efforts to bring a halt to the arms race. Here in the United States, our Government often talks a commitment to arms reduction; yet so many signs, such as the building of the MX missile, suggest otherwise.

Our children are growing up in an unhealthy atmosphere of militarism, where optimism about the future is gradually being replaced by outright fear of the horrors of nuclear confrontation. The hopes and aspirations of America's youth is the future of this country. To take away that hope and replace it with fear robs America of its great potential, and our Nation is in danger of becoming a wasteland of pessimism.

Representative GEORGE MILLER, who chaired yesterday's session, is to be commended for allowing the young to speak their concerns. We all can learn something from these children. I would like to call the attention of my colleagues to the compelling testimony of Ursell Austin, a 16-year-old high school student from Oakland, Calif.

Congressman Miller and members of the House Select Committee on Children, Youth and Families. My name is Ursell Austin, and I am sixteen years old. I live in Oakland, California where I am a high school student and a member of the St. John Missionary Baptist Church. I am honored to be here today to talk to you about my experiences growing up with the threat of nuclear war, and I am very glad this hearing is happening. It helps to restore my faith in government that politicians care enough to hear from young people.

I remember the first time I heard about nuclear bombs was on television. I was home one Saturday and there was nothing much on, so I turned to this program on Hiroshima. This was about two or three years ago. It showed what happened to the people and the land when the bomb was dropped. I was completely shocked when I saw it. It looked so weird, like the whole city was black and scorched. People were walking around burnt to a crisp and looked like they were in pain, but they didn't say anything. I guess they were in shock. I just couldn't believe that such a horrible bomb was dropped on innocent people—most women and children.

The schools I went to never talked about nuclear weapons or Hiroshima or the arms race. I think maybe teachers were afraid to talk about it. It made me think it just wasn't a big deal to them, or it wasn't important, or they were afraid. But that seemed strange to me. I think other kids should know both sides of the nuclear issue, and know them clearly. I believe that if they had a way to understand and discuss both sides, they could make up their own minds. It's not like we don't hear about nuclear weapons. It's on the news, it's in the papers, it's on television. But people act like we aren't supposed to talk about it.

I think about the bomb just about every day now. It makes me sad and depressed when I think about a bomb ever being dropped. I hope I'm with my family. I don't want to die alone. I think about it most on sunny days when I'm having a good time. I think—it could happen right now.

I thought about it when I was going to camp, because I kept thinking what if a nuclear war happens when I'm away from home and away from my family. I was afraid of coming back from camp and there would be nothing left.

I also used to think about it when I was at a school that was built on two levels—an upper level and an underground level. When I was in the classrooms underground I'd think about the building crashing down on me and suffocating me if a bomb dropped. I would think that all the air would be sucked out of me, and I'd burn up under the rubble.

One of the things I think about is what it would be like when a warning comes. I would try to get my family together, go to my grandma's house where we could hold each other tight and pray. I don't want to be warned. I don't want to know it is about to happen. If it is going to happen, I want to be killed right away. Being alive during or after the bomb would be the most frightening of all. I think surviving would be worse than dying.

It scares me about my future. I get angry when I think about maybe not being able to have a career; that my plans just wouldn't get a chance to ever happen. I want to be a midwife and help bring life into this world. But I might not get the chance. I really want to have children and a family someday, but then I'd feel fear for them, too. It makes me wonder whether I should have kids at all. I'd be so scared for my baby.

I want to live longer, but at least I've had this long. I feel the worst for the little children. It's not their fault that governments can't find a way to solve their problems. They are so young and innocent and haven't had much of a life yet. I have a seven year old sister that I love a lot. One day I was trying to imagine a safe future with no nuclear weapons in it. I could see myself telling my little sister that she would grow up safe. It seemed so peaceful. I cried. It still makes me almost cry to think about it.

It seems to me that we shouldn't be spending so much money on more nuclear weapons when we already have enough to destroy every person on earth. The money we are putting for nuclear weapons should go for other things. When we go to county hospitals, we have to wait for hours and hours to see a doctor because there isn't enough money for good health care. Old people have trouble living on social security. The county mental hospitals have to turn people away and onto the streets. I know, because I meet them on the streets. Our schools don't have enough money for books. It's hard to do your homework when there aren't enough books so you have to share and can't take the books home with you to study. So when I hear how much it costs to build nuclear bombs, it just doesn't seem right to me.

A lot of times people think of teenagers as bubbleheads. That we are just interested in playing video games, getting dates or going ice skating. That's not fair. We are concerned about what is happening in our world. We care about more than just whether we get a job. We care about the fate of the world. Soon we will be adults who can vote. Our schools should be places where we can learn about important issues, and discuss them. Where we can learn about the things that prepare us to be involved citizens.

When I first thought about coming to testify before this committee, I was really nervous. Then I thought to myself that in a nuclear war all of you and your children will probably die, too. I decided that maybe I had something important to tell you about what it is like for kids growing up with the threat of nuclear war. It's hard to live with the possibility that we might not ever get a chance to grow up. I think the arms race has gone too far. I hope you will open your eyes and your minds, and stop the arms race before it is too late for us.●

GRATITUDE DAY

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mrs. SCHNEIDER. Mr. Speaker, I would like to bring to my colleagues attention the fact that today, September 21, 1983, represents a day of international significance. In addition to representing the time of the equinox, September 21 has been proclaimed as "World Gratitude Day." According to its founder and organization president, Edna Fuerth Lemle, the day is intended to promote good will and understanding among the nations of the world.

It was Ms. Lemle's dream to conceptualize a day that would transgress all national and religious boundaries for the sake of recognizing gratitude among the peoples of the world. Since its inception in 1965, two nations, Japan and Sweden, have proclaimed September 21 as a day of national thanksgiving. In the United States, 38 States have proclaimed September 21 as World Gratitude Day.

Mr. Speaker, I would like to submit to the RECORD Ms. Lemle's proclamation for World Gratitude Day with the hope that all of us here today will take a few moments to read the proclamation and take to heart the beauty and simplicity of its message.

The proclamation follows:

PROCLAMATION—GRATITUDE DAY THE 21ST OF SEPTEMBER

Whereas humanity has come to recognize devotion and allegiance to immediate family, to clan, to city, to state, and to nation; and now must experience the concept of globalism; and

Whereas words of praise and positive thoughts generate dynamic harmony; and

Whereas decisions made from a grateful heart are endowed with intrinsic wisdom and engender prosperity; and

Whereas gratitude, the opposite of "taking for granted," is a positive emotion which generates good will, is a basic emotion which is indigenous to all people, is a peace engendering feeling.

And Whereas September 21st is a special day. It is an equinox; one of the two times of the year when the sun passes over the equator and night and day are everywhere of equal length and everyone is equal under the sun.

Therefore let us proclaim World Gratitude Day, a holiday for all peoples, a day of meditation for all religions, a day of celebration for all humanity, united by knowledge of a simultaneously shared emotion, a day when triumph of the spirit can make a world community.

(Gather with a few friends be Aware of sharing the emotion of Gratitude . . . Know that it is being shared globally. The Only Donation We Ever Ask Is Your Participation.)●

WHERE IS THE LEADERSHIP TO SAVE US FROM DISASTER IN THE THIRD WORLD?

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BARNES. Mr. Speaker, The Outlook section of the September 18 Washington Post carried a very important article by Charles William Maynes, editor of Foreign Policy magazine, about the impact that the world economic situation is having on stability—and therefore on our interests—in the Third World.

Entitled, "If the Poor Countries Go Under, We'll Sink With Them: While the West Worries About Its Banks, Economic Chaos Could Turn Third World Mobs Against Their Rulers—And Us," the article begins with the arresting statement that "the world is on the verge of a human catastrophe and a political disaster that this country seems determined to ignore, notwithstanding the great damage it will do to America's security and welfare."

Mr. Maynes details the severe economic contractions that Third World countries are being forced to undergo by world economic conditions and developed country economic policies, and points out the consequences for political stability and the survivability of fragile democratic institutions. The picture he paints is depressingly familiar to me as chairman of the Subcommittee on Western Hemisphere Affairs; Latin America's democratic societies, and those seeking to return to democracy, are being severely buffeted by economic conditions beyond their control.

Why do we not care? Why are we not doing anything about this? Mr. Maynes places the blame squarely where it belongs: on our political leadership. The administration seems to think that its only responsibility is to spread Reaganomics to the Third World—and that any resulting unrest can be put down with military aid. Too many of us in Congress are willing to go along with that prescription.

Mr. Speaker, Mr. Maynes is right: It is time for our leaders to start acting like leaders. They should be taking the lead in explaining to our people why we have to act vigorously on the economic front to protect our interests. They should be out in front proposing that we take the hard political and economic decisions necessary to help build a world in which we can be secure.

I hope everyone in a position of leadership in our country will ponder this article carefully. The article follows:

[From the Washington Post, Sept. 18, 1983]

IF THE POOR COUNTRIES GO UNDER, WE'LL SINK WITH THEM: WHILE THE WEST WORRIES ABOUT ITS BANKS, ECONOMIC CHAOS COULD TURN THIRD WORLD MOBS AGAINST THEIR RULERS—AND US

(By Charles William Maynes)

The World is on the verge of a human catastrophe and a political disaster that this country seems determined to ignore, notwithstanding the great damage it will do to America's security and welfare.

While Washington's attention is riveted on whether the debt crisis in the Third World will weaken or seriously harm the banking structure in the West, developing countries are being put through an economic wringer that is undoing the achievements of several decades. Countries that achieved independence in the early 1960s and began the process of modernization in the early 1970s are now being demodernized. Investment projects are lying idle, children are not being taught, disease is spreading, beggars are filling streets from which they have been absent for decades, people are looting food shops, and the middle class is being destroyed by bankruptcy and high interest rates.

Increasingly, the economic strains that Third World governments are experiencing are proving too great for existing political structures to sustain. We seem to be entering a period like the 1930s, when economic distress triggered violent revolutions from Vietnam to Nicaragua. If this economic crisis is not solved, we face political upheavals that can pose grave dangers to the United States.

Perhaps we no longer fear the nexus between economic crisis and political change because in recent years the industrialized North has shown remarkable political stability in the face of economic adversity. Governments have fallen in every major industrialized democracy in the last few years, but unlike the 1930s, there has been no major challenge to the system itself.

This stability, however, may be a tribute to the safety net of the welfare state that even developed countries are finding very expensive to maintain. Most developing countries do not have such a net. They are faced with the anger of disadvantaged populations. And there is good reason why these populations should be angry.

In the last 30 years, local governments, aid donors, and international organizations have uprooted traditional ways of life of Third World people and urged them to pursue the path of "economic progress." Pushed by economic conditions from the farms and villages and lured into the cities as developement economists emphasized industrialization over agriculture, these people turned cities like Jakarta, Mexico City and Lagos into wretched megalopolises. In only 30 years, for example, the population of the Lagos area has risen from 100,000 to 1.5 million, and by some estimates, to 3 million. It is as if all the pain and misery that people in the West experienced over more than 100 years of movement from country to city has been compressed into a period of three decades.

After many years of effort, citizens of Third World nations were beginning to make the adjustment from one way of life to the other, only to be told now that mistakes were made, that the future is no longer bright, and that they should return to a way of life they have abandoned. But the agricultural skills have been lost; the land has been taken, and the family unit is no longer organized to sustain the previous existence.

Even without taking China into account, the last count of the International Labor Organization put the number of unemployed or underemployed in the developing countries at half a billion. Unemployment rates have been increasing faster than in the developed countries and may now be around 40 percent.

Although the modest recovery in the developed North will have some positive impact on the developing countries' export markets, overall the situation looks bleak. Receipts from commodity exports have dropped perhaps 25 percent in the last two years; and even with an upturn in North America, Europe and Japan, the outlook for many commodities is not bright. Aid is not growing to compensate for that.

Whole continents have seen their hopes for the future disappear. According to the World Bank's 1981 report on Africa, the net flow of outside aid into Africa will have to double by 1990 if average per capita incomes are to stop eroding and begin to increase again significantly. On the other hand, if the established patterns continue, the overall per capita growth rate will be zero or negative, and there are alarming possibilities for even steeper downward spirals in some, as populations continue to grow.

Developing countries, to maintain their growth, need a regular flow of commercial loans and government grants from abroad. Yet, according to Morgan Guaranty, if the 20 percent increase in net new bank lending to Third World countries that occurred in 1981 did not take place in subsequent years, the developing countries would lose about $50 billion in investment funds from abroad.

The consequence would be a drop of three percentage points in their real growth rate. Growth in Latin American countries perhaps would decline by more than 5 percent. That is only a prediction, but, regrettably, reality seems to be supporting it. In the first quarter of 1983, private bank lending to the developing countries dropped to almost nothing.

The effects on the Third World of these reversals are extraordinary. Real income for the average person in these countries has declined for three years in a row. Sacrifices that the industrialized world has not experienced since World War II are being imposed on helpless populations. In Chile, the International Monetary Fund is demanding a 50 percent cut in govenment spending, even though Chile's unemployment rate has risen from 4 percent to 26 percent in the last two years. In Argentina, following IMF guidelines, the Government is attmepting to cut its budget deficit by an astonishing two-thirds, even though the unemployment rate has tripled in the last two years.

It is no coincidence that there have been massive street demonstrations in those two countries in the past few weeks. The military governments in Santiago and Buenos Aires are in difficulty, with pressure for political change coming even from their own supporters.

"Cuts in public spending," of course, is a euphemism for saying that health, education and welfare budgets are being slashed. (Countries everywhere are reluctant to cut defense budgets.) The IMF-imposed austerity measures that lead to improved balance-of-payments results today will lead to higher rates of infant mortality, illiteracy and malnutrition tomorrow.

Developing countries are already rebelling against IMF discipline. The main debtor countries of Latin America met in Caracas last month to discuss common action. Although the consensus at the meeting has reduced pressures for a time, many politicians in South America continue to talk about declaring a moratorium on debt payments.

In Africa, populations are actually returning to the bush. Thousands of Ghanaians expelled from Nigeria during the last year had no work to go back to in Ghana. They had to retire to their villages where the world will never learn their fate. Africa today has millions of people moving across borders and within countries in a search for survival.

Even the favored are suffering. No country in the Third World has been as blessed by the arrival of Ronald Reagan to power as Jamaica. The president has repeatedly cited the victory of Edward Seaga over Michael Manley as a victory for democracy. Jamaica, which the administration would like to turn into a showcase, now is the fifth largest per capita recipient of U.S. assistance. Nevertheless, unemployment is nearing 30 percent and a major foundation of the Jamaican economy has become the illegal drug shipments to the United States.

There is a Potemkin Village quality to the Jamaica seen by foreigners. Government officials urge potential foreign investors to visit the two "model farms" run by Israeli investors. But these employ only a few hundred people. Meanwhile, Seaga's free market policies, which are operating in a harsh international environment, have proven to be a catastrophe for the thousands of small farmers whose products cannot compete with cheap foreign food, and who cannot find jobs in the city.

Jamaica is a good example of the problems Third World governments are facing today.

Seaga has not misgoverned Jamaica. In his first year in office he curbed the rate of inflation, increased tourism and attracted the interest of foreign investors.

But any effort to float one boat in the fleet higher in the water than the others will fail. Jamaica has found that its economy floats at the same level as its neighbors, notwithstanding a favored place in U.S. aid disbursements. Investors cannot be attracted to Jamaica when the world economy is in such difficulty.

Will the Third World accept its economic fate without major political protest? Here the lessons of the 1930s are instructive, and chilling. In Latin America, the collapse of commodity prices in the Great Depression helped stimulate 50 revolutions by 1933. In El Salvador, a rebellion and the brutal repression that followed claimed tens of thousands of lives. The anger and the mythology that help fuel Salvador's civil war today date from that conflict. Violence, rioting and repression were commonplace all over the hemisphere, notably in the same countries that are causing us such concern today—Nicaragua, Honduras, Guatemala and Cuba.

In Asia, too, the collapse of sugar, rubber and other commodity prices encouraged vast political changes. The sugar issue set off the first American attempts (sponsored by sugar-state senators) to grant independence to the Philippines. Gandhi began his civil disobedience campaign by seizing on an economic issue when he led a march to the sea to make salt illegally. The collapse of Vietnam's colonial economy led to the first serious challenge to French authority there since the turn of the century. Although put down, it fueled hatreds against the West that blazed again in the '50s, '60s and '70s.

In the 1980s the predictable consequences of economic depression will be reinforced by a powerful new factor: the large number of young people in the Third World. Social scientists have long identified a correlation between youth and violence. In many of the developing countries, at least half the population is under 20. In recent decades it has been the young people who have flocked to the cities looking for opportunity.

This explosive mixture of economic stress and impatient young populations may finally be proving too much for many governments to handle. Violence has flared and governments have tumbled all along the coast of West Africa. Tremors have moved the once-stable political landscape in Kenya.

The authoritarian governments in the southern cone of Latin America seem certain to fall. Ethnic troubles have recently rocked Sri Lanka. The Philippines appears on the verge of major political change.

A particularly troubling aspect of political turmoil in the Third World is the opportunity it offers to outside powers to intervene. As the international economic climate curbs economic prospects within their own countries and compounds their own economic mismanagement, the ability of Third World elites to buy off the angry masses decreases. They become increasingly vulnerable and outside powers move in.

Those with money can, in effect, buy out countries for a few million dollars. Libya, for example, gave $100 million to Nicaragua after the United States closed down its $75 million economic aid program. It tried to buy out Liberia after the coup there, before a panicked U.S. administration restored its support. And it provided assistance to Ugandan dictator Idi Amin in his final days in power.

Those imparting military skills can offer the local elite help in organizing a Praetorian Guard to shoot the mobs when they revolt. Cuba, East Germany and the Soviet Union are performing this security function in Angola and Ethiopia; Israel is training President Mobutu Sese Seko's bodyguard in Zaire; France provides security functions in French African states, and the United States and Cuba do the same in Central America.

The effort won't work. For this time, unlike the 1930s, the mobs will have guns. The geopolitical competition will ensure this, as will the easy availability of arms for anyone with money. Governments fear an armed population and are preparing. The extraordinary recent increases in arms sales to Africa and Latin America—in Africa the increase has been 13-fold in the last decade—reflect elite fears of internal insecurity more than of external aggression. Altogether, Third World countries' expenditures on arms have grown from $27 billion in 1970 to $117 billion in 1980.

It may be that the international economic trends are so unfavorable that no countercyclical action by the United States, even with others, can be effective. A new feudal order may then rise up in the Third World as governing elites, all desperate to survive and many without great scruples, volunteer to become clients of an outside power willing to provide protection.

In this regard, the turn of several small African states toward Libya may reflect their struggle for survival as much as any imperialist design on the part of Libya. In other words, much as the United States prefers the status quo it may have to live with change, even undesirable change. But prudent policy would call for the United States to work with others to limit the scope of change that its enemies can exploit more easily than its friends.

Realistically, however, a common effort is unlikely to occur; for the trends within the U.S. government are all in the opposite direction. As the 1983 Agenda of the Overseas Development Council points out, the United States, a superpower, is now competing with Italy for the dubious honor of being the least generous of all Western countries in the provision of aid to the developing countries. In the worst crisis since the Great Depression, the United States is insisting that the World Bank drastically cut back on its low-interest loans to the poorest countries.

Pledges from richer countries for these loans will fall from a three-year total of $12 billion to $9.5 billion; the shares of the two largest recipients, China and India, are being squeezed to less than India alone used to receive; and the future for additional resources in the next pledging cycle looks bleak.

These low-interest funds have been vital to countries unable to compete for commercial funds with the wealthier developing countries. World Bank loans, like IMF loans, also constitute a seal of approval that private banks often require before they provide commercial funds.

Today only 19 percent of U.S. bilateral development aid is going to the low-income countries. (The figure is over 30 percent for our allies.) In the last 10 years the U.S. has nearly doubled to 41 percent the share of its aid program that is politically motivated, as opposed to development oriented. The Near

East, primarily because of aid to Egypt and Israel, now accounts for nearly 50 percent of all U.S. foreign aid worldwide.

But for the policy community in Washington—the administration, Congress and the "think tanks"—requests that the United States show more concern over the plight of the Third World have become simply annoying. Just as a physical structure may suffer from metal fatigue, official Washington now suffers from policy fatigue with regard to the Third World.

There are a number of explanations for this mood. One is the elite's loss of confidence between 1965 and 1975 that it understood the development process. The earlier hubris of Walt Rostow's "Stages of Economic Growth," in which development was detailed in an almost mechanical fashion, has disappeared. In the days of President Kennedy's Camelot, my Foreign Service Institute professor ordered me, a junior Foreign Service officer, to read that book. it was to be the blueprint we were going to follow to bring the world up to the economic level of Peoria.

Suddenly in the mid-1970's, Americans who previously claimed to know everything about development declared that they knew nothing. The announcement was, of course, premature. As nearly all development economists have pointed out, whatever the mistakes of the 1950s and 1960s, the developing countries as a group have achieved rates of growth unequalled in history. To be sure, credit for this success goes primarily to the people in those countries and not to the foreign donors. But when poor countries are desperate for cash, donations from richer countries certainly cannot hurt.

Attitudes have also affected the American government's policy. White Americans have never been entirely comfortable with the leaders of the Third World, in part because of the less-than-honorable history of this country toward the Third World people on this continent—the Blacks, the Indians, and the Mexicans. After all, until very recently, the majority has benefited by enslaving, defeating, or stealing land from Third World citizens of this hemisphere. It is now all history, the victims probably would not have been more humane as victors, and the sins of fathers should not be visited upon sons or daughters.

Nevertheless, history does leave scars and memories. Reflecting on this legacy, white Americans seem to have divided into two camps—conservatives who are callous in their sense of resentment and superiority toward the Third World, and liberals who are cloying in their mood of meekness and guilt toward developing countries.

Neither attitude is terribly relevant to the reality the country faces—a Third World that ranges from major international powers like India or Brazil to specks on the globe like Grenada or Fiji, a Third World that soaks up 40 percent of U.S. exports, that in certain vital countries represents the future and in many others encapsulates the past, that may affect the global balance of power.

Given the American attitude toward both development and the Third World, however, any appeal to the humanitarian instinct of the American people and particularly the American policy community is likely to fail. The instinct is no longer politically relevant except in the type of emergency that puts faces of hungry children on the front pages of American newspapers. The indifferent U.S. reaction to the Brandt Commission report, which laid out the elements of a global bargain between North and South, is proof of this. The report was a soaring best-seller in Europe, a public relations failure that sank like a stone in the United States. It is not that every one of the report's 59 major proposals in the fields of finance, trade, agriculture, and energy was sound. Such an achievement was never expected. What was disturbing in the United States was the lack of interest.

Yet the problem of what we do about political turmoil in the Third World remains. One of the obligations of an elite is occasionally to act like one. On the issue of development, the American people will not be ahead of their leaders. Instead of exploiting congressional votes in the IMF for partisan advantage, these leaders should be looking for ways to explain to the public the long-run political effects of the world's current economic neglect of many vulnerable regions of the world.

Development experts, including officials in the Reagan administration, have their own agendas for surmounting the current crisis. Proposals range from clever arrangements for redistributing the debt burden to renewed efforts to restore the tools of past policy—more aid, better trade, and wiser experts. The World Bank's recent report on Africa shows what reasonable increases in aid, combined with reforms, can do for that contingent. But even a modest agenda cannot succeed in the current climate.

Economic distress brought political disaster to many regions of the world in the 1930s. Yet then, at least, we had the excuse that we did not always understand the effects on others of such actions as the infamous Smoot-Hawley tariff increases, or inflexibility in reducing the international debt burden resulting from World War I.

In the 1980s, a decade in which we could see a new age of disorder, we have no such excuse.

(Charles Maynes, an assistant secretary of state in the Carter administration, is the editor of Foreign Policy magazine.)●

ESTABLISH A COMMISSION TO REVIEW WAR CRIMES

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. WON PAT. Mr. Speaker, between December 8, 1941, and August 10, 1944, the island of Guam was occupied by the Imperial Japanese military forces. During that time, the people of Guam were subjected to various forms of atrocities, including forced labor, physical and psychological torture, death by execution and massacre, rape and forced prostitution, forced marches, and internment in concentration camps. The people of Guam suffered because of their intense loyalty to this Nation. They were a difficult psychological force to subjugate.

Although the Guam Reparations Commission, which was established by the Guam Legislature, estimated that more than 10,000 native Guamanians were subjected to such treatment, no sufficient plan of reparation for these people has ever been formulated.

Mr. Speaker, my purpose today is to propose the establishment of a commission to first investigate the war crimes and the claims of Guamanians for losses resulting from the Japanese occupation of Guam. Second, this Commission would recommend the appropriate remedies for these claims.

The bill I am introducing today would require the President of the United States to make appointments to this Commission, from among individuals recommended by the Speaker of the House of Representatives and by the President pro tempore of the Senate. Two members of the Commission would be appointed by the Governor of Guam with the advice and consent of the Guam Legislature. One such appointee shall be a member of the bar of the highest court of the Territory of Guam and recommended by the Guam Judicial Council. The bill establishes all rules and guidelines for this Commission which I encourage you to examine.

I would like to emphasize that my island was caught for the second time in its history between two great powers' struggle. Because of their patriotic alinement with this country, they were victimized savagely over several years' time.

The peace treaty signed in 1951 with the Japanese precludes our seeking just reparation from that country. The people of Guam should not have been denied these reparations. They seek the help of this Congress in establishing a commission to study these wartime crimes against my people and what measure the United States can implement to restore justice to the people of Guam.

I urge your serious consideration in this matter. Thank you.●

THANK YOU, IRMA

HON. CHARLES PASHAYAN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. PASHAYAN. Mr. Speaker, yesterday, at the 49th annual Honor Awards Convocation of the U.S. Department of the Interior, 34 employees were presented Distinguished Service Awards. I salute all of them, as well as the 21 who were presented with valor awards, and should like to take this opportunity to tell my colleagues about one of the Distinguished Service Award recipients, Mrs. Irma Buchholz, secretary to the superintendent, Sequoia-Kings Canyon National Park.

Secretary of the Interior James Watt could not have said it better when he called all the recipients "employees who have gone that extra mile not just to get the job done, but to do it exceptionally well." Mrs. Buchholz, as Secretary to 13 superintendents at

one of this Nation's most popular national parks, has been doing that job "exceptionally well" for more than four decades. The recognition given her yesterday by her peers has been due for many years. She truly epitomizes the dedication given by most Federal employees in pursuit of their careers.

The new media, when visiting either Sequoia or Kings Canyon National Park—they were combined in 1943 under unified management—works with Mrs. Buchholz and of late have found that the Park's public information officer, another title she carries, is a story in and of herself.

Mr. Speaker, at this point I should like to insert a news article written by Gene Rose of the Fresno Bee as well as a news article written by Charles Hillinger of the Los Angeles Times. They have captured the spirit of Irma Buchholz, not only a treasure for the National Park Service, but for us all.

The articles follow:

VETERAN PARK SERVICE SECRETARY—TO HER THE JOB IS A WAY OF LIFE

(By Gene Rose)

SEQUOIA NATIONAL PARK.—Park superintendents come and go. But in Sequoia-Kings Canyon National Park, Irma Buchholz has become a permanent fixture—as venerable and enduring as the park's famed landscape.

In the past 37 years, she has served eight different superintendents, offering both her wit and wisdom to the managers of the famed big trees parks.

Well past the age of retirement, Buchholz still serves the NPS, acknowledging that her job as secretary to the superintendent is more than a job, it's a way of life.

"I have worked for all but two of the superintendents from Col. White to Boyd Evison," she related recently. "When I came here in 1943, I didn't know the Park Service from the Forest Service."

Since those early days, Buchholz has acquired a reputation as large as the Sequoias, having served and served and served.

"When I first started, I had no idea that I would be here this long." she said. "But it's a job that has grown on me."

Over the years, she has seen a passing parade of upward-bound rangers and retiring superintendents.

The succession of short-term superintendents has given rise to the remark that Irma was, indeed running the park.

Henry L. Jones, who worked with Buchholz as a management assistant in the late 1970's and is now superintendent of Waputki-Sunset National Monuments in Arizona, said the veteran secretary is not only a highly polished NPS professional but a warm and friendly person.

"She is just a superlative person . . . and she expects perfection," Jones said. "Yet she always has time to listen to everyone and is the 'mother confessor' to most of the staff."

Jones described Buchholz as a diplomat and very loyal to those she works for.

"Most people in the NPS move about and get to know people. Irma stays in one place and watches people pass through Sequoia-Kings Canyon national parks on their way from ranger, maintenance and administrative position to the high staff positions in Washington and elsewhere.

"She has friends throughout the service, including those that are highly respected in the NPS."

Irma's husband, the Rev. John Buchholz, died in 1972. Her family now consists of a daughter, Fanchon Owen of Fresno; a younger sister, Jeanette Barton of Three Rivers; four grandchildren; and two great-grandchildren.

"I'm at the stage now where my work is my life," she acknowledged. "I don't know what else I would do if I didn't do this . . . maybe some volunteering."

Buchholz currently serves a flexible tour of duty and lives in park housing across the road from park headquarters—where she can respond to about any question or inquiry.

Her daughter says it's almost worse than that.

"That job is her life. I have never seen anyone enjoy their job as much as she. She doesn't even like to take a vacation."

What spare time she takes, she uses to pursue her love of books and reading.

"Several years ago, I made the foolish statement that I would quit when the superintendents got younger than me," Buchholz said. "But now I don't subscribe to that idea anymore.

"I enjoy working for the younger fellows."

SECRETARY REGARDED AS PARK INSTITUTION

(By Charles Hillinger, Times staff writer)

SEQUOIA NATIONAL PARK.—"She's faster than the files," Boyd Evison, superintendent of Sequoia and Kings Canyon National Parks, says of the woman who has served him—and 12 of his predecessors—as secretary for 40 years.

Irma Buchholz, 71, is a National Park Service institution. She lives in government housing across from park headquarters, and park employees swear that she knows every rock, tree, bird and animal in Sequoia and Kings Canyon.

When reporters need to know anything about the parks, Buchholz is the person they call. A frequent question is, "Irma, do you know or remember such and such?"

SPEAKS "FROM MATURITY"

"I speak from maturity," Buchholz said. "They keep passing me along, superintendent to superintendent. I come with the job."

When Evison became superintendent 2½ years ago, Buchholz asked him: "Doesn't it frighten you to have a little old lady as your secretary? It would me. . . .

"He's so young. Boyd is only 50, you know," Buchholz said. "I knew his father well, worked with him for years." Evison's 92-year-old father is a former chief of information for the park service.

Buchholz, who vacations by train throughout the United States and Canada, says she never wants to retire.

Photographs of all 13 park superintendents she has served hang on her office wall.

"Notice I have them hanging behind me." she said, "not out in front where they would be looking at me."●

INTERNATIONAL FAST FOR LIFE

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. DELLUMS. Mr. Speaker, on September 15, 1983, the International Fast for Life came to an end after more than 40 days of fasting by 11 courageous people protesting the insanity of the arms race and the tragedy of world hunger. The 11 people started their hunger strike on August 6, the 38th anniversary of the atomic bombing of Hiroshima, and have since touched the hearts and minds of people around the world.

Two of the fasters—Dorothy Granada, 52, and Charles Gray, 58—are residents of the Eighth Congressional District in California. The other fasters are from Canada, Japan, West Germany, and France. These 11 were supported by more than 5,000 people in 25 countries who conducted shorter, open-ended fasts during these 41 days to register their wholehearted commitment to the burgeoning peace race. In the United States alone, support fasts were undertaken in some 200 cities.

The Fast for Life has raised issues no person can thinkingly ignore. While the superpowers cast billions of dollars into a dangerous and senseless arms race, several million people around the world go without adequate supplies of food, plagued by crippling starvation and disease. Basic necessities of life are scarce for these underprivileged, yet the United States and Soviet Governments squander more than half of their budget moneys for instruments of war; instruments, such as nuclear weapons, that do little to aid life and threaten our very existence.

The fasters urged that we "call in sick" on nuclear weapons and double our efforts to negotiate a halt to the madness of the arms race. Why are we not listening? Where is our defense sense which tells us that more money spent on nuclear weapons will only heighten the atmosphere for confrontation and the possibility of nuclear war; that more money for nuclear weapons is money directed against the human race, while there is much work to be done at home and abroad.

As responsible leaders, how can we not heed the advice of the fasters who hungered so hard for peace? The link between world militarism and world hunger is as strong as ever. We continue to conduct business as usual feeding the mouths of armament manufacturers by building new weapons, neglecting the mouths of the needy. Production of the MX missile is just one example of how our priorities are terribly distorted. Deploying new nuclear missiles in Western Europe, just some 6 to 8 minutes from Moscow, is a strategically unstable measure that will leave little room for human or computer error.

Throughout their hunger strike, the fasters urged us to reflect on our Government's priorities, and demand an end to the arms race. When will we heed their call? The policies of the

United States and the Soviet Union are wasting limited resources, leading us toward a nuclear catastrophe hundreds of times more devastating than the tragic atomic destruction of Hiroshima some 38 years ago.●

TRIBUTE TO NORTHRIDGE NATIONAL JUNIOR LEAGUE ALL-STAR BASEBALL TEAM

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Ms. FIEDLER. Mr. Speaker, I would like to share with the Members the fact that the Northridge National Junior League All-Star baseball team has had an excellent season and one of which I am very proud. These young constituents of mine were the Western Regional Little League Champions, they came in third in the Little League World Series and they were the United States' runner-up team.

The opportunity that sports has given these young people for personal growth and development is to be commended. Also the support shown by the adults who worked with these young people throughout the season shows one of the strengths of America and the American family.

For the record, Mr. Speaker, I would like to submit the names and the record of the Northridge National Junior League All-Star baseball team:

RECORD: WON 17, LOST 4

PLAYER AND POSITION

Jacob Austin—Outfield.
Greg Biley—Shortstop.
Kirk Edwards—Pitcher, outfield.
Jeremy Leach—Outfield.
Rex McMackin—Third base, catcher.
Scott Scibilia—Catcher, pitcher.
Mark Scott—2nd base.
Steve Slattery—Outfield.
David Waco—2nd base.
Steve Walsh—Outfield.
Donald Williams—Outfield.
Joel Wolfe—First Base.
Joe Zimmerman—Outfield, third base, pitcher.
Manager: Ron McMackin.
Coaches: Jeff Pentland, Joe Koh, Ben Samuel, Craig Flastrom, and Wayne Zimmerman.

CONTRIBUTIONS OF ITALIAN AMERICANS REMEMBERED

HON. JOHN HILER

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. HILER. Mr. Speaker, on October 10, our Nation will commemorate the 491st anniversary of the discovery of America by Christopher Columbus. While his discovery will highlight celebrations everywhere on that national holiday, it also provides us with an opportunity to honor Italian Americans for other contributions they have made to this great country.

Our history books are filled with mention of Christopher Columbus and his remarkable voyage, which he made after years of struggle with Queen Isabella of Spain and in the face of mutiny threats and an uncharted ocean. Little did he know that hundreds of thousands of fellow Italians would make similar voyages centuries later to make the America he discovered their new home. Many of these new citizens have helped defend this Nation in time of war and helped our Nation prosper in times of peace.

I am proud to represent many Hoosiers of Italian heritage who reside in Indiana's Third Congressional District. Their contributions to northern Indiana came to my mind last week, Mr. Speaker, when U.S. District Court Judge Alan Sharp swore in 93-year-old Pasqualina Acito as a naturalized citizen.

Mrs. Acito, a great great grandmother, originally came to this Nation in 1915 the same way Christopher Columbus did, by boat, with her brother. She married in Chicago a few months later, but because of questions about her citizenship she recently was threatened with deportation hearings. Fortunately, my office was able to intervene successfully and Mrs. Acito last week was able to become a citizen of the United States. She brought tears to the room, crowded with media and onlookers, when upon being presented with a flag by my office, said, "God bless America."

To leave one's homeland in search of new discoveries and new lives is something few of us can understand. Mrs. Acito does, and so do millions of immigrants to this Nation. I am proud of the contributions and successes of Italian Americans, and I hope my colleagues will join me in honoring them on Columbus Day.●

NEED FOR QUICK ACTION ON DISABILITY

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. ROYBAL. Mr. Speaker, the continuing review of the eligibility of social security disability beneficiaries, which has caused so much controversy over the past few years caused more controversy during our recent district work period.

On August 10, Attorney General Robert Abrams of New York State announced the filing of a lawsuit against the Department of Health and Human Services on behalf of individuals with heart diseases whose benefits were previously denied or terminated. This action was preceded by social services commissioner, Cesar A. Perals, who ordered the State's disability service to terminate no more benefits until the Federal Government establishes appropriate medical standards * * * for the review process.

On August 12, Gov. Jay Rockefeller of West Virginia issued an executive order to the State disability service which includes the reopening of decisions of previously-terminated beneficiaries and directing the State to follow orders of the Federal courts.

On August 15, the Social Security Administration began sending notices to approximately 75,000 previously terminated beneficiaries informing them of a ninth circuit court order which required SSA to reinstate benefits pending a reevaluation based on new policies.

On September 7, Gov. James Hunt of North Carolina issued an executive order to place a moratorium on processing any initial recommendations for terminating benefits unless fraud has been demonstrated.

On September 12, the New York Times, in a front page article by Robert Pear, documented these and other recent actions taken by the States. I ask that the article be reprinted following my remarks because I believe that the article demonstrates the need for national legislative reform to be enacted quickly. Absent such national reform we will continue to see individual States and individual

courts acting to correct the abuses which have been so well documented in the media and at least five committees of the Congress.

The legislation introduced by Chairman J. J. Pickle (H.R. 3755) adequately addresses most of the major issues and should be brought to the floor as soon as possible. Although I might have preferred the bill as originally conceived and would have even added additional reforms, it is a good bill and it is imperative that we enact legislation as quickly as possible.

The material follows:

[From the New York Times, Sept. 12, 1983]

NEW YORK AND OTHER STATES FLOUT U.S. RULES FOR DISABILITY BENEFITS

(By Robert Pear)

WASHINGTON, Sept. 11.—New York and other states, eager to help people retain Social Security disability benefits, have begun to flout Federal rules for the program, and so far the Reagan Administration has taken no action to penalize them.

States administer the program on a local level, but they are supposed to follow policies and eligibility criteria set by the Federal Government.

In a variety of legal and political actions over three months, the Governors of New York, North Carolina, Massachusetts, Arkansas, Kansas, West Virginia and other states have challenged the Reagan Administration's restrictive interpretation of the law. In some places state officials have cooperated with beneficiaries suing the Federal Government.

Last week Gov. James B. Hunt Jr. of North Carolina ordered a moratorium on the removal of people from the rolls, except in cases of fraud.

374,000 DROPPED FROM ROLLS

Nationwide, 374,000 people have been removed from the rolls since March 1981, Federal officials said. The program costs $18 billion a year and provides monthly cash benefits to 3.9 million people. A 1980 law requires the Social Security Administration to re-examine beneficiaries once every three years unless they are permanently disabled.

Social Security officials insist that a "crackdown" was needed to remove ineligible people from the rolls. But the officials now acknowledge that the process should have been more "humane" and that errors were made.

Two major reasons that Federal officials have not penalized the states are that doing so would be politically awkward for the Administration in light of its pledge to be more humane and that it would be difficult to suddenly disrupt the "partnership" that has existed between Federal and state agencies over the years in administering the program.

The action taken by Governor Hunt resembles a moratorium announced in July by Cesar A. Perales, the New York State Commissioner of Social Services, who asserted that the Federal Government was not meeting its "legal and moral obligations" to the disabled. Peter P. DiSturco, the Regional Commissioner of Social Security, then sent a letter to Mr. Perales saying New York was "not in compliance" with the Federal law. But he did not indicate what action, if any, the Federal Government might take.

New York State has also joined New York City in a lawsuit challenging Federal standards used to determine whether people with mental disabilities are eligible for benefits. The state and the city filed a second lawsuit last month charging the Federal Government had improperly denied disability benefits to thousands of people with severe heart disease.

Gov. Michael S. Dukakis of Massachusetts said his state was joining in another lawsuit against the Reagan Administration, was reopening cases in which disability benefits had been cut off and was insisting on proof of medical improvement before removing anyone else from the rolls. The Reagan Administration contends that, under the law, it can cut off benefits without having to show that a person's medical condition has improved.

The National Governors Association last month called for major changes in this and other Federal policies governing the disability program. Social Security officials said they were studying the state actions but had not imposed any penalties.

In June, Margaret M. Heckler, the Secretary of Health and Human Services, announced changes designed to end what she said were the "hardships and heartbreaks" that had occurred in the program. But state officials, considering those steps inadequate, have gone further.

Representative Edward R. Roybal, Democrat of California, chairman of the House Select Committee on Aging, who has held several hearings on the program, said the state actions sent a clear message to the Federal Government that "the current policy is wrong and will no longer be supported by the nation's governors."

ORDER IN WEST VIRGINIA

States have a financial incentive to keep people on the rolls because the Federal Government pays all the costs of Social Security disability benefits. People who lose those benefits often turn up on state or local welfare rolls.

State officials also have political reasons for asserting more control over the program. Gov. Bill Clinton of Arkansas has said that state officials receive many complaints about the program but have "virtually no real power" to affect decisions on individual cases.

He said that when state employees tried to keep people on the rolls they were often overruled by Social Security officials. This, he said, was "counter to the Administration's own philosophy," which generally calls for Federal officials to respect the judgment of state officials running social welfare programs.

In West Virginia, Gov. John D. Rockefeller 4th ordered the state rehabilitation agency to follow "Federal court decisions most favorable to beneficiaries." He said this "would generally require a showing of medical improvement" before a person could be removed from the rolls.

Several Federal courts have ruled that the Federal Government must show such improvement, but Mrs. Heckler has announced she "does not acquiesce" in the decisions and has directed lower-level officials to disregard them. The legality of such a policy is now before the courts.

In July, Governor Clinton directed Arkansas officials to comply with Federal court decisions holding that severe pain by itself could be a disabling condition. Mr. Clinton said Federal officials had "ignored" the decisions. The United States Court of Appeals for the Eighth Circuit, which includes Arkansas, said that "for some unexplained reason" the Secretary of Health and Human Services "insists upon ignoring this court's statements with respect to the proper evaluation of pain."

Social Security officials said they would obey a court decision in the case of a specific individual but did not have to apply the court's interpretation of the law to other similar cases.

In Kansas, Gov. John Carlin said the disability program had "exceeded the bounds of acceptability" in denying benefits to the truly disabled. The state has decided to re-examine cases in which benefits were cut off in the last year and has said it will no longer follow unreasonably strict Federal guidelines.

The Governors of New Jersey and Connecticut have not announced any major challenge to the Federal rules. But a New Jersey state agency, the Department of the Public Advocate, is working with Legal Services of New Jersey, the federally financed program for the poor, in a lawsuit to assist people who face possible loss of benefits. They are trying to force the Federal Government to give greater weight to evidence of pain and to the medical opinion expressed by a claimant's regular physician.

In Washington, the House Ways and Means Committee is considering a bill that would alleviate many of the problems cited by the nation's governors. The bill would require the Government to comply with appellate court rulings and would make it more difficult to cut off benefits.

Social Security officials expressed concern about the bill, saying it could increase Federal spending by several billion dollars. The sponsor of the bill, Representative J. J. Pickle, Democrat of Texas, is also concerned about program costs, but he said the Administration had been too "hasty and harsh" in its efforts to prune the disability rolls.●

COMMENDING THE DEDICATION OF GEN. BENJAMIN REGISTER AT ROCK ISLAND ARSENAL

HON. LANE EVANS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. EVANS of Illinois. Mr. Speaker, over the July recess I hosted a business opportunities conference for small businesses in the 17th District of Illinois, which I am privileged to represent. This conference was a huge success, bringing together procurement officials from some 30 Federal agencies nationwide and over 250 business people from central Illinois. The conference resulted in a better local understanding of the Federal procurement process, which may well lead to more business and jobs for my district.

The conference's success was due in large part to the efforts of its cohost, Gen. Benjamin Register, Jr., commander of A-M-C COM Headquarters at the Rock Island Arsenal. In his command, General Register oversees some 30 ammunition plants, 4 arsenals, 7 field installations, and 2 research centers. These facilities have more than $30 billion in assets, an annual budget of nearly $9 billion, and

a force of more than 40,000 employees at 47 installations in 26 States.

General Register and his command have sponsored numerous contracting conferences throughout the Nation, in which many Federal agencies participate. These conferences give thousands of small businesses the opportunity to bid on Federal contracts that they might otherwise overlook. Not only does this increase competition and hold down Federal contract prices, but it also results in more business for our Nation's small businesses which are responsible for creating most of our economy's new jobs.

This week I learned that General Register will soon be leaving his post at the Rock Island Arsenal to become the Deputy Director of Defense Logistics at Cameron Station in Alexandria, Va. I want to commend the general for his dedicated service at the arsenal, of which the July business opportunities conference was just one small example, and to wish him continued success in his new command.●

NORMAN B. (GABBY) HARTNETT

HON. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. MONTGOMERY. Mr. Speaker, on October 28, 1983, this country and its veteran population will lose to retirement the most respected and valuable friend and representative any organization could ever hope to have. Norman B. Hartnett, known as "Gabby" to those who have shared in his life, will step down as national director of services for the Disabled American Veterans.

Since 1942, when he enlisted in the U.S. Navy, Gabby Hartnett has served his country and his fellow man with an enthusiasm that is matched by few. He is a rare occurrence in a world where mediocrity is commonplace. Gabby has never settled for anything below excellence.

While serving aboard the U.S.S. *Frederick Funston,* he was injured during the invasion of Leyte in the Philippines in 1944 and was discharged in 1945 as a result of his disabilities.

Following World War II, Gabby enrolled at American University in a course of veterans' programs that would lay the foundation for 37 years of meritorious service to the well-being of all former members of the Armed Forces.

Before coming to Washington, Gabby worked as a Disabled American Veteran national service officer in Boston from 1946 to 1953 and from 1966 to 1970. Prior to assuming his present position, he supervised the DAV national service program from 1976 to 1978 and its national employment program from 1970 to 1975.

Since 1978, Gabby has supervised all operations of the DAV's Washington, D.C., office, including its 280-man national service program, its national legislative program and has spearheaded efforts to increase employment opportunities for disabled veterans. For his distinguished and unrelenting work in encouraging and promoting employment of the handicapped, he received a Presidential citation.

Besides leading the national staff of the three-quarter-million member DAV, this veteran's veteran is a member of the VFW and the American Legion, the executive committee of the President's Committee on Employment of the Handicapped, the advisory committee on the Veterans' Administration national Task Force on Education and the Vietnam-Era Veteran, and the advisory committee of the office of veterans' affairs of the American Association of Community and Junior Colleges.

Gabby Hartnett is and always has been concerned for those who served their Nation in time of war or national conflict. But he has not just held on to his concerns, he has released them in a torrent of action ranging from participation as a primary force behind well-aimed legislation to heart-of-the-matter articles on the issues to a simple, warm handshake.

Gabby Hartnett cares what happens to this Nation and its veterans. Because his caring is so visible, he has been an effective leader. A leader of leaders, as he has been called.

Veteran or not, we all owe Gabby Hartnett a great debt. He is a remarkable man responsible for remarkable deeds. I am sure he will never be far from the mainstream of veterans' affairs. Because of him and people like him, veterans' affairs will never be far from the mainstream of legislative action.

Mr. Speaker, we could not pay tribute to a more deserving American. Gabby Hartnett is an exceptional man. As he takes official leave from the Disabled American Veterans organization, we wish for him continued good health and happiness always.●

AMNESTY INTERNATIONAL REPORT ON CHILE

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mrs. SCHROEDER. Mr. Speaker, I would like to share with my colleagues two cases involving the Chilean Government's use of torture on political detainees. These 2 cases and 16 others like them are contained in a report that Amnesty International published in May of this year which presented the findings of an investigative mission conducted in 1982.

CASE NO. 7—ANONYMOUS

Personal details

He is 28, a skilled lithographer, unmarried and lives with his father.

State of health before arrest

He has never had any serious illnesses and has never been in hospital. He has suffered from insomnia, having had difficulty falling asleep and managing to sleep for only four to six hours a night.

He described himself as having a somewhat depressed personality. He has had pains in the heart region and (at the same time) breathing difficulties approximately once a month for the past five years. These attacks are brief and do not seem to be related to over-exertion. He was examined by a doctor, who could find no physical reason for the attacks. In addition he has suffered from headaches.

Time and place of arrest and detention

He was arrested in the first quarter of 1982 and driven to the CNI centre in Santiago, where he was held for 20 days. He was then transferred to the Cárcel Pública, from where he was released 26 days later.

Duration of alleged torture

He was tortured on two days while at the CNI centre in Santiago.

Interrogation and torture

His account of events was as follows:

He was arrested at his home at 5.30 am in the first quarter of 1982. No arrest-warrant was shown. He was blindfolded then driven for about half an hour. When they reached their destination he was taken downstairs into a large room where he was made to strip and was given overalls and *zapatillas.* He was photographed, then taken to his cell. Later that day he was forced into another room, where he was interrogated and tortured.

He was slapped on the ears and the side of the head so hard that he fell down. He was punched in the abdomen and on the right shoulder. While he lay on the floor the lower parts of his legs were kicked.

He was ridiculed and threatened with execution. He also underwent a mock execution—was told he was going to be shot; he heard rifle fire, but the guns were not loaded with live ammunition.

He was not electrically tortured but at one point he had to hold a metal rod which he was told was going to be electrically charged. In the event it was not.

He was always clothed during interrogation and torture, and had to wear a mask.

For two days he underwent prolonged interrogation and torture. On both days the torture was stopped when he developed breathing difficulties (without actually fainting). (These attacks were different from those previously described.) A doctor was summoned, and after he had been examined by auscultation he was taken to another room where he was injected (probably with a tranquillizer, he thought) in the right buttock.

He was held incommunicado throughout his 20 days at the CNI centre and the first five days at the *Cárcel Pública.* He wore a mask, overalls and *zapatillas.* His cell was small—about 2m by 1.5m—and contained a concrete bunk, a mattress, blankets and a pillow. He was permitted to remove the mask when alone in his cell.

He was kept in his cell throughout—except on the two days when he was taken out for interrogation and torture—and was interrogated there almost every day (and

was once punched). He was ordered to do push-up exercises about six times a day.

Medical examination and/or attention during detention

As soon as he arrived at the CNI centre, a man asked him about his previous illnesses and health. His blood pressure was taken, his heart and lungs were auscultated and he was weighed and measured. He was examined in a special room by someone who claimed to be a doctor.

During his detention he became constipated and was given a laxative by someone he called a "practicante" (medical assistent), which he thought brought on diarrhea.

Medical personnel involved in torture

On the two occasions when he developed breathing difficulties during torture he was examined in the interrogation room by a person he took to be a doctor. He was auscultated and then taken to the surgery, where he was injected with what he thought was a tranquillizer.

Early symptoms described

His legs were stiff and swollen and he ached where he had been beaten and kicked.

During both torture sessions he developed sufficiently severe breathing difficulties for someone he took to be a doctor to be summoned. He did not lose consciousness. He was constipated while in detention and was given a laxative, which he thinks caused diarrhea, after which he became constipated again. He suffered from insomnia and had nightmares. He lost his sense of time and could not remember how many days he had been in detention. He became labile, prone to weeping, gloomy and withdrawn.

Present symptoms described

His memory is impaired—he finds it hard to remember things like keeping appointments. He has difficulty concentrating, especially when reading, and finds it hard to express himself both orally and in writing. He is more nervous and anxious than before and is emotionally labile and prone to weeping. He feels more insecure, withdrawn and tense, somewhat more depressed, and more passive and "low" than before.

His tolerance for alcohol has changed: now he becomes more easily nauseated by drink than previously. And he now smokes 25 cigarettes a day, compared with 10 before he was arrested.

He suffers from insomnia and gets nightmares so he now takes sleeping tablets.

He is seeing a psychiatrist.

Clinical examination (one month after the alleged torture)

There was muscle tenderness over the shoulders. He seemed rather tense, had somewhat impaired memory and was melancholy and passive, with little facial expressiveness. He cooperated fairly well during the interview but it was not very easy to make contact with him.

Conclusion

The medical delegates found consistency between the torture alleged and the symptoms described.

CASE NO. 8—PABLO ARTURO FUENZALIDA ZEGERS

Personal details

He is 33. He went through high school, then studied history at university until he was expelled in 1974. Since then he has worked for various humanitarian organizations, most recently for the *Comisión Chilena de Derechos Humanos*, Chilean Human Rights Commission. He is married and has two children, aged one and three.

State of health before arrest

In 1962 the back of his head was injured in an accident. He was apparently unconscious for about five minutes and was admitted to hospital for observation. Shortly after the accident he had an epileptic fit, and an electroencephelogram revealed a focus on the left side. He was treated for epilepsy, and since then has had seven epileptic fits in which he lost consciousness. He did not have any fits between 1968 and 1978, his last one occurring in 1980, after which he spent several days in hospital.

In 1978 he was in a car accident in which he suffered a head injury and loss of consciousness.

In 1973 he had an operation for hiatus hernia. His original symptoms have persisted.

Time and place of arrest and detention

He was arrested at the headquarters of the Chilean Human Rights Commission in Santiago at 8.00 pm on 10 December 1981 and driven to the CNI interrogation centre. On 14 December he was transferred to the *Cárcel Pública*, where he was held in the sick bay until 20 December, when he was moved to the *Penitenciaria*. He was released on bail on 23 April 1982.

Duration of alleged torture

He was tortured at the CNI centre in Santiago on four days. On the last day he underwent purely psychological torture.

Interrogation and torture

His account of events was as follows:

At the time of arrest no arrest-warrant was shown. On the way to the CNI interrogation centre he was punched on the back of the head 10 to 20 times.

On arrival his blindfold was exchanged for a mask. He was made to strip and put on overalls and *zapatillas*. Then he was interrogated (without physical torture) for three and a half hours. Next day he was taken to the interrogation room again and electrically tortured. He was made to lie naked on a bed to which he was tied by the wrists, ankles and hips. He was electrically tortured for about one and a half hours, one wire being attached to the upper left side of his chest, another to his left testicle and another to his left ankle. Each shock caused severe pain and convulsions all over, although he did not lose consciousness. Between shocks he was slapped on the face and abdomen.

Next day he was interrogated from 10.00 am till 10.30 pm He was not physically tortured, but the interrogator, who was called "Doc", tried, unsuccessfully, to hypnotize him.

The following day he was given back his own clothes and taken to a room together with three other detainees. They were interrogated as a group and the session was filmed. They were not blindfolded or tied to their chairs. This interrogation lasted two or three hours, the interrogators wearing half-masks. When they did not reply satisfactorily *picana* (electric prod) torture was inflicted. The instrument used was a black baton about 70cm long and 5cm in diameter, one end of which was red. It had two metal points. The detainees were wearing their own clothes, which the current penetrated. After this group interrogation he underwent a solo three-and-a-half-hour session during which the *picana* was applied to his temples.

In the course of interrogation he was threatened: told his family, who the interrogators said had been arrested, would come to harm.

He was held incommunicado the whole time he was at the CNI centre and kept in isolation for the first two days at the Cárcel Pública.

He wore a mask which he was allowed to remove when he was in his cell. The mask was taken off when he was being interrogated by "Doc" and during the filmed group interrogation. Except for during the filming, when he wore his own clothes, he was dressed in overalls and zapatillas.

His cell was about 2.2m by 2m. It was painted yellow and contained a concrete bunk plus blankets and a pillow. The light was always on and the cell was cold and damp. He was allowed to use the toilet.

Medical examination and/or attention during detention

On arrival at the CNI centre he was given a medical examination by a man he took to be a doctor. He was told to remove his overalls, then his heart and lungs were auscultated, his blood pressure taken and he was questioned about previous illnesses. He described his epilepsy and said he should be allowed to take his daily two anti-epilepsy tablets (Mysoline). He also mentioned the hernia operation. He was told his blood pressure was high (180/90) and that he should get some rest. Instead, he was interrogated. Next morning he was examined by another man he took to be a doctor, who asked him how he was and took his blood pressure (160/80). He was told to lie on a bed and was injected with what he thinks they said was Valium [a tranquillizer]. He heard the doctor say he needed the injection in order to be able to work with "the boys"—it would be "too difficult" otherwise with such a high blood pressure. After being given the injection he was taken back to his cell, where he stayed for about an hour and a half, until his next interrogation, before which his blood pressure was taken in his cell.

Next day—after he had undergone electric torture—a man he took to be a doctor came to his cell and examined him. He complained of a kind of numbness and weakness in his right side; he also told the "doctor" he had difficulty talking. The "doctor" explained that electric current applied to the left side produced changes in the right side of the body because of the arrangement of the nerve pathways from the brain. He would not give him a tranquillizer, explaining that this would not be wise as he was to be interrogated again. On his last day at the CNI centre, before being taken to the *Cárcel Pública*, he had a medical examination by yet another man he took to be a doctor. His mask was removed, so he could describe this person very clearly (see Appendix III).

A nurse dressed in white was in the room. The subject was examined by the doctor, who told him he had a hemiparesis but that it would resolve without treatment. His blood pressure was taken and he was told that it was 140/70, which was normal.

During his first few days at the *Cárcel Pública*, he was isolated in the sick bay.

Medical personnel involved in torture

He was injected with a tranquillizer for high blood pressure, the doctor explaining he needed this to be able to work better with "the boys".

Early symptoms described

After the electric torture he had severe pain in both temples and at the back of the head for two days. He also had impaired vision, especially in the right eye. His lips were dry and he was short of breath. He was

aware of numbness and considerable weakness down the whole of his right side, and he found it hard to control his tongue when talking. He also complained of pains in all his muscles, and of swollen legs.

He was able to move both arms and legs, but because his right side was so weak he found walking difficult. He described an incident that occurred after his transfer to the *Penitenciaria*, in which he fell about 2m down a flight of stairs because his right leg gave way under him. He tried to save himself with his right arm but that gave way too and he fell and hit the back of his head—without, however, losing consciousness.

He had pain in the right ear, but no suppuration.

While in detention his weight went down from 74kg to 70kg. He also suffered from acid eructations and heartburn.

From time to time, he said, he had a form of seizure involving trembling of the right hand, involuntary movements of the facial muscles and tongue chewing. (These attacks did not develop into anything worse; he has never experienced *grand mal* epilepsy or lost consciousness.)

He said his memory and powers of concentration were impaired.

Immediately after release he suffered from insomnia and had nightmares. He said he got tired very easily.

Present symptoms described

His right side still feels weak.

He still has impaired vision, that of his right eye particularly being blurred. He no longer gets headaches, but his memory and powers of concentration are still impaired. For instance, he said, he used to be able to remember telephone numbers but no longer can.

His right hand trembling attacks and tongue chewing have stopped.

He still suffers from insomnia and has begun taking sleeping tablets. He takes an antacid, which has relieved his peptic symptoms. He continues to take the anti-epileptic medicine previously prescribed (Mysoline), and also Tegretol.

Medical documentation

He had a neurological examination on 18 January 1982, one month and five days after allegedly being tortured. It states:

"To sum up, this is the case of a . . . patient with a history of epilepsy which, taking into consideration both the symptomatology (cephalic retropulsion, adversive crisis, language inhibition, right arm clonus) and the latest EEG report, can be classified as a partial focal epilepsy with left-sided frontocentral localization whose evolution has been benign and whose aetiology is unknown.

"The present deterioration in his condition cannot be attributed to the suppression of anti-epileptic medicines for two reasons: firstly because he did without them for five years and there were no problems; secondly because the dose administered was below the anti-convulsant threshold. The neurologic complication at present revealed points to a deterioration of his focal picture with the appearance of right-sided hemiparesis or hypotasis, which requires an investigation into the aetiology of this epilepsy as well as into the mechanisms that determined its deterioration.

"We suggest that an EEG control, a brain scan and an examination of the ocular fundi be carried out."

Appendix IV is a medical certificate, dated 11 December 1981, issued by the above-mentioned specialist, describing the subject's medical history and treatment.

Appendix V is a medical certificate from a local doctor who wished to remain anonymous; it compares the subject's mental condition after release with his mental state before arrest.

Clinical examination (four and a half months after the alleged torture)

There were opacities in the lenses of both eyes. The field of vision in the right eye was reduced: there was no lateral field of vision, and the subject's field of vision was greatly reduced above and moderately reduced below.

His blood pressure was normal at 130/70, and his pulse was 70. There was a 15cm by 2cm surgical scar from a mid-line upper abdominal incision.

The neurological examination revealed diminished reflexes on the right side. There was reduced sensation on the right side and reduced sense of pain in the right leg. There was a slight weakness in the right arm and leg. There was a minimal tremor of the right hand. The subject walked normally.

The Romberg sign proved negative. There was normal muscle tone, normal finger-nose test and normal knee-heel test. His speech was "heavy", circumlocutary and slow. He has little facial expressiveness.

Conclusion

The torture alleged appears to have exacerbated the subject's epilepsy. New focal symptoms have appeared, including hemiparesis and hypoaesthesia. These findings indicate a cerebral lesion in the left hemisphere.

Not all the findings were unambiguous; therefore a complete neurological examination is suggested, including an EEG, CAT scanning and eye examination, in order to clarify the subject's condition.

The medical delegates found consistency between the torture alleged and the early and present symptoms. There was consistency also between the symptoms described and medical certificates issued by local doctors after the alleged torture. The findings of the medical delegates' examination, four and a half months after the alleged torture, was consistent with the symptoms described.●

RULE ON H.R. 3929

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. ROSTENKOWSKI. Mr. Speaker, I take this opportunity to inform my colleagues that the Committee on Ways and Means yesterday favorably ordered reported H.R. 3929. This legislation would provide for the temporary extension of the Federal supplemental compensation (FSC) program as well as the payment of social security disability benefits during appeal and make other amendments to the unemployment compensation program.

I wish to serve notice pursuant to the rules of the Democratic caucus, that I have been instructed by the Committee on Ways and Means to seek a modified closed rule for the consideration of this bill by the House of Representatives.●

PRIVATE BILL FOR THE RELIEF OF MR. VELID DAG

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. PANETTA. Mr. Speaker, I am today introducing private legislation for the relief of Mr. Velid Dag, a longtime resident of the United States who has languished for more than 30 years in diplomatic limbo. Born in Turkey in 1918, Mr. Dag first visited the United States in August 1939, as an economics student attending Indiana University. He later returned in 1950 to marry Hyla Mac Tillman, a U.S. citizen. He then embarked on a long and distinguished career in service to our country at the old Army Language School and the renamed Defense Language Institute in Monterey, Calif. He was for years the chairman of the Turkish language department, until his retirement in 1977. But because Mr. Dag, acting pursuant to advice from the Turkish Embassy, applied for, and in 1942 was granted, an exemption from U.S. military service as a neutral alien, according to existing law at that time he was forever barred from U.S. citizenship.

When in 1958 Mr. Dag was faced with deportation for failing to maintain nonimmigrant status, the late Congressman Teague introduced private legislation for his relief. That same year Congress passed legislation (H.R. 6968) which became private law 85-724 canceling the warrants for Mr. Dag's deportation, but denying him permanent resident status in the United States.

Mr. Speaker, I believe that the United States owes more to Mr. Dag in return for his long and loyal service to our country, which has denied him citizenship despite his diligent work in the sensitive field of training members of our Armed Forces in foreign languages. This injustice is all the more pronounced since the circumstance barring his citizenship—namely, the fact that he exercised in 1942 his right as a neutral alien not to serve in the U.S. military—would not be an issue today due to subsequent changes in law (Public Law 92-129). In 1971, lawfully admitted nonimmigrant aliens were exempted from the requirement to register for service in the U.S. military. When Mr. Dag opted to exempt himself from U.S. military service, he was a nonimmigrant alien, the very class of persons excluded from the registration requirement by the enactment of Public Law 92-129.

Moreover, there are compelling humanitarian reasons for this Congress

to approve my legislation on behalf of Mr. Dag. For over 23 years Mr. Dag has been prohibited from leaving the United States. When Mr. Dag learned 3 years ago of the illness and then death of his sister-in-law in Turkey, he was torn with grief and dispair at not being able to be with his family. Moreover, his brother is suffering from ill health, and Mr. Dag desperately wants to spend time with his brother before it is too late. Despite repeated efforts to seek redress through the Immigration and Naturalization Service, Mr. Dag has not been able to obtain relief through administrative channels. The last and only hope for him is enactment of private legislation for his relief. This must be done quickly. It should not be our policy to keep a loyal resident of our country separated from his loved ones in Turkey at a time when they are in need of his presence and assistance.

Mr. Speaker, Mr. Dag's patience has been truly remarkable, but the time for patience has run out. It is now long past time Congress take remedial action to remove an obsolete obstacle to his becoming a U.S. citizen, with all the rights and benefits such status accords him. Mr. Dag, who recently celebrated his 65th birthday, has paid his dues and now deserves to be freed from his long captivity in his adopted land.

The very least this Congress should do is to pass legislation enabling Mr. Dag to travel beyond the borders of the United States. And so I urge my colleagues to support this legislation and I specifically call on the House Judiciary Committee to give this measure prompt and favorable consideration. The text of the bill is reprinted below for the benefit of my colleagues:

H.R. —

For the relief of Velid Mehmed Dag

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Velid Mehmed Dag shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Section 212(a)(22) of such Act shall not apply to Velid Mehmed Dag.●

A CHILD'S VOICE FOR PEACE: GERALD ORJUELA

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. TOWNS. Mr. Speaker, as everyone knows the threat of a nuclear holocaust is always in the back of our minds, especially when there is a conflict between the Soviet Union and the United States.

Many groups advocate a nuclear freeze or reduction and call for the promotion of peace throughout the world. However, no matter how many adult groups one hears from we continue on our way toward increased tensions and nuclear arms buildup.

The views of our Nation's children also deserve attention. Has anyone thought about the effect our actions will and do have upon our children? One of my constituents has some interesting thoughts on the subject of arms control. I want to share his testimony, which was given before the Select Committee on Children, Youth, and Families' hearing on the impact of war on children, with my colleagues:

TESTIMONY OF GERALD ORJUELA

Good morning, parents and distinguished representatives of the United States. Before I begin I would like to say how honored I am for you to let me present my material to you.

I assume you are all sensible people, since it requires great intelligence to be elected to a highly important part of our nation. Other nations have their intelligent people. I'm sure Yuri Andropov is intelligent. Ronald Reagan, our president, is intelligent.

But why instead of using our intelligence for good uses, like peace, we use our intelligence for war? Is it right to call having missiles in Europe peace? Is it right to call a nuclear missile "peace keeper"?

This is a waste of intelligence. We are criminalizing Newton, Dalton, Einstein, Lucretius, and Democritus, great pioneers in the energy of the Atom. What would Einstein have thought of this?

It is senseless to waste money on a missile. There are no winners in nuclear war. A one megaton weapon exploding at ground level during a nuclear war in Racine, Wisconsin, would have a radioactive cloud reach New York in a week. But by then, New York would have been vaporized long before Racine was.

Why can't we live a world with only one rule—peace? Sometime in October of last year, I saw a PBS (channel 13) presentation of a movie made by the Japanese after the bomb had hit. Parts of people literally melted under the blast. A bone was sticking out from the socket where there once was an arm. The shadows of people left imprinted on the floors and walls when the heat flash vaporized them. Pitiful piles of entrails that were once known as human beings. That was a 25 kiloton bomb.

Now nations have arsenals made of more than 15,000 warheads, mostly thermonuclear. Each one 50 times more powerful than the one over Hiroshima.

Simple in design. At high temperatures, the two forms of "heavy" hydrogen, deuterium, and tritium fuse to form the heavier element helium. Great energy is released. That can be heard in any serene junior high school. But no matter how simple it is, it's deadly. Any country with the capabilities can do it. And so a lot of countries have it. That is frightening.

That is when children, like me, come in. We are frightened, that a lot of countries have the bomb. We are frightened that we might be hit. You are parents. Let your children live, and let our children live. If you kill a child, you really kill two—us as children, and us as adults with children. We must understand that anything nuclear—a plant, a missile—a war—is something very dangerous, we cannot yet safely operate the first. We cannot control the second and no one wins the third.

A nuclear war is a time bomb. Time is running out. Let adults, children and the nations of the world fight and work together to defuse this time bomb. The wire that we need to cut is visible. But to cut the wire we need clippers. If we work together the clippers are in our hands. If not, time will terminate—and so will the world.

If you don't listen to the adults, please in behalf of the children of the world, I beg you, give yourselves and us a chance.●

MAJORITY LEADER DESCRIBES PROBLEMS AND OPPORTUNITIES FACING THE UNITED STATES IN FAR EAST

HON. SHERWOOD L. BOEHLERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BOEHLERT. Mr. Speaker, last month it was my privilege to accompany a bipartisan delegation headed by Majority Leader JIM WRIGHT on visits to five Far East nations with which the United States has vital relationships.

For those of us with the responsibility of acting on legislative measures affecting these relationships, these visits were extremely productive. We gained valuable insights into both the problems and the opportunities that the United States faces in Japan, China, Singapore, Malaysia, and Taiwan.

It was particularly gratifying to be a member of a delegation led by the majority leader. At all times he spoke not as a partisan, but as an articulate spokesman for the United States. He earned the respect of all as he addressed with sharp clarity the essence and significance of complex international characteristics and relationships.

On the trip Mr. WRIGHT prepared a series of informative articles that subsequently have been published by Texas newspapers. In the thought that our colleagues will find these articles as incisive and interesting as I did, I am inserting into the RECORD at this point two of those stories that appeared in the Dallas Morning News:

[From the Dallas Morning News, Aug. 13, 1983]

SECRETS OF JAPANESE MIRACLE

(By Representative Jim Wright)

NAGASAKI JAPAN.—Here where one age ended in a bellowing mushroom cloud and the post-war era began, the mystery of the Japanese miracle comes to a poignant focus.

The secrets of the enigmatic island race and its resurgence in only one generation from total defeat to industrial eminence, remain shrouded like the mist-curtained mountains that brood over Japan's bustling valleys.

It was here 33 years ago this week that the atomic blast ended World War II. Waves

of searing heat killed an estimated 74,000, leaving the entire Nagasaki plain a radioactive ruin and bringing the Japanese empire to its knees.

Here at exactly 11:02 a.m. each Aug. 9 thousands of pilgrims and mourners from throughout Japan assemble in a place called Peace Park to observe a moment of silence before placing wreaths at the base of a 30-foot memorial statue.

Nagasaki Mayor Hitochi Motoshima tells us he thinks we are the first U.S. congressional delegation ever to lay a wreath on this commemorative day in Nagasaki.

He says he has paid homage to the American war dead at the monument for the Battleship Arizona sunk by the Japanese in Pearl Harbor that fateful Dec. 7.

Among the thousands who gathered here to mourn those slain by an American bomb we can detect no sign of hostility toward our six-member delegation.

These disciplined people, who blazed a blood-stained path of conquest across Asia 50 years ago, now seem to want nothing so much as peace. They make no secret they consider Americans their best friends and the United States their firmest global ally.

Their constitution, written under direction of Gen. Douglas MacArthur, renounces war forever. This is a part of their strange metamorphosis. It may also partly explain their phenomenal economic success.

Freed of the armament burden and investing less than 1 percent of its GNP in a modest defense establishment of only 250,000 men, Japan can devote almost its total national energy to developing the domestic economy.

Still, this is only a part of the answer. Alone it cannot account for the modern industrial miracle that is Japan.

How did this crowded country of 110 million and few resources dependent on the outside world for most of its food and energy achieve such commanding supremacy in world trade that it holds inflation to 2.4 percent and unemployment to less than 3 percent?

One clue may be in the Japanese education system. The literacy rate is 99 percent. Schooling, like everything else here, is purposeful, aimed at preparing each student for a specific job.

Another factor may be the government's attitude toward interest rates.

"We do not exactly set the interest rate," says Kunio Komatsu, 56-year-old vice minister for international trade and industry, "but we do so indirectly in setting the price of government securities.

"We know business cannot modernize or expand, new enterprise cannot begin, and the people cannot be good customers for our manufactured goods if interest rates do not stay low."

Today the short-term prime rate in Japan is 6 percent, the long-term rate is 8.4 percent. That's only slightly more than half the current U.S. rate.

Contrary to common misimpression, Japan uses most of its goods at home. It sells only 10 percent of its gross national product abroad.

The Japanese consumer is an increasingly good customer. Today 62 percent of all households own a car, as compared with only 22 percent in 1970. Seven times as many homes have air conditioners today as 10 years ago.

Where Americans use credit, the Japanese pay cash. Rather than borrow and pay interest, they save until they have enough to buy an automobile.

Even in home purchases, it isn't uncommon for the buyer to pay 50 percent down. This means the first-time purchaser usually is in his 40s, and expects to buy only one home during his working career.

How do they do it? The typical employed Japanese saves close to 20 percent of his income. This pool of liquid savings is free to fuel investments in industrial automation at low interest rates.

But how, with wage rates lower than the American standard, can Japanese workers lay so much aside for the future?

The answer to that may touch upon the one ingredient in the Japanese character which explains so much of the rest.

Call it commitment. Or dedication. Call it duty. Or sense of national purpose.

Stereotypes die hard, particularly for those of us who remember General Tojo and Tokyo Rose and the sight of Mitsubishi Zeros strafing lifeboats.

What I see here in the Japanese homeland four decades later is an image less stark, hues more subtle. It is not the unthinking role of the anthill where life counts for little as I once supposed.

What I detect is vaguely reminiscent of the Puritan work ethic, but with a distinctly Japanese dimension.

The worker identifies with his place of work. To give less than his best effort would be, in his mind, dishonorable. The employer, for his part, will do almost anything to avoid laying people off. To render unemployed those who've given the company faithful service would be to lose face, to invite disgrace.

When a manufacturer of electric toasters recently faced a financial crunch due to declining sales, he dressed the idled assembly linesmen in white smocks and stationed them on the sidewalks in front of the retail outlets.

They engaged pedestrians in conversation, extolled the virtues of their product and lured enough into the stores to revive sales and resume production. They never lost a day's pay.

The standard work week is 48 hours. Many Tokyo workers commute for three hours daily. There are company unions whose agents bargain with management. They agree without strikes on a social compact. Wages rise with productivity.

Many firms offer fringe benefits which include hospitalization, housing, even subsidized home loans.

Japanese bureaucrats are the hardest working in the world, according to Bob Iverson of the U.S. Embassy. Often before important meetings they spend the night in their offices to be fully prepared.

Leisure comes in small doses. Even then I'm not sure it's enjoyed. At a Tokyo swimming pool I saw hardly anyone floating, lolling in the water, swimming idly. Each swimmer made a strenuous dash from one end of the pool to the other as if trying for the Olympics.

Maybe that, too, is part of the secret. Folks here seem to get their kicks from doing more than is expected.

[From the Dallas Morning News, Aug. 19, 1983]

Our Allies in the Far East

(By Representative Jim Wright)

KUALA LUMPUR, MALAYSIA.—Here on both sides of the equator where the Pacific merges into the Indian Ocean and the China Sea, a group of emerging nations is forming its own economic and political front line in the battle against communism.

The nations have forged a common front in an organization called ASEAN, the Association of Southeast Asian Nations.

Most Americans probably don't even recognize ASEAN's name. Fewer still are aware of how much its five member nations have accomplished in their home-grown fight against communist encroachment in their region.

"The communists have been busy here since before World War II," said Suppish Dhanabalan, foreign minister of the small but dynamic city-state of Singapore.

"We have been working to remove the traditional communist breeding grounds—poverty and inequality," he explained. "We are building a large property-owning class. It is amazing how people's perception of communism changes when they become owners of property."

Dhanabalan is one of the rising young Southeast Asian leaders with whom our six-member congressional delegation has talked since arriving in this region a few days ago. All emphasized the importance of ASEAN.

"It's like Benjamin Franklin said—we've got to hang together or we'll all hang separately," one official observed.

ASEAN was organized in 1967 by Singapore, Indonesia, the Philippines, Malaysia and Thailand, the five countries that sit astride the vital sea lanes linking the Indian and Pacific Oceans. The strategic importance of the area is obvious from even a glance at the map.

From the very beginning, ASEAN has been an unlikely collection of partners. While the nations share the same part of the world, they are marked by important differences.

Tiny Singapore has 2.4 million people in only 224 square miles—roughly equivalent to combining the populations of Dallas and Tarrant Counties into a nation smaller in size then either of them. Yet Singapore's near-by ASEAN neighbor, Indonesia, has 150 million people and sprawls across a chain of islands which stretches almost from Australia to Indochina.

Of the five nations, only Thailand has never been a colony of some more powerful nation. Singapore, the most affluent though smallest of the five and its gargantuan neighbor, Indonesia, are the only two that do not maintain diplomatic relations with mainland China.

Thailand and the Philippines have security treaties with the United States, while Singapore, Malaysia and Indonesia are officially nonaligned.

Despite these differences, the ASEAN nations discovered long ago they had one thing in common.

"They see the Russian bear—and its scares them," said Harry Thoyer, the one-time newspaperman who has been U.S. ambassador to Singapore since 1980." "And they're only slightly less wary of the Red Chinese."

It was foreboding enough for the ASEAN nations to watch the Soviets establish refueling and reconnaissance bases in Vietnam in the 1960s.

Their apprehensions tightened when the Americans abandoned Vietnam and when the United States established formal diplomatic ties with the People's Republic of China.

"A lot of people here were afraid your country was going to turn this part of the world over to another local sheriff," our visiting congressional delegation was told.

But what really made ASEAN officials' hair stand on end was Vietnam's Soviet-backed invasion of Cambodia in 1978.

Today an estimated 160,000 Vietnamese troops occupy Cambodia. Hundreds of thousands of Cambodians, fleeing the repressive communist regime, have escaped into neighboring Thailand. The United States has been providing humanitarian help for these refugees, but they still pose an enormous problem for Thailand and its partners.

Fearing their nations, too, might become targets of Soviet-supported invasions, the ASEAN countries got busy. While originally formed as only an economic and social organization, ASEAN began working quietly on the diplomatic and trade fronts to put pressure on Vietnam to withdraw from Cambodia.

Through these efforts the ASEAN partners have succeeded in preventing U.N. recognition of the communist puppets in Cambodia. They also have given solid support to three guerrilla groups fighting the Red invaders.

In Kuala Lumpur, the capital of Malaysia, our congressional group quietly received the word that a formal congressional declaration of support for the ASEAN position on Cambodia would be welcomed. We promised to talk the matter over with our colleagues when we return to Washington.

What the ASEAN partners definitely do not want, however, is for the United States to try to elbow its way into a formal role in ASEAN.

"We are nonaligned," one official said, "but it is important for you to remember we are nonaligned on the side of the United States."

This is the same message we got in Singapore from Lee Kuan Yew, outspoken prime minister of Singapore and one of the most respected statesmen in the Far East.

"You don't need formal allies here—you need friends," he said.

In straight-from-the-shoulder-language, Lee criticized America for its clumsiness in exercising its muscle as a world power, and yet he admitted our reluctance is one reason he thinks so highly of our country.

"I like Americans," he said. "I like your idealism. You don't use and exploit your power. That's what makes you so different from the brutal Soviets. We only hope you can learn in the shorter time given to you what it took the British three centuries to learn."

But Lee, along with other ASEAN leaders, expressed fear the United States lacks the patience and resolve to win a prolonged ideological battle with the communists. If we do not, Lee said, Southeast Asia eventually will be swallowed.

Everywhere we go, that is the main apprehension among friends of our country. They believe in the purity of our motives. They know and appreciate our generosity, but they don't have much faith in our persistence.

They fear we lack the patience to stick out the long struggle. The communists, they say, count on losing patience, as we've done in other situations, and leaving Southeast Asia to them.

"For you, this would be only the shrinking of your influence," Lee said. "for us, it is life or death."●

POVERTY-STRICKEN MALI, UPPER VOLTA FACE BLEAK FUTURE OF DISEASE, HUNGER

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. AuCOIN. Mr. Speaker, this is the third in a series of six recently published articles on sub-Saharan Africa written by Nicholas D. Kristof, a Rhodes scholar from Yamhill, Oreg.:

[From the Oregonian, May 25, 1982]

FACE BLEAK FUTURE OF DISEASE, HUNGER

(By Nicholas D. Kristof)

BOBO DIOULASSO, UPPER VOLTA.—This evening, like every evening, the ragged children will gather on the outer fringe of the warmth and cheer of the restaurant attached to the Hotel de la Paix. When a guest has pushed away his plate, a child will rush in and scoop any leftovers into a tin can. It is his only dinner, and if he is lucky he will get it without a cuff from the manager.

In neighboring Mali, the poverty is even more wrenching. Lepers are everywhere, extending hands with only stubs for fingers, pleading for a coin. River blindness has struck 10 percent of the population in some areas—including the father of 10-year-old Sharza in Bamako. Each evening, Sharza leads her father past the open manholes and gaping sewers to the Bar Berry, where she imploringly goes from table to table asking for money.

These are two of the poorest countries of the world, landlocked under the Sahara Desert in West Africa, where a walk through any village is a numbing kaleidoscope of suffering and destitution—yet tinged, too, with the dignity of the healthy villagers and the excited laughter of children upon seeing a stranger.

The people of this Sahel region, tucked beneath the Sahara, always face the prospect of starvation if the rains do not come. And, in the terrible drought of the early 1970s, many did starve and cattle herds were wiped out. Now those haunting photos of emaciated children are off the front pages, and the cattle herds are back to their pre-drought numbers, but otherwise not much has changed.

In a land where everything depends upon the uncertain weather, the only certainty is that there will be another drought, with more starvation. The only question is when.

"Droughts are a part of this country," said one diplomat in Bamako, Mali. "The big drought a few years ago wasn't the first, and it sure as hell won't be the last. Every few decades, there has been a great drought, for as long as we can trace."

Not much has been done, or can be done, to prevent tragedy when the next drought comes. It is a process of nature, and the risks can be averted only slowly, by building the economy and improving the infrastructure, as well as changing people's lifestyles. The next drought, experts say, probably will be almost as devastating as before.

Even when the rains come, life is a struggle. The statistics give only a hint of the human suffering they represent: In Mali, per capita income is about $140 per year. Life expectancy is 43 years, adult literacy is 10 percent, and there are 25,000 Malians for every doctor. In some areas, half the children die before the age of five years; many other diseases and parasites sap the vitality of people without killing them.

Near Mahina, Mali, the villagers bathe and swim and play in a tributary of the Senegal River. Girls scrub their squealing younger brothers, and mothers wade knee-deep to do the laundry on a rock. They have no choice, for the river is the only place to bathe and scrub.

But the river is teeming with the blood flukes that cause bilharzia, an extremely painful condition caused by worms that invade the body and lay eggs repeatedly. It is a fact of life that many of the villagers will get bilharzia, hookworm or river blindness. They must wash some time, and if they didn't, that would only increase their chance of getting leprosy.

Economic performance in Mali and Upper Volta has been poor—per capita income grew an average of 1.1. percent in Mali in the '60s and '70s; in Upper Volta the fugure was only 0.3 percent. There has been talk that these are perpetual basket cases, beyond hope, and that Western help should instead be focused on countries in the intermediate poor range that perhaps can be pulled out of the mire of poverty.

But Upper Volta and Mali should not be basket cases, for they do have resources. Mali was a net cereals exporter until the drought, and in some areas the soil is fertile.

"The land resources are good enough that Mali should be feeding itself, and probably several of its neighbors, too," said one Western expert in Bamako.

Despite the region's reputation for aridity, the rain does fall here—in violent tropical storms that wash out the roads and carry off the scarce topsoil. Bamako gets 40 inches of rainfall a year and even Timbuktu, the gateway to the Sahara, gets about 10 inches. Much of the region gets about the same rainfall as the grain belt of the United States—about 30 inches—and it is sometimes said that Mali and Upper Volta could be the breadbasket of West Africa.

The catch is that although the average rainfall may be comparable, the rain in the Sahel is sporadic and undependable. It all falls in a brief rainy season, and the amount can vary enormously from year to year. In the dry season, village wells often dry up, so that women must walk 15 miles or farther each way to fetch water on their heads.

Much of the land could be irrigated from the Niger and Volta rivers—rice has grown well in irrigated areas here—but the capital is not available to build irrigation systems. And in some projects, management problems resulting from the lack of trained personnel have ruined useful programs.

For example, a U.S. aid program provided irrigation pumps to a wheatgrowing area near Dire, Mali, doubling the productivity of the land and quadrupling the amount of land one person could farm. But the project is being dismantled because of local management problems.

The government themselves have sometimes been impediments to economic growth, Western diplomats say. The Malian government for a long time paid producers low prices and pocketed the difference when the crops were sold. That dampened the incentive to produce; only this year were producer prices belatedly raised to reasonable levels.

Furthermore, government corruption is endemic in the area, so that a traveler from Bobo Dioulasso to Bamako must pay bribes at more than a dozen roadblocks along the way. At other times, soldiers have hijacked gasoline trucks to get fuel, with the result

that the oil companies no longer serve some areas.

Another constraint on productivity has been the poverty and poor health. The blind and the lepers cannot contribute to the economy, and the many others with enervating parasites or diseases can work only listlessly.

"The guy who can't stand up in his field because his legs are painful from Guinea worm isn't going to weed his field," one diplomat said. "And if he can't weed his field, the millet won't grow."

It is a vicious circle. Mali and Upper Volta have enormous agricultural potential for both irrigated and dryland farming. But they cannot tap it because they don't have the capital. And because they cannot tap their resources, they remain dreadfully poor, and the government remains corrupt and the people remain locked in a tenuous struggle for survival.●

MILTON FAUST

HON. W. G. (BILL) HEFNER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. HEFNER. Mr. Speaker, earlier this summer the State of North Carolina lost one of its truly great men. The death of Milton Faust saddened all, as best exemplified by the article which appeared in his hometown newspaper, the Salisbury Post, and I wish it included following my remarks for all to read.

"Uncle Miltie" as he was known to so many died a young man at the age of 69. He was an ordained Presbyterian minister, and served in many churches before becoming the chaplain of the VA Medical Center in Salisbury, N.C. in 1945. He held this position until his retirement, but the truth is that Milton Faust never retired from that which he did best—bringing hope and happiness to all he met.

Upon his death it seems that everyone had a story to tell of the difference Milton had made to their lives. He was an historian, a teacher, a humorist, and a lover of people. His dedication to his work and to his God was an example of his community. No patient at the VA hospital could fail to feel better after a visit from this remarkable man. And his intellect and wit served as an inspiration to young and old alike.

The list of community, State and National organizations to which Milton Faust gave his time and energy seems endless. He will be sorely missed, but the legacy of love and dedication he left in each of us will make us better people for having known him. I only hope that his lovely wife, Anna, and their fine children can find comfort in the many friends who are remembering the Fausts in their prayers.

The article follows:

[From the Salisbury Post (N.C.) July 23, 1983]

WERE WE—OR MILTON—RICHER?

(By Jason Lesley)

The richest man in Salisbury died this week.

Oh, there are plenty of people richer in terms of money than Milton Faust. He wasn't selfish enough to accumulate more wealth than he needed for his family to live comfortably. But it will be a long time before we see another man richer in friends, happier in the joy of living or more dedicated to helping others than he was.

"Uncle Miltie," as he always wrote on his name tag at Civitan conventions, regularly brought a ray of sunshine into The Post newsroom when he came in with a news item from the VA Hospital, the American Legion, the Civitan Club or any of a half dozen churches where he was likely to be guest speaker.

God gave Milton Faust something that the rest of us didn't get. He had a disposition that would bring smiles to the faces of Mt. Rushmore.

He had wit and he liked a joke—even if it was on him.

He was ideal to be a chaplain, first in the U.S. Navy and later at the VA hospital. I can't imagine a lonely soldier or a sad patient not feeling a little better after a visit with him.

He breathed life and vitality into Franklin Presbyterian Church. Later, he founded a new church, John Calvin Presbyterian, directly in front of the VA Hospital. I've always thought he had the patients there in mind when he built that church. He left John Calvin to give his beloved servicemen all his time as VA chaplain.

Friends talked about him Thursday when the Salisbury Civitans gathered for lunch at the Holiday Inn.

Some were just getting the news. Milton had suffered a heart attack and had been taken to Charlotte for surgery. As he was rolled away to the operating room, Milton told a couple of his closest friends and family members to "be of good cheer." He must have said that favorite phrase a million times.

Doctors found a tear in his heart causing a leakage of blood. Four hours of surgery couldn't save him.

It was one on those sudden, shocking deaths that people refuse to believe until they can see it in the paper. It seems that Milton had just talked with or joked with or visited with half the people in Salisbury. Everyone was stunned.

Some couldn't talk about their loss.

Others knew that Milton died just the way he would have wanted—quickly. "He wouldn't have wanted anybody to have had to wait on him," one friend said.

J. C. Ritchie recalled that Milton had worried about the Civitan Club bulletin being printed, even after he had been taken to the hospital. He had his son, Eric, deliver the information to the printer and wanted to be sure J.C. would pick up the printed bulletins in time for the club meeting Thursday. "Here he was in the hospital," Ritchie said, "and he was worried about that bulletin. But he was that way about everything—totally dedicated."

Jim Foil said that Milton would visit his car dealership regularly years ago and he would sometimes show up at 6 a.m. to have breakfast with Foil and his employees at the East Innes Cafe. Foil got a laugh out of Milton for the better part of 50 years over his "career" as a boxer.

"Milton was a Golden Gloves boxer when he was at Catawba," Foil said. "He went down to Charlotte to fight and just got the living tar beaten out of him. It was so bad his roommate threw in the towel to stop it. Well, I've called him Milton 'Bum Bum' Faust ever since and he would always chuckle about it."

Marcelle Williams, the school board member, said he and Milton did quite a bit of traveling and one incident at the airport in Atlanta exemplified his kind-hearted ways.

"We were coming back from Portland, Ore.," Williams said, and our plane had to circle the field at Atlanta so long that we missed our connecting flight. My wife and I got bumped off the last plane to Charlotte but Milton got a seat. He saw this young woman who had also been bumped and learned that she was trying to get home to her father's funeral. Milton was already on the plane but he got off and told them to give his seat to the girl and he would stay behind.

"The airlines put us up in a motel that night and there came a knock at our door. It was Milton, carrying a Coca-Cola and a 7-Up and joking that he had come to mix us up a couple of 'drinks.' "

Roger Morrow, chaplain at the VA appreciated the Faust wit as much as anyone. He fell victim to it more than once.

"I needed some surgery right after I came to the VA here," Morrow said. "And Faust was visiting me the morning that I was to go to surgery. They were taking me down the hall to the operating room and Faust and the doctor were walking with me. Faust says to the surgeon, 'I believe you are a Roman Catholic, aren't you, Doc?' And the doctor said yes. 'Well, I want you to know this is a Protestant minister. Remember the Protestant Reformation as you cut on him."

Morrow remembered another incident when Milton and a group of Presbyterian ministers came to his house for a Christmas dinner. "There was a sprig of mistletoe over the kitchen door and Milton laid one of the grandest kisses on my wife, Nancy, that I've ever seen," Morrow said. "She turned red as could be, and I told Milton that I sure wished he hadn't done that. Up until then she had been a contented wife."

Nearly everyone, it seemed this week, had a kind word for Milton Faust and though a specific story might not come to mind as I talked with his friends they all had felt the radiance of his love and had been made better people by knowing him.

We'll try to "be of good cheer," Milton. But it won't be easy today.●

LITERARY VIEWS OF ANIMAL RESEARCH

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. LANTOS. Mr. Speaker, much has been written and spoken on the subject of animals in research. Most of that material has been from the scientific and technical communities.

But there are a number of literary expressions of sentiment on the topic. I commend to my colleagues' attention two such works, a poem, "Rags," by

Edmund Vance Cooke, and an essay, "Eulogy on the Dog," by George G. Vest:

RAGS

(By Edmund Vance Cooke)

We called him "Rags." He was just a cur.
But twice, on the Western Line,
That little old bunch of faithful fur
Had offered his life for mine.
And all that he got was bones and bread,
Or the leavings of soldier-grub.
But he'd give his heart for a pat on the head.
Or a friendly tickle and rub.
And Rags got home with the regiment,
And then, in the breaking away—
Well, whether they stole him, or whether he went,
I am not prepared to say.
But we mustered out, some to beer and gruel,
And some to sherry and shad,
And I went back to the Sawbones School,
Where I still was an undergrad.
One day they took us budding M.D.'s
To one of those institutes
Where they demonstrate every new disease
By means of bisected brutes.
They had one animal tacked and tied
And slit like a full-dressed fish,
With his vitals pumping away inside
As pleasant as one might wish.
I stopped to look like the rest, of course,
And the beast's eyes levelled mine
His short tail thumped with a feeble force,
And he uttered a tender whine.
It was Rags, yes Rags! who was martyred there,
Who was quartered and crucified,
And he whined that whine which is doggish prayer
And he licked my hand—and died.
And I was no better in part nor whole
Then the gang I was found among,
And his innocent blood was on the soul
Which he blessed with his dying tongue.
Well! I've seen men go to courageous death
In the air, on sea, on land!
But only a dog would spend his breath
In a kiss for his murderer's hand.
And if there's no Heaven for love like that,
For such four-legged fealty—well!
If I have any choice, I tell you flat,
I'll take my chance in hell.

EULOGY ON THE DOG

(By Senator George C. Vest)

Gentlemen of the jury: The best friend a man has in the world may turn against him and become his enemy. His son and daughter that he has reared with loving care may become ungrateful. Those who are nearest and dearest to us, those whom we trust with our happiness and our good name, may become traitors to their faith. The money that a man has he may lose. It flies away from him when he may need it most. Man's reputation may be sacrificed in a moment of ill considered action. The people who are prone to fall on their knees and do us honor when success is with us may be the first to throw the stone of malice when failure settles its cloud upon our heads. The absolutely unselfish friend a man may have in this selfish world, the one that never deserts him, the one that never proves ungrateful or treacherous, is his dog.

A man's dog stands by him in prosperity and poverty, in health and in sickness. He will sleep on the cold ground, when the wintry winds blow and the snow drives fiercely, if only he may be near his master's side. He will kiss the hand that has no food to offer, he will lick the wounds and sores that come in encounter with the roughness of the world. He guards the sleep of his pauper master as if he were a prince.

When all other friends desert, he remains. When riches takes wings and reputation falls to pieces he is as constant in his love as the sun in its journey through the heavens. If fortune drives the master forth an outcast into the world, friendless and homeless, the faithful dog asks no higher privilege than that of accompanying him, to guard against danger, to fight against his enemies, and when the last scene of all comes, and death takes his master in its embrace and his body is laid away in the cold ground, no matter if all other friends pursue their way, there by his graveside will the noble dog be found, his head between his paws and his eyes sad, but open in alert watchfulness, faithful and true even to death.●

COMMON DEFENSE BURDEN

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. PEASE. Mr. Speaker, it has become quite apparent that through the years our allies have neglected to assume their fair share of the common defense burden. From Denmark to Japan, pleas for greater allied exertions in military preparedness are getting little response. A 1983 Defense Department report on allied commitments to defense spending shows that the total defense burden of NATO and Japan is not equitably distributed. In both situations, the United States has contributed more than its fair share while others have continued to decrease their contributions. The report stated that in 1982, nine members of NATO failed to achieve the 3-percent annual increase they had earlier committed themselves to. The defense spending report also indicated that Japan's burden-sharing performance remains extremely disappointing. The continuation of such unequitable burden-sharing arrangements holds severe implications for international security and serves to weaken the allies' collective resolve.

There are great complexities in measuring the contributions to the common defense. The very selection of measuring devices depends heavily on subjective considerations that can vary according to differing national historical experiences, threat perceptions, world roles, ideological assumptions, and concepts of security. However, when everything has cleared, what allies have committed to doing for the common defense,compared with what they have actually provided, determines their relative burden-sharing contributions.

The North Atlantic Treaty established a collective security partnership. The purpose of the partnership was to insure the members' security and facilitate European economic development by dispersing the total defense burden among many. In 1978, the NATO partnership committed itself to annually increase defense by 3 percent after inflation. Since 1978, only two countries, the United States and Luxembourg, have kept their promise. The Defense Department's report on allied defense contributions indicated that in 1982 nine countries—Belgium, Denmark, Germany, Greece, Italy, the Netherlands, Norway, Portugal, and Turkey—failed to achieve the 3-percent increase, depriving the common defense of $1.6 billion. Moreover, the weighted average increases for all NATO nations combined, excluding the United States, has steadily declined, according to the report. These distressing facts indicate the allies' lack of resolve to their commitments and the weakening of their collective unity.

Japan's burden-sharing performance has been extremely distressing. Despite sometimes impressive annual defense expenditures, Japan started from a low base and really never appeared ready to fully address her actual needs. In 1983, Japan increased defense spending by 5 percent in real terms, whereas the Japanese Defense Agency has repeatedly stated a need for a 7-9-percent real increase if goals of the second 5-year plan are to be realized. Japan's defense forces continue to lack modern equipment and there appears to be less than an adequate amount of equipment and men to sufficiently defend her borders.

In 1981, Japan agreed to defend the air/sea line of communications out to 1,000 miles from its home islands under the Treaty of Mutual Cooperation and Security between our two countries. Japan's failure to fully address her military requirements decreases the likelihood that this commitment will be maintained.

This is not to say that our allies have totally neglected their responsibilities and commitments. Many have contributed positively in several capacities. Germany provides significant host-nation support such as security of U.S. facilities, transport, and supply services. Belgium and the Netherlands provide general support for storage, procurement of supplies and equipment, and maintenance and utility functions. However, the fact remains that the United States bears a disproportionate share of the defense burden.

The NATO alliance and the mutual defense agreement with Japan both represent partnerships. They both represent an agreement whereby nations have joined together in pursuit of a common objective, mutual security, and world peace. In order to effectively operate as a partnership and promote the collective purpose, each member must contribute or assume its

proportionate obligations. Each member must be held accountable for its portion of the total burden. NATO can no longer expect the United States to continue to give more than her fair share. The need for an effective and unified western alliance requires that all our allies maintain their commitments and assume their fair share. It is of the utmost importance that the foundation of our arrangements be rooted in an equitable distribution of the common burden. I urge my fellow Members of Congress to join me in demanding that our allies contribute equitably to the common defense.●

SUPPORT FOR A MORATORIUM ON OFFSHORE OIL AND GAS LEASING

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. PANETTA. Mr. Speaker, on March 10 of this year, a group of Massachusetts and California Senators and Congressmen introduced legislation—H.R. 2059/S. 760—which would legally establish the commitment of California and Massachusetts citizens to the rational development of our Nation's valuable offshore hydrocarbons. If enacted, H.R. 2059 would exempt from oil and gas leasing only 4.6 percent of the Nation's offshore acreage proposed for leasing during the coming 4 years.

H.R. 2059 would permit the development of resource-rich areas offshore California and Massachusetts, but would prohibit development in those areas where the benefits of developing the minimal reserves there are outweighed by the risks to sensitive coastal environment and economies. The bill would also exclude a 50-mile buffer zone around the Commonwealth of Massachusetts, tracts in and at the head of submarine canyons off of Georges Bank, and the Great South Channel. It is important to note that this legislation would not effect existing development in the productive Santa Barbara Channel nor would it restrict future leasing in the promising southern Santa Maria Basin area offshore California.

The bill has gathered overwhelming support from coastal legislators, county and city officials, industry organizations, coastal planning organizations, and affected citizens. The following letter from both California Senators and 33 Members of the California House delegation and to Chairmen WHITTEN and HATFIELD supporting a 1-year moratorium on offshore leasing on these California areas is indicative of the strong congressional attention focused on this issue. I request that it be submitted in full into the RECORD. Further, I request that the following list of California municipal governments and local organizations expressing support for this legislation be inserted.

I urge my colleagues to recognize the importance of a balanced offshore drilling development policy which weighs the potential benefits of offshore drilling in areas impartially against the economic and environmental risks of such development. These legislators, cities, businessmen, and citizens certainly do:

A. COUNTIES

1. County of Humboldt
2. County of Mendocino
3. County of Monterey
4. County of San Diego
5. County of San Luis Obispo (Wilson bill)
6. County of San Mateo
7. County of Santa Barbara, Chairman—Board of Supervisors
8. County of Santa Cruz, Board of Supervisors
9. County of Sonoma, Board of Supervisors

B. CITIES

1. City of Atascadero
2. City of Los Angeles, Mayor Tom Bradley
3. City of Oceanside
4. City of Pismo Beach
5. City of San Luis Obispo
6. City of Santa Barbara
7. City of Santa Cruz

C. MULTI-GOVERNMENT ORGANIZATIONS

1. Association of Monterey Area Bay Governments
2. San Diego Association of Governments
3. Southern California Association of Governments

D. OTHER ORGANIZATIONS

1. California Governor George Deukmejian (Wilson bill)
2. California State Park Rangers Association
3. Pacific Coast Federation of Fisherman's Associations
4. American Lung Association of Mty. SLO & Santa Cruz Counties
5. Action for Animal's Rights
6. Association for the Preservation of Cape Cod
7. Citizens Coordinate for Century 3
8. Friends of the Coast, Bodega Bay
9. Friends of the Earth
10. Get Oil Out, Santa Barbara
11. California Democratic Party, Executive Board
12. NRDC
13. Pacific Grove Chamber of Commerce
14. Pacific Marine Fisheries Commission (H.R. 6365)
15. Sierra Club, Loma Prieta Chapter
16. Sierra Club, Santa Lucia Chapter
17. Tulare County Democratic Central Committee.

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 1, 1983.

Hon. JAMIE WHITTEN,
Chairman, Committee on Appropriations, Capitol, Washington, D.C.

DEAR CHAIRMAN WHITTEN: On June 29, the House passed by an overwhelming margin the fiscal year 1984 Interior Appropriation bill, which contained provisions temporarily exempting certain California areas from offshore oil and gas leasing. The Senate Appropriations Committee did not include these important provisions in its version of the fiscal year 1984 Interior bill. Despite—and in response to—the Senate action, we reiterate our support for the House efforts to ensure the protection of certain California offshore areas from the economic and environmental risks associated with oil and gas leasing, and urge maintaining the House position in conference.

The California Outer Continental Shelf (OCS) oil and gas leasing provisions in H.R. 3363 would exempt economically, environmentally and strategically sensitive coastal areas from offshore oil and gas leasing. All told, the California OCS provisions of H.R. 3363 would delete from oil and gas leasing less than 2.5% of the billion OCS acres under consideration for lease under the Five-Year OCS oil and gas leasing plan, leaving over 12 million acres offshore California open for lease.

As the statements received by the House Interior Appropriation Subcommittee in its recent OCS hearing attest, considerable bipartisan concern from local governments, the State's tourism and fisheries industries, the military branches and other coastal users has been expressed over oil and gas leasing. We are pleased that the Subcommittee took into consideration these concerns—as well as those of the Department of the Interior and the oil and gas industry—in reaching the compromise provisions approved by the House.

While we do not question the need to develop new domestic sources of oil and gas to reduce our dependence upon foreign energy sources, we feel that the economic necessity of developing our domestic energy resources must be balanced by our responsibility to protect the military operations, economies and environment along our coast. We feel that the California OCS provisions contained in the House-passed fiscal year 1984 Interior bill strike such a balance, and urge your support of these provisions during the House-Senate conference to resolve the differences between these bills.

Thank you for your consideration of this important matter.

Sincerely,

Bill Lowery, M.C.; Pete Wilson, U.S.S.; Ed Zschau, M.C.; Ron Packard, M.C.; Don Edwards, M.C.; Henry A. Waxman, M.C.; Vic Fazio, M.C.; Sala Burton, M.C.; Leon E. Panetta, M.C.; Alan Cranston, U.S.S.; Tony Coelho, M.C.; Jim Bates, M.C.; Barbara Boxer, M.C.; Tom Lantos, M.C.; George E. Brown, M.C.; Doug Bosco, M.C.; Julian C. Dixon, M.C.; Pete Stark, M.C.; Richard Lehman, M.C.; Mervyn M. Dymally, M.C.; Edward R. Roybal, M.C.; George Miller, M.C.; Robert Matsui, M.C.; Howard L. Berman, M.C.; Duncan Hunter, M.C.; Gene Chappie, M.C.; Mel Levine, M.C.; Tony Beilenson, M.C.; Matthew Martinez, M.C.; Ronald V. Dellums, M.C.; Jerry M. Patterson, M.C.; Augustus F. Hawkins, M.C.; Al McCandless, M.C.; Robert Badham, M.C.; Norman Mineta, M.C.●

H.R. 3790

HON. CARROLL A. CAMPBELL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. CAMPBELL. Mr. Speaker, Representative JIM JONES and I recently introduced H.R. 3790, which requires that annual adjustments in both nonmeans-tested automatic outlay programs and tax indexing be tied to a 2-percent trigger and only that amount over a 2-percent increase in the Consumer Price Index be awarded. We believe this 2-percent solution is a viable, equitable, and relatively painless way to reduce the projected deficits.

I would like to share with my colleagues a chart which reveals the projected savings from H.R. 3790:

Savings from modification of Federal nonmeans-tested entitlement programs

[In billions]

1985	3.25
1986	7.70
1987	12.30
1988	16.90
1989	21.60
1990	25.30
Total	87.05

Savings from modification of tax indexing

[In billions]

1985	2.4
1986	6.6
1987	11.4
1988	17.0
1989	23.9
1990	31.3
Total	92.6

The enactment of this legislation would reduce the deficits by $179.6 billion over the 6-year period. I believe a reduction of this magnitude would have a positive effect on interest rates and the long-term health of our economy.

Mr. Speaker, sooner or later we are going to have to bite the bullet and confront these projected deficits. I believe we must do it sooner than later, and I hope that my colleagues concur and join us by cosponsoring H.R. 3790.●

STATE AND LOCAL GOVERNMENTS CANNOT AFFORD NEW FEDERALISM

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. OTTINGER. Mr. Speaker, a Princeton study of the 1982 budget cuts concluded that overall most States were unable or unwilling to maintain service levels in the face of the Federal cuts. To understand the impact of New Federalism, it is important to know the historical role of the Federal Government in providing these service programs. A thesis on New Federalism written recently by my son describes this in detail and I want to share this information with my colleagues:

"NEW FEDERALISM" PROPOSAL CONSIDERED

It is important to understand the major arguments for why the "New Federalism" proposal would lead to a significant reduction or elimination of state and local programs addressing public infrastructure and human welfare needs. Under the proposal, many state and local governments would lack the financial resources to maintain the turned back program responsibilities, while others would lack the political initiative.

Federal involvement in these program areas grew precisely because of the inability or unwillingness of lower level institutions to address needs deemed of national importance. The "New Federalism" does not address the criteria and concerns that spawned the increased federal role, and would probably exacerbate these concerns.

This section is divided into three parts corresponding to three main criteria for the historical development of an increased federal role for these programs: vertical fiscal imbalance between the federal and state/local levels, horizontal fiscal imbalance between and within states, and providing for spillover and redistributive services.[1] The first two criteria involve the fiscal problems of state and local governments in maintaining public services, while the third criteria explains why these two types of public services have required political initiative from the federal government.

Each part will briefly explain the criteria and why the federal government's involvement has been necessary historically. Then, the "New Federalism" proposal will be assessed in terms of these criteria with evidence from recent studies and surveys indicating its likely impact provided where available.

VERTICAL FISCAL IMBALANCE

The fiscal structure for providing public services can be divided into two main functions: expenditure responsibilities and revenue-raising capacity. A vertical fiscal imbalance results when one level of government has too many expenditure responsibilities and too little revenue-raising capacity as compared to the other levels of government.

Federal aid to state and local governments has grown historically because the national government has had the largest revenue-raising capacity while state and local governments have had the largest expenditure responsibilities for domestic public services. In explaining the necessity for sharing federal revenues with the states, former Council of Economics Advisor chairman Walter Heller said, ". . . prosperity gives the national government the affluence and the local governments the effluents.[2]

Even as federal grants-in-aid have increased tremendously, state and local expenditure responsibilities have grown faster than their ability to pay for them.

Although it is much easier for the national government to increase its revenues each year than for state-local governments to do so, the burden of increased demand (and expenses) for public services rests primarily at the doors of the lower jurisdictions. The result is that the ability of state and local governments to meet public demands goes down while their dependence on federal funds and indebtedness increase, despite substantial revenue increases through courageous tax enactments.[3]

The fiscal plight of state and local governments have worsened during the first years of the Reagan administration due to reduced federal aid and the economic recession. According to a New York Times survey taken a month before the President's State of the Union Address, many state and local governments were increasing taxes and cutting back on basic public services in order to balance their budgets.[4]

Unlike the federal government, "states cannot have operating deficits and a five percent balance is considered a prudent cushion."[5] Most states estimated balances of less than five percent for fiscal year 1982.

Like the Reagan administration's broader economic program, the "New Federalism" would exacerbate fiscal imbalances between the federal and state/local levels leading the latter to further reduce basic public services. The proposal claims to give the states equivalent revenue sources with which the states could finance their $50 billion in increased expenditure responsibilities.

The largest revenue source would be the federal excise taxes that would be phased out allowing states to raise revenue from them. Many studies indicate that the revenue potential of turning back such a tax base would be slight.

Several commissions over the course of the twentieth century have been set up to investigate the potential for the Federal Government to turn back exclusive use of selected tax bases to the States; all have reached a similar conclusion that the revenue potential from such sources as the amusement tax or other excise taxes is slight.[6]

There is a huge difference between giving states grants, which is money in the hand, and giving them exclusive room to levy and raise their own revenue. The tobacco, alcohol, telephone, and oil industries would almost certainly pressure state and local governments to not levy excise taxes on their products. Citizen tax revolts could also make revenue collection difficult. For these reasons, the excise tax base returned to the states may yield less revenue than projected under the proposal.

The administration's cost estimates that show that states would actually benefit from the exchange of program responsibilities for revenue sources has been widely disputed. Congressman Norman Mineta cites this discrepancy:

Over the first four years of the program, the Administration originally claimed it would save states $20 billion. Very credible studies say that the actual cost to the states would be more than $20 billion—a misestimate by the Administration of more than $40 billion.[7]

Embedded in the Reagan administration's figures for "New Federalism" are budget cuts in the programs.[8] In the first component, the "equal swap", figures for AFDC and Food Stamps assume budget cuts that had been proposed by the administration but not yet passed. Figures for Medicaid projected a 10 percent rate of growth when the historic rate of growth has been 16 percent. The federal government, under the proposal, would most likely not cover the "medically needy", those persons who are not on AFDC or SSI but fall below the poverty line because of medical needs. Currently, thirty states cover the "medically

Footnotes at end of article.

needy". In the second component, many of the programs that would be turned back are part of block grants which the administration pushed through Congress in 1981 with significant budget cuts. The administration had requested 25 percent reductions in all the categorical grant programs that were eventually grouped into the broader block grants.[9]

Thus, the evidence suggests that the "New Federalism" would exacerbate a vertical fiscal imbalance between the federal and state/local level by returning more expenditure responsibilities to the lower levels than revenue-raising capacity.

HORIZONTAL FISCAL IMBALANCE

Demand for public services (expenditure responsibilities) may vary greatly between states and within states. Similarly, the tax base (revenue-raising capacity) may also vary greatly between and within states. A horizontal fiscal imbalance results when a jurisdiction's demand for public services does not correlate evenly with its tax base, i.e., when a jurisdiction's expenditure responsibilities exceed its ability to raise revenues to finance them. In order to correct this imbalance, a higher level of authority must transfer resources from the "better off" to the "worse off" jurisdictions.

The federal government has made some attempts to match fiscal resources to public service demand between and within states. In particular, the federal grant-in-aid system has targeted resources to "worse off" state and local governments in efforts to establish uniform minimum standards of nutrition, health care, housing, and other basic services. It was the innovation of many of the great Society programs to channel federal aid directly to depressed urban areas which continue to have high demand for public services coupled with low fiscal capacity to raise revenues.

By doing away with federal grants-in-aid, the "New Federalism" would take away the federal government's ability to transfer resources so that "worse off" areas would be able to finance their increased expenditure responsibilities.

The "New Federalism" would give to the states in general increased expenditure responsibilities and access to certain revenue sources. This proposal would increase horizontal fiscal imbalances because states and localities with a high demand for the turned back programs but a low ability to raise revenues from the excise taxes would be made worse off. New York City's expenditure responsibilities would increase greatly through loss of federal funds for welfare. It would not be able to raise revenues to compensate from excise taxes on oil.

The "New Federalism" would give to the states the major responsibility for poverty programs. Appendix C compares the incidence of poverty in the fifty states with two indications on each state's ability to raise revenues. Of the twenty-six states with more than ten percent of their population in poverty, twenty-two have per capita incomes below the United States average. The unequal match between incidence of poverty and fiscal resources between the states is a horizontal imbalance that demands federal intervention.

The administration's particular choice of turning back the oil windfall profits tax to the states indicates a complete neglect of this issue. States that do not have companies exploring for oil would not be able to levy and collect this excise tax! The oil windfall profits tax constitutes over half the excise tax base that would be returned to the states.

The "New Federalism" would greatly exacerbate the already widening fiscal gap between the "sun belt" states and the "frost belt" states. The "sun belt" states already have a greater revenue-raising capacity due to severance taxes on their energy resources including oil. The oil windfall profits tax would further advantage these states. Meanwhile, the "frost belt" states would receive a greater share of the expenditure responsibilities under the "New Federalism"; i.e., their decaying urban areas remain in great need of both public assistance for the poor and for basic infrastructure.

The "New Federalism" would hurt cities in general by doing away with the Great Society programs that channeled funds directly from the federal government to local governments. Recent studies indicate that the states are not willing to pick up where the federal government leaves off. A good number of these programs were given over to the states at the beginning of 1982 as part of the administration's consolidation of categorical grant programs into block grants. An October, 1982 survey by the U.S. Conference of Mayors provides an early indication of how cities might fare under state as opposed to federal control:

Two-thirds of the cities reported that the conversion to state block grants in FY82 had adversely affected their local human services programs. Seventy percent of the cities did not feel they had been fairly represented in either the state planning or the state resource allocation processes under the block grants. And three out of four cities did not feel that human services funds had been passed through the state to their local programs in an adequate manner.[10]

The same report confirms that cities are still areas of desperate need for public services with low revenue-raising capacity. Lack of funds has led to continued deterioration of basic infrastructure—streets, buildings, sidewalks, and water and sewer systems. It has also led to reductions in police, fire, public transit, and santitation services, according to the survey. None of the human welfare programs for the poor and disadvantaged reached fifty percent of their eligible population during fiscal year 1981 and fiscal year 1982. Employment and training and social service programs reached six percent and seven and four-tenths percent of their eligible recipients, respectively.

The "New Federalism's" neglect of horizontal fiscal imbalances is consistent with the President's statements on the issue. At a press conference a few months before his State of the Union Address, the President advised persons facing sharply reduced public services in the area where they live to "vote with your feet."[11] Problems would ensue for those who could move as well as though stuck behind. The threat or actuality of poor people moving to states or cities with generous welfare benefits could lead these areas to lower their benefit levels * * *.

A recent study at Princeton University's Urban and Regional Research Center corroborate arguments that the "New Federalism" would lead to greater disparities in provision of public services. Released in May, 1983, the study examined the state and local response to the $6.6 billion federal budget cuts in domestic programs for 1982. The findings show that interstate and intrastate disparities in maintaining public services increased and that the "floor" or minimum level of assistance provided to all citizens before the budget cuts had been damaged.

Differences between states such as New York and Texas, between cities within regions and between cities and suburbs nationally were widened as a result of the Reagan initiatives, the study shows. Sections of the floor have been removed or altered.[12]

The "New Federalism" would thus aggravate the problems caused by an uneven distribution of expenditure responsibilities and revenue-raising capacity between and within states.

SPILLOVER AND REDISTRIBUTIVE SERVICES

Spillover and redistributive services are two types of public services that usually require political initiative from a higher governmental level.

Spillover or externality type services are those whose benefits spill beyond the boundries of the jurisdiction that pays for them. It is fair that all other jurisdictions benefitting from these services share in paying their cost. If they do not share in their cost, it is likely that the original jurisdiction's taxpayers will not want to finance these services to begin with. Taxpayers tend to want to finance that level of services from which they directly benefit.

Spillover services include many of the public infrastructure services that "New Federalism" would return completely to the states such as education and transportation. People in the city of Berkeley would not, by themselves alone, finance U. C. Berkeley. The benefits of the university, its graduates, venture far beyond the boundaries of Berkeley in applying their acquired tools. The nation as a whole benefits enormously from maintaining high quality education which yields an intelligent and productive citizenry.

Federal involvement in areas such as education have increased historically because the benefits of these services extend beyond the localities in which they are situated. In particular, the national economy relies heavily on basic public infrastructure services such as transportation, education, and employment training.

Redistributive services are those that transfer resources from the wealthy to the poor. Welfare, Medicaid, and Low Income Housing Assistance are some of the programs involved in the "New Federalism" that are redistributive in nature. Redistributive services usually require political initiative from a higher level of government because taxpayers within a jurisdiction often do not want to pay for services from which they do not directly benefit; i.e., many wealthy people do not want to pay for services that benefit only poor people. Given a choice between their money going for a new convention center to which they would enjoy access and a Food Stamps program, many wealthy taxpayers would lean towards the convention center. Though not all people are like this, this is the theoretical underpinning for why political initiative often must come from outside the jurisdiction in which redistributive effects are desired.

The federal government has taken the lead historically in providing public assistance to the poor and disadvantaged. Fairness to both beneficiaries and to taxpayers dictates that the federal government should finance programs providing a uniform minimum level of basic human needs including Welfare *and* Medicaid. Fairness to beneficiaries requires that all beneficiaries be entitled to the same level of basic human needs regardless of where they live and the gener-

osity or wealth of their neighbors. Fairness to taxpayers requires that the burden to pay for redistributive services be based on ability to pay rather than on where one lives. A middle-class person in a poor city would pay relatively more to maintain a uniform level of services than a middle-class person in a wealthy suburb.[13]

The "New Federalism" would decentralize mostly spillover and redistributive services, thus ignoring the necessity of federal political initiative for these types of services.

The Princeton study of the 1982 budget cuts concluded that overall "most states were unable or unwilling to maintain service levels in the face of the Federal cuts.[14] Many of the states did not restore the budget cuts because of their fiscal crises. Texas and Oklahoma, both prospering from oil, did not restore the cuts out of political opposition.

As a result of this pattern of cuts and state responses, at the end of fiscal year 1982 the cuts were affecting poor people receiving transfer payments and services from the programs . . . Those on the margin of eligibility for assistance (the working poor) were most affected.[15]

Under the "New Federalism" proposal, the states would be responsible for restoring funds for state and local programs that would be cut off by the federal government. Due to the lack of financial resources or political initiative, states would most likely not replace or replace at a greatly reduced level the federal funds for many of the turned back programs. As a result, public assistance programs for the poor and disadvantaged and public infrastructure programs would suffer with the former being hit the worst.

JUDGE FRANCIS A. PIETRYKOWSKI

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Ms. KAPTUR. Mr. Speaker, a few days ago, Lucas County, Ohio, lost one of its finest public servants, Judge Francis A. Pietrykowski, of the Lucas County Common Pleas Court. Until his death at age 55, Judge Francis A. Pietrykowski had spent the greater part of his adult life as a vital part of the Lucas County criminal justice system.

Judge Pietrykowski had the admiration and respect of his colleagues and the entire community. During his distinguished career, he received many honors including the Outstanding Judicial Service Award of the Ohio Supreme Court, the Distinguished Service Award of the Ohio Youth Commission, and the Award of Merit from the Ohio Legal Center Institute. His advice and counsel were sought by all.

The death of Judge Francis A. Pietrykowski leaves a great vacuum in our community's judicial system. We in Lucas County have been blessed with many outstanding public servants. Judge Francis A. Pietrykowski was among the best. On behalf of all Lucas County citizens and the House of Representatives, I offer my heartfelt condolences to Judge Pietrykowski's family, and formally memorialize him for his meritorious service to our community.●

GARDEN CITY FIRE PREVENTION WEEK

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. McGRATH. Mr. Speaker, on October 9, 1871, a tragic fire took the lives of 250 people and caused untold disruption and damage to the lives and property of thousands of others in the city of Chicago. As a result of that terrible event, a greater interest in fire prevention was spawned throughout our Nation. In 1920, President Woodrow Wilson proclaimed October 9 Fire Prevention Day. That same year, the residents of Garden City, a community in New York's Fifth Congressional District, joined together to form the Garden City Fire Department.

Today, we observe the week in which October 9 falls as Fire Prevention Week, and firefighters in Garden City are maintaining our Nation's tradition by sponsoring activities to increase the awareness of the general public of the dangers of fire and the relatively simple steps we can take to prevent the destruction of our homes, businesses, and other property.

The officers and men of the Garden City Fire Department have worked with selfless dedication over the years to protect lives and property in their community. They have six frontline pieces of fire apparatus, a heavy rescue truck, and other specialized equipment, and they have established an outstanding record of service in fire prevention and control. However, without the cooperation of the general public, fire prevention is extremely difficult. For example, over 7,000 people die each year in fires with over 40 percent of the deaths caused by careless smoking.

I wish to take this opportunity to congratulate the members of the Garden City Fire Department for their Fire Prevention Week efforts, which include special exhibits on home fire safety and activities to publicize the need for greater caution to avoid the serious consequences of uncontrolled fires. Chief Harold Herman, public information chairman Larry Nedelka, and the entire membership of the Garden City Fire Department have done a tremendous job on behalf of their fellow citizens.●

RUDOLPH ANTONCIC, MAN OF MANY HATS

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. GAYDOS. Mr. Speaker, some time in the near future, a community and a school district in the 20th Congressional District of Pennsylvania will honor a man who has worn many hats during a career in public service that spans nearly half a century.

The honoree is Rudolph Antoncic and he has earned a "tip of the hat" from members of the Port Vue Borough Council and the South Allegheny School District. The two bodies intend to adopt formal resolutions of commendation for Mr. Antoncic's contributions in many fields.

Among the offices this gentleman has held is that of a notary public for 44 years, a justice of the peace for 30 years, a member of the borough's board of health since 1932, a deputy constable, and former mayor. He has been active in law enforcement activities, graduating from a "criminal and civil law school" and serving for many years on the borough's civil service commission. His interest in police work earned him an award several years ago from the Allegheny County Police Academy.

Mr. Antoncic is in demand as a lecturer throughout the area, speaking before school assemblies and various organizations on civil and criminal

law. He also is the unofficial historian of Port Vue and delights in discussing the history of the Iroquois Indians in southwest Pennsylvania.

He played a major role in compiling a history of the region for the community's observance of the Nation's bicentennial anniversary in 1976. His work in that regard was recognized by local organizations and he was named "Man of the Year."

Mr. Antoncic's dedicated service has been acknowledged in several other fields. Port Vue Post 447, American Legion, cited him for service to veterans and he has been acclaimed for his work with the Red Cross, the Boy Scouts of America, and various fraternal and service groups.

His latest commendation—and one of which he is extremely proud because it places him in the company of many noted Americans—is his appointment as an "Honorary Kentucky Colonel." Presented him by Gov. John Y. Brown, Jr., Mr. Antoncic shares the rank with other notables, such as Sir Winston Churchill, former President Lyndon B. Johnson, and our esteemed colleague in the other body, Senator JOHN GLENN.

Mr. Speaker, it is always gratifying when an individual is singled out by his peers for special recognition because of his service to others. Therefore, I am pleased to join in the tribute to Mr. Rudolph Antoncic and to extend to him, on behalf of the Congress of the United States, our congratulations for a long and illustrious chapter in his public and private life.●

DEDICATION OF AIR TRANSPORT AUXILIARY MUSEUM

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. HARRISON. Mr. Speaker, on October 1, in Millville, Pa., a museum will be dedicated to the memory of 174 men and women who gave their lives to the allied cause of World War II as members of the Air Transport Auxiliary. The ATA traces its origins to September 8, 1939, when a group of civilian pilots met in Bristol, England, to consider what contribution could be made to the war effort. As a result of that meeting, an international call was issued for volunteers to ferry aircraft to the RAF. The response gave birth to the ATA, which logged 309,011 aircraft movements, taking the lives of 27 Americans.

The museum's conception and realization owes to the dedication of Ben Warne, one of the 275 American pilots who flew for the ATA. The building will be the repository for memorabilia linking the 174 who perished with 3,500 survivors from 24 nations. The dedication will be witnessed by at least 100 veterans and pilots' families representing 16 nations.

Mr. Speaker, we should all applaud the heroic efforts of this group as they complete work on this lasting tribute which bears inscribed on its walls the ATA motto: "For our tomorrow, they gave their today."●

SUBCOMMITTEE ON CRIME TO HOLD HEARING ON THE CURRENT STATUS OF DRUG ABUSE PREVENTION AND TREATMENT PROGRAMS

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. HUGHES. Mr. Speaker, on Thursday, September 22, 1983, beginning at 10 a.m., in room 2237 Rayburn House Office Building, the Subcommittee on Crime of the House Committee on the Judiciary will hold a hearing to examine the Nation's drug abuse prevention and treatment programs and to learn what new initiatives and goals have been established in these areas.

The witnesses at the hearing will include Dr. Edward N. Brandt, Assistant Secretary for Health, U.S. Department of Health and Human Services, accompanied by Dr. William Pollin, Director, National Institute on Drug Abuse; a panel of drug addicts and former addicts; a panel consisting of Mr. Thomas Kirkpatrick, Jr., executive director, Illinois Dangerous Drugs Commission, and president, National Association of State Alcohol and Drug Abuse Directors; Mr. Richard Russo, assistant commissioner, New Jersey Department of Health; and Mr. John Gustafson, deputy director, division of substance abuse services, State of New York; and a third panel which will include Dr. Mel J. Riddile, director, Straight, Inc., Greater Washington, Springfield, Va.; Mrs. Sue Rusche, executive director, Families in Action, Decatur, Ga., and Secretary, National Federation of Parents for Drug Free Youth; and Dr. C. Anderson Johnson, director, Health Behavior Research Institute, University of Southern California, Los Angeles, Calif.

Those wishing further information or wishing to submit a statement for the record of the hearing can contact the staff of the Subcommittee on Crime at 207 Cannon House Office Building, Washington, D.C. 20515, telephone (202) 225-1695.●

PEACE THROUGH COMMUNICATION

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. PANETTA. Mr. Speaker, I rise to share with my colleagues a recent press account of an unusual project conceived and carried out by a group of students from Del Mar Middle School, Santa Cruz, Calif.

As the inheritors of tomorrow's world, the students of room one have, with the guidance of teacher Lee Davis, sought to educate themselves concerning the perils and challenges of the nuclear arms race by soliciting the opinions of local, national, and world leaders in the matter. The "Peace Through Communication" project was launched with the help of a grant from the California Council for the Humanities. Over 100 inquiries were mailed to such notables as Pope John Paul II, Vice President George Bush, British Prime Minister Margaret Thatcher, French President Francois Mitterrand, and many other persons familiar with the issues of nuclear arms. Responses received have been reviewed by the students and provide a basis for further discussion.

Mr. Speaker, the students of Del Mar Middle School have joined the growing ranks of sincere Americans who are today thinking about a subject that for decades was dismissed as unthinkable: The catastrophic consequences of nuclear warfare. The students of room one have, moreover, turned their attention to possible solutions and prospects for dismantling the nuclear threat. As I am sure my colleagues would agree, such a sincere and forthright attempt by these students to come to grips with the legacy of nuclear arms may offer insights that have eluded their elders.

Accordingly, I am introducing into the RECORD for the benefit of my colleagues a recent article from the "Santa Cruz Sentinel" concerning the "Peace Through Communication" project and the students of room one.

The text of the article follows:

[From the Santa Cruz Sentinel, June 19, 1983]

DEL MAR STUDENTS TO SPEND SUMMER COMMUNICATING PEACE

(By Keith Muraoka)

LIVE OAK.—While most junior high school students will spend the summer lounging on the beach, a small group from Del Mar Middle School will spend some of their vacation spreading the opinions they garnered from local, national and even world leaders on nuclear weapons and disarmament.

It was a good thing the 30 sixth, seventh and eighth graders in Lee Davis' class aimed high when taking on their "Peace Through Communication" project earlier in the school year.

As a result, they have heard from such notables as Vice President George Bush, Canadian Prime Minister Pierre Trudeau and President Francois Mitterrand of France.

They have received literature on the nuclear weapons issue from Prime Minister Margaret Thatcher of England, a nuclear weapons treaty from Mexico President Miguel de la Madrid Hurtado and articles from Billy Graham on his trip to Moscow.

Nineteen completed tapes were returned to the students with answers on 19 questions about nuclear arms and the possibility of world peace. Those opinions came from everyone from Sentinel Editor Bruce McPherson and county supervisors Gary Patton and E. Wayne Moore to baby-book author and former presidential candidate Benjamin Spock, and included a senior weapons designer at Lawrence Livermore Lab.

The students have a chance to spread those opinions and their "Peace Through Communications" project this summer with the help of a just-received $1,000 grant from the California Council for the Humanities. They will also be on a KUSP radio talk show from 7:30 to 8:30 p.m. on June 28.

According to the students, the huge undertaking began by accident during a classroom discussion on nuclear war. Davis emphasized that the students should form an opinion on the topic. They felt it would be much easier if they first had the opinions of others.

"I sat watching a fellow classmate rock slowly side to side while listening to his stereo headset," says Eli Atkins. "This was highly illegal to do while Mr. Davis was talking, but it gave me the idea of sending a tape to President Reagan and ask him to respond to some questions."

The response was immediate and soon students were throwing names out faster than Davis could write them on the blackboard.

Money for tapes and postage were raised by the students and 105 were sent out to politicians, sports figures and movie stars. Eventually 50 responses came back, 19 in tape form and others with letters and speeches. In the case of Queen Elizabeth, Pope John Paul II and actor Tom Selleck, acknowledgments of the letter but no comment.

Here are some of the responses:

Benjamin Spock: "I believe the nuclear arms race brings not security, but increasing insecurity. It multiplies the risk of war."

Hal Rogers, works for private industry in nuclear waste disposal: "I believe it is absolutely necessary that we re-establish a balance between nuclear weapons deployed by the Soviet Union and the nuclear weapons we have deployed."

Francois Mitterrand, president of France: "France has always associated itself with efforts to produce a genuine general disarmament."

Maj. Gen. Llyle J. Barker Jr., U.S. Army: "Unfortunately the chief of staff of the Army is unable to participate in your opinion poll because to do so is contrary to Department of the Army policy."

On the local level, Sentinel Editor Bruce McPherson said, "In a word, the nuclear arms buildup is ridiculous."

Fourth (Watsonville) District Supervisor E. Wayne Moore Jr., however, said, "I am absolutely convinced that only with peace through strength can the U.S. and Soviet Union avoid war."

Third (Santa Cruz) District Supervisor Gary Patton advocated focusing attention on stimulating human life "not pouring money into objects that are going to be buried in the desert and that we hope will never be used."

Interestingly, Davis feels that his students today have more questions now than before.

"After all this, they see the real complexities of the issue," he says. "There is no consensus on whether to disarm or build more weapons. They have agreed they all want peace, and communication between countries will further efforts to achieve that peace."

Adds eighth grader Joe Hutchinson, "If anything, my opinion is more wishy-washy." Says Evangelica Anton, "Before this project, I didn't have much of an opinion on the nuclear arms race. Nobody wants a war, but we really have to talk about it."

Chris Sullivan agrees, saying the project is not so much a demonstration against war, as it is a plea for the communication needed for world peace.

"We're not demonstrating here," he says. "We're just saying we want people's opinions."

The class is now looking for additional ways to spread the word about their project. They are willing to speak before service organizations and community groups.

What is peace? According to student Ben McPherson: "Peace is the day the world puts away their weapons, the day the MX missile system delivers people to the moon instead of nuclear warheads to Russia and the day history teachers can teach about the day when nuclear weapons were terminated."●

PERSONAL EXPLANATION

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. SCHEUER. Mr. Speaker, due to the fact that the Rayburn Building experienced an electrical power failure earlier today that affected the electronic bell system, I was unaware that a rollcall vote on the Hawkins amendment to H.R. 1036 was being taken.

Had I been aware that a rollcall vote was being taken, I would have voted for passage of the amendment offered by the distinguished gentleman from California (Mr. HAWKINS).●

COAL BY PIPE OR POLITICS

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Ms. FERRARO. Mr. Speaker, after years of debate and discussion, the House will soon vote on coal slurry pipeline legislation. I believe that the basic issue at hand is whether Congress will give a new technology the opportunity to compete on an equal basis with other transportation providers. Enactment of the Coal Pipeline Act of 1983 does not insure that a coal slurry pipeline will ever be built. But it does allow the marketplace, and not a single transportation provider, to decide whether pipelines can compete economically for a portion of the Nation's coal-hauling business.

I commend to my colleagues the following editorial from the New York Times, September 19, on this important subject:

COAL BY PIPE OR POLITICS

The nation's railroads fought hard for the right to compete on equal terms with trucks and barges. Now, unfortunately, they're fighting just as hard to stop pipelines from competing with railroads in moving coal. The House has a chance this week to say no to the railroads—and yes to the consumer's right to transportation at the lowest possible cost.

Much of America's clean, low-sulphur coal is found in the West, far from coastal power plants and export facilities. Today, that coal must be moved by rail. Pipeline engineers (and their corporate backers) believe it would be cheaper to pulverize the coal, mix it with oil or water to form a slurry and then pump it to its destination. But to build a slurry pipeline, the companies need rights of way across other people's property, including the tracks of their railroad competitors.

That is why legislation is needed. A bill favored by coal producers, utilities and consumer groups would require the builders of a pipeline to show that it serves the public interest. Then, once so certified, the Federal Government would use its powers of eminent domain to assign them the rights of way they need.

The railroads contend that this procedure invades states' rights and also threatens to drain scarce water resources from farming and ranching. But it is hard to see why states' rights should take precedence in a matter of clearly interstate commerce. And while some slurry pipelines will use water, the proposed legislation gives states the last word on where it may be obtained.

Basically, the only issue is whether a new technology is allowed to compete with the old. The pipeline bill has cleared all committee hurdles. The House has to show that it believes in competition and the cheapest possible power.●

SOVIET WATCH

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. FIELDS. Mr. Speaker, in 1935 the noted historian, Will Durant, wrote: "For barbarism is always around civilization, amid it and beneath it, ready to engulf it * * *. Barbarism is like the jungle; it never admits its defeat; it waits patiently for centuries to recover the territory it has lost."

In all the history chronicled in Durant's monumental, 11 volume work, "The Story of Civilization," in no place or time has this statement been more true than in the history of the Soviet Union and its client states.

As E. J. Dillion observed in 1930, "Sovietism is no mere philosophy content to assert itself or even endoctrin-

ate others by convincing, persuading, or cajoling them * * * (it is) first of all a relentless destroyer of the roots of past culture, religious, social, pedagogical, and also of those champions of that culture who remain true to it, refusing to be converted and live."

So it is that the leadership of the Soviet Union, from Lenin to Andropov, have been men of unrestrained brutality who have progressively, patiently, driven back the boundaries of civilization, both Western and Eastern, with a relentless sword of blood and horror, allowing the jungle of barbarism to reclaim the Earth, masked by mendacity, propaganda, and the false face of socialism.

The following material is presented as another evidence.

INSIDE AFGHANISTAN: WAR OF INNOCENTS

(By Ludmilla Thorne)

Three weeks ago, as I entered a secret mujahedeen training camp run by the national Islamic Front of Afghanistan, I was startled to see a Soviet helicopter and MiG precariously hovering in an azure sky, between two craggy mountains. But unlike real Soviet military craft, which usually strike fear into the hearts of the Afghan people, these two were harmless cardboard replicas being moved on pulleys.

Young mujahedeen in gray tunics and green cotton belts were firing away at the make-believe enemy aircraft with captured Soviet Dashaka machine guns and Kalashnikov rifles. It was a part of their daily routine, along with running through bonfires and sliding under barbed wire.

Their commander, Brigadier Rahmatullah Safi, an energetic, pipe-smoking man of 53, was obviously pleased with the performance of his youthful charges. "I'm trying to professionalize the jihad," he told me, using the traditional term to refer to the holy war that is now being waged against the Soviet Union. "But I don't even have good binoculars or any walkie-talkies," he remarked. I remembered that in the U.S., children use walkie-talkies as toys, but this man, who is waging a deadly battle against the U.S.S.R., has none.

ASHAMED TO BE AMERICAN

Later, when I spoke with other mujahedeen commanders and soldiers who had just come from battle, I learned that Afghan resistance fighters lack such other common items as boots, clothes, personal first-aid kits, tents, antibiotics and mine detectors, not to mention surface-to-air missiles. In order to clear a mine field, the mujahedeen send herds of sheep through the deadly area, an inhumane and expensive way of carrying out a simple military operation. And three mujahedeen fighters sometimes must share one pair of boots. "Why doesn't your government help us more?" I often was asked. "We don't need American men to fight our war. Just give us weapons and provisions." There was nothing I could say, but I was ashamed to be an American.

At the mujahedeen boot camp, I noticed one trainee going through his paces with particular zest and almost childlike joy. I came up to him and saw that he was indeed barely 15 years old, with peach fuzz on his gentle young face. His name was Mohammad. But whenever I saw him the next few days, I called him "mujahedeen baby," to which he responded with a boyish giggle. It was frightening to think that in a few weeks he, too, may be sent off with a Kalashnikov rifle to face the heavily equipped Soviet military machine.

It was still more frightening to see Afghan boys who were even younger than Mohammad but who already had fallen victim to the Kremlin's barbaric war. Eight-year-old Najib Khan picked up what he thought was a small green bird, but it was a Soviet-boobytrapped toy that within seconds tore off both of his arms just below the elbow. Minagol, age nine, stepped on a similar "butterfly" boobytrap and lost his right foot. Such toy explosives, dropped over populated areas by Soviet aircraft, aim to terrorize the Afghan people by attacking the most innocent, the children.

A few days after my last meeting with Mohammad, I met another young man, whose similarly youthful face was of a lighter color. He was Kolya, a blond, blue-eyed Russian boy of 19 who deserted from the Soviet army in Kabul a little more than two months ago and was now with the mujahedeen.

"I didn't want to be a part of this dirty war in Afghanistan," he told me. "None of the Soviet soldiers wants to be here . . . the Soviet Union should pull out its forces, because innocent people are dying on both sides." These were words I had heard again and again, as I spoke with more than a dozen Soviet POWs in various parts of Afghanistan during my visits there last February and again this month.

Prior to being sent to Afghanistan, Soviet soldiers are usually told they will be defending the Soviet Union's southern border against Pakistani, Chinese, Iranian or American mercenaries. "But one or two months after I arrived in Afghanistan I realized that I was deceived," explained Grisha Suleymanov, a 20-year-old sergeant from Dagestan. "We didn't see any Chinese or Americans."

"Soviet officers come here for the money," said Kolya, who was a private. "Instead of receiving their usual 250 rubles per month, in Afghanistan they earn 700 or 800 rubles. while we receive only nine. And each year that a Soviet officer serves in Afghanistan is counted as three years."

Practically all of the Soviet soldiers I spoke to described how they were often beaten and humiliated by their upperclassmen and sergeants "for nothing." "You're constantly on the run, polishing their boots, making their beds, getting their food, doing their laundry, and then they start punching you," said Kolya. Sanya, another 19-year-old deserter who was sitting a few feet away, pointed to his lip, which bore fresh stitch marks. "They hit me so hard that my lip had to be sewn up," he said.

Caught in the hopeless situation of being personally abused by their own officers, having to carry out a brutal war against a largely defenseless population, and facing the possibility of being killed if they are taken prisoner by the mujahedeen, "many Soviet soldiers hang themselves, not only in Kabul, but all across Afghanistan," Kolya told me.

The Afghan resistance has been making increasing efforts to take live prisioners whenever possible, and to accept deserters like Grisha, Kolya and Sanya. But holding them is a difficult task for the mujahedeen. Not only must they share their limited rations with their Soviet captives, but they also must constantly conceal them from the Soviet command by shuttling them back and forth. Whenever the Soviets find out where their POWs are held, they try to bomb the area (in itself a rather revealing indicator of the Soviet government's attitude toward its own people).

Because Pakistan feels threatened by its huge Soviet neighbor to the north, it is opposed to having Soviet soldiers on its territory. Thus, the problem of finding a safe haven for Soviet POWs has remained mainly unsolved. "You arrange for a place where we can keep Soviet soldiers," one Afghan leader told me, "and we will get you a whole brigade."

Eight of the soldiers with whom I have spoken want asylum in some Western country, most often the U.S. Two soldiers said that "under no circumstances do we want to be repatriated to the U.S.S.R. via the Red Cross because in the Soviet Union we will be shot." Two others wrote personal letters to President Reagan, asking him to take a "human" interest in their fate and to give them asylum in the U.S. "I want to live in America as a free person," wrote one of them at the end of his note. Two soldiers indicated a preference for West Germany, and I know of other defectors who have asked for asylum in France.

But not all Soviet POWs want asylum. Matvey Basayev, 19, a Russian by nationality, and Mikhail Aratunian, 24, an Armenian, have converted to Islam and want to remain with the Jamiat mujahedeen party. Three soldiers want to go home, even though they know that prison or very possibly death await them there. Sgt. Alexander Zhurakovsky, who defected more than a year ago, is homesick and despondent. "I was born in the Ukraine and I want to die there," he told me.

Soviet soldiers in Afghanistan have learned that they can boost their low morale by smoking hashish, which they get from the Afghan population by bartering their clothes, ammunition, all kinds of spare parts, batteries, metal pipes and much else. "Hash helps getting over the depression," I was told. "And it's not so frightening to die, when you're high." One soldier estimated that 90% of the Soviet forces in Afghanistan smoke hashish, and about 40% use opium. "Soldiers aren't even punished anymore for smoking hash . . . the Soviet command has realized that it's useless even to try." There are indications that the Afghan population is making a concerted effort to keep the Soviet army doped up.

Western experts have suggested that 8,000 to 15,000 Soviet soldiers have been killed in Afghanistan during the 3½-year conflict, but these figures probably are too low. The mujahedeen estimate that anywhere from 20,000 to 50,000 have been killed. Sasha, 21, who deserted in July of this year, told me that he couldn't speak about all of Afghanistan, but that just during the past year that he was stationed near Kandahar, 3,000 Soviet soldiers were killed and about three times as many were wounded. "Furthermore," he said, "about one-third of those who died were killed by the Soviet Union's own planes and helicopters. Very often when a Soviet unit finds a group of mujahedeen, it informs its command of their location and asks for artillery and air cover. And when it comes—pow!—they give it to their own men in the area."

Bodies of soldiers killed in Afghanistan are delivered to parents in the Soviet Union in sealed zinc coffins. If the face is not mutilated, a slit is left in the coffin so the family may see the face. Matvey Basayev, who was assigned to the Kabul airport, said the morgue in his battalion was "never empty. It was busy day and night."

MORAL COURAGE TO DEFECT

Many Soviet deserters expressed their revulsion with the behavior of some of their officers and fellow soldiers in Afghanistan. In the words of Sasha and a fellow soldier, "Soviet soldiers often go on 'combing out' operations not to fight, but to steal from the Afghan people. They go to get themselves some 'presents,' as they like to call it." The two soldiers described with particular abhorrence the conduct of their former company commander. "He used to bring 13- and 14-year-old Afghan boys to our post and ask one of the soldiers in the company to stab them with a knife. When the soldier refused, [he] would pierce the boys' throats in front of everybody." The commander is said to be back in civilian life in Moscow.

Soviets soldiers who have had the moral courage to defect from the Soviet army in Afghanistan want to tell their stories in the U.S. and in Western Europe. "Ludmilla, don't leave. Take me back with you to America," screamed Sergei Meshcheryakov, as I was about to leave a guerrilla stronghold near Allah Jirga. What could I say? But an important question remains: Will Western countries demonstrate as much moral courage by giving asylum to these men, or will they defer, so as to not dare antagonize the Soviet bear?

EAST GRANBY

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mrs. JOHNSON. Mr. Speaker, on September 24, the town of East Granby will celebrate its 125th anniversary.

This is indeed a special occasion and cause for celebration. First settled in the 1660's, the area was part of an early Congregational Parish of Simsbury and then later of Granby, called the Turkey Hills Ecclesiastical Society. According to the law of the time, local residents were required to attend services for the entire day on Sundays. Traveling conditions being what they were at the time, it was often exceedingly difficult for Turkey Hills residents to reach the original meetinghouse which now stands on Hopmeadow Lane in Simsbury. After a long struggle the first meetinghouse was erected in Turkey Hill in 1738. This marked the beginning of a series of struggles, as the community grow and developed, to break away from the neighboring towns of Simsbury and Granby. From 1786 to 1858 townspeople tried seven times to secede, finally incorporating into the small tobacco and dairy farming district of East Granby in 1858.

Preserving this, along with many other chapters is the town's history book "East Granby, the evolution of a Connecticut town" dedicated early this year and marking the culmination of 12 years of time-consuming research by the town's historical committee. It represents the perseverance which is native to East Granby citizens and is testimony to their wonderful spirit and local pride.

Saturday's celebration is another chapter in the rich past and traditions of the town of East Granby. It recalls the 100th anniversary when the town motto, "Endear the Past, Enrich the Future" was adopted. Remembering and preserving our past can enrich our present and enhance our future. I am honored to be the elected representative for the town of East Granby, and look forward with them from their rich past to an even richer future.●

LEGISLATION FOR STUDY OF "LAST PERSON SERVICE" OF RAILROAD RETIREMENT SYSTEM

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. GOODLING. Mr. Speaker, today I am introducing legislation calling on the railroad retirement board to prepare a study which would examine the implications of the "last person service" provision of the railroad retirement system, and report back its findings to the Congress in 1 year.

For the benefit of my colleagues who might be unfamiliar with this provision, I should explain first that, under the railroad retirement system, "last person service" means that an individual must cease working for his current employer in order to receive a pension. This same person could work elsewhere, with certain earnings restrictions; he or she simply could not work for the "last person" for whom he or she was employed when applying for railroad retirement benefits.

I understand the rationale for this policy, but have discovered some instances in my congressional district where, it seems to me, this provision is unduly applied to some older individuals working low-paying, ofter part-time jobs. In fact, I became especially interested in "last person service" because of the experience of one of my constituents, who worked as an orderly in a local hospital. My constituent took his job, not because he quit the railroads (where he worked some 22 years), but, because he was laid off from Conrail and could not find railroad related work. (He was not eligible for retirement at the time.) When be became eligible for railroad retirement benefits, and was happily working as a hospital orderly, he found himself in a quandry.

By law, this man could earn up to $410 per month and still receive his railroad pension—provided he would work for any employer but York Hospital in York, Pa., where he was employed. He wanted to remain at York Hospital, and the assistant personnel director advised me that the hospital wanted to retain my constituent. Besides being an excellent employee, my constituent was very attached to this hospital, which had treated his invalid wife many times for her severe spinal problems. The assistant personnel director doubts that this man, who is in his sixties, will be able to find another job at his age; this poses a problem because of the man's medical insurance, which could now skyrocket.

I have discussed this situation at length with the railroad retirement board, and have learned that similar situations come to the attention of the board periodically.

This legislation provides for a study of work and earnings limitations on the receipt of certain railroad retirement benefits and the effects of any modification of those limitations. Accordingly, the board would conduct a corresponding financial analysis, and report to the Congress the results of this study not later than 1 year after the date of enactment of this act, together with any recommendation the board might have for changing this requirement.

Having served a district where many former and current railroad employees reside. I have become well acquainted with the railroad retirement system. My experience has forced me to conclude that "last person service" merits reexamination, and I therefore would hope that this measure which I am today introducing will receive prompt consideration by this body.●

MRS. VIRGINIA P. BOBO

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BROOMFIELD. Mr. Speaker, at the end of September, the Congress of the United States and the American people will lose the services of one of its dedicated and valued employees, Mrs. Virginia P. Bobo, the head of the Capitol Guide Service's Congressional Ticket Office.

Virginia came to work for the Congress 22 years ago as a Capitol guide. Through her dedication and competence, she was promoted to the unenviable position of having to arrange congressional tours of Members and our constituents who visit Washington and express a desire to us to tour the Capitol.

At one time, perhaps, this may not have been difficult. However, during the past several years, we have been seeing record numbers of people who wish to have a congressional tour.

Though there is a limited number of people who can actually take these special tours each day, Virginia has always tackled our requests for tours with cheerfulness and great skill, bending over backward to accommodate us and our constituents.

Mr. Speaker, while I trust the Congressional Ticket Office will function along the high standards Virginia has set, I and I know all of us, will greatly miss Virginia and her dedicated work.

I wish Virginia a rich and rewarding retirement, and my deepest appreciation for a job well done.●

LOUIS L. GOLDSTEIN

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BARNES. Mr. Speaker, I am delighted to take this opportunity to join my colleagues from Maryland in honoring the comptroller general of our State, Mr. Louis L. Goldstein. Mr. Goldstein will be recognized at a testimonial dinner on September 28, sponsored by the Maryland Mental Health Association, to celebrate his 70th birthday.

Louis Goldstein is one of the most beloved leaders in Maryland public life. Relentlessly peripatetic, he swims and exercises each day, then crisscrosses the State with dizzying energy, attending an astonishing number of events and charming Marylanders with his wit and good humor at every stop. It would be hard to find a single person in the State who has not run into Louis Goldstein at least once. As one public official once said of him, "One of these days Louie's going to run into himself coming back from Ocean City."

As a result of this vigor, enthusiasm and sharp mind, Louis Goldstein probably knows more about Maryland than any other individual. He is literally a walking encyclopedia of the history and lore of the State. And he can get more meat out of a crab than anybody else I have ever seen.

Despite his feverish schedule, Louis Goldstein is a hard-working, dedicated public servant who has brought the office of the comptroller out of the stone age to become one of the most advanced in the entire country. In fact, representatives from other States come regularly to the Maryland comptroller's office to take a look at the comuter system and other aspects of the Louis Goldstein operation.

The list of his accomplishments is endless, but Louis served for 13 years in the Maryland State Senate, including 4 years as majority floor leader and 4 years as president of the Maryland Senate and chairman of the senate council; he has been a delegate or alternate to 9 Democratic National Conventions; he serves on innumerable boards and associations throughout the State; and he has received awards for his contributions to every conceivable area of community service.

The magnaminous Goldstein charm can best be summed up in his own famous closing line: "God bless you all real good."●

TRIBUTE TO MISS AMERICA 1983—VANESSA WILLIAMS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. OTTINGER. Mr. Speaker, on Saturday, September 17, 1983, Vanessa Williams, a 20-year-old junior at Syracuse University who hails from Millwood in Westchester County, N.Y., became the 57th Miss America and the first black woman to receive this honor.

In her new role these past few days, Ms. Williams has shown herself to be an individual who enjoys the challenge of her new endeavor. Many of her past endeavors also deserve recognition for they served as stepping stones. She has always been involved with the arts, often presenting her creative, exuberant personality in full form. During her years at Horace Greeley High School in Chappaqua, N.Y., she participated in as many theater and dance productions as possible, never failing to captivate her audiences. Her extensive musical training earned her membership in the All-State Womens Choir, All Eastern Chorus, and All County Orchestra.

Vanessa also became one of the first American high school students to participate in an exchange with a South American nation when she traveled to Caracas, Venezuela with her high school orchestra. There she served as a representative of our country.

Now, Vanessa again has the opportunity to represent the United States, this time as an example of a young, independent woman pursuing excellence. As the Congressman from the 20th District, I applaud her victory and I wish her the best of luck during her reign.●

THE RETIREMENT OF CARL "YAZ" YASTRZEMSKI

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. CONTE. Mr. Speaker, on Saturday, October 1, baseball fans around the country will bid a fond farewell to one of the greats—Red Sox player Carl "Yaz" Yastrzemski.

To those of us who would rather bronze our Red Sox caps than our children's first shoes, it will be a sad day indeed. Yaz has been our inspiration through the fat and lean years with the Sox, and, although we hate to see him go, he is really going with class.

One of the many high tributes to Yaz, his career, and his character recently appeared in the Washington Post. I would like to insert it for the RECORD at this time.

[From the Washington Post, Sept. 16, 1983]

STORY ENDS, BUT LEGEND ENDURES

(By Thomas Boswell)

BOSTON—Monday night in Fenway Park, Carl Yastrzemski hit five home runs and made a marvelous catch in the ninth inning to save a no-hitter.

Yastrzemski's first home run of the night was a 420-foot line drive over the Baltimore Orioles bullpen off Jim Palmer, a gentleman who will someday join Yaz in the Hall of Fame.

As the 44-year-old jogged the bases, the fans cheered and the sky cried. The instant the ball left Yaz's bat, the rain began, as though even the New England weather wanted some tangible way to pay its respects to the leaving legend.

Yastrzemski's other home runs that night, and his great running catch in defense of Billy Rohr, were all bubbles rising from the past, figments flashed on the vast center field screen as the Red Sox appeared their crowd during a long rain delay with an old movie about the 1967 impossible Dream Season.

There was the 28-year-old Yaz in his Triple Crown glory slugging one pitch after another into that same distant bullpen in a long ago September, cramming the pennant down the throats of Jose Tartabull and Dalton Jones whether they wanted it or not.

As the 12-foot-tall mythic Yaz on the screen made his tumbling catches, played caroms off the Monster, threw out runners at all available bases and catapulted those home runs with his chiropractor's dream of a swing, the clouds were not the only source of tears in Fenway Park.

It's tough enough to lose a dignified man who's become a worthy institution when you make it easy on yourself and turn your eyes away, allowing him to slide into retirement only half-noticed. But it's genuinely hard to watch the gimpy, creaky old man fighting to go out with style while the image of his own youth flickers on the screen in double size, taunting him and us with our mortality, reminding us of what we are about to lose.

That night, the rains washed out what would have been Yastrzemski's 453rd home run (17th on the all-time list), his 3,413th hit (seventh) and his 1,834th RBI (ninth).

The next evening, in the makeup, Yastrzemski pinch-hit in the ninth inning with the winning run on second base. A mere single was needed. His grounder was stabbed at the last second before it could escape into center field and the old man was thrown out at first base by a step. As an obligatory but taken-for-granted postscript, the Red Sox lost in the 12th.

That's the hard world of fact in which even legends must live.

These days, Yaz is trying to bring it to the wire with panache. Perhaps as early as Sat-

urday, he will break Hank Aaron's all-time record for games played (3,298). It's fitting that Yastrzemski—the man of Polish farming stock—should hold the record for endurance. It suits him better than any other mark. Except for '67, he was never a great player, just a very good one who squeezed every drop of production from his talent.

His Red Sox are back where he found them 23 seasons ago—players fighting, after their fashion, to stay out of last place, while management fights, in its fashion, to keep them there.

When the season began, Yastrzemski's goal was "not to be a detriment" to a team he thought might win a pennant. Now, that team should worry about being a detriment to Yastrzemski. He is batting .281—just five points below his career average—and he's also got 10 homers, 24 doubles and 55 RBI's in just 338 at bats. In other words, when he plays, Yastrzemski's production at 44 is almost identical to his career figures.

"This is the way I wanted to go out. But there's still a ways to go," says Yastrzemski.

Yastrzemski must help now with all the last-minute preparations, like a man arranging his own funeral. A front-office man asks him how many seats the family will need for the season-closing Farewell Yaz game on Oct. 2. "Better make it 60, with all the in-laws," says Yastrzemski. "My dad says we'll have 21 Yastrzemskis in the same place at the same time."

Asked if he dreams about a final at-bat home run, like Ted Williams, he says, "I tried to get a home run for my 3,000th hit and it took me 12 at bats just to get a single. I've learned that lesson."

Yastrzemski knows that his baseball legacy is safe. He's one of those figures who transcended his stats. Yaz batted under .280 twice as often as he hit .300 (12 to 6) and he drove in less than 75 runs twice as often as he drove in a 100 (11 to 5). He only hit more than 23 homers four times in 23 years.

Yet, like Pete Rose, Yastrzemski has managed to leave a personal image of himself that surpasses his professional abilities. Yastrzemski can even put his place in the game into words.

"I'd like to be remembered as a winner," he said this week, sitting by his locker. "Someone who made things happen that helped the team win. But I hope I did it with class. Stan Musial was an idol of mine as a boy. I tried to model myself after him, to a degree.

"Given some ability, and I'm not what you'd call a big specimen, I've gotten the most I possibly could out of it.

"I always see ballplayers come back and say 'if.' Retirement won't be hard for me, because that will never be there for me. 'If' I'd worked harder, 'if' I hadn't retired too soon . . .

"When we have those reunions of the '67 team, most of those guys who've been retired for years *are younger than me.* Almost all of 'em. Their biggest thing is always 'if.' You can see that they haven't accepted (retirement). They always pull for me and tell me, 'Keep going.'

"That applies to everything. You want to live so you don't have to say 'If I'd just given myself a fair chance to succeed.' "

If anything galls Yastrzemski its the team's collapse this year.

"We've had 16 straight winning seasons here and I'm very proud of that," says Yastrzemski, whose clubs have been 257 games over .500 since '67.

"This year feels miserable. I can't imagine how bad it must have felt my first six seasons."

Only Yastrzemski knows how deeply he is gnawed by the Sox failure to win a World Series. He is a ballplayer and sees his world in terms of hanging curve balls, not literary metaphors. "I don't think about all that stuff . . . I'm a quiet farm boy. I guess it just wasn't meant to be. In '67 (in the Series) Bob Gibson in the seventh game was too much. The guy was just great. I accept that.

"But in '75, everything went against us." Yastrzemski gives a recitation of umpires' calls and unlucky hits. Then, he pauses and the *real* old wound rises to the surface. "I'll never forget that slop curve to (Tony) Perez." It's nice to know Yastrzemski will never forgive Bill Lee, either.

One last question always hangs around Yastrzemski. What if New England's eternal delusion were to come true and, a year from now, the Red Sox were in a pennant race and their obvious need was for another left-handed bat? Would Yastrezemski listen to the sirens?

A small smile plays around Yastrzemski's mouth. How can such a legend resist such a tease?

"Right at this day," said Yastrzemski, picking his words carefully, "I have no plans to come back."●

BECAUSE WE DO CARE ABOUT THE PHILIPPINES

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. STARK. Mr. Speaker, this morning's new reports that President Marcos of the Philippines says that if President Reagan does not visit the islands this fall, it will raise questions about the renewal of our military bases there, and would demonstrate that the United States does not consider the Philippines important.

Nuts, Mr. Speaker, nuts. I believe such a move would say exactly the opposite.

It is because we care about the Philippines and her people—with whom we have had a long and special relationship—that the President should cancel his visit until the assassination plot on former Senator Aquino is honestly solved and until the Marcos regime ends it dictatorial practices. It is time we show the people of the Philippines that we care about them, and we will not give unconditional support to the Marcos regime regardless of its actions.

If the President proceeds with his trip and we get a renewal of the bases agreement, I believe we will also have signed up on the wrong side in another civil war—and we will soon be called on to commit troops in the Philippines just as we are in the Central American and Lebanese civil wars.

If you really care about the Filipino people, Mr. President, do not go.●

THE LABOR, HHS BILL NEEDS IMPROVEMENT

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. WILLIAMS of Montana. Mr. Speaker, I urge my colleagues to review the action of the House Appropriations Committee regarding the fiscal year 1984 Labor-HHS-Education Appropriations Act, H.R. 3913, particularly as it relates funding for the Job Training Partnership Act (JTPA). The committee's action will result in significant cuts in your district's job training program at a time when there are 10.7 million people unemployed.

The reported bill is $1.72 billion below the levels assumed in the first budget resolution for JTPA. This amount appears large because it includes moneys for fiscal year 1984 as well as forward funding. The total difference without forward funding is $970 million. The additional $750 million of the difference is for forward funding (see chart A).

A major problem in H.R. 3913 is the funding level for title II-A of JTPA, which allocates 78 percent of the funds by formula, as opposed to the 86.5 percent allocated by formula under JTPA's predecessor, CETA. Thus, a larger appropriation is needed for JTPA title II-A to achieve the same level of funding. The House Appropriations Committee did the exact opposite. In fiscal year 1983, $2.181 billion was appropriated under CETA titles II-B and C, IV-A, and VII; while H.R. 3913 provides $1,886 billion for JTPA title II-A. Thus, the House Appropriations Committee provided less than last year's level. The change in the law lowering the percent of funds distributed to local areas by formula would require a larger appropriation than the previous year, not a lower or even equal appropriations level.

As a result of the House Appropriations Committee action, the chairman of the Senate Labor-HHS-Education Appropriations Subcommittee, Senator WEICKER, lowered the numbers he had going into the Senate markup, which were initially higher than the House's to similar levels.

These cuts in funding for JTPA title II-A vary from 15 percent to 35 percent in most areas and average 24 percent nationally. Chart B was provided by the National Association of Counties and gives clear examples of the level of cuts if H.R. 3913 is not amended on the floor. (In evaluating the chart, the data obtained from some States compares funding for title II-A, while other States submitted data based on title II-A and B. Data for each State is internally consistent.)

The administration argues that fewer funds are needed to fund the same level of service to participants under title II-A of JTPA because of the policy changes in JTPA. This assumption is based upon information received from the Reagan administration indicating that the "unit cost per service year" will be significantly reduced under JTPA. This reduction, it is believed, will result from policy changes that eliminated stipends and placed a strict limitation on the amount of money that can be paid to participants in the form of needs-based payments and other supportive services. Under this assumption, the same number of participants could be served for less money. Hence, a recommendation of $1.886 billion for title II-A of JTPA.

Information I have received regarding the Massachusetts experience in implementing JTPA, however, provides evidence that this assumption is faulty and that the average cost per participant is, in fact, remaining fairly stable or even rising slightly. In fiscal year 1982, the average cost per participant for Massachusetts CETA programs was $2,007. While fiscal year 1983 is not yet complete, it is estimated that the average cost per participant will fall between $2,200 and $2,300. Furthermore, local service delivery area job training plans for fiscal year 1984, as approved by the Private Industry Councils and local elected officials, reflect a planned cost per participant of $2,294.

The State of Massachusetts also indicates that there are 919,048 economically disadvantaged individuals who would be eligible under the act. These Reagan budget cuts will only allow the State to serve 12,749 clients or only 1.4 percent of the universe of need.

The following tables have been submitted for the RECORD:

CHART A.—BUDGET AUTHORITY FOR SELECTED EMPLOYMENT AND TRAINING PROGRAMS

[In millions of dollars]

	Fiscal year 1984 budget proposals—									
		Administration request			First budget resolution					
						Senate				
	Fiscal year 1983 actual	Original	Revised	Appropriation bill reported by full committee	House	Without advance funding	With advance funding	Conference agreement	Conference agreement over appropriations	Fiscal year 1983 actual over appropriations
Total selected E and T programs	3,977	4,369	4,319	6,455	8,925	6,812		8,175	+1,720	N/Ap
Forward funding for JTPA	N/Ap	[1] 725	[1] 725	[2] 2,861	[2] 3,911	[2] 2,898		[2] 3,611	[2] 750	N/Ap
Total without forward funding	3,977	3,644	3,594	3,594	5,014	3,914		4,564	+970	+383
Basic job training	[3] 2,181	[4] 1,886	1,886	1,886	N/Av	[4] 2,181	[4] 3,815	N/Av	N/Av	+319
Summer youth	825	725	725	725	N/Av	724	1,268	N/Av	N/Av	+100
Dislocated workers	110	240	223	223	500	150	259	N/Av	N/Av	−113
Federally administered programs other than Job Corps and TJTC	223	187	187	187	N/Av	253	424	N/Av	N/Av	+36
Job Corps	618	586	553	553	N/Av	586	1,026	N/Av	N/Av	+65
TJTC	20	20	20	20	N/Av	20	20	N/Av	N/Av	0

[1] The administration request includes forward funding for only 3 mos., as opposed to 9 mos. in the first budget resolution.
[2] Forward funding for 9 mos. as authorized.
[3] CETA titles 2BC, 4A, 7.
[4] JPTA title 2A.
N/Ap—Not applicable.
N/Av—Not available.

CHART B.—COMPARISONS OF FISCAL YEAR 1983 ALLOCATIONS AND FISCAL YEAR 1984, SUBSTATE PLANNING ESTIMATES FOR SAMPLE STATES

	Fiscal year 1983	Fiscal year 1984	Percent change
Arizona (without summer youth funds) (title II-A):			
Phoenix	5,579,891	4,289,664	−23
Maricopa	3,526,760	3,092,620	−12
Pima/Tucson	3,274,128	2,880,353	−12
BOS	6,163,888	6,800,488	+10
Arizona total	18,544,667	17,063,125	8
Florida (partial) (Title II-A)			
Brevard	2,124,058	1,179,952	−44
Broward Csrt	6,048,771	3,761,138	−38
Escambia	1,555,326	1,127,114	−28

●

PETER BEAULIEU

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BROOMFIELD. Mr. Speaker, we often hear the bad news about our Nation's youth—the experimentation with drugs, teenage pregnancies, youth crimes, falling test scores, and so forth.

However much all this may be a part of the reality of the youth scene, there is another side, one we do not often hear about. This other side is about the good kids, the ones who live in every comunity across our Nation. The ones who are working hard, earning good grades, being of help to their families and communities, and who are becoming responsible, contributing adults.

The Boys Clubs of America, each year, honors one of these young people as "Youth of the Year," and it is with great pleasure that I call the attention of my colleagues in the House to a fine man from southeastern Michigan who was one of the five national finalists this year for this great honor. He is Peter Beaulieu of the Boys and Girls Club of Royal Oak, Mich.

Pete, who is 17, has been a member of the Royal Oak Club for 8 years. At the club, he was named 1982 Member of the Year. He is president of the Keystone Club, and has served as a member of the National Keystone Conference Steering Committee. He also was chairman of the Northeast Area and Ontario Keystone Conference. In 1982, Pete also received the Michigan Juvenile Justice Project Award for outstanding service.

Pete has also been a volunteer tutor helping younger members of the Royal Oak Club with their schoolwork, and he is coordinator of the club's tutorial program. He is a regular visitor to an area senior citizens home and every Christmas he helps provide food and gifts to the needy. Pete has found time also to be an aide to the mentally retarded, a Big Brother, and the coordinator of a national award-winning program for the hearing impaired.

Outside of his work with the Boys and Girls Club, Pete has participated in five Jaycee walkathons to raise money for the local burn center.

Pete's work in school reflects the same hard work and involvement that he displays with community organizations. He is a senior at Madison High School with a 3.8 grade point average. He is a member of the National Honor Society, president of his class, and editor of the class yearbook.

Mr. Speaker, I had the pleasure of meeting Pete and he is truly a fine young man.

I wholeheartedly congratulate him on his many accomplishments and honors he has received. We are all very proud of him, and grateful for reminding us that there are many facets to our Nation's youth.●

CASH MARKET FOR HUMAN ORGANS

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. GORE. Mr. Speaker, the problems that families face as they attempt to work within the present system for human organ transplantation have recently received a great deal of national attention. All of us have been touched as we have watched individuals forced to struggle through an ad hoc process as they seek an organ transplant. There is no more compelling plight than a parent who must mount a nationwide public appeal to plead for an organ donation or for funds to save the life to their child.

As chairman of the Subcommittee on Investigations and Oversight, the Committee on Science and Technology, I have, over the last 9 months, conducted an extensive investigation into many of these issues. As a result, I am introducing legislation that I believe will make significant strides in establishing a system for solving this problem as well as it can be solved for all those who need transplants.

On Monday, the Washington Post reported on a plan by a physician in Reston, Va., to establish a brokerage house to buy organs from living human beings in Third World countries and sell them for a profit to Americans in need of a transplant. While such a proposal was probably inevitable, it should not go unnoticed.

It is true that we live in a free market system that allows the freedom to choose many things. However, a person seeking a kidney transplant does not do so because they chose to be sick. We must not allow technology to dehumanize people so that they are regarded as things to be sold and bought like parts of an automobile. If this were to occur, it would seriously undermine the values of our society.

In this mornings Los Angeles Times, Arthur Kaplan, of the Hastings Center, presents a lucid and comprehensive report of the sorry tale of allowing a cash market for human organs. I take exception only with Dr. Kaplan's call for a law allowing presumed consent. There are a number of strategies, such as those I propose in my legislation, that should first be tried before moving to such a system.

I commend Dr. Kaplan's article to you.

"CASH MARKET" IS NO PLACE FOR TRADE IN VITAL ORGANS

(By Arthur Kaplan)

It seems that hardly a week goes by without someone appealing on television or in the newspaper for an organ to save his or her life or the life of a loved one. Only last month, the media were reporting the efforts of a small Wyoming town to raise money through bake sales and car washes to pay for the costs of a liver transplant for one of the local children. In New Jersey a frantic mother had to resort to pleading in the newspapers in order to persuade state officials to pay the $100,000 fee demanded by a hospital for performing a heart transplant on her son. These and countless similar desperate efforts poignantly illustrate the inadequacy of current public policy in the field of organ transplantation.

Literally thousands of people are on waiting lists around the country, hoping day after day that suitable organs will be found for them. Nearly 4,000 await corneas to restore their sight. More than 6,000 await donor kidneys to free themselves from the tyranny of thrice weekly six-hour sessions on dialysis machines. The waiting lists are shorter for heart, liver and lung transplants, since most people needing these die long before suitable organs are located.

The plight of these people has not gone totally unnoticed. The free market abhors a vacuum; commerce eventually rushes in, especially when the potential customers are desperate. This week, the Washington Post reported on the plans of a physician in Reston, Va., to establish the International Kidney Exchange, Ltd., which would act as a brokerage house between kidney donors overseas and American recipients. Dr. H. Barry Jacobs was quoted as saying that the price set by potential donors might be as high as $10,000, and their motivation would be "whatever motivates someone to sell: greed, bills. . . ."

Such a development was inevitable. The existing system for procuring organs does not work. While most of us have heard about the need for organ donation, few of us carry donor cards. Most people can't be bothered to fill them out even when they are printed on the back of a driver's license.

Such callousness would be inexcusable if it were not for the fact that many emergency-room physicians and nurses ignore the cards, even when they chance to find them on accident victims, the preferred source of vital organs. Their fears of malpractice suits, combined with a reluctance to involve themselves in a time-consuming and financially unrewarding procedure, produce a system in which fewer than 30 percent of those hospitals equipped to recover organs from cadavers for transplantation do so.

Fifty years of relying upon a system of voluntary donation and public good will has produced a situation in which, according to the Center for Disease Control, only 20 percent of those who die each year from traumatic accidents, tumors or strokes are utilized as donors. Yet, every year national surveys show that the vast majority of Americans are willing to serve as organ donors upon their deaths. And every year thousands of people wait helplessly while the science of organ transplantation advances and the availability of organs dwindles.

A market in organs is not the answer to this tragedy. Medicine is one area where access to life-saving cure should not depend upon the ability to pay. Moreover, the prospects for abuse in such a system, particularly of the ignorant and often desperately poor residents of Third World countries, should make us move quickly to restrict any further expansion of this unattractive industry.

Rep. Albert Gore (Tenn.) has introduced a bill in Congress that would outlaw the sale of organs. But we could also take a positive step to bridge the gap between supply and demand in organs. We could pass a law allowing physicians to assume consent for the utilization of cadaver organs for transplant, unless a person carries a refusal card or an objection is raised by a family member.

If, as the dismal statistics would seem to prove, thinking about our own death is too difficult for any one of us individually, perhaps we can find the courage to face it collectively. The time has come to put our policies where the altruism found in the opinion polls says it is: The burden of proof in organ donation should be shifted onto those who do not want to participate, rather than being placed on the shoulders of those who are willing but reticent, or for whom it is too late to express their wishes. If we fail to act, each one of us, or someone we love, could well pay the price—if we are rich enough.●

CLAMOR IN UNITED STATES TO CUT COMPETITION FROM IMPORTS MAY BE EXAGGERATED

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. FRENZEL. Mr. Speaker, the September 19 Wall Street Journal contained an article by Art Pine headlined "Clamor in U.S. To Cut Competition From Imports May Be Exaggerated."

Because the excellent article is lengthy, I shall not include it here, but I commend it to all my colleagues.

It tells a story we do not often hear in this House. It reports that average Americans, even those whose jobs are said to be endangered by imports, are buying imported merchandise, and seem to understand the idea quoted in the article, "in order for us to sell, they're going to have to sell some of their stuff here."

The article also points out that at least one pollster is finding that "increased protectionism is absolute, pure, unadulterated tripe." Consumers are said to consider origin, only after price and quality, in making purchases.

The Pine piece closes with a warning to Presidential candidate Walter Mondale, quoting a congressional Democrat, "He sounds too protectionist for me."●

WESTERN TECHNOLOGY AND SOVIET SPIES

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. ROTH. Mr. Speaker, last August a $600,000 American computer, originally cleared for export to Belgium, ended up in Budapest after a Belgian businessman allegedly forged export licenses. The Belgian businessman, according to the Justice Ministry, is under indictment for selling an advanced American computer to Hungary.

That same month Belgium expelled at least six East Europeans for economic espionage and uncovered an electronics company in the capital that was a front for Soviet technology spies, according to European press reports. What the Belgians discovered was an electronic company with a secret function. The company in Belgium was run by the Russians but set up under Belgian law. A foreign ministry spokesman said "that the company's true function was economic and technological espionage." The Soviet-front company attempted to secure contracts and joint ventures with Belgian and other Western companies in order to acquire technology of military importance.

Mr. Speaker, I mention this case because it relates to the Export Administration Act which expires on September 30. Last summer the Committee on Foreign Affairs approved amendments to the act which eliminates the requirement for U.S. exporters to obtain validated export licenses for shipments to most Western European countries and Japan. The NATO countries—minus Iceland and Spain—and Japan since 1949 have banded together in an informal Coordinating Committee—known as COCOM—to recommend what items should be subject to export controls for reasons of national security.

Eliminating license requirements to these countries would be a tragic mistake. In the words of one specialist on strategic trade it would "turn the hemorrhage of Western technology to the Soviets into a flood." The incident in Belgium illustrates the point. Here is how: Since the early days of détente few Western countries devoted the resources to effectively implement export control laws. Our own Office of Management and Budget, year after year, cut the budget for U.S. export enforcement. Licensing of exports, particularly among the countries of the Western alliance, became a paper shuffle—an exercise in processing forms as opposed to investigating possible violations of the Export Administration Act.

It is a crime to divert technology of military significance to the Soviets and other potential adversaries. We now know that the Soviets have embarked upon a massive campaign to acquire Western technology by hook or by crook. There is hardly a NATO country which has not expelled Soviet technology spies. Every report on this subject indicates that we have just uncovered the tip of the iceberg.

What can we do to stop this theft of a vital national resource? The answer must be to strengthen export controls. During the last 2 years the United States has begun the long road to properly enforcing export controls. Our partners in Japan and Europe have a much longer road to travel.

Licensing is the backbone of every export control system. The Export Administration Amendments Act of 1983 recommends the elimination of licensing to COCOM countries. But licensing is the enforcement tool that enables our enforcement authorities at the Commerce Department to investigate end users and conduct, if necessary, an investigation to ascertain that the end user is reliable and not likely to engage in diversion. The export control legislation pending before the House would remove this preventative ability to deny the Soviets advanced technology.

During discussion of this issue, much has been made of a recommendation by the General Accounting Office on the issue of so-called West-West licensing. The advocates of the provision in the bill before the House contend that the GAO recommended the elimination of licensing. Mr. Speaker, here is what the GAO recommended:

Reexamine the need for licensing of high technology products to COCOM countries and other allies by exploring various alternatives that would satisfy control objectives and reduce or eliminate the burden of licensing.

Mr. Speaker, the words "satisfy control objectives" are three critical words. The provision in H.R. 3231 before the House does not satisfy control objectives—it just eliminates U.S. export licensing and does not put anything in its place. The provision transfers the entire burden of export controls to the Europeans and the Japanese. I have placed many statements in the RECORD describing the extent and reliability of such controls. In fact, Japan's Foreign Minister only recently admitted that Japanese high technology has directly contributed to the Soviet Union's military buildup.

There is not a single study, a single report, a single witness who appeared before the Committee on Foreign Affairs who presented a comprehensive and thorough review of the export control laws of the Europeans and Japanese. There is not a single report on the issue of export controls which adequately demonstrates that either the national governments within COCOM, or COCOM itself, effectively enforces export controls. The point is, Mr. Speaker, that the system works—but not nearly to the degree that it should work. Eliminating export controls will prevent improving the system. For better or worse, the United States is the conscience of the COCOM system. If we eliminate export licensing our COCOM partners will surely follow. The Soviet Union will be highly gratified.●

DEFICIT CONCERNS ALL AMERICANS

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. OWENS. Mr. Speaker, the deficit is a serious problem that concerns all Americans. The time has come to stop accusing one another and to start looking at the problem and seeking a resolution which will not continue to harm our people in the future.

The deficit is a product of spending more than the Government takes in. It is a simple matter of arithmetic. If we were to reduce expenses and increase revenues our problem would soon be solved. Now, we must look at both sides of the revenue/expense equation and see how we can reduce the deficit.

In 1981 massive tax cuts were enacted which were directed at those with high personal incomes and at corporations. The cuts were supposed to unleash capital to stimulate the economy. At that time unemployment was running at the outrageous rate of 7 percent. The experiment did not work. No rush of capital to provide the basis for production and employment occurred. Instead, the unemployment rate rose to over 10 percent, as over 3 million more people were thrown out of work. Not only did the Government lose the revenues from the tax cuts, but we lost the personal income taxes which would have been paid by the 3 million additionally unemployed people. Think about that—corporations and the well-to-do pay less taxes and 3 million more wage earners are thrown out of work with all of the suffering that entails for them and their families. A rather high price for human beings to pay for an experiment.

The time has come to end this barbarous experiment. We have no right to cause such massive suffering among our people. The time has come to recapture the revenues lost to further increase the wealth of the wealthy. In particular, the time has come to close the loopholes in our tax laws which allow corporations to pay little in the way of taxes—to even sell their excess deductions—while they continue to contribute to our unemployment problem by moving capital overseas to use the labor of people in the Third World and by moving profitable enterprises—within the United States to further increase profits. When we give tax benefits to corporations, those benefits must be tied to investments which create and maintain jobs in this country.

On the expenditure side, we must recognize that fiscal expansion is inappropriate at a time of decreased revenues. The massive expansion of the military budget must be reconsidered. We must look at absurd episodes of waste, such as the simple hammer that costs over $400, and beyond to the chronic cost overruns for military hardward and construction which is all too often defective, ineffective, or downright shoddy. It is time for Government agencies to view each purchase as they would their own property. No one that I know of would continue to buy from a supplier whose products just do not work.

Yes, the deficit is a serious problem. We need to work together to solve it by increasing revenues and becoming cautious buyers who insist on the best quality that our people can produce.●

H.R. 3231—FOREIGN AVAILABILITY

HON. ED ZSCHAU

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. ZSCHAU. Mr. Speaker, H.R. 3231, the Export Administration Act Amendments of 1983 will soon come to the House floor for consideration. As a cosponsor of the bill and a member of the Committee on Foreign Affairs, I have found that the provisions in the bill regarding the foreign availability of products and technologies are important for determining when it is appropriate to control exports. Attached are answers to several common questions about foreign availability and related provisions in H.R. 3231 which I hope my colleagues will find useful in their deliberations on this bill.

H.R. 3231—FOREIGN AVAILABILITY—SECTION 108 QUESTIONS AND ANSWERS

Question. What is "foreign availability" anyway?

Answer. Foreign availability can best be described as the uncontrolled availability from a foreign source of a product or technology whose export is controlled by the United States.

Foreign availability comes in two primary forms. If a product is controlled by the United States and its allies; i.e., it is on the COCOM list and is only produced in the United States or at least one of the COCOM countries, then there is no foreign availability. The product would have to be produced by a country not part of the COCOM group

to be considered as being available from a foreign source. (COCOM nations are NATO allies, plus Japan minus Iceland and Spain.)

If the product's export is controlled *only* by the United States but is manufactured by a foreign company (including companies in COCOM nations), then there is foreign availability.

In either case there must be commercial availability of the product in sufficient quantity and quality to make controls ineffective. The mere capacity of a country to manufacture the product in the future would not be considered as foreign availability.

Question. What government agency has the responsibility for assessing foreign availability?

Answer. In 1979 the Congress assigned this responsibility to the Department of Commerce and directed that the Department act in consultation with appropriate Government agencies and technical advisory committees. H.R. 3231 directs the Commerce Department to establish an Office of Foreign Availability and authorizes $2.1 million for its operations. When fully staffed this office will have about 30 technical specialists assessing foreign availability.

Question. I've heard that there are no standards for judging foreign availability. Is this true?

Answer. H.R. 3231 directs the Secretary of Commerce to issue regulations governing foreign availability assessments within six months of the enactment of the Export Administration Act Amendments of 1983. The procedures to be followed for judging foreign availability are expected to be rigorous.

Question. How will a determination of foreign availability be made?

Answer. A determination of foreign availability will be based on solid evidence and not specious arguments. Export license applicants making representations of foreign availability or Technical Advisory Committee's certifying foreign availability, as allowed in H.R. 3231, will be required to present a minimum level of evidence in order to prohibit frivolous claims and a waste of analytical resources.

In making an assessment of foreign availability the Commerce Department's analysts will use information obtained from many sources including the Defense Department, intelligence agencies, scientific laboratories, U.S. Embassies, industry, and the academic community.

Question. Won't the United States be forced to decontrol a sensitive product if an exporter or technical advisory committee determines that there is foreign availability of a product?

Answer. Absolutely not. H.R. 3231 provides three separate actions that may result from Commerce's foreign availability assessment. They are:

1. The Secretary determines that foreign availability does not exist;

2. The Secretary determines that foreign availability exists and removes the requirement for a validated export license; or

3. The Secretary determines that foreign availability exists and recommends that the President negotiate with the supplying country's government to eliminate the foreign availability of the product. Controls would be maintained during the negotiations.

Question. What is meant by "eliminating foreign availability" and how can it come about?

Answer. Eliminating foreign availability means to eliminate the uncontrolled shipment of that product to potential adversaries. This is accomplished by convincing the supplier's government that continued shipment of this product is detrimental to their security as well as the security of the rest of the free world and negotiating bilateral or multilateral agreements that control the shipment of that product to potential adversaries.

Question. I'm concerned that the requirement in H.R. 3231 giving the President only six months to negotiate the elimination of foreign availability will tie our hands and injure our national security. Wouldn't unlimited negotiation time be better?

Answer. A time limit on negotiations is necessary for the following reasons:

1. Without a time limit there would be no incentive for the supplying country to reach an agreement on limiting its sales. The longer U.S. competition stays out of the market, the more likely it is that the supplier will increase his market share; and

2. The Executive Branch needs incentive to put forth its best negotiating effort. Having a short time limit will spur the Executive Branch to prepare its best arguments and use its best negotiators.

Question. If we remove our export controls on a product that is available freely from a foreign source, won't we be injuring our national security?

Answer. No. If a product that is critical to our national security is available from a foreign source and our government cannot eliminate the product's foreign availability, prohibiting or controlling the export of the U.S. product will be ineffective. Trying to control the U.S. product in such circumstances won't enhance national security and will only hurt the U.S. economy by unnecessarily limiting exports needed to provide jobs.●

COURAGEOUS INDIVIDUAL HONORED

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. SHELBY. Mr. Speaker, I would like to recognize an outstanding individual and share her courageous story with my colleagues in the House of Representatives.

Donna Jean Thornton of Northport, Ala., was selected as the new Miss Wheelchair Alabama in June of this year. She represented the State at the Miss Wheelchair America contest held in August at Salt Lake City, Utah. During this competition Donna was honored by her peers and named Miss Congeniality.

In many ways, Donna is a typical, attractive, down-to-earth young woman—except that when she was injured in a vehicular accident in 1981, doctors told her mother that they did not expect her to live.

Since that time, Donna has been a quadriplegic, paralyzed from the neck down. She has limited use of her arms and hands and moves about with the help of a wheelchair. Donna attributes her survival to friends and family.

In discussing her title Donna said:

My philosophy is to take one day at a time. Do the best we can which in turn should make the world a better place.

My main objective as winner of the state pageant is to be a good representative of the handicapped. I also want to get Tuscaloosa more involved with the Miss Wheelchair Pageant, Inc. I feel so grateful for the support I received in getting to the state pageant.

Mrs. Rebecca Crawford, registered nurse for the Homebound Program of Alabama Vocational Rehabilitation Services since May 1980, helped in preparing Donna for the State competition. Mrs. Crawford was recently elected to the board of directors of the National Association of Rehabilitation Instructors for the southeastern area of the National Rehabilitation Association. I would like to take this opportunity to commend Mrs. Crawford on her efforts. She has devoted many long, hard hours in Donna's rise to the top. Her devotion to helping the handicap surpass all boundaries.

In discussing her accident, Donna has said that the days following were hard ones. Medical complications arose from her accident, including a collapsed lung and pneumonia. She stayed at Druid City Hospital for about a month and went to Spain Rehabilitation Center in Birmingham.

"I'm the most impatient person in the world—or I was," Donna said. Rehabilitation was tedious. "The simplest things seemed impossible. The people at Spain would push me so hard I would get dizzy from low blood pressure and pass out."

"Once I got over my 'I'm so pitiful I want to die' stage, I went back to Spain. Everybody was so nice, and I realized the problem wasn't them. It was me."

"Now I see that, even though it's gonna take me a lot longer to do something than it will somebody else, I know I'll be able to do most everything."

Of the months since her accident, Donna said:

So far, things have gotten better from the day it happened. I think it'll keep getting better. I know that one day I'll be able to be independent, and that makes all this aggravating stuff worthwhile.

Donna is a student at Shelton State Community College where she is studying recreational therapy. She wants to finish her undergraduate degree work in recreational therapy at the University of Alabama and pursue a master's degree in Mobile, the nearest area with a graduate program in recreational therapy.

Donna Jean Thornton has brought great pride to Northport and the State of Alabama. She is truly a remarkable young woman with a wonderful outlook on life in spite of her disability. I am proud of the honor she has brought to herself, and I certainly

wish her the very best in her future endeavors.●

UNITED STATES-JAPAN COAL TRADE

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. RAHALL. Mr. Speaker, the report accompanying H.R. 3222, the Commerce, Justice, State, judiciary appropriation for fiscal year 1984—favorably considered by this body this week—contains language expressing concern over the U.S. declining share of the Japanese coal market.

The Appropriations Committee urges the State Department to work with the Commerce Department "to utilize any available opportunities to negotiate with the Japanese with respect to maintaining the U.S. share of the Japanese import coal market."

I commend the committee for including this language in the report. Coal exports to Japan—the largest market for U.S. coal—in the first quarter of this year were less than half of the tonnage exported to Japan during the first quarter of 1982. Some U.S. coal companies might actually experience export decreases to Japan of as much as one-third.

This trend is disturbing. The Japanese Export-Import Bank is lending the Peoples Republic of China $2 billion to develop new coal mines. Meanwhile, the Japanese are aggressively investing in coal operations in Australia. Obviously, these actions of the Japanese come as a loss to the United States.

The importance of maintaining the U.S. share of the Japanese coal market cannot be underestimated. In 1982, the United States supplied the Japanese with 26 million tons of coal which had a value of $1.6 billion. This tonnage, most of which was of metallurgical quality, represented 12,000 coal-mining jobs. A good deal of this coal comes from the metallurgical coalfields of southern West Virginia.

Faced with unprecedented levels of coal industry unemployment in those coalfields, in January I contacted President Reagan prior to his meeting with Japanese Prime Minister Nakasone, urging the President to discuss the coal-trade issue with the Prime Minister. The President and Prime Minister Nakasone agreed to establish a United States-Japan energy working group which would examine the potential for increases in the coal trade.

This working group met in Tokyo on July 4 and 5. Prior to this meeting, 18 members of the congressional coal group wrote to Secretary of State George Shultz expressing concern over the 1982 trade imbalance of $19 million between the two nations. The letter stated:

> A certain degree of reciprocity must be maintained between the two nations. The Japanese would benefit from purchasing one-third of their coal requirements from the United States because they would be insured of both security and diversity of supply. The United States would benefit because the existing trade imbalance would be reduced and coal miners would be put back to work.

Unfortunately, the Japanese did not find much merit in the U.S. position during the July working group meeting and it is my understanding that the second meeting, held earlier this month in Alaska, had the same result.

Mr. Speaker, I, for one, cannot tolerate the excessive trade imbalance between the United States and Japan. It is expected to increase to $22 million this year.

If the Japanese continue on this course, they must be served notice that they are inviting a protectionistic response from the United States. The free flow of Japanese merchandise into this country, manufactured from steel, must be controlled if the Japanese choose to ignore the use of U.S. metallurgical coal in the production of their steel.

The report language accompanying this appropriation bill is an endorsement of the Commerce Department's negotiating efforts with the Japanese. I would submit that the Japanese should not take these negotiations lightly.●

THE BAHA'I FAITH OUTLAWED IN IRAN

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. FRANK. Mr. Speaker, the cruelty and intolerance of the Khomeini regime in Iran is well known. One of the most horrifying instances of this has been the brutal persecution of the Baha'i community, which has included numerous executions. Until now this appalling campaign has been carried out under the shaky pretext that the victims had been working to subvert the Government. This was rank hypocrisy: The Baha'is are in fact being persecuted simply because they are Baha'is. The Iranian Government proved this recently by issuing an edict banning all Baha'i activities. This edict, if interpreted broadly, makes 200,000 Iranians criminals by a stroke of the pen.

Mr. Speaker, this edict is the Khomeini regime's equivalent of the Nuremburg laws; it is the first step along the road to genocide. Dr. Firuz Kazemzadeh, leader of the Baha'i community in the United States, has written a thoughtful analysis of this latest edict, one which reveals the hypocrisy of the Khomeini regime, and which shows that Iranian policies flagrantly violate international conventions regarding genocide. I ask that his insightful comments be reprinted here.

The article follows:

THE BAHÁ'Í FAITH OUTLAWED IN IRAN

On August 29, 1983, the Tehran newspaper Kayhan under the headline "Banning of Bahá'í Activities" published an interview with Iran's Revolutionary Prosecutor Sayyed Hosein Musavi Tabrizi. Asked whether he wished to comment on the "stir about the execution of Bahá'ís in Iran," made by the world's news media, the Prosecutor replied that he had no intention of reacting and, instantly contradicting himself, proceeded to react, saying that Iran's Ministry of Foreign Affairs had already been instructed to "announce officially that today there are plenty of Bahá'ís in Iran. We never kill them or imprison them because they are Bahá'ís." However, the Prosecutor continued, "some of them are spies." He then accused "some of them" of sabotage, sending money out of Iran and, in several instances, of hoarding automobile spare parts.

Accusing Bahá'ís of espionage and other crimes was not new; the admission that there were "plenty of Bahá'ís in Iran" was. The Islamic regime, like its predecessors, has always claimed that there were virtually no Bahá'ís in Iran. Now that more than 150 Bahá'ís have been executed and hundreds of others thrown in jail, it has become necessary to tell the world that these were only a small fraction of the total and that there were "plenty of Bahá'ís who lived unmolested in the Islamic Republic.

In behalf of the government the mullah announced the banning of "all the collective and administrative activities of Bahaism in Iran "and noted that the Constitution of the country has also not recognized them."

The Chief Prosecutor further stated that individual Bahá'ís were free to perform their religious acts as long as they did so in private, were not active, did not invite others to take part, did not teach their faith, did not communicate information, did not form assemblies, and did not cooperate with Bahá'í administrative institutions. Obeying the commandments of their religion and unwilling to break laws, the Bahá'ís announced the dissolution of all their administrative institutions, including the National Spiritual Assembly, some 600 local assemblies, and all their ancillary institutions.

The new edict of the Islamic government is a most important step on the path leading to the eventual obliteration of Iran's Bahá'í community. The Bahá'í Faith has no clergy. The religious community is governed by local assemblies, democratically elected every year by all adult believers, and a national assembly, elected at an annual convention. These bodies appoint committees which are charged with the conduct of activities for the benefit of the community such as managing periodic gatherings, organizing classes for adults and children, publishing Bahá'í literature, directing Bahá'í schools and charitable institutions, providing advice and counsel to individuals on personal and family problems, promoting the knowledge of the fundamental principles of the faith (unity of mankind, universal peace, universal education, essential unity of all religions, abandonment of inherited

prejudices, harmony of religion and science).

The assemblies are the spiritual, administrative and organizational focus of Bahá'í life. The effect of their elimination on the Bahá'í community would be comparable to what the Catholics of a diocese would experience if they lost their bishop, all priests, churches, charitable and educational institutions and were permitted only to say prayers in the privacy of their homes.

It should be noted, moreover, that by officially proclaiming Bahá'í institutions criminal associations and participation in them a criminal act, the Islamic government has produced an excuse for the future arrest of more than 5000 men and women who served on local spiritual assemblies and of other thousands who served on various ancillary institutions.

The banning of Bahá'í administrative institutions in Iran is an act of genocide for it is intended to extirpate a religous community by creating conditions in which its survival will be impossible. The United Nations Convention on the Prevention and Punishment of the Crime of Genocide which went into effect in 1951 defines genocide as "any of the following acts committed with intent to destroy, in whole or in part, a national, ethnical, racial or religious group, as such: (a) Killing members of the group; (b) Causing serious bodily or mental harm to members of the group; (c) Deliberately inflicting on the group conditions of life calculated to bring about its physical destruction in whole or in part; (d) Imposing measures intended to prevent births within the group; (e) Forcibly transferring children of another group." Points a, b, and c fully apply to the actions that have been taken against the Bahá'í, and there have been instances of e as well.

The proscription of Bahá'í institutions though comprehensive in its evil effects on the Iranian Bahá'í, is only one of many measures that include executions, refusal of employment, withdrawal of pensions, expulsion from schools, systematic public harassment, confiscation of all community properties, confiscation of religous literature, destruction of holy places, and slander designed to provoke hatred. The list could be greatly extended but no further evidence is needed that the Bahá'í of Iran have become victims of genocide.●

CHARLES C. THOMPSON

HON. CHARLES W. STENHOLM

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. STENHOLM. Mr. Speaker, on August 5, 1983, the State of Texas and Texas agriculture in particular, lost one of its finest citizens: Charles C. Thompson of Colorado City, Tex., who died as the age of 85.

No words could better honor this remarkable individual, a man whose positive influence affected not only me personally, but virtually every farmer in the State of Texas, than the editorial in the Abilene Reporter-News following his death.

I would like to share those words with this body in recognition of a truly great, though often unheralded American:

It is possible, perhaps that some isolated corner exists in the Big Country that did not feel the influence of Charles C. Thompson, who died Friday at the age of 85. If so, it would be hard to find.

It was said of Thompson—hailed more often as "Charlie" or "Mr. Charlie" by friends everywhere—that he threw a lengthy shadow over the Big Country. He served as a regional leader in an astounding number of capacities. He was honored by nearly every civic organization in the area. Wise men across the country sought his advice.

In short, the mark he left on this part of the country cannot be overestimated.

He liked to point out that he herded sheep until he was a youngster of 14, and he worked with cattle and farmed for the greater part of his life. Born in 1898 in Erath County, he spent his life in West Texas, residing much of the time on a 6,000-acre farm and ranch near Colorado City.

Except for that stint as a sheepherder, Thompson never was one to limit himself to a single career, managing to combine interests and skills in many fields. He started out as an attorney—his first law partner, former U.S. Rep. George Mahon. Next came the county judgeship of Mitchell County, a job he held for three terms. He then turned to banking, becoming president of the City National Bank of Colorado City in 1938, and board chairman in 1955.

In 1927 he was one of the first to join the Colorado City National Farm Loan Association. In 1932 he helped organize the Mitchell County Agricultural Credit Corp. to provide financing to farmers and ranchers during the Depression.

Thompson also worked closely with the Federal Land Bank of Houston, the Federal Intermediate Credit Bank of Houston and the Houston Bank for Cooperatives. His tenure on the Farm Credit Board of Houston stretched from 1943 to 1977, including service as board chairman beginning in 1952.

In all, Thompson was associated with farm credit institutions for about 50 years, longer than any other American.

He also spent 20 years on the board of Texas Tech University, serving as chairman for 15 of those years. Tech named a building after him.

He also served for 20 years on the board of the Texas Electric Service Co.

His civic contributions and the honors he received from a vast variety of organizations are too numerous to list.

Despite all these accomplishments, however, Thompson remained a man in love with farming, ranching and the quiet, simple life they afforded.

As he stated in an interview in 1975, "I have been a country boy, a farmer and stockman all my life. It's nothing new to me to be in this business. I'll continue to be in it until I'm through with this life.

Mr. Charlie, your friends across Texas and across this country will miss you.●

EXIMBANK GUARANTEES

HON. BILL PATMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. PATMAN. Mr. Speaker, House Resolution 311 that I introduced expresses the sense of the House of Representatives that Export-Import Bank delay issuing guarantees and insurance to the Government of Mexico and the Government of Brazil in the amount of $2 billion until the Congress has an opportunity to review such transactions.

Today I received a report from the Congressional Research Service that emphatically points out the problems that the Eximbank is overlooking in order to grant these guarantees.

Since Brazil and Mexico are already delinquent on existing Eximbank credits the proposal "appears to be an exception from the stated policy, of the Eximbank, regarding treatment of delinquent borrowers." Further, "in case of default the use of loan guarantees, instead of direct loans entails a special risk for Eximbank. In the case of defaults involving loan guarantees, the payout on the guarantee is immediate."

The "Bank's profitability is of concern if Congress is not to be faced with large Eximbank losses at a time when there is a large overall budget deficit." Another concern is the serious precedent that this might set for other guarantees to other countries. It needs careful scrutiny by Congress.

Attached is the memorandum from Congressional Research.

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, D.C., September 20, 1983.

To: Hon. BILL PATMAN (Attention: Barbara Rudd).

From: Patricia Wertman, Analyst in International Trade and Finance, Economics Division.

Subject: Export-Import Bank Guarantees of Export Credits to Brazil ($1.5 billion) and Mexico ($500 million): Some Economic Considerations.

The legality of the proposal to guarantee $2 billion in export credits to Brazil and Mexico will be considered in a separate memorandum to be prepared by the American Law Division of CRS.

The primary purpose of the Export-Import Bank (the Bank or Eximbank) is to finance the export of American goods and services. The Bank is also required by its basic statute (the Export-Import Bank Act of 1945) to be self-sustaining. The Bank's profitability is of concern if Congress is not to be faced with large Eximbank losses at a time when there is a large overall budget deficit. During FY 83 Eximbank faces a loss expected to exceed $250 million.

At the current time it appears likely that Brazil and Mexico will continue to have difficulty servicing their debts. Brazil, with nearly $90 billion in outstanding debt, has asked the Paris Club of creditor governments to delay $1.5 billion in payments due in 1983 and 1984. Brazilian commercial bank debt of $4 billion falling due in 1983 has been rescheduled over an eight-year period.

A similar rescheduling of $7.5 billion falling due in 1984 has been requested. Arrears on interest payments are estimated to be $2 billion.[1] Brazilian gold reserves has been ex-

[1] Hughes, Margaret. Brazil Faces Fresh Crisis As Interest Arrears Touch $2 Billion. Financial Times of London, August 22, 1983: 11.

hausted. Brazil has a tentative agreement with the International Monetary Fund (IMF) which will release new funds, but the agreement has not yet been approved by the IMF's board. Brazil now has two repayments of $400 million each outstanding to the Bank for International Settlements (BIS). By March 31, 1983, Brazilian arrears to Eximbank amounted to $1 million.

The prospects of Mexico, which owes about $86 billion, appear to be somewhat better than those of Brazil. A large trade surplus enabled Mexico to draw only half of $1.7 billion which had been made available by Mexico's private lenders. $20 billion owed by Mexican state agencies to commercial banks and falling due between August 1982 and December 21, 1984 has been successfully rescheduled.[2] Mexico is fulfilling its agreement with the IMF. The combined arrearage of principal and interest owed to Eximbank is $6.4 million.

Generally, it is the policy of the Government of the United States to disapprove loans to countries with arrearages of 90 days or more unless a specific exception is decided upon. According to the National Advisory Council's (NAC) most recent annual report:

"The National Advisory Council believes that the existence of significant debt arrearages to the U.S. Government or its agencies is an important consideration in passing judgment on specific loan proposals. As a general policy, the Council recommends that loans to countries whose governments are in arrears 90 days or more on debts which they or their agencies owe to the U.S. Government or its agencies should be deferred, and where appropriate, disapproved. Exceptions to this general rule must be explicitly approved." [3]

Thus, U.S. policy, unless specifically indicated to be otherwise, is to discontinue lending to borrowers already in arrears. Brazil and Mexico are already delinquent on existing Eximbank credits. The proposed loans to Brazil and Mexico appear to be an exception from the stated policy regarding the treatment of delinquent borrowers.

The proposal to extend assistance to Brazil and Mexico through the Eximbank envisions the use of loan guarantees. The use of loan guarantees, instead of direct loans entails a special risk for Eximbank. In the case of defaults involving loan guarantees, the payout on the guarantee is immediate. By comparison, direct loans can be rolled over or rescheduled.[4] Most of the losses which Eximbank is sustaining involve payouts on bank guarantees to Mexico. Increasing the availability of funds for direct loans might be an alternative, although direct loans are fully charged to Eximbank loan limitation ceiling. While ceilings for loan guarantees are established in the budget, they are charged to the ceiling at the rate of 25 percent. An advantage of direct loans, however, is that their costs are more apparent than those of guarantees.

There appear to be three important financial or economic goals involved in the decision to provide export credits to Brazil and Mexico: the desire to promote U.S. exports, the desire to provide immediate financial assistance to Brazil and Mexico and, implicitly, the desire to stabilize the international system. In addition, there are considerations other than financial and economic ones. The Eximbank has always been used to further the foreign policy goals of the United States.[5] Foreign policy considerations regarding the internal stability of Brazil and Mexico and of the region are extremely important, but outside the scope of this paper. They are also much more difficult to quantify. The most obvious cost is the potential for large loan losses damaging to Eximbank.

The choice of a financing vehicle is also very important, affecting the ultimate costs. Congress may wish to consider whether this assistance can be most effectively provided through the vehicle of loan guarantees, direct credits, or even a rarely used straight balance-of-payments loan.●

QUESTIONNAIRE RESULTS 1983

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. BEILENSON. Mr. Speaker, earlier this summer I mailed a questionnaire to my constituents in California's 23d Congressional District. The reaction to this survey was overwhelming—nearly 18,000 individual responses were returned to my offices in West Los Angeles and in the San Fernando Valley.

Once again, this year's congressional poll sought from my constituents views and comments on some of the major controversies which have and will continue to dominate the attention of this Congress. The poll included questions on Federal spending priorities, the deficit, energy, the environment, foreign affairs, U.S. trade, and immigration reform.

Of those who responded to the questionnaire, the overwhelming majority either favored freezing military spending at the 1983 level—57 percent—or raising defense spending by only 5 percent next year as called for in the congressional budget resolution—23 percent. Only 18 percent of those responding supported the overly ambitious and unsustainable defense spending increase originally requested by President Reagan.

On a question concerning our policy in El Salvador, 60 percent opposed providing increased military aid to the Salvadoran Government, while 35 percent supported the President. Concerning the MX, 55 percent opposed producing and deploying this missile, while only 37 percent favored it.

This year's poll yielded interesting results on other questions also. A significant majority—62 percent—expressed support for congressional efforts to acquire and preserve valuable scenic land in the Santa Monica Mountains National Recreation Area and in other Federal parks authorized by Congress.

Mr. Speaker, my constituent survey has once again been useful in obtaining the views of those I represent, supplementing personal meetings with as many constituents as possible each year and the many phone calls, letters and telegrams I receive. I believe other Members of Congress may find this survey to be informative also, so I would like to share the results with my colleagues at this time.

[In percent]

	Yes	No	No answer
1. MX Missile: The Reagan Administration has asked Congress for funds to deploy 100 MX missiles in silos in Wyoming and Nebraska, arguing that these new missiles are required to maintain a credible nuclear deterrent. The Administration says that without the MX the Soviets will achieve nuclear superiority and lose all incentive to negotiate a reduction in nuclear weapons. Opponents charge that the MX is a destabilizing, first-strike weapon which will increase the danger of nuclear war; that the missile will be vulnerable based in existing silos; and that it is unnecessary for deterrence since our submarines, bombers, and Minuteman ICMBs already provide a secure retaliatory force.			
Do you favor production and deployment of the MX missile?	37	55	8
2. El Salvador: Since 1980, the United States has spent over a billion dollars on military and economic aid to El Salvador. The Administration is proposing to send an additional $110 million this year to assist the Salvadoran government in its fight against rebel forces, and $86 million in military aid next year. President Reagan, in a recent speech to Congress justifying his aid requests, said El Salvador is vital to U.S. interests. "If we cannot defend ourselves there, we cannot expect to prevail elsewhere," he declared. "Our credibility would collapse, our alliances would crumble, and the safety of our homeland would be put in jeopardy." Critics charge that simply increasing military aid to El Salvador will not resolve the conflict there. They argue that the United States should be doing all it can to encourage a settlement of the civil war through negotiations, which are supported by our allies in the region, and they maintain that the Administration has not been firm enough in insisting on an end to human rights abuses by government security forces.			
Do you agree with President Reagan that maintaining the present government in El Salvador is essential to America's credibility and safety?	36	58	6
Do you think the United States should send American troops into El Salvador if needed to prevent the collapse of the Salvadoran government?	21	74	5
Do you support the Administration's policy of increasing military aid to El Salvador?	35	60	5
3. Immigration Reform: Congress is considering a bill which would control illegal immigration by penalizing employers who hare undocumented workers and by legalizing aliens who can prove they entered the United States before January 1982. This bill is referred to as Simpson-Mazzoli, in reference to its sponsors. Opponents say the Simpson-Mazzoli bill would reward lawbreakers by allowing illegal aliens to remain in this country and to fill jobs needed by American workers. Civil rights advocates contend that the new penalties prohibiting the hiring of illegal aliens would lead to discrimination against Hispanics and other minorities. Business groups oppose the penalties because they do not believe employers should be responsible for enforcing the law. On the other hand, supporters of the reform bill maintain that the legalization program is needed because it is impossible to locate and deport all illegal aliens. They argue that a new law against hiring such aliens would curb future immigration substantially by limiting access to jobs. Advocates also say the Simpson-Mazzoli bill strikes a good balance between civil rights concerns and the need to regain control of America's borders, and that it offers the only real hope for immigration reform this year.			

	Yes	No	No answer
Do you support the Simpson-Mazzoli immigration reform bill?	62	31	7
4. Medicare: The greatest increase in federal spending during the next 10 years will be in Medicare and other federally funded health care programs. The cost of Medicare has doubled in just 5 years from $28 billion to nearly $60 billion, and budget analysts predict it will double again by the end of the decade. Budget experts agree that spending for Medicare and other entitlement programs must be controlled before federal spending can be reduced. These experts predict that because of sharply rising costs, Medicare's hospital insurance fund will be depleted by 1988 unless major reforms are enacted.			
What steps would you favor to control Medicare spending and guarantee that the Medicare fund remains solvent? (Choose as many as you wish.)			
A. Increasing gradually the amount workers contribute to the Medicare fund (now set at 1.3 percent of an employee's gross wages)	49	33	18
B. Increasing the deductible that Medicare recipients pay when receiving health care services	38	40	22
C. Reducing Medicare expenditures by limiting the amount paid to doctors and hospitals for medical treatment	64	20	16
D. Reducing Medicare expenditures by restricting coverage or by increasing the age at which coverage begins	29	47	24
E. Using general tax revenues to finance any future shortfalls in the Medicare fund	47	35	18
5. Budget Deficit: President Reagan's budget will soon result in federal deficits of $200 billion or more annually, the highest in our nation's history. The President opposes all efforts to lower these deficits by increasing taxes or moderating his $1.8 trillion, five-year military spending plan. The President's budget would cut spending next year for education, job training, child nutrition, pollution control and other domestic programs by $2.8 billion, but these cuts would be more than offset by his proposed $35 billion increase in spending for defense. Opponents of the President's tax and budget policies contend that continued high deficits will choke off economic recovery by crowding out private sector borrowing, thus keeping interest rates up and unemployment high. They argue that we must reduce these deficits to keep our economic recovery going, and that we should do this by raising some taxes, holding defense outlays to a reasonable level, slowing the growth of entitlement programs, and carefully evaluating all other federal spending. Congress this year will discuss various plans to lower future deficits, and many members believe that both defense spending restraint and some new taxes are needed.			
Which of the following defense spending proposals do you favor for next year? (Choose one.)			
A. Increasing military spending by $35 billion—10 percent above the rate of inflation—as proposed by President Reagan (Total defense budget: $280 billion)	18	41	41
B. Increasing military spending by $23 billion—5 percent above the rate of inflation—as proposed in the congressional budget resolution (Total defense budget: $268 billion)	23	37	40
C. Freezing military spending at this year's level (Total defense budget: $245 billion)	57	19	24
Which of the following proposals do you favor to raise new revenue and reduce future deficits? (Choose as many as you wish.)			
D. Enacting standby taxes, beginning in 1986, as recommended by the President, including a $5-per-barrel excise tax on oil and a 5 percent surcharge on personal and corporate income taxes (Estimated revenue, 1985–1988: $146 billion)	31	35	34
E. Making the 10 percent personal income tax cut which goes into effect this month temporary, and repealing it in 1985 or 1986 if the economic recovery is strong but deficits remain high (Estimated revenue, 1987–1990: $160 billion)	44	29	27
F. Repealing the tax indexing law. This law is scheduled to go into effect in 1985 and would adjust tax rates to compensate for inflation's tendency to push wage earners into higher tax brackets (Estimated revenue, 1985–1988: $90 billion)	21	48	31
G. Repealing tax cuts scheduled for 1984, including expanded business and investment credits, a larger allowance for foreign earnings, and cuts in the windfall profits tax on new oil and in cigarette and telephone excise taxes (Estimated savings, 1985–1988: $39 billion)	43	29	28
H. Supporting President Reagan's position—making no change in present tax laws—on the assumption that, left alone, the President's "supply-side" tax policy will promote economic recovery and produce lower deficits	33	40	27
6. Natural Gas Prices: In response to natural gas shortages, Congress passed a law in 1978 to promote the search for new supplies by allowing significant price increases for newly discovered gas. The same law continued controls on "old" gas—gas discovered before 1978—so that the average price for the mix of new and old gas would not rise too fast. Because a lot of new gas was discovered, while demand declined, many gas companies are stuck now with contracts forcing them to purchase more new gas than they need. These contracts prevent them from buying the cheaper old gas which would help keep the average price of their gas down. Consumers, as a result, have been hit with soaring gas bills. Faced with an outcry over price increases, the Reagan Administration has proposed deregulating the price of all natural gas, hoping to lower average gas prices. Opponents believe decontrol will only increase prices. Instead, they favor lowering the average price of gas by modifying pipeline contracts so that more old gas may be sold along with higher-priced new gas.			
Which of the following proposals do you favor to control rising natural gas prices? (Choose one.)			
A. Deregulating the price of all natural gas, as advocated by the Reagan Administration	37	32	31
B. Modifying pipeline contracts, as recommended by opponents of natural gas decontrol	58	16	26
7. Family Planning: The Department of Health and Human Services has ordered family planning clinics receiving federal support to notify parents when their teenage children obtain birth control prescriptions. Advocates of family planning have obtained a court order to block the enforcement of this rule. The Department claims its action will encourage family participation in federally supported health programs. Critics say the rule will cause teenagers to avoid family planning programs and lead to a rise in teenage pregnancies and abortions.			
Do you think family planning clinics that receive federal funding should be required to notify the parents of teenagers who receive prescription contraceptives?	29	68	3
8. Hazardous Waste: Congress created a hazardous waste "superfund" in 1980 to pay for the cleanup of chemical dump sites that threaten public health and safety. This $1.6 billion fund, however, will pay for cleaning up only about one-quarter of the more than 400 sites targeted by the Environmental Protection Agency for immediate, emergency cleanup. Some 14,000 dump sites—all of them potentially hazardous—are known to exist. Obviously, much more money will have to be spent. One plan to raise the additional money needed would impose a tax on chemical wastes to pay for waste cleanup and to provide an economic incentive to detoxify or recycle wastes instead of dumping them in the first place. Critics say this new tax would increase the cost of some goods.			
Do you favor taxing the chemical industry to pay for the cleanup of hazardous chemical waste and to encourage waste recycling and detoxification?	93	6	1
9. Federal Parks: The Reagan Administration has halted the acquisition of land for federal parks, including the Santa Monica Mountains National Recreation Area which was established in 1978. Administration officials say that, with deficits high and money tight, government should only maintain those parks already completed. Critics of the Administration's policy say it is short-sighted to halt or delay work on important new parks such as the Santa Monicas since land costs are rising and key parcels are in danger of being lost to development.			
Do you support the acquisition of land to allow the completion of already-authorized federal parks?	73	24	3
10. U.S. Trade: Congress is considering several proposals that would restrict the importation of foreign goods in order to protect American industries and save jobs. One proposal is the automobile "domestic content" bill which would require a substantial portion of U.S. parts and labor to be included in every car sold here. Foreign manufacturers who fail to meet this standard would have to reduce the number of cars and trucks they sell in the U.S. Supporters say the domestic content bill would save 700,000 U.S. jobs. Opponents argue that this trade restriction would drive up prices and actually cause a net loss of U.S. jobs—in other American industries as other nations retaliate by restricting American exports, and among Americans who sell and service imported cars.			
Do you favor passage of the domestic content bill to limit the import of foreign cars?	36	59	5

●

BEN COHEN REMEMBRANCE

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 21, 1983

● Mr. PEPPER. Mr. Speaker, on August 15 I lost a dear friend and the country a great American when Ben Cohen died. Ben was one of the most brilliant men of his generation, a member of President Roosevelt's brain trust who worked selflessly to lift this country out of the depths of the Depression.

I came to know Ben Cohen shortly after I came to the Senate in November 1936. From time to time I met and consulted with him about various aspects of the New Deal and about legislative matters of particular interest to Florida. My close association with Ben began in the summer of 1940. I had suggested rather casually at a press conference that the United States might lend Britain and France some airplanes out of our Air Force to be replaced by airplanes already on order once they became available.

Ben read my comments in the press and invited me to meet with him that evening to discuss our proposition. We spent the evening drafting a resolution which was the first lend-lease resolution introduced into the Congress. Before introducing the legislation I called President Roosevelt's personal secretary and read it to her requesting that she tell the President if I did not hear back from him by noon I would introduce it. When I finished reading it, Miss LeHand said, "My, it would be great if we could get that."

The Foreign Relations Committee of the Senate rejected my resolution. About a week or so later Ben Cohen, Walter Lippmann, Charles Marsh, and I met and drafted another resolution more like the one finally adopted in March 1941. Thereafter I saw much of Ben and worked often with him upon legislative and policy matters during the years that Ben remained active in government.

America should always be grateful that among its citizens at a critical period in the Nation's history was a devout son like Ben Cohen employing his genius in the Nation's service.

Gentle, kind, compassionate, tenacious of purpose, highly devoted to his ideals and extraordinarily brilliant, Ben Cohen was a rare and noble man. Truly, "we shall not see his like again."

Mr. Speaker, I insert the following articles about Ben and his career in the RECORD following my remarks:

BENJAMIN COHEN, KEY NEW DEAL THINKER

Washington.—Cohen and Corcoran—the shy, think-it-though Jew, the outgoing, get-it-done Irishman: It was a team that commanded Washington's attention in the early New Deal and reshaped America's way of doing business.

They were called "the Gold Dust Twins" from a soap adverstising slogan of the day ("Let the Gold Dust Twins do your work"). Or some called them Felix Frankfurter's two chief little hotdogs."

The shy, intellecutual Benjamin V. Cohen, 88, senior partner of this unlikely pairing, died Monday of pneumonia after two weeks in a hospital. He had lived alone, a bachelor with his dog who had been looked in on by friends from his old law firm.

Thomas (The Cork) Corcoran died in 1981. The two had drifted apart ideologically—Mr. Corcoran becoming increasingly conservative—but remained friends all their lives.

When Franklin D. Roosevelt took office in 1933, he said America had nothing to fear but fear itself, but he needed more than hopeful words to revive confidence. He needed ideas and laws.

He turned to Mr. Frankfurter, the Harvard Law School professor who had been supplying Washington with brilliant students since the administration of Woodrow Wilson.

Mr. Frankfurter sent Mr. Cohen and Mr. Corcoran, and together they came up with laws to correct stock market abuses that had wiped out so many novice investors and ways to prime the pump of a dried-up economy (an idea Mr. Cohen got from economist John Maynard Keynes in Europe in the 1920s).

Mr. Corcoran's talent lay in pushing through legislation. He whisked about the Capitol's corridors, arguing, cajoling, pleading or threatening to get lawmakers to line up behind FDR's then-radical ideas. Stocky and with the shoulders of a halfback, he was energetic, ingenious, optimistic, affable. He could play Gilbert and Sullivan on the piano without glancing at the notes; he loved the outdoors and built a weekend cabin in the woods with his own hands.

Mr. Cohen, tall but slouched, was a gentle, sad-faced pessimist content to remain in the background as the meticulous draftsman, the intellectual. He got along on a few hours' sleep and read detectives stories as a diversion from heavy thinking.

Both were gluttons for work. They shared a Georgetown apartment—known as "the little red house on R street"—and often worked all night, figuring out how to overcome objections their bills had provoked the previous day.

Mr. Corcoran liked to boast that he purposely made bills complicated so the average lawyer would miss some of their far-reaching implications, and he made them stronger than he really wanted them to be so his original ideas would survive the watering-down process in Congress.

Together, the two planned the Tennessee Valley Authority, Federal Housing Administration, the first Wage and Hour Law, the Electric Farm and Home Authority. Their masterpiece was a body of law curbing Wall Street's malpractices.

They drafted the Public Utility Holding Company Act of 1935, helped enact it, and as special assistants to the attorney general, defended it against 81 lawsuits brought by holding companies.

Washington lawyer Joseph L. Rauh, Jr., a New Deal disciple of the two, said yesterday that it was Mr. Cohen's idea to transfer 50 old destroyers to help hard-pressed Great Britain against Germany at a time when President Roosevelt was sympathetic but immobilized by national sentiment for strict neutrality.

"Ben was the intellectual leader of the effort to prepare this country to stop Hitler," Mr. Rauh said.

"He was the driving force behind the destroyer deal. He pushed Roosevelt toward greater action. I think the world might not have survived to benefit from what he did in the domestic field if it hadn't been for his activities in the foreign field."

In a speech at a 1977 reunion of New Dealers, Mr. Cohen characteristically turned attention away from himself.

"We were the lucky ones," he said, "caught up by the wise and compassionate leadership of President Roosevelt in the mobilization of the energy experience and knowledge of this great nation to meet its pressing and long-neglected needs.

"For us, it was a time when to be alive was joy and to be young was very heavy."

[From the New York Times, Sept. 5, 1983]

BEN COHEN, A GOOD MAN

(By Joseph P. Lash)

MENEMSHA, MASS.—Benjamin V. Cohen, who died Aug. 16, was a rare man. He and Thomas G. Corcoran were pre-eminent among that "contamination of mischievous cub lawyers," as an anti-New Deal columnist called the men at the heart of Franklin D. Roosevelt's Washington. Ben was as austere, shy and selfless as "Tommy the Cork," as Roosevelt dubbed him, was ebullient and gregarious. They made a team that single-handedly performed for the White House chores of bill-drafting, speech-writing and political strategy now done by hundreds. Tom, who turned to money-making law in 1941, died a few years ago, but Ben, who championed his friend to the very end, remained the selfless, public-spirited jurist—"the best legal brain in Washington."

"The length of a man's life does not count as much as its quality," he once wrote the sorrowing member of a bereaved family. He was himself one of the incorruptibles. At the time of his death, at 88, I had been interviewing him for a "group portrait" I was planning about the New Deal. For years he had been living alone at the Winthrop, an apartment house on Massachusetts Avenue, next to the Brookings Institution. Every day he walked his dog. A lady on his floor brought him his meals. Two fellow New Dealers, younger men, David Ginsburg and Joseph L. Rauh, looked after him, almost forcefully at the end, taking him to the hospital after doctors they consulted insisted that he go, and he refused.

When I started the New Deal book, I asked to see him. I should call when I got in, and if he was well enough he would see me, he replied. He added that he was "monitoring" television and the press, most of whose reporting was superficial. "I am in a fighting mood," he said.

On the appointed day, this tall, gaunt man in ill-matched, slightly baggy clothes, wearing a knitted green wool cap that reminded me of Ichabod Crane, answered the doorbell. Supporting himself on a cane, he led me into his living-room study where tables, chairs, shelves and carpets were stacked with magazines, documents and books. He apologized for the disarray, but as I soon discovered he knew where everything was, down to the paragraph. His books also turned out to be his filing system, with letters, many of historic value, interleaved among the pages. His voice was high-pitched and quavery. It had been the same in the 1950's when, in the United Nations chambers, he expounded the United States position on disarmament—a position, he explained to me, that he had to extract from the Government's military and security agencies. He always had a saving sense of "the need to guard against not only a President's thinking he knows what is good for the country, but against bureaucracies who feel they know what is good for the country."

The dissolution of utility holding companies, the most hotly fought piece of New Deal legislation, was largely his handiwork. He mapped out the strategy of its defense against the utilities' legal onslaught on the bill, led by the eminent John W. Davis, once a Democratic candidate for President. "Everyone in Washington thought that the act was doomed—everyone that is except Cohen," wrote Joe Rauh. But Ben argued its constitutionality before the Supreme Court, which upheld the statute.

He sensed the danger of Hitler early, and, ever the scholar, wanted to take a year off to study foreign affairs. He never was able to take the leave of absence. But when, in 1940 after the fall of France, he heard of Winston Churchill's message to Roosevelt pleading for some World War I destroyers, the memorandum he drafted on the President's right to accomplish the transfer by executive action, together with a tightly reasoned brief along the same lines he produced with Dean Acheson, not yet back in the Government, emboldened the President to act.

He was a staunch supporter of the United Nations. He, along with others, including Eleanor Roosevelt, went to the Kennedy White House in the early years of United States involvement in the Vietnam War to urge that the matter be taken to the world organization, only to be told the United States had decided it could handle the situation better alone. "Had they gone to the United Nations I am sure they would not have gotten what they wanted. But the American people would have had time and opportunity to learn into what a tragic pit they were being asked to leap."

He never abandoned his original vow to use the law for public purposes. He was never appointed to a high bench, as he should have been, and in the last decade of his life when he was asked to cooperate in a fest-schrift in his honor said simply, "It's too late." But up to the end his intimates said of him, as Holmes did of Brandeis, "There goes a good man."

[From the Washington Post, Aug. 18, 1983]

COUNSELOR FOR THE PUBLIC INTEREST

(By Joseph L. Rauh Jr.)

Even in a life as blessed as my own with teachers like Benjamin Cardozo, Felix Frankfurter, A. Philip Randolph, Eleanor Roosevelt and Reinhold Neibuhr, the unceasing wisdom and selfless public spirit of Ben Cohen stand out as an incomparable role model. I am sure I speak for hundreds of men and women, many now departed, whose lives were deeply affected by Ben's teaching in word and deed that working in the public interest is the highest and happiest of callings.

The first time I saw Ben Cohen was in September 1935. He had already made his mark as the author of Roosevelt's laws cleansing the financial markets. Newly enrolled in the New Deal directly from law school, I was assigned to help Ben with the defense of the Holding Company Act he had drafted.

From what I had read in the press, I expected to find a sharp-featured, fast-talking, brash New York lawyer giving orders to a big staff a mile a minute. Instead, there I was looking at a reserved, kindly, sensitive and quiet man who acted as if the acquisition of a "lawyer" just out of law school were the equivalent of Blucher's reinforcement of Wellington at Waterloo.

He told me (his high-pitched voice rising to demonstrate he wasn't always quiet) that "that yellow-belly" John W. Davis was trying an end run with a collusive suit against the Holding Company Act by a bankrupt holding company, and that's the case I was to start working on right away in the next room. What a beautiful learning experience watching Ben outwit Davis at every turn! Scholars of constitutional litigation will look in vain to find a more spectacular legal performance than Ben's victory over Wall Street's best and brightest.

I never worked for Ben in any formal sense after that 1935-36 year on the Holding Company litigation, but somehow I feel I was always working for him the entire 47 years since then. For whether you went to Ben's office to seek his advice or he telephoned to volunteer it concerning some problem or case on which he knew you were working, you always had the feeling he was the guiding spirit of affirmative government—in a true sense the counselor for the public interest.

I remember one day in early 1939 when Irving Levy and I, working as lawyers in the Wage and Hour Division of the Labor Department, faced what we then thought was a pretty monumental problem concerning the enforcement of the law Ben had largely drafted. We told him of our fright as Jews that all the first indictments about to come down under the Wage-Hour law for sweatshop violations of the then 25-cent minimum wage would be of Jewish-owned companies and this would add to the current wave of anti-Semitism.

Like a father comforting two perturbed children, Ben said quietly, "Well, that's fine; you two be the good guys and do the prosecuting and, Irv, you make sure the papers know Joe is Jewish, too."

War was never far off in the late '30s, and no one saw the coming storm more clearly than Ben. I remember his telling Justice Cardozo as early as 1937 that he wished he could take a year off and study world affairs because international disaster was at hand. When Hitler invaded Poland in September 1939, Ben went to war. He became the leader of the group of young government executives and lawyers determined to prepare the nation for the inevitable day of our entry into the war and to keep our potential allies afloat until then.

Possibly his greatest contribution was the destroyer deal. Britain desperately needed our old destroyers, but Congress was reluctant to act. Ben built the case for executive action with meticulous care (he could be a slave-driver to volunteers combing libraries for precedents and arguments) and then sold it throughout the Roosevelt administration. Possibly nothing shows the breadth of his interests and vision better than his ability to turn from the reform of our capitalist system at home to the task of stalemating Hitler's threat to our democracy from abroad.

Ben's foresight on world affairs was not limited to World War II. In the 1950s, when most people didn't know where Vietnam was, Ben used to say there was grave danger of our getting involved in that country. As our involvement escalated, so did his advice to stay out. He would get so worked up on the subject that Dave Ginsburg once suggested we limit Vietnam discussions to 30 minutes at the various dinners we all had together.

Ben's happiest days were in government service. No task was too time-consuming or too hopeless. He and Tom Corcoran had a night male secretary who would type into the wee hours of the morning. Once in a while Ben would sneak out to the late show at the closest movie house (my wife saw him heading for the famous Hedy Lamar "nude" movie), and usually he was asleep by the time the credits were finished. The office joke was that the best way to sleep with Ben was by going to the late show with him.

His wisdom was always available to those who sought or would heed his counsel even after he left the government in the 1950s. But he had no office and wrote little on the subjects about which he knew so much and cared so deeply. Many lawyers sought his association, but he always said no.

Ben was unwilling to apply his talents to representing the interests he had fought in his government days; his head and his heart never forsook the New Deal. He was, to the end, the perfect public interest lawyer.

[From the Washington Post, Aug. 17, 1983]

BENJAMIN V. COHEN

The 15 years from 1932 through 1947 transformed the American government and its place in the world. Through much danger and tribulation, those years turned out well for the country—and, you can add, for much of the world as well. That did not happen automatically through the operation of blind impersonal forces and trends, as elementary history textbooks sometimes suggest, but through the character and intellect of the people who sought to guide that extraordinary change. One of the wisest and most influential among them was Benjamin V. Cohen, who died here Monday at the age of 88.

Some of this country was not far from violent and radical upheaval in the early 1930s. The historic contribution of the New Deal lawyers was to demonstrate that the public already possessed the authority, within the long established traditions of American law and regulation, to recapture control of the public's interests. No one today but the specialists knows anything about the Public Utilities Holding Company Act. That is a sign of its success—it is taken for granted. But in the 1920s speculators had introduced great instability into the American financial economy by developing the practice of pyramiding holding companies and even in 1933, amid the wreckage of their pyramids, they vehemently fought any attempt to control them. The act was important because it showed Americans that their government had both the will and the power to end practices that had been among the most flagrant and visible contributors to the great crash.

With the outbreak of war in Europe and the fall of France, it was clear that Britain was in desperate need of help and that the United States had the strongest possible interest in providing it. Mr. Cohen was at the center of the small group of men who drafted the Lend-Lease Act. Once again political and legal skill found a way, through the law, to meet the unprecedented requirements of a bad moment. In 1947 he was counselor of the State Department in the period when the Marshall Plan was being organized—probably the most valuable idea in American foreign policy in the past 40 years.

At that point he left the government. But he continued to live here, in an apartment on Massachusetts Avenue, and devoted himself to consulting, advising, talking and listening. He lived long enough to see the great legislation of 1933 accepted as essential by the children and grandchildren of the men who at the time had damned its authors as radicals and subversives. He also lived long enough to see the utility industry, and the securities industry, in the hands of people who consider the Holding Company Act and the Securities and Exchange Act to be basic protections of the integrity of their businesses.

It is hard to think of any American of his generation who was more gifted than Mr. Cohen. It is harder to think of any who used his gifts better, in the public service, than he did.●

SUPPORT CONTADORA NATIONS

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

Mr. TORRES. Mr. Speaker, today's Washington Post reports on the decline of interest by this Congress on the crisis in Central America given the new attention to developments in the Middle East and the downing of the South Korean jetliner.

Mr. Speaker, we must not allow ourselves to become diverted in what was a major issue of debate here only 1 month ago. On Monday, I introduced House Joint Resolution 363.

This resolution would provide a sense of the Congress, expressing the support of the U.S. Government for the objectives of the negotiations of the Contadora nations in their pursuit of a 10-point peace plan for the region.

Last month California's senior Senator, Mr. CRANSTON and I traveled to Latin America and met with the leaders of the Contadora nations.

We stand to gain by supporting the Contadora proposals because they are the best hope that would end violence.

We must assert that the administration support the Contadora leaders' goals for the region in promoting progress on human rights, economic development, and evolution toward democracy.

H.J. RES. 363

Expressing the support of the United States Government for the objectives of the negotiations of the Contadora nations, and for other purposes.

Whereas the United States has an important national interest in encouraging peace, stability, and democratic development in Central America;

Whereas the escalating military conflict in Central America threatens these important United States national interests;

Whereas four key Latin American democracies close to the turmoil in Latin America—Colombia, Mexico, Panama, and Venezuela—initiated a regional dialogue in a January 1983 meeting on Contadora Island, Panama;

Whereas leaders of these so-called "Contadora nations" have made significant and substantial progress in subsequent discussions towards agreements on goals for a comprehensive regional peace; and

Whereas the Contadora nations have proposed a ten-point peace plan for the region involving commitments to (1) end all existing warlike situations; (2) freeze existing offensive weapons; (3) agree to control and reduce the present inventory of armaments, with adequate supervisory mechanisms; (4) prohibit the existence of foreign military installations in their territories; (5) provide previous notice of troop movements near a border; (6) provide joint border patrols or international supervision of borders as needed; (7) establish joint security commissions to prevent, and if necessary, to settle border incidents; (8) establish internal control mechanisms to prevent the supply of arms from the territory of any country in the area to another country; (9) build a climate of detente and trust in the area; and (10) coordinate systems of direct communications among the governments in order to prevent armed conflicts and to generate an atmosphere of reciprocal political trust: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(1) the United States Government expresses its full support for the objectives of the Contadora negotiations and for the ten points outlined by the presidents of the Contadora nations; and

(2) the President of the United States should encourage the nations of Central America to give their full support to the Contadora peace process.

SEC. 2. The Secretary of State shall transmit a copy of this joint resolution to the ambassadors to the United States from Mexico, Venezuela, Colombia, and Panama.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, September 22, 1983, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

SEPTEMBER 23

9:00 a.m.
Energy and Natural Resources
Public Lands and Reserved Water Subcommittee
To hold hearings on S. 1090, to establish a National Outdoor Recreation Resources Review Commission to study and recommend appropriate policies and activities to assure the continued availability of quality outdoor recreation.
SD-366

Foreign Relations
Business meeting, to consider measures relating to the war powers resolution and authorizing the continued participation of U.S. Armed Forces in the multinational force in Lebanon, including Senate Joint Resolution 163 and Senate Joint Resolution 166.
SD-419

9:30 a.m.
Finance
Economic Growth, Employment and Revenue Sharing Subcommittee
To hold hearings on the future of U.S. basic industries.
SD-215

Labor and Human Resources
Aging Subcommittee
To hold hearings to review certain provisions of the Age Discrimination and Employment Act which affect Americans working abroad.
SD-430

10:00 a.m.
Joint Economic
To resume hearings on job training needs of American workers.
2203 Rayburn Building

SEPTEMBER 26

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on numerous tax proposals, including S. 120, S. 1397, S. 1584, S. 1814, S. 1815, and S. 1826.
SD-215

10:00 a.m.
Judiciary
Immigration and Refugee Policy Subcommittee
To resume hearings to review the progress of this year's refugee resettlement program.
SD-226

Joint Economic
To resume hearings on job training needs of American workers.
2203 Rayburn Building

SEPTEMBER 27

9:00 a.m.
Office of Technology Assessment
The Board, to hold a general business meeting.
H-227, Capitol

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SD-253

Judiciary
Constitution Subcommittee
To hold hearings on S. 141, to provide a special defense to the liability of political subdivisions of States under section 1979 of the Revised Statutes (42 U.S.C. 1983) relating to civil actions for the deprivation of rights.
SD-226

10:00 a.m.
Agriculture, Nutrition, and Forestry
Soil and Water Conservation, Forestry and Environment Subcommittee
To hold hearings on S. 843, to reimburse farmers for the costs of applying conservation practices to acreage diverted under an acreage limitation program for the 1982 through 1985 crops of wheat, feed grains, upland cotton, rice, and soybeans; S. 998, to establish a conservation program for erosion-prone cropland; and S. 1053, to use surplus agricultural commodities to make supplemental payments-in-kind (PIK) to producers who divert acreage from production of agricultural commodities and devote such acreage to long-term conservation uses.
SR-328A

Commerce, Science, and Transportation
Merchant Marine Subcommittee
To hold hearings on S. 1624, to reserve up to 20 percent of bulk commodity imports and exports for U.S.-flag ships, to allow a tax credit for increased shipping costs, and to establish a capital construction fund for building shipyards; S. 1616, to clarify laws regarding transportation of Government cargoes on U.S.-flag vessels; S. 206, to increase the Secretary of Transportation's role in administering cargo preference laws; and S. 188, to require all U.S. mail shipped overseas to be carried on American vessels.
SR-253

Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Nuclear Regulation Subcommittee
Business meeting, to resume markup of S. 893 and S. 894, bills to provide an effective and efficient licensing and regulatory process for the siting, construction, and operation of nuclear powerplants, and on proposed legislation authorizing funds for fiscal years 1984 and 1985 for certain programs of the Nuclear Regulatory Commission.
SD-406

2:00 p.m.
Appropriations
Business meeting, to mark up proposed legislation appropriating funds for fiscal year 1984 for the Departments

of Labor, Health and Human Services, and Education, and proposed legislation appropriating funds for fiscal year 1984 for foreign assistance programs.
SD-192

SEPTEMBER 28

9:30 a.m.
Banking, Housing, and Urban Affairs
Consumer Affairs Subcommittee
To hold hearings on S. 573, proposed Fair Deposit Availability Act.
SD-538

*Judiciary
Juvenile Justice Subcommittee
To resume oversight hearings to review Federal assistance to State and local victims of crime assistance programs.
SD-226

Select on Intelligence
Legislation and the Rights of Americans Subcommittee
To hold closed hearings on intelligence matters.
S-407, Capitol

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Business meeting, to resume markup of S. 1354 and H.R. 3103, bills to provide emergency relief for disaster-damaged roads administered under the Federal-aid highway emergency relief (ER) program; and S. 452, to establish public buildings policies for the Federal Government, to establish the Public Buildings Service in the General Services Administration, and to provide for the authorization of funds for the construction, renovation, and maintenance of public buildings and related activities of the Public Buildings Service.
SD-406

Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings to investigate alleged involvement of organized crime and mismanagement of funds in the Hotel and Restaurant Workers Union (HEREIU).
SD-342

Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold hearings on proposed legislation designating funds received from the sale of excess Federal real property to reduce the national debt.
SD-138

11:00 a.m.
Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold oversight hearings on certain activities of the General Services Administration regarding the disposal of surplus Federal real property.
SD-138

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
SD-226

Select on Intelligence
To resume hearings in closed session on S. 1324, to regulate public disclosure of Central Intelligence Agency information.
S-407, Capitol

SEPTEMBER 29

9:30 a.m.
Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To resume hearings on S. 1821, proposed Secondary Mortgage Market Enhancement Act.
SD-538

Rules and Administration
To hold hearings to discuss media and the regulation of campaign finance.
SR-301

10:00 a.m.
Commerce, Science, and Transportation
Merchant Marine Subcommittee
To resume hearings on S. 1624, to reserve up to 20 percent of bulk commodity imports and exports for U.S.-flag ships, to allow a tax credit for increased shipping costs, and to establish a capital construction fund for building shipyards; S. 1616, to clarify laws regarding transportation of Government cargoes on U.S.-flag vessels; S. 206, to increase the Secretary of Transportation's role in administering cargo preference laws; and S. 188, to require all U.S. mail shipped overseas to be carried on American vessels.
SR-253

Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 1811 and H.R. 71, bills to authorize and direct the Secretary of the Interior to engage in a special study of the potential for ground water recharge in the high plains States.
SD-366

Environment and Public Works
Regional and Community Development Subcommittee
To resume hearings on S. 1525, authorizing funds through fiscal year 1986 for administrative expenses of the Federal Emergency Management Agency and for emergency and disaster relief assistance, and to revise procedures concerning State requests for relief assistance.
SD-406

Governmental Affairs
Permanent Subcommittee on Investigations
To continue hearings to investigate alleged involvement of organized crime and mismanagement of funds in the Hotel and Restaurant Workers Union (HEREIU).
SD-342

Judiciary
Business meeting, to consider pending calendar business.
SD-226

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on a Presidential commission report on excellence in education, and to review Federal and State efforts to impose higher standards in education.
SD-430

Joint Economic
Economic Goals and Intergovernmental Policy Subcommittee
To hold hearings on certain economic issues relating to the Soviet Union.
2203 Rayburn Building

2:00 p.m.
Judiciary
To hold hearings on the nomination of Sherman E. Unger, of Ohio, to be U.S. Circuit Judge for the Federal Circuit.
SD-226

SEPTEMBER 30

9:00 a.m.
Energy and Natural Resources
Public Lands and Reserved Water Subcommittee
To hold hearings on S. 837, to designate certain lands in the State of Washington as wilderness.
SD-366

9:30 a.m.
Finance
Oversight of the Internal Revenue Service Subcommittee
To hold hearings on S. 1262, to clarify and expedite Internal Revenue Service audits of religious organizations.
SD-215

10:00 a.m.
Environment and Public Works
Water Resources Subcommittee
Business meeting, to consider S. 865, to provide for the operation, maintenance, and construction of water resource projects; and S. 970, to authorize funds through fiscal year 1988 for maintenance dredging and to require non-Federal interests to pay for 50 percent of the annual Federal costs to dredge deep-draft channels and harbors.
SD-406

OCTOBER 3

9:30 a.m.
Finance
Economic Growth, Employment and Revenue Sharing Subcommittee
To resume hearings on the future of U.S. basic industries.
SD-215

10:00 a.m.
Joint Economic
Agriculture and Transportation Subcommittee
To hold hearings on issues relating to certain changes in the telecommunications industry.
SD-138

OCTOBER 4

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on S. 764, proposed Air Travelers Security Act.
SR-253

Labor and Human Resources
Labor Subcommittee
To hold hearings on S. 19 and S. 918, bills to revise current Federal pension law with respect to the rights and benefits of working and nonworking women, and the substance of S. 372, to promote interstate commerce by prohibiting discrimination in the writing and selling of insurance contracts.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Finance
Social Security and Income Maintenance Programs Subcommittee
To resume hearings on S. 1691, to restructure the administration of the child support enforcement program, and a related proposal, S. 1708.
SD-215

Labor and Human Resources
Family and Human Services Subcommittee
To resume oversight hearings on the breakdown of the traditional family unit, focusing on the role of Government.
SD-628

11:00 a.m.
Finance
Social Security and Income Maintenance Programs Subcommittee
To resume hearings on S. 1691, to restructure the administration of the child support enforcement program, and a related proposal, S. 1708.
SD-215

OCTOBER 5

9:30 a.m.
Labor and Human Resources
To hold hearings to review human resources implications in Job Corps reform.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Nuclear Regulation Subcommittee
Business meeting, to resume consideration of S. 893 and S. 894, bills to provide an effective and efficient licensing and regulatory process for the siting, construction, and operation of nuclear powerplants, and on proposed legislation authorizing funds for fiscal years 1984 and 1985 for certain programs of the Nuclear Regulatory Commission.
SD-406

Judiciary
Courts Subcommittee
To hold hearings on S. 1706, to provide for the positive identification of persons holding identification documents.
SD-226

Judiciary
Administrative Practice and Procedure Subcommittee
To hold hearings on proposed legislation to authorize compensation for those citizens and resident aliens of the Aleutian Islands who were interned, detained, or forcibly relocated by the U.S. Government during World War II.
SD-628

Joint Economic
To hold hearings on the emerging economics of agriculture.
SD-138

OCTOBER 6

9:30 a.m.
Energy and Natural Resources
Energy Conservation and Supply Subcommittee
To hold hearings on S. 1366, to implement the recommendations of the Interim Report of the Northern Mariana Islands Commission on Federal Laws, and to revise certain provisions of the revised Organic Act of the Virgin Islands and the Organic Act of Guam; and S. 1367, to repeal certain provisions of law relating to the territories and insular possessions of the United States.
SD-366

Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

10:00 a.m.
Environment and Public Works
Business meeting, to consider S. 23, S. 532, and S. 1330, bills to develop long-term job opportunities in public works.
SD-406

Joint Economic
To resume hearings on job training needs of American workers.
SD-138

OCTOBER 7

9:30 a.m.
Joint Economic
To hold hearings on the employment/unemployment statistics for September.
SD-106

OCTOBER 17

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To hold hearings to review environmental research and development programs.
SD-406

OCTOBER 18

10:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold hearings on S. 1634, to repeal certain provisions of the Federal Coal Leasing Act Amendments of 1976.
SD-366

Judiciary
Security and Terrorism Subcommittee
To hold hearings to examine the influence of communism in liberation theology.
SD-226

Judiciary
Administrative Practice and Procedure Subcommittee
To resume oversight hearings to provide indemnification to Government contractors against the risks of catastrophic accidents and noncatastrophic accidents for which the Government is primarily responsible.
SD-562

Labor and Human Resources
Alcoholism and Drug Abuse Subcommittee
Business meeting, to mark up S. 503, to make it unlawful to manufacture, advertise, distribute, or possess a drug which is an imitation of a controlled substance.
SD-628

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume oversight hearings on vocational education programs administered by the Department of Education.
SD-430

OCTOBER 19

9:00 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

9:30 a.m.
Labor and Human Resources
To hold hearings to review Federal and State efforts to impose higher standards in education.
SD-430

10:00 a.m.
Judiciary
Security and Terrorism Subcommittee
To continue hearings to examine the influence of communism in liberation theology.
SD-226

OCTOBER 20

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To hold hearings on proposed legislation to improve and clarify the employee retirement income security program.
SD-430

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
SD-406

Labor and Human Resources
Aging Subcommittee
To hold hearings to review certain programs for older veterans.
SD-628

OCTOBER 21

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To hold hearings on ground water contamination.
SD-406

Judiciary
Courts Subcommittee
To hold hearings on S. 1581, to grant congressional approval to the Central Interstate Low-Level Radioactive Waste Compact.
SD-226

OCTOBER 25

9:30 a.m.
Governmental Affairs
Oversight of Government Management Subcommittee
To hold oversight hearings to review computer security in the Federal Government and the private sector.
Room to be announced

Labor and Human Resources
To resume oversight hearings on alleged illegal sales of union memberships or books to unqualified welders by officials of local chapters of the International Brotherhood of Boilermakers, Iron Shipbuilders, Blacksmiths, Forgers & Helpers.
SD-430

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume oversight hearings on vocational educational programs administered by the Department of Education.
SD-628

OCTOBER 26

9:00 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

9:30 a.m.
Governmental Affairs
Oversight of Government Management Subcommittee
To continue oversight hearings to review computer security in the Federal Government and the private sector.
SD-628
Labor and Human Resources
To hold hearings to review volunteer initiatives in health.
SD-430

OCTOBER 27

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold oversight hearings on Federal arts policy.
SD-430

NOVEMBER 2

10:00 a.m.
Labor and Human Resources
To resume hearings to review Federal and State efforts to impose higher standards in education.
SD-430

NOVEMBER 3

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To hold hearings on proposed legislation to revise certain provisions of the Federal Employees Compensation Act.
SD-430

NOVEMBER 9

10:00 a.m.
Labor and Human Resources
To resume hearings to review Federal and State efforts to impose higher standards in education.
SD-430

NOVEMBER 15

10:00 a.m.
Labor and Human Resources
Aging Subcommittee
To hold hearings to redefine old-age provisions contained in the Older Americans Act.
SD-430

NOVEMBER 16

9:00 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

9:30 a.m.
Labor and Human Resources
To hold hearings to review the human resources impact of the U.S. Supreme Court's legislative veto decision.
SD-430

NOVEMBER 29

10:00 a.m.
Labor and Human Resources
Aging Subcommittee
To hold hearings to review targeted scarce resource provisions of the Older Americans Act.
SD-430

NOVEMBER 30

9:30 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

DECEMBER 6

10:00 a.m.
Labor and Human Resources
Aging Subcommittee
To hold hearings to review long-term care policy provisions of the Older Americans Act.
SD-430

CANCELLATIONS

SEPTEMBER 22

10:00 a.m.
Governmental Affairs
Business meeting, to consider recommendations to the Budget Committee with regard to budget reconciliation requirements imposed by House Concurrent Resolution 91, revising and replacing the congressional budget for the U.S. Government for fiscal year 1983 and setting forth the congressional budget for the U.S. Government for fiscal years 1984 and 1985.
SD-342

SEPTEMBER 23

9:30 a.m.
Judiciary
Constitution Subcommittee
To hold hearings on Senate Joint Resolution 26, proposing an amendment to the Constitution authorizing the President to disapprove or reduce an item of appropriations.
SD-226

SENATE—*Thursday, September 22, 1983*

(Legislative day of Monday, September 19, 1983)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The PRESIDENT pro tempore. Our prayer this morning will be delivered by the Reverend Dr. Paul Currie, minister of the First Presbyterian Church at Caruthersville, Mo. He is being sponsored here by Senator JOHN C. DANFORTH. He comes from the Eighth District of Missouri, of which Mr. EMERSON is the Congressman.

PRAYER

The Reverend Dr. Paul Currie, minister, First Presbyterian Church, Caruthersville, Mo., offered the following prayer:

Let us pray.

Almighty God, we gratefully acknowledge our debt to You and humbly acknowledge our dependence on You. We seek Your guidance of the Senate trusting in Jesus' promise that whoever seeks finds.

O God of peace, we pray for peace—for the coming of the day when nations shall beat their nuclear swords into plowshares and shall not learn war any more. In these tense and troubled times when the way to peace is confusing and complicated, show us the way and give us the will.

Just God, in the face of countless competing interests, help this Senate to be just toward all. And, O God, give all of us special compassion toward those who are weak.

Our Father, we pray for our Senators knowing that they have their needs as all of us do. Assure them of Your love and Your all-sufficient grace. In Jesus' name, we pray. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE REVEREND DR. CURRIE

Mr. STEVENS. Mr. President, on behalf of the Senate, I thank the Reverend Dr. Paul Currie for those words of encouragement to Members of the Senate.

SENATE SCHEDULE

Mr. STEVENS. Mr. President, today after the recognition of the two leaders under the standing order and two special orders, the Senate will have a period for the transaction of routine morning business not to extend beyond the hour of 12 noon. It is the intention of the leadership to proceed at that time to the consideration of S. 1342, the Department of State authorization bill, followed by consideration of S. 869 the Export-Import Bank bill.

The majority leader is hopeful the Senate will complete action on these measures in a timely manner today.

The majority leader has described, on numerous occasions during this past week, the work that is before us before the October break. Indeed, Mr. President, my staff calls it a heavy legislative menu that must be completed not only prior to our break, but a great portion of it prior to the end of the fiscal year, which ends Friday, September 30.

THE U.S. COAST GUARD

Mr. STEVENS. Mr. President, the U.S. Coast Guard has had responsibility for the security and safety of our navigable waters since 1790. Today the Coast Guard has a complex set of missions. These include search and rescue, boating safety, aids to navigation, merchant marine safety, environmental law enforcement, and port safety. The Coast Guard has done a remarkable job in discharging these complex and far flung duties with a relatively small number of personnel and a limited budget.

The role of the Coast Guard is particularly important in Alaska. In a State with a coastline longer than that of the contiguous 48 States, a small and scattered population, and extreme weather and water conditions, Alaskans depend on the Coast Guard to protect life and property on the water. For that reason, Alaskans are very concerned about the continued vitality and effectiveness of the Coast Guard.

I am concerned that increasing demand for existing or new services coupled with rapidly aging vessels and equipment may soon impede the ability of the Coast Guard to respond whenever and wherever needed. These services are too important to allow this to happen.

An excellent article on this problem entitled "Today's Coast Guard: A Study in Insufficiency," by Vincent C. Thomas, Jr. was recently published in the August 1983 issue of Sea Power. I recommend this article to all those who have an interest in maintaining the safety and security of our navigable waters.

With that in mind, Mr. President, I ask unanimous consent that the text of this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TODAY'S COAST GUARD: A STUDY IN INSUFFICIENCY

(By Vincent C. Thomas Jr.)

"USCG traditions stand alongside the finest and proudest of the nation. They are worthy of 'protection.' They are known and respected . . . and emulated . . . by maritime nations and mariners around the world. They reflect the very fiber of American character."

"The last thing the USCG needs is yet another study. Twenty-five were done in the last year or two. Responding to studies is absorbing a massive amount of time that could be spent on solving the problems whose symptoms lead to studies. Please—no more!"

These two quotations from the Coast Guard's response to yet another study of its roles and missions effectively describe the situation in which the Coast Guard finds itself today: a proud service which simply hopes to continue to serve the nation, as it has most ably for 193 years, yet is beset from all sides by well-meaning agencies which can't agree on what the Coast Guard is now and what it should be in the years to come.

A KEY QUESTION FROM NACOA

The prestigious National Advisory Committee on Oceans and Atmosphere (NACOA), which conducted the latest study, asks the key question that many in the Coast Guard and the general public also ask: "Why is it that such a relatively small agency, employing only 45,000 and operating on less than $2 billion a year, somehow finds itself the subject of so many studies?" The committee's answer: "One reason, of course, is that the Coast Guard sounded the alarm that—all other things being equal—increasing duties, rising operating costs, and decreasing resources presented an unbalanced equation. Another reason for the scrutiny, we believe, is that the Coast Guard is a governmental conglomerate charged with a mixed bag of missions: military and civilian, regulatory and service-oriented, lifesaving and law-enforcing. The Coast Guard's complexity contributes to its vulnerability."

The NACOA study and the Coast Guard's response, considered together, indicate that there is a sizable gap between the Coast Guard's view of the importance of its various missions and the views of those outside the service. The Coast Guard's response to NACOA's comments on search and rescue (SAR) missions illustrates that gap. Said the Coast Guard: "Categorizing a 'non-emergency' [SAR] assist as 'convenience' is misleading. . . . A person stranded in an inoperative boat which is anchored in sheltered water is not usually in any danger of losing his or her life . . . but he or she can be

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

subjected to considerable hardship if not assisted. Unlike being in an automobile that has broken down, there is no way to walk away from a boat, and there is often no shelter from the elements."

Given this disparity of views and its potential impact on Coast Guard funding, people, resources, missions, and responsibilities, perhaps the next question is: How is the Coast Guard faring?

The quick answer is that the multi-mission service appears to have survived the stresses and strains of the last five turbulent years without undue lasting hardship. Further, it is operating at the moment with somewhat newer resources, both at sea and in the air, than it has had available for many years. It has few "people" problems. Its leadership is quietly impressive and highly professional. Finally, and perhaps most important in the long run, there appears to be a far greater degree of public appreciation for what the Coast Guard does, and why.

DISQUIETUDES AND INSUFFICIENCIES

That is the positive side. Offsetting those plus factors—more than offsetting them in some areas, in fact—are certain nagging disquietudes and insufficiencies. What follows is a brief discussion of some of the more important factors, both negative and positive, affecting the Coast Guard today—contributing to but at the same time delimiting in certain respects its war and peace capabilities.

Personnel

At the moment the Coast Guard finds itself in an excellent position with regard to people. There are no major difficulties with enlistment and retention remains high. However, Coast Guard leaders have no illusions about the future. They know that, with a declining pool of potential recruits, competition for new enlistments will become keener and that the need for skilled personnel in the civilian labor market will provide lucrative opportunities for those who have learned their trades while in uniform. The Coast Guard has managed to meet its enlistment needs despite cutbacks of recruiting personnel during last year's tight-money crisis and despite higher enlistment standards—the depressed civilian job market helped to counter the negative results of those two factors. However, it is doubtful that the Coast Guard—or any of the armed services—will continue to be so fortunate in the immediate future.

In time, the problems of acquiring authorization for additional personnel and of recruiting those personnel must be faced. As Adm. James S. Gracey, the Coast Guard's Commandant, observes: "There is nothing more difficult today than adding people to the federal payroll." Certainly the Navy found that out earlier this year, when Congress balked at authorizing and funding the personnel needed to man the many new ships now joining or soon to join the fleet. The same kind of problem, albeit on a lesser scale, faces the Coast Guard. Additional ships and aircraft are on the way and they must be manned. But a higher USCG personnel ceiling has not yet been set.

And then there are the reserves—or, in the Coast Guard's case, a lack of reserves. Surprisingly, at a time when Congress has moved or is moving to beef up reserve strength across-the-board in the other services, the Coast Guard has just 12,000 reserves, only 55% of its mobilization requirements. Does it need more? Obviously. And Gracey, the only Commandant in recent memory to serve tours as both Atlantic-area commander and Pacific-area commander, has had far more opportunity than most to see firsthand how much reserve forces contribute to overall Coast Guard readiness and capability. Gracey describes reserves as "full members of the family"—a family that is involved 365 days of the year, whether the nation is at war or at peace, in carrying out its mission.

Gracey would like to have more regular personnel and more reserves, but the dollars to pay for both are hard to come by.

Meanwhile, to maximize the efficiency and productivity of its most valuable asset, the Coast Guard men and women now on active duty, the Coast Guard has begun a personnel evaluation program radically different from those traditionally used by the services. Rather than looking only at an individual's performance while aboard ship (or on duty at a shore station), the new program concentrates on the individual"s day-in, day-out, year-round worth to the service—the term "worth" specifically including his or her off-duty behavior. Is a petty officer an inspiring leader while on duty but a boozer once he doffs his uniform? The Coast Guard wants to know, so that it will have an understanding of how well he can be counted upon in event of emergency. In contrast, is a quiet, reliable, but perhaps uninspiring individual a solid contributor to his community and to the reputation of his service? The Coast Guard wants to know that, too. In short, the Coast Guard is striving to learn what the whole person is like, not just the on-duty person, and what his potential is for a long-term, constructive contribution to the Coast Guard as a vital, dynamic, and constantly evolving organization.

The Coast Guard is more justified, perhaps, in embarking upon this kind of personnel appraisal than the other services would be. Coast Guard personnel usually have more contact, both routinely and in emergencies, with the general public than do the members of any of the other services. A senior Coast Guard petty officer may be responsible, for example, for repairing an inoperative aid to navigation relied upon heavily by boaters; he may head a force cleaning up an oil spill threatening a local beach; he may be assigned to monitor the rise of a rain-swollen river and work side by side with his neighbors to fill sandbags to keep the floodwaters away; and he might be in charge of a crew fighting its way through pounding surf to save the occupants of an overturned sailboat. And those are just a few of the ways a Coast Guardsman can come into direct contact with the local citizenry.

The new evaluation program is a bold step forward, yet one that may be long overdue. It also might well be one that could precipitate a hue and cry from those who would contend that an individual's privacy is being intruded upon. But there is no arguing with the fact that if this system results in putting the right man or woman in the right place where he or she can respond at the right time, everybody wins.

Coast Guard officials say feedback from those with whom Coast Guard personnel come in contact in their many endeavors "would be most welcome." Not only would such feedback provide yet another means of ascertaining whether the right personnel have been correctly assigned, but when the feedback is positive in nature it also would be a tremendous morale booster.

Operating resources

Here the Coast Guard is undergoing a facelift. Four new 270-foot cutters built by Tacoma (Wash.) Boatbuilding Co., soon will be joining the fleet, and the first of a group of nine being constructed in Rhode Island by Robert E. Derecktor Corp., will be launched shortly. Thanks to the impetus given to the Coast Guard's drug-interdiction mission by President Reagan and Vice President Bush, acquisition of three surface effect ships was expedited dramatically. Two have been in full operation for several months already; they are the only surface effect ships now used by any of the U.S. maritime services.

The Coast Guard also will acquire six to eight new patrol boats of a type not yet determined. Funds for their acquisition were included among $300 million appropriated by Congress last year for the Defense Department but earmarked for the Coast Guard. One of the conditions attached to the patrol boat acquisition is that the craft must have a hull form already proven by use in a military or police role. Proposals from industry for construction of the craft arrived at Coast Guard headquarters last month and are currently being evaluated. (The process will be time-consuming; the average *weight* of the proposals is said to be 50 pounds.)

A SWATH (small-waterplane-area twin-hull) craft also is being designed by the Coast Guard. Gracey is particularly enthusiastic about the SWATH because of its stability at sea and the resulting decrease in crew fatigue.

In the air, because of the lack of modernization over the last couple of decades, what the Coast Guard is receiving now in the form of brand-new assets is particularly note-worthy. Last October the first of 41 HU-25 Guardian aircraft was flown operationally; it was the first new USCG aircraft since the 1960s. Later, in March, the last HU-16 Albatross, an ancient seaplane the first model of which was built in 1949, was flown for the last time. Eighty-eight of these reliable old birds served the Coast Guard with distinction during the past three decades plus.

The Guardian is an unusually sophisticated patrol aircraft, highly automated and capable of use in a variety of missions. Enthuses one of its supporters: "Comparing the Guardian with its predecessors is like drawing a comparison between a Z-car and a Model-T Ford!"

A newer version of another magnificent old workhorse, the C-130 Hercules, will join the Coast Guard ranks later this year. These new patrol aircraft will have an electronics capability vastly superior to that of their predecessors, as well as greater fuel capacity, speed, and range.

In October, still another new aircraft will arrive on the scene—the HH-65A Dolphin helicopter, the Coast Guard's new short-range recovery aircraft. The HH-65A replaces another veteran of more than two decades of service, the HH-52A Sea Guardian. The Dolphin, like the other two newcomers to Coast Guard air, has a state-of-the-art avionics system that will contribute tremendously to its much-improved capabilities. It, too, will be faster than its predecessor, with greater range and fuel capacity.

Maintenance

Even as the Coast Guard acquires new hardware assets, it still must struggle to find ways and means of keeping its older assets afloat and in the air. For that reason,

the USCG soon will embark on a FRAM (fleet rehabilitation and modernization) program to standardize equipment aboard its 378-foot cutters. The FRAM program is reminiscent of similar Navy programs during and after the Korean War to prolong the lives of WWII destroyers in the absence of funds to build new ones. New ships obviously would be better, but the FRAM program will add years—if not complete modernity—to the lives of the large cutters.

A lack of adequate spares still plagues the Coast Guard. Gracey aptly describes the USCG's collection of ships and aircraft as a "potpourri." Finding parts for some of the more ancient craft often can be likened to finding a needle in a haystack; some spares, in fact, must be custom-manufactured to fill particular needs, and that problem can only worsen as long as the older ships and aircraft stay in service.

There are additional maintenance frustrations in still another area—ship overhauls. The Coast Guard had hoped, to minimize the separation of crews from their families, to undertake the majority of its overhauls in the homeport areas of the ships being overhauled. That laudable goal already has proven to be for the most part unattainable, since it has not been possible to find enough shipyards in homeport areas either able or willing to do the work. Part of the problem lies in the low volume of work available, part in its irregularity, and still another part, believes Gracey, in the unwillingness of many yards—because of paperwork requirements, slow payment, and other frustrations—to undertake small government projects.

Research and development (R&D)

The Coast Guard is on the way up in this vital area after having sustained sharp budget cuts in the recent past that reduced the service's overall R&D effort and resulted in the loss of sizable numbers of talented civilian employees. Now not only does the budget contain more R&D dollars, but there is also a clear determination on the part of Coast Guard leadership to make R&D pay both long- and short-term dividends. Asserts Gracey: "We are bringing more civilians aboard, and also are making it clear that we are willing to take risks in R&D. And we're not going to sit back and wait for the ultimate solution."

What the "ultimate solution" is for the law enforcement mission has yet to be determined. There appears to be recognition, however, that, despite the upcoming influx of new equipment previously described, the Coast Guard still lacks enough resources, and enough of the right kind of resources, for certain key missions, notably drug interdiction. The NACOA study recommends that, "in the long term" and assuming "a continuing high priority for anti-drug efforts," the Coast Guard be given "sufficient resources to handle this effort without adverse effect on its other missions."

The Coast Guard was fortunate in being able to acquire the three surface effect ships—two of which were available almost immediately—in a matter of just months. But how often will that type of miracle occur? What prototypes are being developed and tested now that could be the first of a class tomorrow? With the possible exception of a single modified 200-ton surface effect ship (the only one in existence) being tested by both the Navy and Coast Guard, the answer is, "None." That is a worrisome situation.

Third World involvement

The Coast Guard has long been involved in international activity of various kinds, not only as a wartime partner of the U.S. Navy but also on missions in the Antarctic and associated with the international ice patrol, to cite but a few examples. Its unique abilities have in fact been recognized and emulated throughout the maritime world. Of late there has been a new development: requests from African nations for assistance in establishing and improving their own fledgling coast guards.

The door to such involvement, already opened by such duties as the operation of a LORAN (long-range [electronic] aid to navigation) station in Liberia, was opened even wider by a USCG training team that worked in Sierra Leone. The team, headed by Lt. Robert C. Eccles, impressed those with whom it worked directly, as well as the officer who commands all of Sierra Leone's forces and U.S. State Department officials assigned to Sierra Leone. From that beginning came invitations for Gracey to extend an already-scheduled trip to Liberia to include visits to Sierra Leone and other African countries. The upshot has been the establishment of closer relations with all of the nations involved, a development which in the long run could be of immeasurable benefit in improving and standardizing maritime practices, regulations, and cooperation worldwide.

OF RESOURCES AND RESPONSIBILITIES

During the terms of office of the last three Commandants, Adms. Owen Siler, John Hayes, and Gracey, the Coast Guard has gone from a service that loyally and almost automatically responded "Aye, aye, sir" when called upon to fulfill ever-increasing responsibilities with resources lessening in capability to one that, although just as loyal, has made it clear that—for the country's sake, if not its own—it will make itself heard if and when it finds its responsibilities are near to overtaxing its resources.

Hayes did much to awaken the executive branch, the Congress, and the public to Coast Guard problems when he warned that threatened budget cuts would result in sharp curtailment of search and rescue operations. And suddenly Congress—not wanting to contend with irate constituents who rely heavily upon the Coast Guard—managed to find funds to ensure that those SAR missions would continue. Gracey, although perhaps not as conspicuously combative as his immediate predecessors, also does not hesitate to make known what will happen if ill-considered budget cuts are made, if potentially damaging reductions by well-meaning study panels are implemented, and if the professionalism of his service is endangered by those who apparently don't understand what "multi-mission" means.

But no matter how able—and how forthright—the USCG's leadership might be, the Coast Guard is in a sense threatened by those seemingly endless studies that manage to pick it apart, but somehow just don't seem to know how to put in back together. In those studies two themes are dominant: (1) If certain Coast Guard responsibilities appear to be secondary, nonemergency-type missions, they should be turned over to civilian agencies on a contract basis. (2) The amount of time the Coast Guard devotes to various missions should be quantified, and if percentages of time spent on certain functions are below a desired norm, those functions should be eliminated or transferred to other agencies.

A case in point in NACOA's discussion of the use of buoy tenders in the national aids to navigation program. NACOA believes that "10 percent to 16 percent utilization of such major capital equipment is unusually low when compared to typical industry use of comparable equipment." Other comments of a similar nature were made by NACOA, with emphasis on similarly esoteric econometric data rather than on the relationship of sometimes ancillary duties to the overall Coast Guard mission.

"SHIPS MUST OPERATE"

The Coast Guard's responses to such contentions—and to the often accompanying recommendations for transfer of certain USCG functions to the private sector or to other government agencies—point to the serious problem it has in bringing about an understanding that the "whole" Coast Guard mission is somewhat more than the sum of its component parts and that there is, accordingly, a continuing need for involvement of Coast Guard people in tasks which in private industry might be "farmed out" to subcontractors.

Asserts the Coast Guard: "There is an important training factor in buoy tender operations. But it cannot be met by having just a few tenders in operation. Furthermore, gaining professional experience—and keeping it sharp—are different matters. Buoy tenders provide superb command-at-sea experience for mid-level officers. Because of the work they do, they also provide unparalleled professional experience for junior officers and crew alike. To get that experience, ships must operate; they cannot be in mothballs, or sit idly while others do routine work. . . . Tenders and their military crews also perform other USCG missions and meet regional emergency needs—like floods—as required. The effect of losing that resource and the flexibility of military personnel to respond quickly and effectively whenever and wherever needed should not be taken lightly. It is doubtful economic benefit can be shown for NACOA's proposal, all things being considered, but even if it were shown, the decision should not rest on economics alone. The national interest transcends economics."

A superb example of what the Coast Guard is seeking to impart—the importance of honing an individual's skills across a wide spectrum—is the previously mentioned Lt. Eccles, whose leadership, sound basic knowledge, and diplomatic presence led to such a warm response in Sierra Leone. Eccles, 1983 winner of the Navy League's Capt. David H. Jarvis Award for Inspirational Leadership and Professional Competence, also was cited for his operational competence in time of crisis when a civilan airliner slid off an icy runway at Boston's Logan Airport into the sea. The SAR procedures he initiated while serving as operations duty officer translated directly into the saving of lives.

At this juncture, if indeed the Coast Guard is alive and well, it would appear prudent for those outside the Coast Guard who are charged with the responsibility for its well-being to expend more effort in ascertaining what resources the Coast Guard needs to keep it that way, rather than in dissecting it once again without really determining why it continues to function as well as it does.

At the same time, it would behoove the Coast Guard itself to speak out more loudly and more persuasively, across-the-board and at levels other than the top, to what it believes it needs, so that the public it serves

every day of the year can better support those requirements.

Gracey himself is obviously doing his utmost to make public the Coast Guard's deficiencies, and certainly is pulling no punches, whether on Capitol Hill or in executive branch circles, in articulating the Coast Guard's needs. But no matter how persuasive he is in Washington, even more effective is the Coast Guardsman at water's edge, perhaps repeating Gracey's words verbatim as he uses Coast Guard assets which no longer can do the job.

It can be argued ad infinitum whether $100 billion, $250 billion, or $500 billion a year need be spent for national defense purposes, but there simply is no argument at all with regard to Coast Guard responsibilities. They may not change in definition, but it is inevitable that, with some very minor exceptions, they will continue to increase in volume. Therefore, if it is presumed that, as all evidence indicates, the Coast Guard is well led and well managed, then the leaders of the legislative and executive branches of the government have a responsibility to the citizenry at large to give the Coast Guard enough assets, and enough modern assets, to permit it to respond to the degree that it not only wants to but has to.

Mr. STEVENS. Mr. President, I reserve the remainder of leader time on this side.

Mr. President, I ask the distinguished Senator from Connecticut, does he wish part of the leadership time this morning?

Mr. WEICKER. Mr. President, the Senator from New Hampshire is not here now. He and I have requested that we be yielded a part of the leadership time.

Mr. STEVENS. Mr. President, let me yield to my good friend from West Virginia and reserve the time for the Senator from Connecticut.

Mr. BYRD. I thank the acting leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. WILSON). The minority leader is recognized.

Mr. BYRD. Mr. President, I yield my time to the distinguished acting leader, if he wishes to have it.

Mr. STEVENS. I thank the Senator.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, I yield to the Senators from New Hampshire and Connecticut the remainder of the time of both leaders to be used as they see fit.

Mr. RUDMAN. I thank the acting majority leader.

The PRESIDING OFFICER. The Senator from New Hampshire.

SECRETARY WATT'S "UNFORTUNATE CHOICE OF WORDS"

Mr. RUDMAN. Mr. President, I rise in this Chamber this morning more out of sadness than anger to address the unfortunate remarks made by the Secretary of the Interior, Mr. James Watt, yesterday here in the city of Washington. I say more in sadness than in anger because it seems to me that we in the Congress should allow the President and his administration to operate in a generally unfettered way and surely should not interpose our wishes as to who is fit to serve and who is not fit to serve in the Cabinet.

For those unfamiliar with the Secretary's remarks, he said yesterday in a speech here in Washington, describing a commission he had appointed, as follows:

> We have every kind of mix you can have. I have a black, I have a woman, two Jews, and a cripple. And we have talent.

That last part of it would almost indicate that somehow those characteristics of the people and talent were somehow mutually exclusive.

Very polite and nervous applause greeted that statement. He then went on to say that he was only saying that as some sort of a joke.

This morning, one of the members of that commission said:

> I am disturbed that he decided to describe our race, religion, and other characteristics. The point should be that we are intelligent, experienced, well-informed people, undertaking a serious, conscientious study.

Mr. President, I could not help but wonder last night as I watched the evening news and watched the Secretary make those remarks and then, suddenly after the very polite and nervous applause, have what I can only describe as an embarrassed sneer on his countenance. I could only think of the thousands of Americans in veterans hospitals, disabled in the service of this country, who must have had something to think about as they were characterized as cripples.

I could only think of two of the most distinguished Members of this body who hardly think of themselves as being handicapped, one on each side of the aisle, who received their disabilities, if they would call them those, while in extraordinary service to this country. I wondered how they felt as they heard that remark about cripples.

I wondered about all the young children, children of friends of mine, who, through no fault of their own, through birth defects, through accidents and injury, have disabilities as they found themselves being described by a representative of the President of the United States as cripples.

It seems to me that this is the last straw. I will not recount Secretary Watt's past indiscretions. They have been laughable, and they have been pathetic. But this remark shows an insensitivity that is an egregious insult not only to handicapped Americans but to all Americans.

Mr. President, Secretary Watt was not elected. He was appointed by the President of the United States, our President, who has not an ounce of prejudice or poor taste in his entire being. And yet when this man speaks, the American people look at him as a representative of our President.

I am going to suggest this morning that the Secretary think long and hard as to whether his usefulness to his country and to his President has now passed its time.

He is an embarrassment to the President who appointed him, he is an embarrassment to the party to which I am proud to belong, and, most of all, he is an embarrassment to the country.

I call this morning on Secretary Watt to do the sensible thing and sumbit his resignation to the President.

I thank the Chair.

Mr. GORTON. Will the Senator from New Hampshire yield?

Mr. RUDMAN. Yes.

Mr. GORTON. Would the Senator from New Hampshire be willing to add me to his thoughtful statement and to the views which he expressed?

Mr. RUDMAN. I would be delighted to have my longtime friend and colleague, the senior Senator from the State of Washington, be associated with these remarks.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I first want to associate myself with all those thoughts so clearly articulated by the distinguished Senator from New Hampshire.

I do not doubt that if anyone in this Nation saw a cross being burned on their neighbor's lawn, or some such overt activity reflective of prejudice, they would assist their neighbor in the most immediate and effective way. But then the question is, how many would stand up in the barroom down by the corner on behalf of their neighbor if someone made an offensive remark relative to their neighbor's color, race, or physical condition?

Maybe we do not associate words with extreme action, but that is where the problem always starts. It is when we fail to speak out at the offensive comment that the violent deed will eventually take place.

I have seen various descriptions of yesterday's comments by the Secretary—unwise, unfortunate. However, I

suggest that they probably are an accurate reflection of how Secretary Watt views his fellow man. Therefore, it is the integrity of his views on humanity that I find incompatible with his position as one of the leaders of the Government of the United States of America.

His past indiscretions relative to persons of the Jewish faith, the Jewish state, his past indiscretions relative to minority Americans, Indians among them, his past indiscretions relative to those of a differing philosophical point of view are a part of a panorama not of error but of bigotry and hate.

There is nothing wrong with blunt talk. There is a great deal amiss with the convictions of a Cabinet Secretary whose talk flies in the face of our constitutional ideals and commitments.

One of the great privileges that I have is to serve as the chairman of the Subcommittee on the Handicapped. I am not doing any favors in the sense of the duties I perform. Rather, I have never seen a tougher, more idealistic, more committed group than those who in some way or another are deemed to need our special care. The crippled and handicapped are the patriots and the purpose of America. My concerns, then, go beyond just one Cabinet Secretary's speech.

It remains to be seen whether Watt is a loose cannon or whether he is a part of a battery.

Either way he well articulates the trash of American thought rather than its commitment to individual dignity. And what one does with trash is what I suggest the President of the United States do with James Watt.

Parenthetically, what one does to further human dignity is what I suggest the President do in concert with the Congress of the United States.

RECOGNITION OF SENATOR BAUCUS

The PRESIDING OFFICER. Under the previous order, the Senator from Montana is recognized for not to exceed 15 minutes.

Mr. BAUCUS. Mr. President, I ask unanimous consent that my speech this morning, along with the introduction of a bill, be done as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. I thank the Chair.

TARIFF BARRIERS

Mr. BAUCUS. Mr. President, today I am submitting a sense of the Senate resolution insisting that Japan dismantle its nontariff barriers to beef imports.

GENERAL BACKGROUND

Last year, America's trade deficit with Japan was $16 billion. There were many reasons for this deficit; clearly, one of the main ones was protectionist Japanese barriers against imports of American products. As the U.S. Trade Representative's Office recently reported:

> A widespread perception persists among Japan's trading partners * * * and not incorrectly, that the Japanese market remains relatively less open to foreign suppliers when compared to access for Japanese goods and services in their markets.

BARRIERS AGAINST BEEF IMPORTS

Some of the most significant barriers restrict imports of American beef. There are two main barriers.

The first barrier is the beef quota system. As a recent Japanese Government report says: "All beef imports into Japan are subject to a quota system." This system, designed to protect Japanese cattlemen against competition, now permits imports of only 30,800 tons of high-quality beef a year. That comes to only 10 ounces—about one good steak—a year for every Japanese consumer.

The second barrier is a system of tariff and nontariff restrictions, including things like a complex licensing system and an artificial pricing system. These restrictions more than double the price at which American beef is sold in Tokyo.

As a result, American ranchers are locked out of a large part of the Japanese market.

THE BILATERAL AGREEMENT

During the Tokyo round of multilateral trade negotiations concluding in 1979, the United States and Japan entered into a 5-year bilateral agreement. The United States essentially agreed not to invoke remedies under United States and international trade laws. Japan agreed to gradually increase the quota for high-quality beef from about 16,000 tons to about 30,000 tons. And Japan pledged to negotiate "on ways to further expand the importation of high-quality beef in 1984 and thereafter to the mutual benefit of both countries."

On March 31, 1984, this agreement expires. Negotiations for a new agreement are underway. But so far they have been unsuccessful. In fact, the Japanese seem to have become more and more intransigent.

But there are some positive signs, too. Some influential Japanese are beginning to recognize how much Japanese agricultural protectionism threatens United States-Japan relations. For example, the Japanese Economic Institute recently reported that the Japanese business community has grown "increasingly critical of the protection of the agricultural sector, on the grounds that it would not lead to more efficient and productive farming in the long run, and that it jeopardizes Japan's access to foreign markets * * *."

THE NAKASONE LETTER

But even such positive signs are not enough.

Therefore, I and 51 colleagues recently sent a letter to Japanese Prime Minister Nakasone. This letter said that Japan's barriers to imports of U.S. beef remain one of our most important bilateral issues. It concluded by asking the Japanese to join us, in the spirit of free trade, "in reaching a new agreement liberalizing the treatment of American beef."

THE JAPANESE RESPONSE

At about the same time, Japan's Ambassador to the United States, Mr. Okawara, gave Japan's side of the story. In an address to the National Governors Conference, he defended Japan's agricultural trade policy, making four main arguments. I shall respond to each.

First, the Japanese Ambassador argues that, because "[t]he fear of a food shortage persists * * * [s]ome level of domestic agricultural production is a necessary assurance."

Self-sufficiency indeed is an important consideration. But it is overridden by two other considerations. First, if self-sufficiency justifies protection, that justification cannot necessarily be limited to agricultural products. It might just as easily extend to many other products—including products Japan exports. And that might undermine the entire GATT system.

In addition, self-sufficiency is not necessarily inconsistent with increased beef imports. As Mike Mansfield recently wrote me: "[w]e are not out to destroy Japan's agriculture * * *. We want and need a viable Japanese agriculture. Academic studies seem to indicate that Japan could open its market without great harm to cattle growers."

That is a letter from our Ambassador to Japan, Mike Mansfield.

Second, the Japanese Ambassador to the United States argues that "the effect of this import quotas on the enormous volume of Japan-United States trade is marginal."

This argument misses the point. We do not contend that barriers against beef imports are the sole cause of our trade deficit. What we do contend is that they undermine the principles of free trade, reduce the income of U.S. cattlemen, and obstruct the development of better United States-Japan trade relations. That is harm enough.

Third, the Japanese Ambassador to the United States argues that Japan has "made substantial accommodations that have benefited U.S. farm interests."

This argument, too, misses the point. True, as Japan's economy has grown, so have its agricultural imports. And, true, Japan now buys about 60 percent of U.S. beef exports. But Japan buys much less U.S. beef than it would in an open market. For

example, if the beef quotas were eliminated—just as, I might parenthetically add, we do not have any legal quotas against the importation of Japanese cars in the United States—U.S. sales of high-quality beef could increase as much as fivefold.

Fourth, the Ambassador argues that "[t]he United States* * * maintains import restrictions similar to those of Japan. * * *" As examples, he refers to import restrictions under section 22 of the Agricultural Adjustment Act and under the Meat Import Act of 1979.

Granted, the United States does not always observe pristine free trade principles. But even so, the Ambassador's two examples are much less disruptive than Japan's barriers against beef imports. The section 22 restrictions are expressly permitted under a 1955 GATT waiver; the United States participates in a continuing review of the waiver and has been willing to discuss any special problems it creates. And, the Meat Import Act quotas are triggered only at extremely high import levels. What is more, they would not be necessary if countries like Japan did not impose such barriers against U.S. beef exports.

RECENT NEGOTIATIONS

The debate goes on. And so do the negotiations to renew the bilateral agreement.

The most recent negotiations took place last week in Tokyo. U.S. negotiators raised the beef issue and asked the Japanese negotiators to make reasonable concessions. The Japanese refused. They offered simply to extend the current quota system. Eventually, the talks broke down and no progress was made.

CONCLUSION

Mr. President, a double standard exists. The Japanese sell Americans billions of dollars worth of cars, electronic devices, and other products. But they refuse to give us a fair chance to sell them American beef. They deny U.S. cattlemen the same treatment America routinely accords Japanese businessmen.

Given this situation, we in the Senate must convince the Japanese that we will not tolerate this double standard. Trade must be a two-way street.

That is why 51 colleagues and I in a letter that I circulated among my colleagues in the Senate expressed to the Japanese Prime Minister our very deep-rooted dissatisfaction. That is why I am today introducing a resolution expressing the sense of the Senate that "the United States negotiators should insist that Japan dismantle all nontariff barriers to imports of beef" and that "if negotiations do not result in satisfactory progress toward the dismantling of all nontariff barriers the United States trade representatives should seek appropriate relief under United States and international trade law."

Mr. President, this resolution is similar to last year's Bentsen-Danforth resolution, Senate Resolution 462, which passed the Senate on September 30, 1982. It reemphasizes the Senate's deep concern about the beef issue. That way, I hope it will encourage fruitful negotiations.

I urge my colleagues to cosponsor the resolution. And, I urge the Senate leadership to process the resolution quickly so we can get a recorded vote in the Finance Committee on the floor as soon as possible.

I ask unanimous consent that the resolution be held at the desk until the end of the day for the addition of original cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S. RES. 225

Whereas, the United States and Japan are signatories to the General Agreement on Tariffs and Trade (hereinafter referred to as "GATT");

Whereas, in keeping with the provisions of GATT and the general principles of free trade, the United States has given Japan broad access to many United States markets;

Whereas, Japan has benefited from this broad access by becoming a major United States supplier and now has a $16 billion annual trade surplus with the United States;

Whereas, Japan uses a system of quotas and other nontariff barriers to limit imports of beef;

Whereas, the Japanese system forces Japanese consumers to pay unreasonably high prices for beef and denies American cattlemen an opportunity to compete fairly in the Japanese market;

Whereas, the Japanese system is in violation of GATT;

Whereas, in 1979 the United States and Japan negotiated a bilateral agreement by which Japan would gradually increase its beef quota;

Whereas, the bilateral agreement expires on March 31, 1984, at which time Japan will no longer be under any agreement to increase the quota and the United States will no longer be under any agreement to forego trade law remedies against Japan;

Whereas, negotiations are underway to establish a new bilateral agreement; and

Whereas, Japan's barriers to beef imports undermine the principles of free trade, reduce the income of United States cattlemen, and obstruct the development of better trade relations between the United States and Japan: Now, therefore, be it

Resolved, That it is the sense of the Senate that, in negotiations with Japan, United States negotiators should insist that Japan dismantle all nontariff barriers to imports of beef.

SEC. 2. It further is the sense of the Senate that if negotiations do not result in satisfactory progress toward the dismantling of Japanese barriers to imports of beef by the time the current bilateral agreement expires, the United States Trade Respresentative should seek appropriate relief under United States and international trade law.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin is recognized for not to exceed 15 minutes.

Mr. PROXMIRE. Mr. President, I understand the Senator from Minnesota (Mr. BOSCHWITZ) has a brief statement he would like to make, and I ask unanimous consent that he may proceed as if in morning business for 3 minutes at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Minnesota is recognized.

A CALL FOR SECRETARY WATT'S RESIGNATION

Mr. BOSCHWITZ. Mr. President, I speak more in sadness than in anger this morning as I speak about James Watt, and I call for his resignation in these remarks. Really, I did not find the remarks he made yesterday any more or less offensive than others he has made, but I believe that his effectiveness has been undermined—perhaps even before this time—certainly at this time, and it is on that basis that I call for his resignation and ask the President to appoint somebody who can move forward in the field of environment.

There is hardly a subject that comes before us on which there is greater polarization then environmental issues. There is hardly a subject that comes before us that is more sensitive if we are really going to strike a balance between environmental concerns and the concerns of the economy.

I have sought in my voting record to strike that kind of a balance, and when I have been in doubt, I have sided with the environment, as it must be preserved and it cannot always be retrieved.

James Watt increases the polarization that surrounds the issue of the environment. Every action that we consider with respect to environmental affairs becomes one of pro or con, often not on the issue itself, but pro or con James Watt. Every issue becomes a cause. At times we are asked to relax certain environmental measures because of the economy. At other times we find it necessary to tighten up laws and regulations because of the environment. A balance simply must be struck.

I do not think that that balance can be struck as long as James Watt is the Seretary of the Interior. These last remarks have pushed me over the edge, though certainly many of his remarks

and actions have brought me close to the edge before. I think that the President can find somebody who will better serve the country, better serve the environment, and better serve the Government than the present incumbent, and therefore I call for his resignation.

I thank the Senator from Wisconsin for yielding.

Mr. PROXMIRE. Mr. President, I thank my good friend from Minnesota. I wholeheartedly concur in his statement, and I commend him for calling for the resignation. It is one thing for a Democrat to do that, it is far more difficult and more significant I think when a Republican Senator does.

PENTAGON MAY BE INFLATING ESTIMATES OF SOVIET DEFENSE COSTS

Mr. PROXMIRE. Mr. President, rightly or wrongly, no single estimate has had more of an influence on U.S. defense and budgetary policy than the annual measures of Soviet defense costs.

Because of reported differences between the CIA and DIA over their estimates of Soviet defense, I asked the Joint Economic Committee staff to prepare a report explaining the latest conclusions of the intelligence community about the trends and to put them in perspective.

DIFFERENCES BETWEEN CIA AND DIA ESTIMATES

The study shows where the two agencies agree and differ and examines the possible causes of the slower growth rates of Soviet defense estimated by the CIA.

The highlights of the study are as follows:

According to the CIA, Soviet defense costs grew at an annual rate of 2 percent during 1978–81, compared to a growth rate of 4 to 5 percent during the previous 10 years.

The CIA also found that the portion of GNP devoted to defense—the military burden—did not increase during the 1970's.

Most of the slowdown in the defense growth rate took place in procurement which has been level since 1976.

The slowdown in the growth rate was probably the result of problems in the economy, such as transportation bottlenecks, which affected the defense industries, but a policy decision by the Kremlin to slow the growth rate cannot be ruled out.

THE DEFENSE INTELLIGENCE AGENCY

While the DIA agrees with the CIA's dollar cost estimates, the Defense Intelligence Agency's own current ruble price methodology unlike the CIA indicates there was no slowdown in total Soviet defense spending.

According to the DIA, Soviet defense costs increased by 6 to 7 percent in nominal terms during the 1970's, and the military burden increased from 13 to 14 percent in 1970 to 14 to 16 percent in 1981.

So who is right, the DIA or the CIA?

The DIA's estimates are not adjusted for inflation, are based on a definition of Soviet defense that differs from the U.S. definition, and contain wide margins of error.

The DIA considers its methodology classified, making it difficult for outsiders to evaluate it.

For many years, attention has focused on the CIA's estimates of Soviet defense costs. Its estimates are made in ruble terms and dollar equivalents, both adjusted for inflation.

The CIA's estimates should be given serious consideration by all those who assess Soviet behavior and especially by those who believe our policies should in part respond to theirs.

QUESTIONS ABOUT DIA METHODS

The DIA is in effect challenging the validity of the CIA's estimates but it is doing so in a way that raises more questions than it answers.

The fact that the DIA's estimates are not adjusted for inflation reduces their usefulness for policymakers to practically zero. Such estimates are meaningless unless you know what the inflation rate is. That is why U.S. defense spending is usually given in constant dollars, that is, adjusted for inflation. This questionable practice could result in inflating the costs of Soviet defense.

At the very least, the DIA's methodology should be subjected to careful scrutiny by an outside group of experts so that Congress understands what weight to give it.

I might add that the CIA's methodology for estimating Soviet defense costs has been subjected to outside scrutiny. In addition, the CIA on several occasions has explained in some detail its own methodology.

DIA METHODS SHOULD BE REVIEWED BY OUTSIDE EXPERTS

I urge the Director of the Defense Intelligence Agency to take the necessary steps so that an outside group of reputable specialists in the field can examine the DIA's methodology for estimating Soviet defense spending in current rubles. Unless this is done, the analytical approach used by the Pentagon will be considered questionable and charges that it is inflating their estimates of Soviet defense spending will be hard to refute.

The study mentioned above, "Soviet Defense Costs," was prepared by Richard F. Kaufman, assistant director of the Joint Economic Committee. Copies of the study can be obtained from the Joint Economic Committee.

CHILDREN OF THE HOLOCAUST

Mr. PROXMIRE. Mr. President, the reality of Hitler's Holocaust against the Jewish people of Europe has, indeed, been documented and condemned. The horror of his means has long been made evident to all who care to know—the crematoria, the mass graves, the experimental torture. It is hard enough for Americans, so accustomed to democracy and an open society, to grasp the level of terror perpetuated against an innocent group of people. Yet even more horrible is the crime against a group so often overlooked when we think of the Holocaust: the mass destruction of children.

There is a certain innocence about children, an innocence that exists merely by a lack of knowledge about the bad things in the world. We Americans, like so much of the world, treasure our children. They are not only the future of our society, but they also inspire their parents to work toward a better society. Could we have tolerated the destruction of our own children? Obviously, the answer is no. To moral and civilized men, the destruction of others' fragile children is no less tragic.

Hitler's reign of terror against the Jewish people included their children. Not only did these children witness the tragic and inhumane destruction of their elders, but they, too, faced death by similar means. Their lives were destroyed, their youthful innocence shattered.

There is perhaps nothing as painful to see as the faces of the children of a genocidal war, children in the midst of death. Yet even in the wake of their horror, we find those who managed to maintain their youthful air, their sense of innocence. In a collection of poems by children who were caught up in the Holocaust, entitled "I Never Saw Another Butterfly," we are made aware of this fragile yet enduring characteristic of childhood. They expressed their fears, they showed their tears, but they never lost that final glimmer of hope.

Mr. President, if the adult victims of a genocide cannot stir us into action, perhaps the children can. Our ratification of the Genocide Convention, which has been pending in this body since 1949, 34 years—President after President has called on us to act, and we should act at long last—can only help us bring future perpetrators of genocidal destruction of people to clearcut and thoroughly legal justice.

THE NUCLEAR FREEZE—NOT "BUILD-DOWN"—IS THE ANSWER

Mr. PROXMIRE. Mr. President, the distinguished senior Senator from Oregon, MARK HATFIELD, has written an article that appeared in the New York Times this morning entitled "This Is Arms Control?" That article constitutes a masterful indictment of the so-called build-down which some Senators are now pushing as a substi-

tute for the comprehensive, mutual, verifiable nuclear freeze. As we all know, Senators HATFIELD and KENNEDY are the authors of the nuclear freeze resolution. That resolution was reported adversely—that is, with a recommendation that it not pass—from the Foreign Relations Committee this week.

In opposing the so-called build-down approach to arms control, Senator HATFIELD contends that, far from reducing our nuclear arsenal, build-down would, in the name of modernization, enhance our nuclear arsenal. The build-down would really become a nuclear buildup. Is HATFIELD right? Why would not an agreement with the Soviet Union that required the destruction of two old nuclear weapons for every new one added to the arsenal not result in a reduction in the nuclear arsenal? HATFIELD in his article says why. He argues that the sponsors of the build-down would measure build-down by the number of strategic warheads and the destructive capability of each warhead.

Destructive capability is measured by megatonnage and throw weight. And what is wrong with that? As HATFIELD points out—plenty. This formula overlooks the prime ingredient in the effectiveness of a nuclear weapon—its accuracy. In HATFIELD's words, when the accuracy of a missile is improved by a factor of 2, its capacity to destroy a particular target is increased by a factor of 8. So the build-down would become a buildup.

Why am I so certain that it would inevitably become a buildup? Simple. Let me ask: Why would the Soviet Union or this country bring a new nuclear weapon into its arsenal if it had to destroy two old ones? Think about the answer to that question.

Ponder it for a minute. Why would the Russians or our military bring a new weapon into their nuclear arsenal with the full knowledge that they would have to destroy two old ones? It is a critical question. The answer is that they would only bring a new weapon into the arsenal on one condition. They would have to be sure that the one new weapon would be more deadly, more potent, more effectively destructive than the two weapons they would take out of the arsenal. Can anyone seriously doubt that? Can there be any other reason for a Russian or a NATO general to recommend or accept a new nuclear weapon for his arsenal? Of course not.

In the course of Senator HATFIELD's argument, he hits the crux of our problem in seeking an effective way to end the arms race when he observes that the nuclear freeze "treats technological advancements in weaponry as the greatest danger of the arms race and the first priority of an arms control agreement leading to reductions." This is exactly why this country should make the nuclear freeze the heart of our negotiations with the Soviet Union to stop the arms race. Some Senators may regard this as a kind of "mission impossible."

How can we stop technological progress in nuclear weaponry or in any other area? Has not technological progress again and again established itself as an irresistible force? Well, there is an answer and a good one. The answer is that we can stop technological progress in a particular area and especially in the area of nuclear weaponry. How do we stop it? We stop it by stopping testing. No new nuclear weapon can develop to a level of reliability and accuracy without continuous testing. And testing we can—we are sure—detect. The freeze would stop testing, as it would stop the building or the deployment of nuclear weapons. The build-down, of course, would not stop testing.

Indeed, it would have a seriously perverse effect. It would actually stimulate the arms race. How? It would enhance the competition on both sides to test intensively to develop more advanced and effective weapons. And that technology advance by the superpowers would continue to stimulate the proliferation of nuclear weapons as cheaper, lighter, more readily available weapons became increasingly easier for more and more countries to acquire.

Mr. President, the build-down or intermediate regional nuclear arms limitation such as we are now conducting with the Soviets in Geneva, or quantitative limitations on the number of warheads or megatonnage or throw weight or on MIRV'ing may or may not serve a specific, limited purpose, but at best they constitute band-aids. None of these can serve the purpose of a comprehensive freeze on all nuclear weapons. Sure, I admit that such a strategy requires monumental efforts to secure reliable verification. But Senator HATFIELD is right: This course does indeed constitute the most promising path toward survival, exactly because it confronts and begins to master the heart of the problem, which is the technological arms race.

Mr. President, I ask unanimous consent that the article from today's New York Times by MARK HATFIELD, entitled "This Is Arms Control," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THIS IS ARMS CONTROL?

(By Mark O. Hatfield)

WASHINGTON.—The attitudes that threaten to prevail in Congress today are similar to those that gripped European and American leaders at the turn of the 20th century. The peace movement was strong during that period, just as it is today. The political elite sang of disarmament. Yet these leaders had no intention of denying themselves the freedon to build all the arms they desired.

So it is with the vast majority of those in Congress who support the MX missile on the grounds that it will encourage progress at the arms control talks in Geneva. This defies logic. The type of "arms control" they want in exchange for voting for the MX is even more mind-boggling—a "guaranteed build-down" that would remove two or three old nuclear weapons from the arsenals of the superpowers for each new one built.

Arms escalation would thus become what some Congressmen have called "the engine to fuel arms control." George Orwell would have had fun with this one. Build-down is simply a new way to insure continuation of the old rules, allowing the Administration to determine what it "needs" (whatever the weapons laboratories offer) and attach a quantitative ceiling. This is then called arms control—and we move on to the next round in the arms race. Build-down is a general's dream. It is analogous to trading old Volkswagens for new Rolls-Royces and sleek, agile Ferraris.

In contrast, the term "nuclear freeze" accurately reflects the intent and substance of the proposal it represents. It treats technological advancements in weaponry as the greatest danger of the arms race and the first priority of an arms control agreement leading to reductions.

The Senate Foreign Relations Committee voted Tuesday to reject the freeze and build-down but sent them to the Senate floor for a vote. There is talk of reconciling the two measures. Only magic could make this possible. Weapons might be built on both sides while a freeze is being negotiated—and certainly it would seem more desirable to be removing some weapons than to fail to impose any constraints. But there is a catch: New weapons systems desired by build-down advocates will take many years to reach partial or full deployment, while a nuclear freeze could be negotiated within a year.

While some proponents of build-down are fervently committed to its implementation, others are probably quite prepared to settle for much less. They are merely seeking an imaginative justification for the MX. I suspect that all the President would need to do to placate them is announce that our negotiators at the arms talks in Geneva have been instructed to mention build-down to the Russians. Having done this, they could then return to their original agenda. Congressmen and Senators could hold press conferences touting their influence, and that would be that.

Last week, three members of Congress suggested modifications to make build-down more acceptable to freeze advocates. These include ceilings on strategic warheads and destructive capability. They are flawed in two crucial respects.

Surprisingly, the sponsors acknowledged that rough strategic parity now exists. If this is so, nothing useful can be accomplished through spending for new weapons that couldn't be accomplished without spending a dime through a freeze and subsequent reductions tailored to preserve the balance in a purely downward motion.

The second flaw lies with the build-down proposal's formula for measuring destructive capability. The formula takes into account throw weight, the number of warheads and bomber-carrying capacity. But one glaring omission—missile accuracy—renders it virtually useless. When the accuracy of a missile is improved by a factor of two, its capacity to destroy a specific target increases as though its explosive power were

increased by a factor of eight. Accuracy is not verifiable, but missile flight testing, which is necessary to improve accuracy and maintain confidence in existing weapons systems, is easily verified. Unlike the freeze, build-down conspicuously overlooks the single most important factor contributing to destructive capability.

The historian Barbara Tuchman described the mentality that spurred the second international conference on arms limitation at the Hague in 1907 by saying, "political leaders told the public only what sounded virtuous . . . disarmament must be discussed, if only to prove to the public its impracticability and their own honest intentions." In 25 minutes, they agreed to call for "further serious study" of disarmament. Agreement on the acceptable instruments of war consumed six weeks. They agreed to meet again in eight years. Seven years later, World War I had begun. Fortunately, they weren't able to conclude the war in less than an hour—as we are today.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mrs. KASSEBAUM). Under the previous order, there will now be a period for the transaction of routine morning business, not to exceed 12 noon, with statements therein limited to 5 minutes each.

Mr. PROXMIRE. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REVIVAL OF 1960's DRUGS

Mrs. HAWKINS. Madam President, 1983 marks the 18th anniversary of a very important event—the launching of the major drug-abuse movement in the United States. The time was 1965. The place: the University of California at Berkeley. January 1965 marked the first time the Berkeley campus—or any college campus—was used to protest and to advocate illegal activities, including the use of illicit drugs, particularly marihuana and LSD. Tables were set up to disseminate information and press for the legalization of marihuana. Marihuana itself was a symbol of protest, as opposed to alcohol, which was used by the establishment. Timothy Leary preached to that generation, "Tune in, turn on, drop out."

The time is now 1983. The place: the entire country—every State, every city, every community, and almost every home. The sons and daughters of the 1960's generation are starting a 1960's renaissance that includes the abuse of LSD, once out of fashion. Today almost 1.2 million Americans use hallucinogenic drugs, including mescaline, peyote, and LSD. LSD traffic runs about $20 million and is steadily growing.

The 1980's generation was born too late to witness the horrors of this particular mind-exploding drug, which can cause irreversible physical and mental damage. They are learning though. In 1982 hospitals in 26 metropolitan areas admitted 4,378 people who overdosed on acid. And that does not include mental hospitals. The Drug Enforcement Administration estimates that there are 10 times more LSD overdoses today than in the 1970's. Three deaths from LSD overdoses have been reported in the last 3 years. It seems that the 1980's generation is tuning in, turning on, and dropping dead from drug abuse.

Madam President, I ask unanimous consent to insert into the RECORD two articles on the revival of 1960's drugs in the 1980's.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Times, July 6, 1983]

EXPERTS NOTE REVIVAL IN USE OF 1960's DRUGS

LOS ANGELES (UPI).—Hallucinogenic drugs, popular among a generation that "tuned in, turned on, and dropped out" in the 1960's, are regaining favor among users cynical of the horror stories surrounding psychedelics, drug experts said yesterday.

Greater sophistication among drug users, refinement of hallucinogenics and fewer "bad trips" are encouraging a West Coast trend toward LSD, PCP and other mind-altering substances that one expert predicts "will spread gradually throughout the United States by the end of the decade."

Already, UCLA psychopharmacologist Dr. Ron Siegal said in an interview, "We are getting reports of a renaissance of LSD use in major cities such as New York and Chicago."

Police said the greatest abuse seems to be among high-school students, attracted by the ease with which hallucinogenics can be obtained and their convenience. The most popular is apparently a single drop of LSD on a postage-stamp size piece of blotter paper that a user just pops into his mouth.

Among the horror stories that scared drug users away from psychedelics were tales of people who, under the influence of hallucinogenic drugs, exhibited bizarre public behavior, killed themselves or murdered others.

"Some of the (current) users are aware of the history of LSD, and they're aware of a lot of the horror stories where just that, horror stories with little scientific validity," Siegal said.

Drugs such as LSD are more refined today than in the 1960s, which users feel make them safer, Siegal said.

He said use of potent forms of marihuana, resulting in mild hallucinogenic experiences without ill effect, has "tempered the fear and anxiety many people have about experimenting with a hallucinogenic drug.

"Their own experience has convinced them these drugs could be used safely when handled properly," Siegal said.

Don Bays, an administrative assistant with the Los Angeles Police Department, said there has been an enormous increase recently in the confiscation of LSD. So far this year, police have seized 112,222 units of LSD—a 3,000 percent increase over the 3,462 units seized in the first six months of last year.

LSD USE RISING DRAMATICALLY IN INDIANA

(By Bill Lammers)

LSD's popularity in Indiana has risen dramatically in the last two years, says a top state police investigator. And Fort Wayne isn't immune from the trend.

Users apparently discount horror stories of suicides resulting from "bad trips" in the '60s, officials say, adding the '80s version of the hallucinogen is purer, lessening the danger.

In 1982, 74 persons in Indiana were arrested for selling LSD, while only three cases were reported in 1981, said Lt. Charles P. Williams, head of the special investigations section of the state police.

LSD ranked fourth in arrests in 1982 behind marihuana (388), methaqualone (128) and cocaine (88).

"This year, it's running neck and neck with methaqualone," Williams said. "I expect before the year is out it'll be one of the most popular drugs."

Most of the LSD coming into Indiana is in tablets, he said. But recently some forms of blotter LSD—a drop of the drug on a postage-stamp-size piece of paper—have been seized, especially a type known as "Black Star" in the Fort Wayne area.

State police have pinpointed two routes for the hallucinogen into the state from the Berkeley and Westminster areas of California: direct from California to Indianapolis and from California to Florida to Bloomington.

"The one thing we've seen is the large amount—5,000- and 8,000-dosage units," Williams said. The drug often sells for $1.50 to $2 a dose; the manufacturing cost is 10 to 15 cents a dose.

Fort Wayne health and rehabilitation officials said they also had seen interest in LSD perking up in recent years.

"From what we hear there does seem to be a little bit of a trend, an increase," said Ruth Anne Sprunger, executive director of the Mental Health Center. "It had sort of died down for a while, and then it was all pot, coke (cocaine) and booze."

LSD appeared in quantity in Fort Wayne during last year's Three Rivers Festival, said Joyce Bussard, evening supervisor at Washington House Inc., 2720 Culbertson St., which helps people break their dependence on drugs or alcohol.

"The reefer (marihuana) died out, but the acid stayed on all summer," said Bussard. "The one (LSD) is really kind of hit and miss," with fewer young people reporting its use lately.

The '80s version of LSD is purer, with dosages more uniform, officials say, "The quality is more consistent," Williams said.

"I don't want to say it's safe. The drug itself is very dangerous because it acts on your mind. But for the street people, it's cleaned up a lot since the '60s," he said.

GUERRILLA DRUG WAR

Mrs. HAWKINS. Madam President, I ask you and all the other Members here today to "ride shotgun" with me on the issue of youthful drug abuse in America. We are fighting a full-scale war here—against drugs, against drug growers, against drug smugglers

against drug dealers. But a conventional fight will not defeat this enemy.

Madam President, the drug war we are fighting has all the marks of true guerrilla warfare. We are not exactly sure who the enemy is. It could be a wealthy landowner in Colombia or the guy down the block who takes weekend trips in his small private plane. He could be the neighbor next door—as an entire Florida community discovered recently. Enemies are everywhere, yet no one can pinpoint them. What is worse, the enemy keeps moving around and changing his position. For instance, Florida's crackdown on drug smuggling has had the unfortunate effect of increasing drug trafficking in other border States, particularly California. The enemy simply shifted position and dug in once again.

The drug smugglers and dealers fight a dirty war. In true guerrilla style, they demoralize the population slowly, bit by bit. Because their forces are small and scattered, they prey on the innocent and the helpless—the youth of our country. Their tactic is to undermine the coherence of the community by targeting its weakest members, by destroying their minds and bodies with drugs and ruining any chance of a future.

Madam President, it seems to me that we have to fight the drug war on the enemy's terms. We must be harsh and ruthless with these criminals who are attacking our Nation's very foundation. We are too lenient, too "fair." We cannot allow the guerrillas to win a waiting game. The best way to win the drug war is to act now and knock out the central source of supply: illegal drug imports from abroad. The time has come for a diplomatic initiative against drugs. Eradication of illegal drug crops is the best possible means of attack. And we must link such eradication with one of the most powerful weapons that the United States can wield: foreign aid.

As long as foreign countries are willing to soak up American taxpayers' money, they must make a good-faith effort to destroy once and for all their illegal drug trade.

It cannot be done overnight; I realize that. But a systematic reduction of crops should clearly be linked to U.S. foreign aid and U.S. votes at multilateral banks. Sure and steady pressure over a long period of time will convince drug-producing countries that we mean business. The battle against drugs is not a weekend war.

VERMONT TOWN ENERGY PROJECT

Mr. LEAHY. Madam President, I ask unanimous consent to place in the CONGRESSIONAL RECORD a recent article published in the Energy Conservation Bulletin on the Vermont town energy project. This excellent article describes the outstanding work of this project. I believe this project is an excellent example of local initiative. I commend it to my colleagues.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMMUNITY ENERGY PLANNING UNDERWAY IN VERMONT

In line with their strong history of direct democracy and citizen involvement, 18 towns in Vermont have begun developing town energy plans, undertaking local energy projects, and participating in regional energy task forces. The impetus for this activity is a program called the Vermont Town Energy Project, funded by an ACTION Community Energy Grant and operating out of the Center for Rural Studies at the University of Vermont. The VTEP works with Town Energy Coordinators, volunteers appointed by the Selectmen in each town, to help them become more effective in promoting energy conservation and the use of local renewable sources, and to bring together all of the energy-related services available to the community from various agencies.

According to Paul Markowitz, Project Coordinator, "The aim of the Vermont Town Energy Project is to establish a working framework in each region and in each town to help move the State of Vermont toward a more affordable, sustainable, and secure energy future."

The Project, which was initiated in November 1982, has been operating in two regions of the state—the Central Vermont area and in Bennington County. In August, expansion of the Project to a third region in the Brattleboro area brought the number of target communities to 25.

The Project combines components of many existing efforts that have been conducted in Vermont and throughout the nation to assist local energy programs: distributing energy planning and action documents, creating regional energy task forces, sponsoring workshops, coordinating the technical and planning assistance offered by various agencies, and providing money to each town for project expenses.

The Project coordinates the energy-related services of the Community Action Agencies, Regional Planning Commissions, Cooperative Extension Service, and the State Energy Office, to provide direct planning and technical assistance to towns. It emphasizes improving the effectiveness of Town Energy Coordinators while bringing together other people in the community who are interested in working on local energy projects. For instance, in Central Vermont, the initial target region, each of the nine towns participating have formed town energy committees invovling a broad spectrum of community residents.

The regional energy task forces organized by the Project are comprised of Town Energy Coordinators, agency representatives, and representatives from energy-related businesses. The task forces were designed to help overcome the isolation of Town Energy Coordinators and to pool the knowledge and experience of coordinators within a region. They have also brought agencies with energy-related services into direct contact with individuals at the local level who can apply those services to their town and community's needs.

Another valuable contribution has been a series of special workshop sessions conducted in five locations throughout the state, held in conjunction with the Extension Service's annual training sessions for town officials. The workshops topics included: (1) developing a town energy plan, (2) financing energy conservation in town and school buildings, and (3) bulk purchasing of insulation. While the first session on energy planning was more analytical in scope—assessing energy needs, resources, and consumption patterns—the financing and insulation workshops session used local individuals with strong backgrounds in the field, and the insulation workshops called upon local energy outreach advisors from the Home Energy Audit Team, Vermont's energy audit program.

The principal reference for the Project is a guidebook entitled Town Energy Planning: A Framework for Action, prepared by Markowitz in cooperation with the Center for Rural Studies and the Agency of Development and Community Affairs, Montpelier, Vermont. The guidebook described the range of issues that can be pursued at the local level and discusses in detail specific projects that communities can undertake. These projects include fuel oil and fuelwood cooperatives, volunteer weatherization efforts, town forest management, and implementing energy-conscious land-use bylaws.

Markowitz is enthusiastic about the progress of community energy planning in Vermont. He told the Bulletin: "While the Vermont town Energy Project is a fledgling program, it has already demonstrated that individuals at the local level are eager to work together to address their energy needs and problems if they can be provided with a reasonable level of assistance and funding."

CLINCH RIVER BREEDER REACTOR

Mr. LEAHY. Madam President, I ask unanimous consent to place in the RECORD today the speech I made on the Clinch River Breeder Reactor in 1981.

As we face this issue again in the near future, this speech provides a historical perspective on this issue that I believe will be helpful to my colleagues.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR PATRICK LEAHY ON THE CLINCH RIVER BREEDER REACTOR

For a number of years, I have been opposed to the building of the Clinch River Breeder Reactor because I believe this program presents an unreasonable risk to the public health and safety, and because this facility is a waste of the taxpayers' money.

The point I will make today is simple. The Clinch River Breeder Reactor is the latest in a long series of nuclear white elephants which have cost the taxpayers of this nation billions of dollars but have never provided any measurable benefits to our citizens.

During this year we have spent more effort on reducing waste in the federal budget than ever before. We have cut programs to fund basic human needs. We have cut scientific development. The President has asked us to slash the funding for alternative energy sources such as solar energy and energy conservation which are so important to the people of my state. Yet, while the President has been asking every-

one to tighten his belt, he has increased federal spending for nuclear power by 30%.

The nuclear power industry is obviously in trouble. But the nuclear industry's difficulties, no more than any other industry's, cannot and should not be solved by throwing the taxpayers' money at the problem.

Over the past three decades, the Federal Government has given the development of nuclear technology the most aggressive support of any new technology ever supported by the Federal Government. Unfortunately, in its enthusiasm to develop every aspect of nuclear technology, the Federal Government has not tempered its enthusiasm with equal fiscal vigilance. In fact, for many years, billions of dollars have been wasted by projects which appeared technologically attractive and intellectually exciting but which, again and again, have turned out to be expensive white elephants. The Clinch River Breeder Reactor is the latest in the long series of such projects.

To put its development in perspective, I would like to review a few of the projects which the Federal Government has funded in past years in this area.

The first of these was the nuclear-powered airplane. The concept behind this program was that the heat from a nuclear reactor could be used to provide jet propulsion. Year after year, the Congress was warned that the Russians were ahead in this vital area, and, year after year, the Congress authorized millions to support the project.

It was soon recognized that the nuclear jet plane suffered from an insurmountable problem. If enough lead shielding were placed on the plane to protect the passengers from the radiation produced by the engine, the plane would be too heavy to get off the ground.

At one point, the Atomic Energy Commission proposed using old pilots in the planes. Since they had a shorter time to live, a little extra radiation would do less harm.

In what would have been the most star-crossed technological combination imaginable, it was even proposed that nuclear jet engines be placed on the C-5A cargo plane.

The C-5A had the unfortunate habit of dropping engines in flight. The core of a nuclear jet engine—in a single year—would be more radioactive than a Hiroshima bomb. Imagine if the C-5A had dropped a nuclear jet engine!

This program has now been abandoned by us and the Russians, yet the American taxpayers spent over $1.5 billion supporting this project over 11 years.

Then there was the nuclear-powered buzz bomb. It was designed to use a nuclear-powered rocket to send atomic bombs on our enemies. Unfortunately, the nuclear rocket engine spewed millions of curies of radioactivity over friendly territory on its way to its target.

It, too, was abandoned—but not until after hundreds of millions were wasted.

If not a jet, if not a rocket—perhaps then a nuclear-powered space ship. It was an intriguing idea—the ship could fly forever. It was even proposed that it could "intercept potentially hostile space vehicles." The principal problem in space flight, unfortunately, is not flying forever but getting off the ground in the first place.

Never mind that NASA thought the program was a waste of money. Over $1.5 billion in taxpayers' money was wasted on this project as well.

By the way, that engine was tested at a site called Jackass Flats, Nevada.

If not in the air—perhaps on the sea. The idea—build a nuclear-powered merchant ship which could steam forever. Never mind that merchant ships want to call at port regularly to unload their cargo.

Over $100 million was spent on this program before it was abandoned.

And then there was the proposal to use radiation to preserve food. It was abandoned after scores of millions were spent.

And then there was Project Plowshare. Nuclear bombs would be used to excavate canals and release natural gas. Over $150 million was spent on this project before it also was abandoned.

But my favorite is plutonium-powered long-johns developed to keep deep-sea divers warm. Let me quote from the Atomic Energy Commission's press release:

"The device . . . warms a garment of the 'long john' type worn under the diver's suit . . . The water is warmed in a bottle-shaped heat exchanger . . . which contains four capsules of plutonium 238 fuel."

I do not know how much was wasted on plutonium-powered long-johns, but there is no record they were ever popular with divers.

When all the other arguments have fallen by the wayside, it is argued that we must continue spending these huge amounts of money on breeder reactors because the French are doing it. Why our program is more expensive than the combined French, British, German, and Japanese programs is never explained.

Nevertheless, it is argued, we cannot lose out to the French.

I did not understand the French attitude to the breeder program—which will obviously be an economic failure—until I studied the French decision to build the Panama Canal in the course of our debate on that matter.

Because Ferdinand de Lessups had built a sea-level canal at the Suez, he decided that the glory of France demanded a sea-level canal be built at Panama. Of course, there was a mountain in the way in Panama. You have all seen the pictures of the hulks of the rusting French heavy equipment which they left when they abandoned the project.

And we all know the story of how the United States—using a more practical plan—succeeded and, with this project, established its place in the world as a major economic power.

The breeder decision is really the same type of decision. We can spend our very tight research dollars to build better, more efficient uranium-powered reactors and coal plants or gamble billions on a whole new type of reactor which will be twice as expensive as our present power plants.

The French made that gamble with their sea-level canal and lost to the United States.

The French gambled on the SST and again lost to the United States jumbo jets.

Let them gamble again on a white-elephant breeder while we concentrate on building more efficient coal and uranium plants. They will surely lose again.

The only purpose of a breeder reactor is to create electricity. The United States has 400 years of coal and 100 years of uranium supplies—all of which can be used to generate electricity. It makes no energy or economic sense to spend billions more to develop a substitute for coal and uranium—our most abundant domestic fuels.

In summary, from Jackass Flats, to the nuclear-powered C-5A, to the plutonium-powered long-johns, the nuclear research program has been a parade of nuclear white elephants. I think it is time to stop making the taxpayers finance the parade. I support the cancellation of the Clinch River Breeder Reactor.

EQUALITY OF RIGHTS FOR WOMEN

Mr. CRANSTON. Madam President, I would like to take a few moments to speak upon a matter of continuing urgency for our Nation—the attainment of equal rights for all Americans regardless of sex.

INTRODUCTION

Our Nation was founded upon the concept of equality of rights and equality of opportunity. Yet, more than half of all Americans are still denied equal rights and opportunities because of their sex.

Despite advances over the past two decades, many American women each day face discrimination, limited opportunities, and economic hardships. It is essential that we begin to recognize the fact that attainment of equality by American women is of paramount importance to each one of us. The practices and policies that exclude women from full social, political, and economic participation in our society rob our Nation of the benefits of their contributions, their productivity, and their creativity. Our Nation simply cannot achieve full productivity and prosperity as long as we continue to deny more than half our population full opportunities to utilize their talents and energies.

The American dream of equal opportunity must become a reality for all women in this Nation.

LIMITED PROGRESS

In the sixties and seventies, significant progress was made toward breaking down many of the barriers, stereotypes, and prejudices that for nearly 200 years relegated women to second-class citizenship. The enactment of numerous civil rights laws—particularly in education and employment—led to the elimination of many archaic laws and policies that had effectively barred women from numerous occupations and professions or denied them the right to own or use property, to obtain credit, and otherwise enjoy economic rights. As a consequence of the struggles of the past two decades, increasing numbers of women have made inroads into facets of American life from which they were previously excluded.

But beneath the surface and despite this demonstrable progress, denial of opportunities and rights on the basis of gender persists. Women still bear the burden and stigma of a kind of second-class citizenship. Measured by any standard, sex discrimination is still with us. It continues to strangle the hopes and aspirations of young women, condemn older women to lives of poverty and fear, and hold millions

in stagnant, dead end jobs with bleak economic futures.

It has been some 20 years since the passage of the Equal Pay Act and title VII of the Civil Rights Act of 1964—the two laws intended to eliminate employment discrimination against women. Yet the earnings gap between men and women has not declined but, in fact, has widened. In the 1950's, full time female workers earned 64 percent of what similarly situated male employees earned; today they are down to 59 cents on the average.

Despite State and Federal equal pay laws prohibiting unequal treatment, wage discrimination against female workers exists today in every profession, occupation, or field of employment and at every level of experience. It persists in male-dominated fields. It persists in female-dominated fields. It persists in the new occupational fields that have not yet become sexually stereotyped. For example, female engineers earn only 86 percent of the salary of male engineers; female college professors and lawyers receive only 71 percent of what their male counterparts earn. Although 60 percent of the retail sales clerks are female, they earn only 67 percent of what male clerks earn. Average starting salaries for female Harvard MBA's are reported to be $2,000 less than those paid to male MBA's. Entry level male college lecturers average $13,577; females, $11,870. Sex-bias in wages has even appeared in the computer field. In 1981, the median weekly pay for female computer operators was $355; for males, $488.

Moreover, for every woman who has moved into a higher paying, male-dominated occupational field, thousands have remained behind, locked in female job ghettos where the services performed are undervalued, wages kept low, and the opportunities are limited. The salaries paid in occupations and professional fields dominated by female workers are universally lower than their education, skills, responsibilities—and working conditions—warrant. This lack of comparable pay for work of comparable worth is a major factor depressing the wages of women generally.

ECONOMIC CONSEQUENCES

The combined effects of unequal pay for equal work, unequal pay for work of comparable worth, and occupational segregation have been devastating for women.

Our Nation has been increasingly experiencing what is graphically described as the feminization of poverty. Two of every three poor adults today are women. The number of poor families headed by women increased by one-third between 1969 and 1978, rising from 1.8 to 2.7 million; the number of male-headed families in poverty dropped from 3.2 million to 2.6 million during that same time.

For many men, poverty comes as a consequence of joblessness and the way out of poverty is through employment. But many of the women living in poverty already have jobs and are working full time—their jobs just do not pay a living wage. Almost 40 percent of the fully employed women earn less than $10,000. The 1982 poverty level for a four-person family was $9,860. The poverty rate for families headed by a full-time working woman is more than double that for households headed by full time working men.

Poverty endures for many of these women long after their families have grown. A lifetime of lower earnings and limited career opportunities results in substantially lower benefits from social security and other pension programs. Presently, 72 percent of older persons living in poverty are women.

Minority women face the double burden of race as well as sex discrimination. While the average ratio of male-to-female wages is 59 percent, that ratio is 54 percent for black women and 49 percent for Hispanic women. More than half of the black and Hispanic families headed by a female live in poverty. Older minority women constitute the poorest of the poor; 82 percent of older black women live at or near poverty. And the unemployment rates among young black women are the highest of any category of workers.

Wage discrimination against women has serious consequences for the welfare of America's children. It is estimated that one-third to one-half of the children born during the 1970's will live for some significant period of time in a female-headed household—more than one-third of which now live in poverty. Unless we find ways to break down the barriers which continue to deny women workers access to jobs with adequate salaries and advancement potential, many children will also face a high risk of poverty and its consequences.

DISPELLING THE SECONDARY WAGE-EARNER MYTH
